This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

THE HISTORY of the origin and progress of a book is said to be more interesting to its author than to the general reader. However this axiom may hold good in most cases, mine would seem to be an exception, and to call upon me to explain why so large a volume upon American Literature should have been compiled by a foreigner; to state the circumstances in which it originated; to point out the objects I had in view; and to define the plan upon which it has been executed.

After having devoted some years to the active duties of an American Literary Agent, I found myself, in 1854, in possession of a mass of materials relating to American Literary History, sufficient as I then thought to warrant my throwing them into a definite form. The attempt was a novel one, and it proved eminently successful. Thus encouraged, I continued my researches and extended my plan; and now, after four years' assiduous application, submit the result, trusting that it will be welcomed as affording a tolerably full and impartial survey of American literary enterprise during the first half of the nineteenth century.

My object in attempting an American Bibliographical Guide has been twofold; on the one hand, to suggest the necessity of a more perfect work of its kind by an American, surrounded as he necessarily would be with the needful appliances; and, on the other, to supply to Europeans a guide to Anglo-American literature, a branch which by its rapid rise and increasing importance, begins to force itself more and more on our attention.

It is admitted on all hands that such a work is a desideratum; at the same time, nobody can be more alive to the disadvantages under which a foreigner must labour in attempting it than I have been. I have broken the ice; let us hope that the very deficiencies of my work will summon some competent American bibliographer into the field, who from his vantage-ground may find both time and inclination to amend my errors and supply my deficiencies.

A guide to American bibliography is, as just stated, a desideratum, called for by one of the daily increasing requirements of the age, for bibliography, so to speak, is to the literary student what the lighthouse is to the mariner, without which he would be constantly in danger of hidden rocks and shipwreck, of disappointment and waste of energies, travelling fruitlessly perhaps over ground previously

eminently preoccupied. Without catalogues literature itself would be like some huge pawnbroker's warehouse without a key to its contents, full of all that is costly and valuable, yet choked up by the rubbish which surrounds it, — that which is useful and valuable buried and lost to ready use, instead of being rendered at all times easy of access by means of system and arrangement. Literature is the store-house of the mind of the great human family, and of the past as well as of the present. That which has come down to us from age to age, with all its accumulations of modern science, will go down to posterity, and from it the then student of history,—the future Macaulay, if you will, will have to select his materials; and often, as the noble historian himself has done, find the most valuable to consist of works which in the eyes of contemporaries were deemed unworthy of notice, and contemptuously consigned to oblivion. To rescue these is the office of contemporaneous bibliography. How many records of the past are lost to us, because in ages gone by bibliography was not cultivated! How many important events in our history are only known to us from some rare single-leaf, a broad-side or proclamation, a cancelled leaf in an old chronicle, or a private and confidential warning, issued stealthily in the "mysterious column" of a newspaper!

But American bibliography is almost untrodden ground; and yet, how are we to give to the great Republic of North America her proper place amongst the intellectual nations of the earth without a knowledge of her literature? She has, herself, risen with giant strength, and taken her position by the side of the most renowned countries of the world in all that concerns self-government, commerce, and the arts, which conduce to the civilization and happiness of the great family of mankind; but she has disregarded the importance of an authentic record of her literary progress, and allowed the productions of her rising intellect and matured knowledge to be confounded with those of the great Anglo-Saxon family from which she sprang. Brunet, Ebert, and Lowndes, imperfect as they must necessarily be, yet furnish the student with sufficient data to enable him to form an estimate of the present literature of Europe, and the past. To supplement what they have done, as far as the literature of North America is concerned, has been my principal object, and therefore, in enumerating the publications of America, I have purposely omitted all reprints of European productions, unless they have been enriched with notes and additions, or otherwise ingrafted into her literature.

Such then was the origin of my work, and such are the objects I proposed to myself in undertaking it. It remains now for me to state upon what plan and by what aids I have been enabled to accomplish the task I had set myself to do. It may be asked, why the volume

confines its researches to no more than the last forty years, and why it would ignore all that had previously been accomplished by American writers? It was necessary to draw a line, and the literature of a colony may be said to belong to that of the parent state. After the declaration of independence in 1776, the national enterprise found many other fields than literature for its development, and though there are most honoured names which make the exception, it was not till about the year 1820 that America, herself, may be said to have possessed a national literature. Added to this, the scantiness of materials would have made it not only difficult but unsafe to have ventured beyond the limits prescribed to myself. This earlier literature is more properly within the province of a native American bibliographer, who, having ready access to public and private collections, will not meet with the difficulties which would beset a foreigner on all sides. Let us hope that my labour may lead to so desirable a result; though in embracing a period of forty years within the limits of my plan, it is but reasonable to suppose that any work of sufficient merit, which may have appeared prior to the year 1817, has been deemed worthy of being reprinted, in which case it will be found enumerated in the following pages, and even where such has not been the case, it will be seen that I have inserted many, particularly such as the Memoirs and Transactions of Scientific bodies, in the lists to which they properly belong.

The best evidence I can bring forward as to the principles which have guided me in the selection made, is to be found in the table of contents. To that the reader is referred, and by it he will see that I have endeavoured to render as complete as possible all classes of literature which have a permanent claim upon his notice. I refer more particularly to the analytical table of contents of works by scientific bodies, such as the Memoirs, Transactions, and Proceedings of learned societies, also to careful and accurate collations of many important works, and to the classes of *Natural History*, *Comparative Philology*, and *American Archæology, Indians, and Languages*, in all of which much information will be found, which is nowhere else to be met with. It has also been a part of my plan to place on record the linguistic labours of American missionaries in all parts of the globe, and to enumerate in their proper places the productions of their presses. Since the completion of my volume I have collected upwards of 200 additional titles of such publications in Armenian, Burmese, Chinese, Karen, Siamese, Syriac, Tamul, Turkish, and in the aboriginal languages of African tribes and of American Indians. These, should the opportunity arise, will be communicated to the reader upon some future occasion.

In a work of general reference, like the present, one of two methods must necessarily be adopted; it must either be subdivided into classes, or be alphabetically arranged throughout. I am not about to raise the vexed question of the impossibility of forming a strictly philosophical classification of the productions of the mind; nor am I going to defend the arbitrary classes which I have adopted, in compliance with the wishes of many competent judges, who valued the practical utility of the work more than its extreme bibliographical accuracy. These claim the reader's indulgence, as all other imperfect productions of mankind must ever do; and the more so, as a full and general alphabetical index has been added, by which a facile reference can readily be made to any work sought, if it is not found in the class first referred to. In the course of the work some little inaccuracies as to Christian names have occasionally crept in, from indistinctness of the hand-writing of the copyists, or from errors in the printed catalogues from which the titles were copied. As far as possible these have been rectified in the general index, which, in all cases of doubt, should be the authority followed.

In the section devoted to Biography I have followed the American custom of placing the work under the name of the subject of each biography. In the index it will be found both under that head and under the author's name, if known. Like its predecessor of 1854, the present volume also presents the reader with two separate divisions, headed Spiritualism and Mormonism. I make no apology for having excluded these publications from the classes of Philosophy and Theology. In common with many literary friends, I felt reluctant that the records of these mental aberrations should be placed side by side with the productions of higher intellectual powers.

The Introduction will need but a few words of explanation, and its value must depend upon the accuracy with which it is executed. It is an attempt to do for North American literature what has long since been done for that of Europe; to furnish the materials for a more comprehensive history of the development of the intellectual powers of a great and powerful people. In the first section, *Bibliographical Prolegomena*, I have derived much assistance from the labours of my late friend Dr. Ludewig. The second section, *Contributions towards a History of American Literature*, has been furnished by Benjamin Moran, Esq., Assistant Secretary to the American Legation, and though brief, it is full of valuable information, the fruits of much and original research. The third section, *Public Libraries of the United States*, is by Edward Edwards, Esq., one of the most successful and indefatigable labourers in the field of literary history. To both these gentlemen my thanks are pre-eminently due, and I cannot take leave of my subject without also discharging a debt of gratitude to those kind

friends who have cheered and encouraged me, and assisted me in my labours during its gradual progress towards completion. To Professor Turner, of Washington, Henry Carey Baird, Esq., and Charles B. Trego, Esq., of Philadelphia, S. Hastings Grant, Esq., of the Mercantile Library, New York, and Joel Munsell, Esq., of Albany, my thanks are more particularly due for very much that is valuable in the ensuing pages.

London, 1*st January*,1859. NICOLAS TRÜBNER.

POSTSCRIPT.—THE following books, received since the printing of the Bibliographical Prolegomena, demand a brief notice in this place.

1. A Catalogue of Books on Freemasonry and kindred subjects. By William Gowans; 12mo, pp. 60. New York. William Gowans, 1858.

This neatly got up volume is dedicated to the memory of the late Hermann Ludewig, Esq., and is an enlarged edition, the fourth, of that mentioned at page XXXIII. of the Prolegomena. Mr. Gowans states in the Preface, that he commenced its compilation in 1840, but he must pardon the remark that a bookseller of his intelligence, after 18 years of "unwearied application and research," to use his own words, might have produced a better book, had he availed himself of the many opportunities which must have presented themselves to him during that period. It is a list of books which may simply have passed through Mr. Gowans' hands, or which possibly he may still possess. Such a work has no claims to be considered a bibliographical authority upon the subject. The most ordinary means for making it such would seem to have been disregarded. The titles are imperfectly given, in the case of foreign works, so erroneously, as to make it worse than useless, and even English original editions, and American reprints of them, are not distinguished. To enable the reader to judge of the extent of Mr. Gowans' "researches," it may be stated that his list, professing to be a general one of Masonic books of various nations, does not exceed 550 articles, whilst the Catalogue of American books on Freemasonry alone, compiled by Mr. B. Barthelmes, and printed at New York, in 1856, enumerates about 450 original articles. Mr. Gowans mentions this book at page 10 of his Catalogue, but surely he can never have consulted it in the compilation of his own.

2. THE LIBRARIAN'S MANUAL, a Treatise on Bibliography, comprising a select and descriptive list of Bibliographical Works; to which are added Sketches of Public Libraries. Illustrated with engravings. By Reuben A. Guild, A. M. 4to, pp. 304 (16 wood-

cuts), limited to 500 copies, with 10 copies on large paper. New York, 1858.

This work is already mentioned at page XXIV. of the Prolegomena, from the Prospectus issued previous to its publication, but the article from the London Quarterly Review on Libraries and Catalogues is omitted. It consists of two parts, the first comprising a descriptive list of 495 Bibliographical books; and the second containing Historical sketches of fourteen Public Libraries in America and Europe. The work fully redeems its promise.

3. *A Descriptive Catalogue of those Maps, Charts, and Surveys relating to America*, which are mentioned in vol. III. of Hakluyt's great work, by J. G. Kohl. 8vo, pp. 86. Washington, 1857.

Mr. Kohl, the celebrated traveller, is now at Washington, employed in carrying his "General Catalogue of American Maps and Charts" through the press. The descriptive catalogue of the Hakluyt Maps is but a forerunner to this great work.

As kindred with Mr. Kohl's great work, it may not be out of place to notice

4. MAPOTECA COLOMBIANA. Catálogo de todos los Mapas, Planos, Vistas, etc., relativos a la America—Española, Brasil, e islas adyacentes. Por el Dr. *Ezequiel Uricoechea*,

which I have now in press, in one volume octavo.

In conclusion, I would call attention to an important work now in the press, by Mr. Paul Troemel, under the title of

5. *Bibliothèque Americaine*, ou Catalogue raisonné d'une precieuse Collection de livres relatifs à l'Amerique, qui ont paru depuis sa découverte jusqu'à l'an 1700.

This is a bibliographical account of an important collection of books relating to America, originally made by Fr. Müller, of Amsterdam, and now in the possession of F. A. Brockhaus, of Leipzig. Amongst the 556 articles of which the collection consists, at least one hundred are not mentioned by any bibliographer. Indeed, only about 150 of them are found in Ternaux and Rich, which of itself is ample testimony of the importance, and must secure to the publication more than an ordinary interest in the eyes of bibliographers and literary men. At the same time that it supplements the catalogues of Ternaux, Rich, and Asher, an examination of the few sheets already printed off enables me to state that it promises to surpass its predecessors by its extreme accuracy of description and the value of its notes, which exhibit considerable knowledge of the subject.

6. Mr. Buckingham Smith informs me that Señor Gonzales de la Vega of Madrid has a work, in 2 vols., in the press, on Spanish authors who have written on the subject of New Spain.

INTRODUCTION.

BIBLIOGRAPHICAL PROLEGOMENA.

THE LITERATURE of a People takes its impress from their peculiar habits of thought, or it would not be national, but universal. In no case is this more evident than in that of England, in all classes of which there is the unmistakable practical Anglo-Saxon sense as its chief characteristic. If we wish to understand these habits of thought of any nation, we must study carefully the gradual forms in which they have been developed, beginning with their beginning, and tracing them down to our own times. The coronation oath, which Dunstan prepared for the Anglo-Saxon king, is still, but slightly altered, the coronation oath of the sovereigns of England; and in casting the eye over the six volumes of Anglo-Saxon Charters, collected by the late Mr. J. M. Kemble, one is forced to admit, that, allowing for altered circumstances, the Anglo-Saxon mind of the tenth century bears a strong affinity to that of the Englishman of the nineteenth.

If this be so with regard to English Literature, how much more necessary is the knowledge of the sources which have served to form the habits of thought of the people of the United States of America, who, in little more than half-a-century, have not only become our rivals, but our equals in literary composition, and in all the developments of science, in which vigour of mind and a careful training of the intellect are the great and essential qualifications, if we would form a just estimate of Anglo-American Literature.

This consideration has induced me to collect together a list of the scattered materials which serve to illustrate, not only the Literary History of the United States, but likewise that of the entire Continent of America, including also, to the best of my ability, a full and correct list of all Books relating to America. Indeed, for the reason stated above, Anglo-American Bibliography must embrace both books more properly appertaining to the Literature of the United States, and books relating to any part of the great continent of which those States form so prominent a section.

It may be said that both these departments of Bibliography have already received considerable attention, and that there has been no lack of research in the compilers; yet it will be acknowledged that the compilations themselves have almost all grown out of the wants of the public or private collections, which have called them into being, and lay no claims to completeness, having been

the inspection of Mr Stevens, and all reasonable facilities and assistance be afforded him in his work.

(2) That the name of each subscriber be indicated under the title of every book which he contributes, so that when the work is completed, it will show not only the treasures, but also the deficiencies in this department of the library of each subscriber, and enable him by marginal marks against the titles of books which he may subsequently procure, to preserve a perpetual record of his collection and of its deficiencies.

(3) That each subscriber be entitled to contribute not only the title of every book of this class which he may possess at the time of subscribing, but also of all other books of this class, which he may procure for his own library previously to January, 1850, or before the work shall go to the press.

(4) That the sum subscribed by each be in proportion to the number of titles contributed, or be such as Mr. Stevens may accept.

(5) That this sum be paid to Mr. Stevens on the acceptance of the manuscript for publication by the Smithsonian Institution.

(6) That each subscriber be entitled to receive from the Smithsonian Institution, ten copies of the work, for every 500 dollars (or £100) subscribed, and in the same proportion for a larger or smaller subscription.

4. Inasmuch as the library of the British Museum contains a larger number of this class of books than any other library in the world, and at the same time affords extraordinary facilities for bibliographical research, it is proposed to commence the work there. All the titles which this library can furnish will be written out upon cards, made for the purpose, measuring about eight inches by six. When these have been carefully revised and copied, they will, if it be desired, be sent in small parcels to each of the subscribers for their inspection and remarks. When the work is completed, so far as the library of the British Museum can furnish the materials, Mr. Stevens will himself visit each of the other libraries for which he shall have received subscriptions, comparing and revising the titles, and adding such other books as he may find, which had not been previously described.

5. It is hoped that sufficient force can be advantageously employed upon the work, to prepare it for the press in eighteen months.

PUBLICATION OF THE WORK.

When the manuscript of the work shall have been completed, according to the plan detailed above, it is to be delivered to the Secretary of the Smithsonian Institution, at Washington, who will, in accordance with the Rules of the Institution as published in the *Programme of Organization*, of Dec. 8, 1847, submit it to a commission of competent judges. If this commission report favourably as to the faithful execution of the work, it is to be published and distributed at the sole expense of the Smithsonian Institution, constituting one or more volumes of the quarto series of SMITHSONIAN CONTRIBUTIONS TO KNOWLEDGE, similar in form and style of execution to the first volume, about to be published. It will be uniform with the quarto edition of the UNITED STATES EXPLORING EXPEDITION.

(Copy.)

BOSTON, July 7, 1848.

Gentlemen,—I beg leave to offer for your consideration the enclosed plan of a BIBLIOGRAPHIA AMERICANA, and to solicit for the enterprise the patronage and encouragement of the Smithsonian Institution.

I have the honour to be, Gentlemen, your obedient and humble Servant,

(Signed,) HENRY STEVENS.

Prof. Joseph Henry, Secretary of the Smithsonian Institution.
Prof. Charles C. Jewett, Librarian of the Smithsonian Institution.

(Copy.)

We highly approve of the foregoing plan of the BIBLIOGRAPHIA AMERICANA,

submitted to us by Henry Stevens, Esq., accompanying his note of July 7, 1848, and certify that the work will be accepted for publication in the SMITHSONIAN CONTRIBUTIONS TO KNOWLEDGE, provided the execution is found satisfactory to a commission of competent judges, appointed by the Institution for its examination.

(Signed,) JOSEPH HENRY,
CHARLES C. JEWETT.

Smithsonian Institution, Washington, July 17, 1848.

Address, Henry Stevens, care of N. D. Hubbard, Esq., No. 4, Court Street, Boston, or care of Thomas Watts, Esq., British Museum, London.

If Mr. Stevens would add to his alphabetical arrangement of the title-pages, always the most facile mode of reference, a chronological table at the end of the volume, it would be a great advantage, owing to the number of books on America, published either anonymously, or under assumed names, the true authors of which cannot now be ascertained. Take for example, notwithstanding the great pains bestowed upon the catalogue of the British Museum to obviate all the defects of a mere alphabetical arrangement, by references and cross-references almost innumerable, the copy of the original Dutch edition of the Hudson, of 1612, by Hassel Gerritsz, as it appears in that catalogue, where it is placed under *Samoyëden*, correctly according to M. Barbier's bibliographical canon regarding anonymous publications; but where scarcely any one but a bibliographer would think of looking for it. A mere scholar unacquainted with bibliography and its rules, would probably search for it under one of the following heads: Gerritsz (Hassel), Hassel-Gerritsz, Hudson, Quir, or, as the Museum Catalogue also places books under the patrician prefix to a name, under *De* Quir, or Massa; but the cataloguer was evidently not acquainted with the book, and entered it as if the author were unknown. Had Mr. Stevens' object been simply to prepare a book for the student of literary history, he would probably have suggested, himself, a chronological arrangement of his materials, with an alphabetical index; but being intended for more general use, and the alphabetical plan adopted, every objection to that would be met by the addition of a chronological table, with references to the full titles as given in the alphabetical body of the work. Both M. Ternaux and Mr. Rich adopted a chronological arrangement in preference to an alphabetical catalogue. Both plans have their advocates, according to the uses to which each wishes to apply the work; but the double facility of reference, alphabetical and chronological, would be a boon to literature, which would repay any extra amount of labour and expense it would entail. I have been tempted to make this suggestion from having seen the complete MS. of Dr. G. Asher's Essay on the Dutch Books relating to the New Netherlands, in which, out of 320 title-pages, only about forty contain the authors' names, and from the "Bibliotheque Americaine" of Henri Ternaux, exhibiting entire pages of anonymous publications.

Mr. Stevens' work, according to the above plan, was long since to have appeared. It is therefore clear that, to complete it in a satisfactory manner, even the nine years which have elapsed since the prospectus was issued, have been found inadequate for its production. In the mean time, others have entered the field in legitimate competition. Amongst these, Dr. G. Asher has furnished us with part of his Essay on the Dutch Books, relating to the New

Netherlands, which will be found in its place at page xx. No doubt the labour of collecting the materials, collating and comparing the texts of various editions of early voyages and travels, of separating that which appertains to American History from more general matter, and of sifting the archives and muniments of Spain and Portugal, of England and Holland, and of Italy and France, which, for the most part, are still all but untrodden ground to the American antiquary, is considerably beyond the physical powers of a single individual. To be well and efficiently done, Mr. Stevens' Bibliographia Americana requires a competent staff, and if he would only confine himself to its superintendence, by a proper subdivision of labour, a great portion of which is all but mechanical, we might hope to see it accomplished within a reasonable time.

MDCXXIX.

EPITOME DE LA BIBLIOTECA ORIENTAL I OCCIDENTAL, Nautica i Geografica. Al excelentiss. Señor D. Ramiro Nuñez Perez Felipe de Guzman, Señor de la casa de Guzman, Duque de Medina, etc., etc., por el Licenciado ANTONIO DE LEON. Con Privilegio. En Madrid, por Juan Gonzalez, año de 1629. 4to, 47 and 186 pp. and then xii. pp.

Antonio de Leon, afterwards de Leon-Pinelo, was a member of the Council of the Indies. His duties led him to investigate the state of literature in the Spanish possessions, in the tropical regions of both hemispheres, and he prepared an elaborate work on the subject. During its progress, by desire of his superiors, he drew up this abstract of the materials he had collected, which he divided into four sections, as indicated on the title-page. The second of these, the "Biblioteca Occidental," pp. 61—136, contains the titles of books relating to America. In the Appendix, at the end of the volume, at pp. vi. vii., he added a further list from the "Bibliotheca Historica," of Bolduanus, which did not reach him in time to enable him to insert these additions in their proper places. Prefixed, as was usual at the period, are a number of commendatory poems, addressed to the author, and also a "Discorso apologetico,' consisting of eight pages, by his brother, Juan Rodriguez de Leon. The work itself consists of a useful catalogue of authors, arranged alphabetically, in 33 pages, followed by an alphabetical list of books published anonymously, and by a table of 18 pages. The latter is entitled: "Tabla Declaratoria de las lenguas en que escrivieron los autores que se hallan en este Epitome, i Provincias donde se hablan," and is chiefly valuable as regards the languages of South and Central America. The preface gives the outline of the author's plan, and the history of his labours, and in it he also advocates that, instead of America, the New World should be called Iberica. This edition of the Epitome is a book of great rarity, and the above account of it is by Dr. H. E. Ludewig, who had access to the copy in Congress Library at Washington.

MDCCXIV.

BIBLIOTHECÆ AMERICANÆ PRIMORDIA: An Attempt towards laying the Foundations of an American Library, in several Books, Papers, and Writings, humbly given to the Society for Propagation of the Gospel in Foreign Parts, For the Perpetual Use and Benefit of their Members, their Missionaries, Friends, Correspondents, and Others concerned in the Good Design of Planting

and Promoting Christianity within Her Majesty's Colonies and Plantations in the West Indies. By a member of the said Society. London: printed for S. Churchill, at the Black Swan in Pater Noster Row, 1713. 4to, 3 leav. xvi. and 275 pp. 112 leav. of Table. (By BISHOP WHITE KENNET, enlarged by the REV. THOMAS WATTS.)

The title appears to have been printed off before the completion of the book, which contains, at p. 274, the titles of books published in 1714, and the Advertisement at the commencement of the volume bears the date 1 Nov., 1714, which fixes the period of its publication. Bishop White Kennet, when Dean of Peterborough, was an active member of the Society for the Propagation of the Gospel in Foreign Parts, and wrote its history, published in quarto, in 1706. In 1713 he presented his collection of books, relating to America and Her Majesty's other Colonial Possessions, to the Society, and the letter of donation, bearing date the 1st of Oct. in that year, is given by way of introduction to the catalogue, which was printed by order of the Society, under the editorial care of the Rev. Thomas Watts. At the donor's suggestion, Mr. Watts added an accurate and elaborate table, consisting of 112 leaves, and it was the compilation of this table that retarded the publication of the work till 1714. The whole is arranged in chronological order; the discoveries under their proper dates, and the books and editions under their respective periods of publication. The titles are given at length in most cases, the places of publication always mentioned, and the names of the publishers sometimes indicated. The number of pages and sheets, and the size, are all carefully noted. Mr. Watts's index enhances the great utility of this valuable work, which, according to Dr. Dibdin, was reprinted in 1791. M. Raffinesque states that similar publications appeared in 1701 and in 1709. Dr. Ludewig, however, doubts the accuracy of either of these statements.

MDCCXXXVII.

EPITOME DE LA BIBLIOTECA ORIENTAL Y OCCIDENTAL, nautica y geografica de DON ANTONIO de LEON-PINELO, del Consejo de S. M. en la casa de la contratacion de Sevilla y Coronista mayor de las Indias. Añadido y enmendado nuevamente, en que se contienen los Escritores de las Indias orientales y occidentales y Reinos convecinos, China, Tartaria, Japon, Persia, Armenia, Etiopia y otras partes. Al Rey, nuestro Señor. Por mano del Marques de Torrenueva, su Secretario de despacho universal de Hacienda, Indias, i Marina. Con privilegio. En Madrid en la oficina de Francisco Martinez Abad, en la calle del olivo baxo. Año de 1737, 1738, 3 vols. folio.

This second and greatly enlarged edition of Leon's Epitome was intended by Barcia to accompany his edition of Herrera, commenced in 1726; but the materials having greatly accumulated under his hand, he issued it as a separate book. The pages, columns, or sheets, as the case may be, are numbered, and the numerals, either Roman or Arabic, run through all three volumes consecutively. The editor has added two dedications, one to Philip V., and the other to the Marques de Torrenueva, both bearing date 19 Dec., 1737; a "proemio de esta segunda edicion," well worthy of attention; separate title-pages to each volume; several tables, one of anonymous writings, and two of authors, both under Christian and Surnames; and lists of errata to each

volume. Besides these, each volume is accompanied by an appendix containing Barcia's own additions. Vol. I., published in 1737, contains the Biblioteca Oriental; Vol. II., in 1738, the Biblioteca Occidental y Nautica; and Vol. III., of the same date, the Biblioteca Geografica. The title of the second volume, which embraces the works on America, runs thus:

Biblioteca Oriental, Occidental, Nautica y Geografica de Don Antonio de Leon Pinelo, del Consejo de S. M. en la casa de la contratacion de Sevilla y Coronista mayor de las Indias. Añadido y enmendado nuevamente en que se contienen *los escritores de las Indias occidentales, especialmente del Peru, Nueva-España, la Florida el Dorado, Tierra firma, Paraguay, el Brasil, y Viajes a ellas, y los autores de navegacion y sus materias y sus apendices.* Al Rey nuestro Señor, por mano de el Marques de Torre-nueva. Tomo Segundo. Con privilegio. En Madrid en la oficina de Francisco Martinez Abad, en la calle del olivo baxo, año de 1738.

The "Biblioteca Occidental" occupies columns 516—912, and is divided into 27 chapters. The Appendix (Appendice II. de algunas cosas que se han omitido y se han enmendas y añadir en el Epitome de la biblioteca occidental) follows, pp. 913—932. The "Tabla declaratoria" occupies nearly nine pages of the first volume, though referring to the second.

Barcia, as we learn from the Bibliotheca Nova Americana of Mr. Rich, p. 55, No. 7, was in possession of an extensive collection of books and manuscripts relating to America, which were dispersed after his death. From these and other sources he enriched this edition of Leon's Biblioteca; and as it would be next to impossible now to trace these down to our day, owing to the Napoleonic and the more recent civil wars having caused so many of them to be scattered or destroyed, his additions, though not always marked by minute bibliographical accuracy, are most valuable. Indeed, the most competent judges do not fail to regard Barcia as high authority respecting manuscript sources of information.

MDCCLXXXIX.

Bibliotheca Americana, or, a Chronological Catalogue of the most curious and interesting books, pamphlets, and state papers, &c., upon the subject of North and South America, from the earliest period to the present, in print and in manuscript, for which research has been made in the British Museum, and the most celebrated public and private libraries, reviews, catalogues, &c.; with an introductory discourse on the present state of literature in those countries. London, printed for J. Debrett, opposite Burlington House, Piccadilly; J. Sewell, Cornhill; R. Baldwin and J. Bew, Paternoster Row, and E. Harlowe, St. James's Street, 1789. 4to, 2 leaves, and 271 pp. (By J. Debrett.)

Debrett tells us in his prefatory remarks, dated March, 1789, that an American, who had intended writing the history of his own country, applied to him to assist him with materials for his work, knowing that he had devoted some attention to the subject, and this led to his compiling the present catalogue. He disclaims all merit beyond producing a book which, for want of a better, might prove useful; and his work makes no pretension to bibliographical accuracy. It, however, enables us to supply many omissions in Barcia, and to correct some inaccuracies in his descriptions of printed books. The prefatory remarks occupy pp. 1—3; the introductory discourse, pp. 5—21; extracts

from the first volume of Cullen's Translation of Clavigero, containing some literary notices, and also extracts from the Catalogues of Printed Books and Manuscripts in the British Museum, pp. 23—46; a chronological list of literary productions to the year 1788, pp. 47—219 (compiled from Bishop Kennet's Primordia, Robertson's History, and the advertisements of the Monthly Review); a catalogue of some European and Creole authors, who have written on the doctrines of Christianity and morality in the languages of New Spain, with a list of dictionaries and grammars, extracted from Clavigero, pp. 221—227; a catalogue of American State-Papers (from Jefferson's Virginia), pp. 229—262; and the table, pp. 263—267. Dalrymple, no mean authority, made use of Debrett in the compilation of the following catalogue:—

MDCCCVII.

CATALOGUE OF AUTHORS, who have written on Rio de la Plata, Paraguay, and Chaco; collected by A(LEXANDER) DALRYMPLE. London, printed by Ballantine and Law, and sold by T. Wingrave. 4to, 22 pp.

The catalogue occupies 16 pp., and is formed from Leon-Pinelo's Epitome, with Barcia's additions; beyond which there are other materials collected from Muratori, from Debrett's Bibliotheca Americana, and from the Library of the British Museum. The books are arranged in chronological order, from 1534 to 1806. The two supplements, pp. 17—20, and pp. 21, 22, bear respectively the dates of London, July 30, 1807, and London, January 6, 1808. The titles are not given at length, but are abridged and sufficiently accurate for general purposes.

MDCCCXVI.

BIBLIOTHECA HISPANO-AMERICANA SEPTENTRIONAL: || Catálogo y Noticia De Los Literatos || Que ó Nacidos ó Educados ó Florecientes En La || America Septentrional Española, Han Dado A Luz || Algun Escrito, O Lo Han Dexado Preparado Para || La Prensa. || La Escribia || El Doctor D. JOSE MARIANO BERISTAIN DE SOUZA, || Del Claustro De Las Universidades De Valencia Y Va-Lladolid, || Caballero De La Orden Española De Carlos III. y Comendador De || La Real Americana De Isabel La Catolica, Y Dean De La || Metropolitana De Mexico. [*The figure of Gemini*] || En Mexico: || ——o—— || Calle De Santo Domingo Y Esquina De Tacuba Año De 1816.

Then follows the Dedication, two pp. commencing:—A Fernando Septimo, || Rey Catolico || De España Y De Las Indias. Pp. i.—xviii. Discurso Apologetico || De La Liberalidad Del Gobierno Español En Sus Americas, || Que Serve De Prologo || A La Biblioteca Hispano-Americana Septentrional. Page xviii. *closes with:* Resumen De Los Escritores || que comprende la biblioteca Hispano-Americana Septentrional:—Anonimos, 470; || Obispos, 242; || Clerigos seculares, 658; || Religiosos Dominicos, 259; || Franciscanos:—Observantes, 474, || Descalzos, 068; || Agustinos, 124; || Carmelitas Descalzos, 071; || Mercedarios Calzados, 080; || Jesuitas, 375; || Hospitalorios de S. Juan de Dios, 005; || Belemitas, 005; || Hipolitos, 005; Capuchinos, 006; || Mugeres, 016; || Seglares, 829; || Total, 3687. *Then come four pages:* Censura Del M. R. P. Mtro. Y Dr. Fr. Manuel Mercadillo; Censura Del Sr. Dr. D. Matias Monteagudo; Declamen Del Sr. D. Felipe Martinez de Aragon; and the *imprimatur, signed by* Sr. D. Juan Ruiz de Apodaca, Virey De Esta Nueva

España: (*and by*) Sr. Don Pedro Jose De Fonte, Arzobispo de está Metrópoli, Oct. 20, Nov. 30, 1816. Mexico.

The text follows, pp. 1—540, *beginning:* Abad (P. Diego José), *and ending with:* Funes (D. Geronimo) *and F. V.* Fin Del Tomo I°.—O. S. C. S. M. E. C. A. R. *There is also a fly-title, running thus:* Bibliotheca || Hispano-Americana || Septemtrional. (sic) || Tomo I°. || Que Contiene Las Letras || A. B. C. D. E. F.

Fly-title to Vol. II.—Bibliotheca || Hispano-Americana || Septentrional. || Tome II°. || Que Contiene Las Letras || G. H. I. J. K. L. M. || N. O. P. Q. R. || *On the reverse:* Nota. || El Editor de la presente Obra que lo es desde || el pliego quarenta y Siete del primer Tomo, no || ha hecho otrá cosa ni hará, que procurar la fiel || Correspondencia en un todo, de lo impreso con || lo manuscrito; de suerte, que el Publico tendrá || la Obra, tal qual su Autor la escribio.||

From this notice it is seen that the author died before the publication of the second volume. His manuscript was, however, placed in the hands of his nephew, whose name appears on the general title as editor.

The title to the second volume accords with that of the first, to the word Mexico, *after which is added:* y La Publica || Don Jose Rafael Enriquez Trespalacios Beristain, || Sobrino del Autor. [*The figure of Gemini.*] En Mexico: || Oficina De D. Alexandro Valdés, Calle De Santo Domingo, Año De 1819.

The text follows, pp. 1—525, *beginning:* Gabaldá (Fr. José), *and ending with:* Quiros y Camposagrado (D. Manuel), *after which:* Fin Del Tomo II°.—O. S. C. S. M. E. C. A. R.

Fly-title to Vol. III. Bibliotheca || Hispano-Americana || Septentrionalis. || Tomo III°. || que Contiene Las Letras || R. S. T. V. U. X. Y. Z.

The title to the third volume varies from that of the second only in the date being 1821, *instead of* 1819. *The text follows,* pp. 1—366, *beginning:* Rabago (D. Andrés Diez), *and ending with:* Zurricaldai (D. Santiago), *after which:* Fin De La Obra.

As a specimen of the author's style and method of treating the subject, the following articles may be acceptable to the reader, particularly as one of them relates to the compiler himself.

Acaxitli (D. Francisco) Indio Megicano, Cacique y Señor de Tlalmanalco. Escribió:

De la entrada del Virey, D. Antonio de Mendoza, en las tierras de los Chichimecas: Manuscrito que existe en el Archivo de la provincia de P. P. Franciscanos de la Provincia de Santo Evangelio de Mégico.

Accila (Mosen N.). Presbitero Aragones ó Valenciano, Doctor en Teologia, y residente en Megico a mediados del Siglo 17. Dió á luz un librito ascetico, intitulado: Tesoro de Devociones, etc., etc.

Beristain y Martin de Souza (Don José Mariano). Nacio en la ciudad de la Puebla de los Angeles, Provincia de Tlaxcala en la N. E. á 22 de Mayo de 1756 y vistió alli successivamente las Becas de los Colegios de S. Geronimo, de P. P. Jesuitas y de San Juan, llamado el Palafoxiano, Bachiller ya en Filosofia por la Universidad de Megico, pasó á España en la familia del Sr. Obispo de la Puebla, Fabian y Fuero, electó Arzobispo de Valencia, y en aquella escuela recibió el grado de Dr. Teologo, fue Regente de Academia de Filosofia,

e hizo oposicion a sus Catedras y Pavordias. En la Universidad mayor de Valladolid fue Catetratico en propriedad y Perpetuo de Teologia, nombrado por el Señor D. Carlos III. á Consulta de su supremo Consigo de Castilia. Despues de varias oposiciones á las Canongias de Oficio de las Catedrales de España entre ellas á la Magistral de Toledo ya Canonigo Lectoral de la de Victoria, regresó á la America, 1790. Con el empleo de Secretario del Reverendo Obispo de la Puebla Don Salvador Buenpica y con el objeto de hacer oposicion escolastica á la canongia Lectoral vacante en dicha Iglesia como lo executo. Pero no habiendo merecido á aquel cabildo que le consultase para ella, al dia siguiente al de la votacion salió para Vera Cruz, donde se embarcó para España, con el correo. En el Canal de Bahama padeció un terrible naufragio, despues del qual y de trabajos inumerables arribó á la Coruña á las once meses. El Rey le premio con una Canongia de la Metropolitana de Megico, y con la Cruz de la Real y Distinguida Orden Española de Carlos III. y volvió á su patria. En 1811 acendió á la Dignidad de Arcadiano, en 1813 á la de Dean de la misma Metropolitana. Desde 1780, la Real Sociedad Bascongada le expedió el Titulo de Socio Benemerito y en el de 1798, le concedió el de Leterato. La Academia de los Apolistas de Verona le nombro en 1780 su individuo reciproco: La Real Academia Geografico-Historica de los Caballeros de Valladolid le dió en 1782 el titulo de Academico Actual, la de las tres nobles artes de la misma ciudad el de Honorario y Conciliario; y la de S. Carlos de Valencia el de Academico de honor. En Valladolid fue uno de los fundadores de la Sociedad Economica de aquella provincia y su censor, y en la misma Capital fundó por si solo la Academia de Jovenes Ciruganos, declarandose la el titulo de Protector de ella hasta que el Rey la elevó á la clase de Real; y en Megico fue Secretario del Gobierno sede vacante el año de 1800 y Presidente de dicho Gobierno Arzobispal en la Vacante del año 1809. Superintende del Hospital General de S. Andres, Rector del Colegio de San Pedro, Preposito de la Real Congregacion de Oblatos, Juez Visitador del Real Colegio de San Ildefonso, Abad de la congregacion de S. Pedro, Presidente de la Junta Provincial de Consultacion de libros, comisionado por el superior Gobierno para negocios muy graves, y Visitador extraordinario del Arzobispado. Como esta es una noticia meramente historica, no la he creido agena de mi pluma la qual se ha empleado en escribir esta biblioteca.

This collation of Beristain's important work on all that appertains to the progress of Literature and Science in Mexico and the adjacent countries, subject at the date of its compilation to the crown of Spain, has been made by me from one of the few copies known to exist. Indeed the rarity of the work is such, that it may be said to be almost unknown in Europe; nor need this excite any wonder, when it is considered that in the revolutions which followed one another so rapidly in the Spanish provinces of America, immediately after the date of its publication, books in sheets may have served to supply the want of paper for cartridges, or have been consumed in the many conflagrations attendant upon civil war. As already stated, it consists of 3687 literary notices, both biographical and bibliographical, not always, it is true, critically correct, yet sufficiently so as to render it the fullest storehouse to which the future literary historian of New Spain can resort for information.

MDCCCXX.

BIBLIOTHECA AMERICANA-SEPTENTRIONALIS; being a choice collection of books in various languages, relating to the History, Climate, Geography, Produce, Population, Agriculture, Commerce, Arts, Sciences, etc., of North America, from its first discovery to its present existing government, among which are many valuable articles and rare; together with all the important official documents published from time to time by the authority of Congress. (*The same title also in French.*)—(Compiled by CONSUL WARDEN.) Paris, 1820. 8vo, pp. 147.

This catalogue was printed for private distribution, by Mr. Warden, U. S. Consul at Paris, and contains an account of the first collection of books relating to America formed by that gentleman, who parted with it to Mr. S. E. Eliot, Mayor of Boston, Mass., for 5000 dollars. Mr. Warden, however, was indefatigable, and in 1831 produced another catalogue of a second Collection, under the following title:—

MDCCCXXXI.

BIBLIOTHECA AMERICANA; being a choice collection of books relating to North and South America, and the West Indies; including voyages to the Southern Hemisphere, maps, engravings, and medals. (By CONSUL WARDEN.) 8vo. *Paris*, 1831. 140 pp.

*** Reprinted nine years afterwards, under the same title, excepting in the alteration of the date, to *Paris*, 1840, in 8vo, 3 *leaves* and 124 pp.

These three catalogues of Mr. Warden's two collections are enriched with valuable notes. The second collection, represented by the catalogues of 1831 and 1840, was secured for the State Library, Albany, by the payment of 4000 dollars. From the report it appears to have consisted of 2155 vols., 12 atlasses, 121 maps, 9 medals, and 2 engravings.

MDCCCXXXII.

A CATALOGUE OF BOOKS relating principally to America, arranged under the years in which they were printed, from 1500 to 1700. *London*, O. RICH, 12, Red Lion Square, 1832. 8vo, pp. 129.

Mr. Rich limits this list to books printed before the year 1700, and he has the merit of being one of the first who described each article sufficiently at length to be of use to those who are interested in the investigation of the history of America. Mr. Rich was, we believe, a native of New England, a member of several learned societies of America, as mentioned at page xvi., and resided for some years in Spain, before he established himself in London as a bookseller, commencing in that capital with a stock of books, chiefly relating to his native country and to Spanish America, which the troubled state of Spain, at the period of his sojourn in the Peninsula, had enabled him to amass at very moderate prices. Indeed, had there been no buyer for them on the spot, at the moment of the dispersion of many old libraries, both ecclesiastical and civil, during the progress of the Revolution, it is probable that many volumes of the greatest rarity and interest would have perished altogether as waste-paper. To Mr. Rich belongs the merit of having awakened the attention of other European booksellers to the importance of the subject of the earlier American

History, beyond the limits of the American continent; and the principal London booksellers, who dealt in rare and valuable books at that period, became his great competitors in the book-market. Amongst those whose catalogues deserve particular mention, were Messrs. Salva, Rodd,* Thorpe, Bohn, Payne, and Foss, from whom the late Mr. Grenville chiefly derived those rare works on America, which makes the Bibliotheca Grenvilliana almost indispensable to the collector of similar publications. The late Mr. Asher, of Berlin, also became a successful competitor, and supplied some few rare books on the subject to the British Museum, and other public and private collections. As his trade increased, Mr. Rich did not confine his speculations to Spain and to England. He sought throughout the continent of Europe for French, Dutch, and German editions and translations of early voyages and travels, connected with the Western hemisphere, and devoted much attention to the pamphlets and other ephemeral publications connected with New England and Virginia, which form one of the chief sources of information on all matters appertaining to the colonial portion of the history of the present United States. Mr. Fr. Müller, of Amsterdam, deserves prominent mention, also, amongst those booksellers who have devoted themselves to rescue these fragile records of American history from obscurity, which is more fully noticed in calling attention to his catalogue, at p. xix.

The 129 pp. of which this catalogue of 1832 is composed, present us with a bookseller's price-list of 486 works, printed from 1493 to 1700. Of these, 90 are printed prior to the year 1600, and 396 in the seventeenth century. It is compiled with enough of accuracy for the purpose for which it was intended—a dealer's description sufficiently full to enable him to vend his wares; and Mr. Rich's notes are, on the whole, entitled to much consideration, though now and then such slips occur as this—"the existence of any publication on New England," for instance, "anterior to 1670, is very doubtful;" though Dr. Asher, in his Bibliographical Essay, noticed at page xx., as will be seen, confines himself almost exclusively to books printed anterior to that date. To some copies of the catalogue Mr. Rich added, A List of Books relating to America, 1493 to 1700, 16 pp. 8vo, which was afterwards reprinted in 4to, in double columns, 4 pp. The latter was "*printed by J. S. Hodson, 15, Cross Street, Hatton Garden;*" but bears no date.

These lists furnished the first general outline of what had been published, respecting both North and South America and the Islands, throughout Europe, prior to 1700. Previously no one had attempted to do more than to provide particulars of those books which serve to illustrate such separate portions of America as it was the compiler's object to bring more prominently forward. Great bibliographical accuracy is not attempted, beyond that which regards dates and places of publication; and the titles themselves are not given at length. Of these Mr. Rich enumerates 486, a number which might have been considerably increased had he made more diligent reference to historical works, to booksellers' and sale catalogues, and to the larger bibliographical

* A Catalogue of Books, consisting of a Collection of Voyages and Travels in various parts of the world; including an extensive series relating to the several countries of America. On sale . . . . by *Thomas Rodd*. 8vo. 1843. pp. 116. (Nos. 1426—2328, consist of Books relating to America.)

productions appertaining to general literature. The value of these lists is seen in the rapid rise in the prices of many of the rarer articles enumerated in them; whilst such as up to that period were precious chiefly as book-rarities, but which did, nevertheless, occasionally find their way into the market, are now scarcely ever seen, excepting in large public libraries, or in private cabinets, which are not likely to be dispersed. As a companion, there appeared in

MDCCCXXXV.

BIBLIOTHECA AMERICANA, or a Catalogue of Books in various languages, relating to America, printed since the year 1700. Compiled principally from the works themselves, by O. RICH, Member of the Massachusetts Historical Society; of the Albany Institute; of the Pennsylvania and New England Linnean Societies; Honorary Member of the American Antiquarian Society, etc. *London: O. Rich*, 12, *Red Lion Square. New York: Harper and Brothers*, 1835. 8vo, 424 pp.

MDCCCXLVI.

BIBLIOTHECA AMERICANA NOVA. A Catalogue of Books relating to America, in various languages; including Voyages to the Pacific and round the World, and Collections of Voyages and Travels, printed since the year 1700; compiled principally from the works themselves, by O. RICH, *London* (1835), 1846. 2 vols. 8vo. Vol. I. pp. 517. Vol. II. pp. 412, and 16, and 8 pp.

Mr. Rich published a specimen of this important work with his catalogue of ancient and modern books, in 1834, at which time he contemplated that it would extend to some 600 pp. There are two "Notices" prefixed to the volume; the first, dated 1 *December*, 1834, states that "the compiler being unable to publish the complete *Bibliotheca Nova Americana* at once, had confined himself" (*in the first volume*) "to books printed in the eighteenth century." In the other he informs us, that "only 250 copies are printed; 150 for sale in America, and 100 for sale in Europe." This small impression has now become exhausted, the work is consequently very scarce and seldom attainable, excepting the second volume, which contains a list of Books, extending up to those published in 1844. A Supplement to the first volume appeared under the title:—

SUPPLEMENT TO THE BIBLIOTHECA AMERICANA NOVA. *Part I.* Additions and Corrections, 1701 to 1800. *London:* O. RICH, 12, *Red Lion Square*, 1841. 8vo, pp. 425—517.

Mr. Rich did not avail himself of the labours of his predecessors to the extent he probably would have done, had his object been less one of trade and more of a literary character, which we gather from the introduction, in which he states, that "he possesses most of the books, with a few additions, here and there," clearly indicating that these additions were to be found in his stock, though omitted in the Bibliotheca Nova. Indeed, with the exception of Meusel's improved edition of the Bibliotheca Historica of Struve, he appears to have made no use of foreign bibliographical works; and several valuable sources of information, furnished even by English writers, have also been left unexplored.

He has adopted a chronological arrangement, and the number of publications

of each individual year is indicated by separate numerals, each series commencing with the unit. The great defect of the work is consequently the want of a good index, as, for the facility of reference, an alphabetical arrangement is infinitely to be preferred to a mere chronological enumeration of title-pages, unless accompanied by that most necessary adjunct.

The work progressed slowly through the press, and the first volume, consisting of 426 pp., was rendered more complete in 1841, by the addition of a supplement of 82 pp., and a table of 9 pp., forming altogether the 517 pp. enumerated above. It was issued with a new title-page on the completion of the second volume in 1846, and two volumes embrace an enumeration of books, all published in the eighteenth and nineteenth centuries, up to the year 1846, the titles of which, though not given at length, are sufficiently so to prevent any mistakes arising as to works of so comparatively modern a date. At the end of the second volume is the prospectus of a *Bibliotheca Americana Vetus*, including the former list of books, printed from 1493 to 1700, 16 pp., with a supplement of 8 pp. This work was completed by Mr. Rich, and prepared for publication; but the MS. having been accidentally left in a hackney conveyance, was never recovered, and was sold as waste-paper to a butcher at Gravesend, in the vicinity of Mr. Rich's residence, from whom only a few sheets were ultimately rescued. It is probable, however, that the most valuable portion of its contents was given by him in his catalogue of

MDCCCXLVIII.

PART I. OF RICH AND SONS' CATALOGUE for 1848; containing near two thousand books, relating principally to America, now on sale at No. 12, Red Lion Square, London.

This elegant little catalogue contains the title-pages of a certain number of books not mentioned in bibliographical works, though most of them, anterior to 1700, are enumerated in Mr. Rich's own list and supplement. Mr. Rich died in 1850, and his catalogues are deservedly cherished by all who feel interested in tracing the rise and progress of the New World, since its first discovery by Columbus in 1492. I have deemed it prudent to place the whole of these in one sequence, though in so doing it has been necessary to deviate from the strictly chronological arrangement of my materials. We now, therefore, retrace our steps to

MDCCCXXXVII.

BIBLIOTHEQUE AMERICAINE, ou Catalogue des Ouvrages relatifs à l'Amerique, qui ont paru depuis sa découverte jusque l'an 1700; par H. TERNAUX, *Paris*, 1837. 8vo. viii. and 191 pp.

This is still considered the standard work on books relating to America, printed previously to the eighteenth century. It is, however, far from perfect, and not compiled with sufficient strictness to generally accepted bibliographical canons; nor has M. Ternaux consulted books in everybody's hands, such as Brunet and Ebert, Meusel and Camus. Sometimes the title-page is given at length, at others it is abridged; and sometimes the exact words of the title are inverted to please the fancy of the compiler, who omits the enumeration of the number of pages, and all lists of plates, and is not always accurate as to the size of the work, representing the same book at times both as folio and

quarto. With all these faults it is, nevertheless, a very useful manual; chiefly compiled from M. Ternaux's own collection, formed partly in Spain, and partly in America, and not less so, both in Paris and London. It exhibits no less than 1153 title-pages, notwithstanding the objections just pointed out, quite sufficient to render the recognition of the books to which they refer a matter of no great difficulty. These are also translated into French, and accompanied by notes, most of which are valuable. Besides M. Ternaux's own collection, many titles have been added from the works of Barbosa, Leon-Pinelo, Barcia, and Rich. The following volume may be considered somewhat in the light of a necessary satellite to the Bibliothèque Americaine :—

CATALOGUE des Livres et MSS. de la Bibliothèque de feu M. RAETZEL. *Paris, Silvestre*, 1836. 8vo. 4 leaves and 249 pp.,

in which Nos. 908 to 2117 articles of printed books, and Nos. 2200 to 2227 MS., are on America. This collection was formed by M. Ternaux, probably with an ultimate view to sale, and the volumes relating to America are fully described in the Bibliothèque Americaine.

MDCCCXXXVII.

CATALOGUE d'Ouvrages sur l'Histoire de l'Amerique et en particulier sur celle du Canada, de la Louisiane, de l'Acadie et autres lieux, ci devant connus sur le nom de la Nouvelle France. En trois parties. Rédigé par G. B. FARIBAULT, Avocat. *Quebec, des presses de W. Cowan, No. 9, Rue de la Fabrique*, 1837. 8vo. iv. and 207 pp.

The compiler, an advocate of Quebec, is known as a corresponding member of the "Société Littéraire de Quebec," and as a most diligent contributor to the "Memoires Historiques," published by that Society. Till Mr. Rich called attention to the work in 1846, it was but little known beyond the confines of Canada; and M. Ludewig, who first saw a copy of it in the library of Mr. J. Sparks, of Cambridge, Mass., could not meet with one for sale in the United States; but had no difficulty in obtaining the work on application to the publisher. The merit of the Catalogue, which evinces great diligence and aptitude, is greatly enhanced by its valuable notes to the more important articles; and though, as regards those of earlier date, there is but little added to our former stock of information, still what is said is to the point; whilst, as regards those of more recent date, the bibliographical notices are in every way most satisfactory. M. Ludewig thus sums up the contents of the volume :—

PART I. pp. 1—155. Ouvrages avec les Noms des Auteurs, per ordre alphabetique (with supplement and alphabetical index). 796 *articles*.

PART II. pp. 157—184. Ouvrages sans Noms d'Auteur, classés d'aprés l'ordre chronologique de leurs publication (from 1505—1836). 178 *articles*.

PART III. pp. 185—207. Cartes, plans et estampes.

MDCCCXXXVIII.

CATALOGUE of the Books relating to America, in the Collection of COLONEL ASPINWAL, United States' Consul in London (1838).

Incorporated in the Bibliotheca of Mr. Rich. The collection was formed with a view to sale as a whole; but, such a sale not having been effected, it was dispersed. The notes are valuable.

MDCCCXLIII.

In the second volume of the American Pioneer, published at Cincinnati, by the Logan Historical Society, will be found:

J. M. PECK'S DESCRIPTIVE CATALOGUE of Historical References to the Valley of the Mississippi.

A clever view of the Literary Memorials relating to the History of the Valley of the Mississippi.

MDCCCXLIX.

BIBLIOTHECA AMERICANA: a Chronological Catalogue of twelve hundred books and pamphlets relating to America (including many not noticed by American Bibliographers), which have been collected during the last seven years, and are now on sale at the annexed low prices. London: John Russell Smith, 4, Old Compton Street, Soho Square, 1849.

A bookseller's price-list, deserving notice, as preserving the titles of pamphlets not elsewhere described, and which even at the date of their publication were of no great moment or interest; to which circumstances they probably owe their present scarcity. The catalogue lays no claim to bibliographical accuracy, beyond size, place of publication, and date of the books it describes. Of these, 66 are prior to 1700, and the residue since.

MDCCCL.

A CATALOGUE of Books, relating to America, on sale at the prices affixed, by F. MÜLLER, at Amsterdam. *Amsterdam*, 1850. sm. 8vo.

A bookseller's price-list, in which the titles are so greatly abridged, as to be but of little value in a bibliographical point of view. The compiler, Dr. G. Asher, a mere tyro at the time in bibliography, added some notes, which have been censured as evincing a great want of knowledge of the subject. Notwithstanding, some of them possess considerable merit, and as the purpose for which they were inserted was probably chiefly to sell the wares they refer to, or at best to relieve the tedium attendant upon the perusal of a dry list of title-pages, to subject such notices to severe criticism is surely not the province of a bibliographer. We shall have to speak hereafter of Mr. Asher's more recent labours in the same field, and show that he has proved himself competent to the task he has undertaken. With all its imperfections, M. Müller's catalogue, which enumerates 1200 title-pages, about 900 of which had been omitted by earlier bibliographers, is well worthy of notice. Most of these relate to Dutch and French publications of the seventeenth and eighteenth centuries, and the far greater portion belong to the second half of the latter.

MDCCCLIII.

BIBLIOTHECA AMERICANA: a Catalogue of a valuable collection of Books and Pamphlets, relating to the History and Geography of North and South America, and the West Indies. For sale, by JOHN RUSSELL SMITH, 36, Soho Square, London, 1853. 8vo, pp. 196.

A bookseller's price-list of 3372 articles, chiefly books printed since 1700, though there are a few of the sixteenth and seventeenth centuries. The titles, though abridged, are given sufficiently at length for general purposes; and the

dates and places of publication, as well as the size, are always indicated. It contains many works, chiefly English pamphlets, which have escaped the notice of earlier bibliographers. There are two divisions, the first, containing the "books" referred to on the title-pages, is alphabetical; and the second, consisting of the "pamphlets," many of which are anonymous, is arranged in chronological order.

MDCCCLV.

GESCHICHTE der Americanischen Ur-religionen von J. G. MÜLLER. *Basel*, 1855. 8vo, viii. and 706 pp.

Professor Müller mentions in the introductions to the several sections of his book, the works from which his materials were drawn; and their value may in all cases be estimated from his remarks respecting each as he passes it under review. Professor Müller also draws attention to many papers in Transactions and Periodicals, a class of most valuable materials, which often escapes the research of the most diligent.

MDCCCLIV.—VI.

A BIBLIOGRAPHICAL AND HISTORICAL ESSAY on the Dutch Books and Pamphlets, relating to the New Netherland and to the Dutch West India Company; as also on the Maps, Charts, etc., of New Netherland, accompanied by a historical map of the country. Compiled from the Dutch public and private libraries, and chiefly from the collection of Mr. F. Müller, in Amsterdam, by G. M. ASHER, LL.D.—A LIST of the Maps and Charts of New Netherland, and of the Views of New Amsterdam, by G. M. ASHER. *Amsterdam, F. Müller*, 1855. VI. *parts*, small 4to (of which only I.—III. have yet appeared), with an Appendix (issued as parts IV., V.).

It is to be regretted that M. Asher attempted to make use of the English language, instead of his native German, to clothe thoughts evidently conceived in the latter. The style is consequently obscure, is full of German idiomatic expressions, and in many instances perfectly unintelligible to a mere English reader. The consequence is, the work never commanded sufficient sale to pay its expenses; and though the whole of the manuscript is in the hands of the publisher, there is but little probability of the remainder being placed in those of the printer at present.

PARTS I. TO III. consist of 120 pages, and furnish 117 title-pages, numbered consecutively. The Appendix consists of 22 and 24 pp., and is devoted to the maps, charts, and views of New Amsterdam. It is illustrated with a folding map.

M. Asher is at present occupied in producing another impression of the work, revised and corrected, which is rapidly progressing towards completion. He has had access to all the public libraries in Holland, and has most sedulously examined their contents, as to all that relates to his subject, and he has also availed himself of the opportunities a long residence in Amsterdam afforded him, of becoming thoroughly acquainted with the contents of the extensive and valuable collection of M. F. Müller, of a portion of which he compiled a catalogue in 1850, as noticed already at page xix. This has given him an insight into the secret springs of action which prevailed in the colony before it was ceded to the English at the peace of Breda in 1667. As is well known,

Henry Hudson, an Englishman, first discovered the Hudson in 1608, but sold his claim to the Dutch, and the States General, in 1614, granted a patent to a company of merchants for an exclusive trade on that river. The settlement was no sooner formed than Sir Thomas Dale, governor of Virginia, despatched Captain Argall to take possession of it in the name of James I., and the Dutch, unable to resist the force he brought with him, prudently submitted. The States General, however, determined upon forming a colony on the river, and with that view granted the country, in 1621, to the Dutch West India Company, and in 1629 Wouter von Twiller arrived at Fort Amsterdam, now New York, and took upon himself the government. In 1664 Governor Stuyvesant surrendered the colony then known as New Amsterdam to Colonel Nicholls, who had been sent out by Charles II. with three ships and 300 men to reduce the place. The name was then changed to New York, and that of Fort Orange was altered to Fort Albany. After its cession to the English in 1667, the Dutch again possessed themselves of it in 1673, but surrendered it to the English in the following year.

This digression may be pardoned; because M. Asher has not on his title-page identified the country, which the Dutch in the infancy of the colony called "the New Netherlands," with the State of New York, nor their city of New Amsterdam with the present commercial capital of the United States. Most of the books noticed in his Essay are not mentioned by other bibliographers, and indeed to him may be said to belong the merit of having rescued from oblivion these valuable aids for investigating the colonial history of one of the most important of the United States of America.

The title-pages are given at length, and are accompanied by a literal English translation; but all mention of plates and maps is omitted, though probably in the revised impression of his work, the compiler may remedy this great defect in a book, otherwise claiming great bibliographical accuracy. The notes are chiefly historical, and indeed the book itself is even more valuable to the historical student than to the bibliographer.

PART I.—Descriptions of New Netherland; 28 pp. Enumerating 19 title-pages, with critical analysis of each article.

PART II.—History: A.—West-India Company; pp. 29—120. Adding 98 title-pages, numbered 20—117. About 30 pages are occupied with the notes, which, it must be admitted, are somewhat lengthy. This section is still incomplete, at least 50 pp., consisting solely of title-pages, remaining in manuscript.

PART II. B.—Special History of New Netherland, is also still only in manuscript.

THE APPENDIX contains a list of maps, most carefully and accurately put together, giving the dimensions of the plate, with the titles and inscriptions in each case, as well as the names of the places to be found upon each of the maps. This is followed by an account of the first three engraved views of the city of New Amsterdam. Had the entire work been printed it would probably have extended to some 240 pp., without the Appendix, making in the whole a volume of about 300 pp.

MDCCCLVIII.

THE LITERATURE OF AMERICAN ABORIGINAL LANGUAGES, by HERMANN E.

LUDEWIG. With additions and corrections by PROFESSOR WM. W. TURNER. Edited by NICOLAS TRÜBNER. *London, Trübner & Co., 60, Paternoster Row,* 1858. 8vo, fly and general title 2 leaves; Dr. Ludewig's preface, pp. v. —viii.; the Editor's preface, pp. ix.—xii.; Biographical Memoir of Dr. Ludewig, pp. xiii., xiv.; and INTRODUCTORY BIBLIOGRAPHICAL NOTICES, pp. xv.—xxiv., followed by list of Contents. Then follow Dr. Ludewig's Bibliotheca Glottica, alphabetically arranged, with additions by the editor, pp. 1—209; Prof. Turner's additions, with those of the editor to the same, also alphabetically arranged, pp. 210—246; Index, pp. 247—256; and list of Errata, pp. 257, 258.

This work is intended to supply a great want, now that the study of Ethnology has proved that exotic languages are not mere curiosities, but essential and interesting parts of the natural history of man, forming one of the most curious links in the great chain of national affinities, defining, as they do, the reciprocity existing between man and the soil he lives upon. No one can venture to write the history of America without a knowledge of her aboriginal languages, and unimportant as such researches may seem to men engaged in the mere bustling occupations of life, they will at least acknowledge that these records of the past, like the stern-lights of a departing ship, are the last glimmers of savage life, as it becomes absorbed, or recedes before the tide of civilization. Dr. Ludewig and Professor Turner have made most diligent use of the public and private collections in America, access to all of which was most liberally granted to them. This has placed at their disposal the labours of the American missionaries, so little known on this side of the Atlantic, that they may be looked upon almost in the light of untrodden ground. But English and continental libraries have also been ransacked, and Dr. Ludewig kept up a constant and active correspondence with scholars of "the Fatherland," as well as with men of similar tastes and pursuits in France, Spain, and Holland, determined to leave no stone unturned, to render his labours as complete as possible. The volume, perfect in itself, is the first of an enlarged edition of Vater's "*Linguarum totius Orbis Index.*" The work has been noticed by the press of both continents, and I may be permitted to refer particularly to the following

OPINIONS OF THE PRESS.

"This work, mainly the production of the late Herr Ludewig, a German naturalized in America, is devoted to an account of the Literature of the aboriginal languages of that country. It gives an alphabetical list of the various tribes of whose language any record remains, and refers to the works, papers, or manuscripts, in which such information may be found. The work has evidently been a labour of love; and as no pains seem to have been spared by the editors, Prof. Turner and Mr. Trübner, in rendering the work as accurate and complete as possible, those who are most interested in its contents will be best able to judge of the labour and assiduity bestowed upon it by author, editors, and publisher."—*Athenæum, 5th April,* 1858.

"This is the first instalment of a work which will be of the greatest value to philologists; and is a compendium of the aboriginal languages of the American continents, and a digest of all the known literature bearing upon those languages. Mr. Trübner's

hand has been engaged *passim*, and in his preface he lays claim to about one-sixth of the whole; and we have no doubt that the encouragement with which this portion of the work will be received by scholars, will be such as to inspire Mr. Trübner with sufficient confidence to persevere in his arduous and most honourable task."—*The Critic, 15th Dec.*, 1857.

"Few would believe that a good octavo volume would be necessary to exhaust the subject, yet so it is, and this handsome, useful, and curious volume, carefully compiled by M. Ludewig, assisted by Professor Turner, and edited by the careful hand of Mr. Trübner, the well-known publisher, will be sure to find a place in many libraries."—*Bent's Advertiser, Nov.* 6, 1857.

"The lovers of American Linguistics will find in the work of Mr. Trübner scarcely any point omitted, calculated to aid the comparative philologer in tracing the various languages of the great Western Continent."—*Galway Mercury, 30th Jan.*, 1858.

"Only those deeply versed in philological studies can appreciate this book at its full value. It shows that there are upwards of seven hundred and fifty aboriginal American languages."—*Gentleman's Magazine, February*, 1858.

"The work contains an account of no fewer than seven hundred different aboriginal dialects of America, with an introductory chapter of bibliographical information; and under each dialect is an account of any grammars or other works illustrative of it."—*The Bookseller, January*, 1858.

"I have not time, nor is it my purpose, to go into a review of this admirable work, or to attempt to indicate the extent and value of its contents. It is, perhaps, enough to say, that apart from a concise but clear enumeration and notice of the various general philological works which treat, with greater or less fulness, of American languages, or which incidentally touch upon their bibliography, it contains not less than 256 closely printed octavo pages of bibliographical notices of grammars, vocabularies, etc., of the aboriginal languages of America. It is a peculiar and valuable feature of the work, that not only the titles of printed or published grammars or vocabularies are given, but also that unpublished or MS. works of these kinds are noticed, in all cases where they are known to exist, but which have disappeared among the *débris* of the suppressed convents and religious establishments of Spanish America."—*E. G. Squier, in a Paper read before the American Ethnological Society, 12th Jan.*, 1858.

"In consequence of the death of the author before he had finished the revisal of the work, it has been carefully examined by competent scholars, who have also made many valuable additions."—*American Publisher's Circular, 30th Jan.*, 1858.

"It contains 256 closely printed pages of titles of printed books and manuscripts, and notices of American aboriginal languages, and embraces references to nearly all that has been written or published respecting them, whether in special works, or incidentally in books of travels, periodicals, or proceedings of learned societies."—*New York Herald, 29th Jan.*, 1858.

"Je terminerai en annonçant le premier volume d'une publication appelée à rendre de grands services à la philologie comparée et à linguistique générale. Je veux parler de la Bibliotheca Glottica, ouvrage devant renfermer la liste de tous les dictionnaires et de toutes les grammaires des langues connues, tant imprimés que manuscrits. L'éditeur de cette précieuse bibliographie est Mr. Nicolas Trübner, dont le nom est honorablement connu dans le monde oriental. Le premier volume est consacré aux idiomes américains; le second doit traiter des langues de l'Inde. Le travail est fait avec le soin le plus consciencieux, et fera honneur à M. Nicolas Trübner, surtout s'il

poursuit son œuvre avec la même ardeur qu'il a mise à la commencer."—(*L. Leon de Rosny*) *Revue de l'Orient, février*, 1858.

"Mr. Trübner's most important work on the Bibliography of the aboriginal languages of America, is deserving of all praise, as eminently useful to those who study that branch of literature. The value, too, of the book, and of the pains which its compilation must have cost, will not be lessened by the consideration that it is the first in this field of linguistic literature."—*Petermann's Geographische Mittheilungen*, p. 79. *Feb.*, 1858.

"Undoubtedly this volume of Trübner's Bibliotheca Glottica ranks amongst the most valuable additions which of late years have enriched our bibliographical literature. To us, as Germans, it is most gratifying that the initiative has been taken by a German bookseller himself, one of the most intelligent and active of our countrymen abroad, to produce a work which has higher aims than mere pecuniary profit, and that he, too, has laboured at its production with his own hands; because daily it is becoming a circumstance of rarer occurrence that, as in this case, it is a bookseller's primary object to serve the cause of literature, rather than to enrich himself."—(*P. Trömel*) *Börsenblatt, 4th Jan.*, 1858.

"In the compilation of the work the editors have availed themselves not only of the labours of Vater, Barton, Duponceau, Gallatin, De Souza, and others; but also of the MS. sources left by the Missionaries, and of many books of which even the library of the British Museum is deficient, and furnish the fullest account of the literature of no less than 525 languages. The value of the work, so necessary to the study of ethnology, is greatly enhanced by the addition of a good index."—*Berliner National-Zeitung, 22nd Nov.*, 1857.

The Editor has also received most kind and encouraging letters respecting the work from Sir George Grey, the Chevalier Bunsen, Dr. Th. Goldstucker, Mr. Watts (of the Museum), Professor A. Fr. Pott (of Halle), Dr. Julius Petsholdt (of Dresden), Hofrath Dr. Grässe (of Dresden), M. F. F. de la Figaniere (of Lisbon), and other linguistic scholars.

Of works of general bibliography, most of which contain more or less the enumeration of books relating to America, particular mention may be made of Antonio's Bibliotheca Hispana, Vetus et Nova, 4 vols. folio, De Bure Bibliographie Instructive, 7 vols. 8vo, Meuselii Bibliotheca Historica, 11 vols. 8vo, Brunet Manuel du Libraire, 5 vols. 8vo, Lowndes' Bibliographer's Manuel, 4 vols. 8vo, Guild's Librarian's Manual, 4to,* the Catalogues of all European

* Mr. Guild's LIBRARIAN'S MANUAL has not yet reached this country, and is here introduced on the authority of Mr. C. B. Norton's prospectus, which announces its publication for May, 1858. It is there called "THE LIBRARIAN'S MANUAL: a Treatise on Bibliography; comprising a Select Descriptive List of Bibliographical Works: to which are added historical and descriptive Notices of Public Libraries, and an Article from the London Quarterly Review on Libraries and Catalogues. Illustrated with Engravings. By R. A. GUILD, A.M., Librarian of Brown University, Providence, R. I." (200 pp. and upwards, 4to, the number of copies limited to those subscribed for). The ninth section of the first part is devoted to the *Bibliography of Modern Nations; or, National Bibliographies*, of which the first subdivision contains AMERICA. "The second part contains *Historical and Descriptive Notices* of the following public Libraries, viz., Harvard College, Yale College, Brown University, Philadelphia and Loganian, Boston Athenæum, Congress, Albany, Astor, Boston Free

Public Libraries, more particularly those of Spain, England, France, and Holland, the priced catalogues of the booksellers already noticed at p. xv., and the auction catalogues of the libraries of Heber, Hanrott, Libri, Stevens, and other collectors, as well as those of some anonymous collections, sold by the principal auctioneers in London and Paris, particularly one dispersed by Mr. Hodgson of Fleet Street, in 1848, which was very rich in Books relating to America. Dr. Ludewig calls attention to the following

MANUSCRIPTS.

INDICE de la Coleccion de Manuscritos pertenecientes a la historia de las Indias que escribio D^n^. JUAN BAUTISTA MUÑOS y por su muerte se han hallado en su libreria. Formado de R^l^ orden con intervencion de los S^res^. D. JOSEF NAVARRO, del Consejo de S. M.: Alcalde de su casa y Corte, y D^r^. ZENON ALONSO, oficial mayor de la Secret^a^. de Gracia y Justicia de las Indias. Por D^r^. JOAQUIN FRAGGIA y D^n^. MAN. ABELLA, individuos de la real Academia de la Historia. *Signed:* Madrid, 12 de Agosto, 1799. Josef Navarro, Zenon Alonso, Joaq^n^. Fraggia, Manuel Abella. 4to.

A transcript of the original MS. was discovered by Dr. Ludewig in the library of Mr. P. Force at Washington. The original he presumes to be either in Paris or Madrid. This Index enumerates 95 vols. folio, and 18 vols. 4to, besides which it furnishes a separate bibliographical list, copied from that of a Mexican monk, containing references to 32 MSS.

MS. BIBLIOTECA AMERICANA: Catalogo de los autores que han escrito de la America en differentes idiomas, y noticia de su vida y patria, años en que vivieron, obras que escribieron, compuesta por el Mariscal del Campo, DON ANTONIO DE ALCEDO, Gobernador de la plaza de Coruña, año de 1807. folio.

The original MS. was in Mr. Rich's possession in 1846, and a transcript, made for Mr. Jared Sparks of Cambridge, Mass., was examined by Dr. Ludewig, who states that it is valuable on account of the biographical notices it contains.

In the Catalogue of M. V. Salva, of 1826, No. 1428, *Miscelanea de Papeles Manuscritos* is described as containing a "memoir of the reports which were to be given for the description of South America, and to serve as materials for the *Biblioteca historica de las Indias.*" In the same catalogue, No. 1878, is the autograph and unedited MS. of the *Historia General del Regno de Chile, ò Nueva Estremadura*, by *P. Diego de Rosales*, and M. Salva's description of that most masterly performance, induces me to add, that the student of American History should not fail to glance at the notes of that eminent Spanish bibliographer, which are contained in his catalogues of 1826 and 1829. The Literary Histories of the Franciscans and of the Society of Jesus, furnish much curious and interesting bibliographical information respecting the writ-

Public, Royal Library at Munich, Royal Library at Berlin, and the Library of the British Museum, the Notice of the latter including Details of its daily Management, and the Essay from the Quarterly Review." It would be unfair to pronounce any opinion on such a work, from the very meagre and imperfect specimen-page attached to the prospectus, which was probably only intended to convey an idea of the style of its typographical execution. From it, however, we gather that the alphabetical arrangement has been adopted, in preference to the chronological.

ings of members of those religious bodies, whose labours have touched upon matters in any way appertaining to North or South America and the West Indies; and therefore may not be passed over in silence in a work devoted to Bibliography in connection with American Literature.

BOOKS PRINTED IN AMERICA.

The literary history of the United States of America has yet to be written, and the materials for the purpose are scattered, and far from complete. Yet there are many valuable aids to be found, such as Periodical Publications devoted to the subject, and Catalogues and Handbooks compiled for the use of booksellers and their customers. Though not printed in America, it has been thought as well to add one or two works of this latter class, printed in London, which confine themselves exclusively to American literature. Besides these we must not omit to notice works devoted to special branches of literature, published in the United States, which are not less important than manuals of more general pretensions.

1. PERIODICAL PUBLICATIONS.

1. The North American Review.—From its commencement in 1815, it contains under the head of "Intelligence" much valuable bibliographical information, and from 1819 to 1844, it added *quarterly lists of new publications*. In 1844 these lists were discontinued, but those which exist, though often nothing but mere announcements, are indispensable from the dearth of other sources of information.

2. Prospectus of an American Book-circular, by K. v. Behr, 1828.

The editor was a German, and a bookseller in New York. Beyond the prospectus nothing is known of the Circular.

3. The Literary Intelligence prepared for the New York Review by Mr. G. P. Putnam, of the firm of Messrs. Wiley and Putnam, the well-known booksellers. It commences on the 8th of April, 1838, and occupies pp. 511—524 of the number, and was continued till the New York Review was dropped in 1842.

4. Wiley and Putnam's Literary News Letters, and Monthly Register of New Books, Foreign and American, published on the first of every month. Compiled for the purposes of their trade, as extensive importers and exporters, for which it was quite sufficient, without pretending to greater bibliographical accuracy than the occasion required.

5. The Home Book Circular was issued by Messrs. Appleton and Co., and since June, 1843, continued under the title of—

6. Appleton's Literary Bulletin.—It is compiled for the purposes of their extensive trade, and similar to Messrs. Wiley and Putnam's News Letters.

7. The United States Literary Advertiser and Publishers' Circular, a Monthly Register of Literature, by T. and H. Langley, each part containing 8 to 16 pp., 4to, 1841.

This valuable publication is now of great rarity. Dr. Ludewig could not obtain the sight of more than 11 numbers, and he thus enumerates the plan

and contents of the publication. I. *Literary Intelligencer.* II. *American,* and III. *English Literary Announcements.* IV. *American,* and V. *English Publications,* and VI. *Advertisements.* The work was ably conducted; but, at that period, not being adequately appreciated by the public, it was dropped.

8. THE LITERARY WORLD, a Gazette for Authors, Readers, and Publishers, edited by C. T. HOFFMAN (and E. A. and G. L. DUYCKINCK). New York, 1847—1853, weekly, in three columns, pp. 24, forming, in all, 13 vols. large 4to.

The publication commenced on the 6th of February, 1847, and ceased in December, 1853. The first volume, ending July 31st, is all that was edited by Mr. C. T. Hoffman. The second volume contains the concluding half-year, but each volume of the rest of the series embraces an entire year. Messrs. E. A. and G. L. Duyckinck succeeded Mr. Hoffman in the editorship. Each volume has a title and table of contents, and every number is subdivided into, 1. Advertisements; 2. Reviews, Literary, Scientific, Artistic, and Dramatic Intelligence; and 3. Advertisements. In some of the numbers, under the heading of "Publishers' Circular," good lists of Foreign Literature will be found. General bibliographical accuracy is not attempted; but as the advertisers no doubt sought to sell their books by its means, the announcements are sufficient for most purposes, besides which it furnishes very complete lists of the publications of the principal American booksellers.

9. NORTON'S LITERARY ADVERTISER; large 4to, in four columns, from 4 to 18 pp. in each monthly number, published from May to December, 1851. In 1852 and 1853 it was published in monthly parts under the title of—

NORTON'S LITERARY GAZETTE for 1852 and for 1853; 1852 contains 256 pp.; and 1853, 232 pp.

NORTON'S LITERARY GAZETTE for 1854 and for 1855, was published, up to August of the latter year, in parts twice a month. 1854 contains 640 pp.; and 1855 (to August), 328 pp. The volumes for 1855 (September to December), for 1856, and for 1857, appeared in weekly numbers under the title of—

THE AMERICAN PUBLISHERS' CIRCULAR AND LITERARY GAZETTE. 1855 (September to December), contains 276 pp.; 1856, 836 pp.; and 1857, 788 pp.

Similar in contents to the *Literary World,* whose place it appears to occupy, it presents one important addition, in *the List of American Publications,* very carefully compiled by the editor, in which the titles are given at sufficient length, the size mentioned, the pages enumerated, and the places and names of the publishers noted. To this are added *Literary and Scientific Intelligence,* and other matter, both original and selected, appertaining to Science and Art.

10. THE LITERARY ALMANAC, for 1852, 1853, and 1854, was also published by MR. NORTON. It is a gossiping olio, introducing now and then some bibliographical facts; but chiefly devoted to Libraries. It appears to have been discontinued.

11. NORTON'S LITERARY REGISTER, or Annual Book List for 1856; a Catalogue of Books, including new editions and reprints, published in the United States during the year 1855. It contains the titles, number of pages, prices, and names of publishers, with an Index of publishers; *New York,* 1856.

8vo. The title indicates the contents, which the editor has enhanced by the addition of an alphabetical index of matters.

2. CATALOGUES AND HANDBOOKS FOR THE USE OF BUYERS AND SELLERS.

1. A CATALOGUE OF ALL THE BOOKS PRINTED IN THE UNITED STATES, with the prices and places where published annexed. Printed at Boston, for the booksellers, January, 1804; 8vo, xii. and 79 pp.

Following something of the plan of Bent's London Catalogue, it is divided into the classes of—Law, Physics, Divinity, Bibles, Miscellanies, School-books, Omissions. It was the intention to have issued enlarged editions of the catalogue every two years. Dr. Ludewig, however, never met with any other than that mentioned above. It omits in most cases all local and occasional tracts.

2. THE AMERICAN BOOK-CIRCULAR, with Notes and Statistics. London and New York, Wiley and Putnam, April, 1843. 8vo, 64 pp.

Published in reply to the remarks of Dickens, Alison, and others upon American literature. It is valuable as evidence of the state of the book-trade in America at the period of its publication, and is carefully compiled. Copies are now scarce.

3. THE AMERICAN BOOKSELLERS' COMPLETE REFERENCE TRADE-LIST, and Alphabetical Catalogue of Books, published in this country, with the Publishers' and Authors' names and prices, arranged in classes for quick and convenient reference. Compiled by ALEXANDER V. BLAKE; *Claremont, N. H.*, 1847; 4to, 224 pp.——SUPPLEMENT to the American Booksellers' complete reference Trade-list; containing such additional lists as have been furnished by the publishers, as well as additions to the lists, published in the original book, and an Alphabetical Catalogue of the same. *Claremont, N. H.*, 1848, 4to, 4 leaves, 224 pp., to be placed between the body of the List and this Supplement, and then pp. 235—351. Printed for the convenience of the trade. The titles, which are very short, are arranged under the names of the respective publishers of the books, with an alphabetical index of authors and anonymous publications. As its name implies, it is a trade-list, and is sufficient for the purposes of trade, without making any pretensions to bibliographical accuracy.

4. BIBLIOTHECA AMERICANA; Catalogue of American Publications, including reprints and original works, from 1820 to 1848 inclusive, compiled and arranged by O. A. ROORBACH; *New York*, 1849; 8vo, 360 pp.——SUPPLEMENT to the Bibliotheca Americana, comprising a list of books (reprints and original works) which have been published in the United States within the past year; also, omissions and corrections of errors, as far as ascertained, which occurred in the former work. Together with a list of periodicals. Compiled and arranged by O. A. ROORBACH, *New York*, 1850; 8vo, 124 pp.

Bibliotheca Americana: Catalogue of American Publications, including re-

prints and original works from 1820 to 1852 inclusive. Together with list of periodicals published in the United States. Compiled and arranged by O. A. Roorbach, *New York*, 1852; royal 8vo, 652 pp.

Somewhat on the plan of the London Catalogue, each title being, in a general way, confined to a single line. This very useful manual is chiefly intended for the use of the trade. The prices are taken from the Publishers' Trade-list; but where books are out of print, or rare, no price is given. Reprints and Translations are indicated by special marks, and Biography and Law are classed separately at the end of the volume. The alphabetical arrangement is adopted throughout, with this distinction, that in the pages devoted to Biography the name of the subject, and not that of the author, takes the lead, so that, for instance, under Washington are placed all biographies of Washington, no regard being had to the names of his various biographers. The titles of the Law Books are more fully given than those in the body of the work, and that class of the catalogue is followed by a Supplement containing State Reports, Law Digests, &c. The Papers, published at a low charge by the State of New York, up to 1848, are quoted at 555 dollars. In the enlarged edition of 1852 that class Biography is incorporated in the general alphabet; but Law is again classed by itself, followed by "Reports and Periodicals," which form part of the Supplement to that of 1849. Two Supplements have been published, alphabetically arranged, including all classes in one and the same alphabet. The first is completed up to April, 1855, and the second to March, 1858. The title of the latter is: "Addenda to the Bibliotheca Americana, a Catalogue of American Publications (reprints and original works), from May, 1855, to March, 1858. Compiled and arranged by Orville A. Roorbach. *New York: Wiley and Halsted*, 351, *Broadway; London: Trübner and Co.*, 1858. vii. pp., *including title-page, and* 256 pp., *and* 8 pp. *of Catalogue of the Publications of Wiley and Halsted.*

5. Appleton and Co.—A Library Manual, containing a catalogue raisonné of upwards of twelve thousand of the most important works in every department of knowledge, in all Modern Languages. In two parts. Part 1. Subjects alphabetically arranged. Part 2. Bibliography, Classics, Miscellanies, and Index to Part 1. *New York: Appleton and Co.:* (1847); 8vo, xvi. and 434 pp.

D. Appleton and Co.'s New Catalogue of American and English Books, comprising a most extensive assortment of the best works in every department of Literature and Science. With a complete Index. *New York*, 1855. 8vo. 242 closely printed pp. in double columns.

These are most useful catalogues, well adapted to meet the wants of American book-buyers. In the alphabetical arrangement of that published in 1847, subjects are introduced, as Abyssinia, Acoustics, &c., and the names of the authors in all such cases are placed in the index at the end of the volume. That plan was abandoned in the catalogue of 1855. The latter, however, does not supersede its precursor, for that of 1847 was more of an analytical character. Messrs. Appleton's name is sufficient guarantee for the accuracy of any work sent out by them, and as these catalogues do not profess to follow the strict canons of bibliography, they are entitled to every praise, containing as

they do quite sufficient description to meet the wants of those for whose immediate use they were compiled.

6. THE BOOK-BUYERS' MANUAL: a Catalogue of Foreign and American Books in every branch of Literature. With a classified Index. *New York, G. P. Putnam*, 1852. 8vo, 236, viii., and 48 pp.

A very useful manual, not pretending to great bibliographical accuracy, but sufficiently so for the purpose for which it is intended.

7. TRÜBNER'S BIBLIOGRAPHICAL GUIDE TO AMERICAN LITERATURE; being a classified List of Books in all departments of Literature and Science, published in the United States of America, during the last forty years. With an Introduction, Notes, three Appendices, and an Index; *London, Trübner and Co.*, 12, *Paternoster Row*, 1855. xxxii. and 108 pp., in double columns.

It has been said that success is the test of merit. If this be so, this Bibliographical Guide has perhaps its due proportion. The volume is quite out of print, and with one or two solitary exceptions, since its publication, no one has touched upon the subject of American Literature, without making frequent references to its pages, or speaking of it with commendation. The reader is more particularly referred to Chambers' Handbook of American Literature, Elliott's New England History, and Goodrich's Reminiscences, the authors of which acknowledge the aid they received from the historical sketch of American Literature, and the XXI. class-lists of which the volume is composed. It should be remarked, that the prices quoted are those at which the books can be supplied by London booksellers, and necessarily include the cost of importation.

8. THE AMERICAN CATALOGUE OF BOOKS; or, English Guide to American Literature, giving the full title of original works published in the United States since the year 1800. With especial reference to works of interest to Great Britain. With the prices at which they may be obtained in London. *London, Sampson Low, Son, and Co., 47, Ludgate Hill*, 1856. 8vo, vii. and 190 pp.

"It has been the endeavour to avoid an arbitrary classification, whilst grouping the works together in such a way as appears to the publishers to secure, at one glance, a view of all books published upon one subject. In the department of Theology, and, again, in Fiction, it has been departed from in favour of the old style of alphabetical order, from a manifest similarity of subject rendering any other arrangement liable to confusion." These are the words of the preface, and would naturally lead the reader to expect, at least, some approach to a systematic arrangement of subjects; and without any wish to be hypercritical, such cannot surely be said to be the case, where, for instance, "General de Jomini's Political and Military History of the Campaign of Waterloo" is placed between "Allen's Autocracy of Poland and Russia" and "Schimmelpenning's Sketch of the War between Turkey and Russia," with the subject of neither of which it can have the least connection; and similar instances are the rule, and not the exception. When the received canons of a science, like bibliography, are departed from, it requires great caution to devise new rules, which shall be readily as intelligible as those they are intended to supersede; and, therefore, in my case I have been content to follow in the beaten track, rather than attempt a novelty, which, however specious it might at first appear, could only tend to confuse the reader.

In the "American Catalogue," too, the classes of Theology and Fiction, the "old style of alphabetical order" has not been strictly adhered to, as the preface intimates, particularly in that of Fiction, where sometimes it is necessary to refer to the name of the author, and sometimes to that of the book, although in the latter case the name of the writer is also generally carefully mentioned in the midst of the paragraph. The Index is therefore a most useful part of the book, and in using this elegantly-printed volume it claims precedence. The recent decision of the Court of Chancery in the case of *Spiers v. Brown*, allows Dictionary makers the greatest latitude in adapting the labours of others to their own purposes, and perhaps wisely so, and therefore I do not complain that my *Bibliographical Guide to American Literature* of the previous year, should have spared the compiler of *The American Catalogue of Books* the necessity of much of that labour and research, which, as the original pioneer, had fallen to my share; nor should I have noticed the circumstance, but that in the present reproduction of my own, I do not wish it to be surmised that I have borrowed from that catalogue anything to which a comparison of the two works will prove the priority of my claim.

---

9. CATALOGUE, OR ALPHABETICAL INDEX, OF THE ASTOR LIBRARY. In two parts. PART 1. AUTHORS OF BOOKS, A—E. *New York, printed by R. Craighead, Caxton Building*, 81, 83, and 85, *Centre Street*, 1857. Royal 8vo. (Vol. I.) Fly title and title; Preface, dated September 1, 1857, pp. iii.—v., followed by pp. 1—494.

(Vol. II.) Repetition of the title, excepting the letters indicating the contents, which are altered to F—L., and the date to 1858; fly title and title, followed by pp. 495—1000.

Printing under the revision of J. G. Cogswell, Esq., the eminent bibliographer, who is the Principal Librarian of the Astor Library. The Alphabetical Catalogue is subdivided on the plan of Watt's Bibliotheca Britannica, and will probably consist of eight volumes. In a work intended to facilitate access to the treasures of a great public library, certain deviations from strict bibliographical rules may be pardoned, yet it is to be regretted when these are of an arbitrary stamp that the preface does not sufficiently explain the plan adopted. American bibliographers seem fond of inversion, and in the present catalogue the rule laid down in the preface respecting anonymous publications is an example, which bids the reader to search for the work under "the word of the title, which constitutes its main subject," whilst those which have the name of the author on the title-page, or attached to the preface or dedication, are entered in strict alphabetical order. On the whole, these rules have been adhered to, but there are some amusing exceptions. For instance, *S. Augustinus* will be found correctly under *Augustinus*; but for what reason it is impossible to say, the searcher after the works of *S. Hieronymus* is referred to *Jerome, Saint*, and when he has turned to that name in the aplhabet, he will have had his pains for nothing; for it is omitted altogether, and will probably have to be sought under *Saint*, to supply the omission. There is evidently a staff of cataloguers employed, but to secure accuracy the labour of revision should not be subdivided. The book is elegantly and otherwise correctly printed; and of almost every voluminous work an elaborate analysis is given. Though not

strictly claiming a place in a list of books relating to American Literature, I may be pardoned for calling attention to this important national publication.

*** It is not generally known that in the Library of the British Museum is to be found by far the most complete collection of books printed in America. Mr. Stevens is occupied in preparing from this source a bibliographical record of American progress, which when completed will be of great value to the student.

3. WORKS DEVOTED TO SPECIAL BRANCHES OF LITERATURE.

1. The Literature of American Local History; a Bibliographical Essay, by Hermann E. Ludewig, Corresponding Member of the National Institute, and of the New York Ethnological Society. *New York*, 1846. 8vo, 180 pp. (*Not printed for sale.*)

By far the greater portion of the books referred to by Dr. Ludewig belong to the present century, and, in all, they amount to about 1400, existing in public and private libraries in America. Had Dr. Ludewig had access to the library of the British Museum, his list would have been far more complete. Indeed, at the date of his death, on the 12th of December, 1846, he had made considerable additions towards an enlarged edition of the work, which it is hoped may yet be made available on some future occasion. Dr. Ludewig's name is sufficient guarantee that nothing has been omitted, which, up to the date of its publication, the most unremitting research enabled the author to discover in the United States of America. The titles are frequently given at length, and on all occasions the dates and places of publication are noted down. It is to be regretted that the number of pages is not indicated; because from the extent of works on local history, one may mostly form some idea of their relative value.

Dr. Ludewig received great assistance from Mr. William Gowans, the well-known bookseller of New York, and had availed himself of access to the libraries of the Hon. Peter Force, of Washington, and of Mr. George Brinley, jun., of Hartford, both of whom took great interest in the progress of the work. In 1848, Dr. Ludewig issued a "First Supplement" to the "American Local History," in "the Literary World," of Feb. 19th of that year, and printed off 30 copies in a separate form for private distribution. Of the original work only 500 copies were printed, many of which were distributed by the author with a liberal hand to public and private collections on both sides of the Atlantic.

2. A Bibliographical Catalogue of Books; Translations of the Scriptures and other Publications in the Indian tongues, in the United States; with brief critical Notes. *Washington*, 1849. 8vo, 28 pp.

This is in every way a well-executed bibliographical essay. It enumerates 139 title-pages.

3. Bibliographia Americana Historico-Naturalis, or Bibliography of American Natural History, for the year 1851, by Charles Girard. *Washington*, 1852. 8vo, 2 leaves and 66 pp.

It is proposed to extend the work by decades of preceding years, as well, annually, as to future publications. The plan includes: I. The Doings of American Naturalists; II. The Labours of Foreign Authors as to America; and III. Abstracts or Reviews of papers relating to Foreign Natural History, when published in American periodicals. The work is got up with much care, both as regards the subject matter, and in a bibliographical point of view. It enumerates 284 articles, for the greater part to be found in scientific periodicals.

4. LEGAL BIBLIOGRAPHY; or, a Thesaurus of American, English, Irish, and Scotch Law; together with some continental treatises; interspersed with critical observations upon their various editions and authority. To which is prefixed a copious list of abbreviations by T. G. MARVIN, *Philadelphia*, 1847. 8vo, viii. and 800 pp.

"With regard to Law Books of the United States," says the compiler, "this volume will be found to contain a tolerably complete list. To this department of the work, in addition to the resources afforded by the ample history of the Dane Law-School, gentlemen in various States have kindly rendered me material assistance, to whom I am under very great obligation." The catalogue is arranged alphabetically, and the titles are for the most part well abridged, and admirably adapted to meet the requirements of the legal profession, for whose use the work has been mainly prepared.

5. A CATALOGUE OF BOOKS, treating of the IMMORTALITY OF THE SOUL. *New York*, WILLIAM GOWANS, 1853.

A CATALOGUE OF BOOKS ON FREEMASONRY, and kindred subjects. Compiled by William Gowans. *New York*, WILLIAM GOWANS, 1854.

A CATALOGUE OF BOOKS ON THE EVIDENCES OF REVEALED RELIGION, by the most eminent authors. *New York*, WILLIAM GOWANS, 1854.

CATALOGUE OF BOOKS ON PROVERBS, Maxims, &c.

These Catalogues are not confined to American publications; but also enumerate European works on the subjects to which they are devoted.

6. CATALOGUE OF THE LIBRARY OF THE MILITARY ACADEMY, WEST POINT. N. Y., exhibiting its condition at the close of the year 1852. *New York*, 1853. 8vo, 403 pp.

This is a valuable catalogue for the use of Military Schools in America, compiled without any pretensions to minute bibliographical accuracy. At least two-thirds of the books referred to are of European origin.

7. A GENERAL CATALOGUE OF LAW BOOKS: including all the Reports, both English and American, from the earliest period, by LITTLE, BROWN, and Co., *Boston*, 1856. 12mo, 149 pp.

This catalogue is got up with much care, and the notes are valuable. Its first object was to enable the legal profession to see what books of authority in the Courts had been published either in England or America. The titles are not always given at length, nor is this necessary, when they are so carefully abridged as in the present instance. It is needless to add that the number of pages is not indicated. The bulkiness of a law book is frequently anything but a test of its merit.

8. CATALOGUE OF A BIBLIOGRAPHICAL LIBRARY, offered for sale at the prices affixed. Collected by JOEL MUNSELL, Albany. *Albany*, 1856. 8vo, 1 leaf and 40 pp.

This is a catalogue of bibliographical books generally, American as well as European, making no profession of completeness, but simply describing at sufficient length the books submitted for sale in its pages.

9. BIBLIOGRAPHIE DER FREIMAURERREI, in America (Nachtrag zur Bibliographie von Dr. Kloss) zusammengestellt von B. Barthelmess, M.D. *New York*, 1856. 8vo, vi. and 48 pp.

Carefully prepared, in accordance with the generally accepted bibliographical rules, this little book is deserving of all praise.

10. BIBLIOTHECA PROBATA. Catalogue of Books selected, examined, and arranged under the heads of Bibles, Prayer-books, Commentaries, Devotional Library, Family Library, Parish Library, Parish School Library, Sunday School Library, Academic and School-District Library; with full descriptive titles, characterizations and prices. To which is appended a list for the library of a parish minister, drawn with much care and consultation of learned authorities. Second Edition, *New York*, DANIEL DANA, JUN., 381, *Broadway*, 1857. 12°. xxxi. pp.; containing fly-title and advertisement, title-page, preface, dedication, and alphabetical index; then 234 pp., including a chapter on English Literature of 15 pp., followed by the various sub-divisions enumerated on the title-page, with Addenda, 3 pp.

This is in every sense a most carefully prepared catalogue for the purposes of sale. In most cases, where the books are not well known, the number of pages is given; but dates and places of publication are systematically omitted. The notes are partly original and partly selected. The chapter on English literature is a rapid sketch, commencing about the middle of the fourteenth century, and brought down to the death of Webster, whose writings are adduced as "a happy illustration of the best characteristics" of American literature. The volume is elegantly printed, and should contain at the end a catalogue of Mr. Dana's publications, with "notices of the press." 23 leaves, 8 of which are paged 1—15.

BY WAY OF CONCLUSION it may not be out of place to notice that in NAUMANN'S SERAPAEUM, Dr. Hermann Ludewig * published three elaborate articles on American Literature, the first of which, containing a survey of the bibliographical sources which relate to books on America, appeared on the 31st of July, 1845; the second, Remarks on the Libraries of the United States, on the 30th of April following; and the third, on the Periodical Literature of America, with some remarks upon American and German bookselling in America, on the 30th of June, 1846.

In 1845, Mr. George Palmer Putnam published in London, in an octavo volume of 292 pp.—"AMERICAN FACTS; Notes and Statistics relative to the Government, Resources, Engagements, Manufactures, Commerce, Religious Education, Literature, Fine Arts, Manners and Customs, of the United States of America,"—in which there is some valuable information respecting the number and character of books published in America.

* For a slight biographical sketch of Dr. Ludewig, the reader is referred to p. xiii. of his Literature of American Aboriginal Languages.

The Indexes to the North American Review, to the Journal of Science and Arts, to the Bibliotheca Sacra, and Poole's Index to Periodical Literature, must not be passed over in silence.

1. GENERAL INDEX TO THE NORTH AMERICAN REVIEW, from its commencement in 1815, to the end of the Twenty-fifth volume, published in October, 1827. *Boston: published by Grey and Bowen; New York: by G. and C. and H. Carvill; London: by O. Rich, No.* 12, *Red Lion Square, Holborn,* 1829. *Royal* 8vo, 4 *leaves, including fly-titles, title, and editor's Note, and* 442 *pp.*

This index is constructed with much care, and the leading words are so arranged as to present the greatest facilities for reference and research. A separate index of *Books Reviewed* is added, in which each book is indicated by the principal word of its title, at least, so says the editor's note. In most cases this is so; but "*Abstract, Account, Addition,*" and several "principal" words of a like character, are exceptions to the rule. It is surely much better to place all books under the author's names, where known, and in regard to anonymous works, to insert them according to M. Barbier's canon, under the first word of the title-page, articles and prepositions excepted. This index occupies pp. 403—442.—It may not be amiss to mention that an account of books relating to America will be found in the following places in the North American Review:—VOL. I. pp. 145, 297; VOL. II. pp. 1, 2, 4, 5, 7, 9, 145, 148, 150, 289, 291, 294; VOL. III. pp. 1, 4, 9, 145, 150, 151, 305—308, 316; VOL. IV. pp. 1, 145, 289; VOL. V. pp. 1, 175; and VOL. VI. pp. 255. In VOL. XVIII. p. 162, mention is made of the number of books printed in the United States, and of the proportion of those imported to those printed; and in VOL. XXIII. p. 206, in deploring the deficiency of books in the United States, the writer gives the numbers contained in the principal cities.

2. THE AMERICAN JOURNAL OF SCIENCE AND ARTS. Conducted by PROFESSOR SILLIMAN and BENJAMIN SILLIMAN, JUN. Volume L. General Index to the forty-nine volumes. *New Haven: printed for the Editors, by B. L. Hamlen, printer to Yale College* (*April* 19*th*, 1847). 8vo, xviii. pp. for title and preface, 1 leaf Explanations, and pp. 5—348. By way of frontispiece a portrait of Professor Silliman is given. There is a list of works reviewed at pp. 287—294, and a list of periodical works at p. 295.

3. INDEX TO THE BIBLIOTHECA SACRA AND AMERICAN BIBLICAL REPOSITORY, Vols. I.—XIII. containing an index of subjects and authors, a topical index, and list of Scripture texts, by W. F. DRAPER. *Andover: W. F. Draper; London: Trübner and Co.*, 60, *Paternoster Row,* 1857. 8vo, v. pp. including title and preface; pp. 7—223, containing lists mentioned above; and pp. 1—13, Index of Contributors to the Bibliotheca Sacra, followed by lists of Mr. Draper's publications.

The Series itself is thus divided:—

BIBLICAL REPOSITORY.

First Series,	12 vols.	1831—1838.
Second Series,	12 vols.	1839—1844.
Third Series,	6 vols.	1845—1850.

BIBLIOTHECA SACRA.

First Series, 3 Numbers, 1843.
Second Series, 13 vols. 1844—1856.

An index to the First and Second Series of the Repository, extending from 1831 to 1844, was prepared and published by Dr. Agnew. The present index embraces the Second Series of the Bibliotheca Sacra, from 1844 to 1856, and the American Biblical Repository since the Union of the two in 1851. Books are generally designated by their short and popular titles, and not by the words of the title-page; and foreign titles are mostly translated. Both the index of subjects and authors, and the topical index, abound in bibliographical analysis and information.

4. AN INDEX TO PERIODICAL LITERATURE, by WM. FRED. POOLE, A.M., Librarian to the Boston Mercantile Library Association. "Qui scit ubi sit scientia, habenti est proximus." New York: Charles B. Norton, 71, Chambers Street, 1853. Royal 8vo. Fly-title, pp. i.—x., containing title-page, preface, and two pages of abbreviations; pp. 1—521, and leaf of errata.

Mr. Poole makes use of the American reprints of the Edinburgh, Quarterly, and North British Reviews, which do not correspond with the paging of the originals. Otherwise the work is well suited for reference, and is most carefully compiled, and the heads, Authors, Books, and Literature, need only be referred to, to show how valuable this volume is to the student of literary history.

CONTRIBUTIONS

TOWARDS A

HISTORY OF AMERICAN LITERATURE.

CHAPTER I.

FIRST COLONIAL PERIOD.

The historian of a Nation's Literature owes it both to justice and to policy to describe the earliest literary productions of the country whose mental creations are his subject. They are landmarks, valuable as indicating subsequent improvement, and although often crude and inelegant, are by no means to be slighted or disregarded. The first attempts at literature in America were the offspring of English colonial times, the study of letters having received the attention of some of the leading men among the earlier British settlers on the American continent. This is the more remarkable, from the fact that they wrote in times of trial and danger, when, instead of quiet and peace, so desirable to the man of letters, the writer was disturbed by the war-cry of the savage and the alarm of his neighbours.

Among the stern, unflinching spirits who, with Captain John Smith, braved the pestilential swamps and wily Indians of Virginia, there were those who were not only "diggers up of trees' roots," as the famous admiral forcibly expressed himself, but lovers of literature. The most prominent of these was George Sandys, who deserves honourable mention for having penned the first American literary production of any note. He translated *Ovid's Metamorphoses* on the banks of James' River anterior to the year 1626, and so creditable was this performance that it was published in folio, in London, in the year named, with a Dedication to Charles the First. The work gained for its author the respect of Dryden, who pronounced Sandys the best versifier of his age, and Pope spoke in commendation of his verses in the Notes to the Iliad.

From the character left us of the early English settlers in America, it is manifest a love of letters was not confined to any particular colony. The Puritans carried the taste with them, as did the Virginia pioneers, and their literary productions, like their colony, took a far more lasting root than did those of their

more Southern brethren. As might have been expected, the first writings of New Englanders were mostly of a religious character, consisting of sermons, moral essays, and polemic controversies. None of these, however, appear to have been printed in the Colonies, although several were published in London. This was owing to the non-existence of a printing-office in any of the provinces until 1639, in which year printing was first practised in that part of the North American continent, extending from the Mexican Gulf to the Arctic Ocean.

Not a few of the settlers, North and South, have left journals, records, letters, and biographies, which, if they do not belong strictly to American literature, are not to be repudiated as worthless; for they are among the foundation-stones of a fabric whose capitals and crowning pinnacles may yet be among the richest trophies of the English language.

It is curious that the first book *written*, and the first book *printed*, in what is now the United States, were in verse—the one being Sandys' *Translation of Ovid's Metamorphoses*, the other the *Bay Psalm Book*—works widely different in character, and yet somewhat prophetic of the poetical taste of the future nation to whose early literary contributions they belong.

The failure of the attempts to colonize Virginia, gave to the successful settlers of New England, and particularly to those of the province of Massachusetts Bay, the honour of laying the foundation of American literature, as well as that of American Independence. From 1620, when the Pilgrims landed at Plymouth Rock, until the establishment of a press at Cambridge, near Boston, quite a large number of tracts and pamphlets were written in the colony. These, as before remarked, were mostly of a religious character, strongly impregnated with the peculiar views of the Puritans; and they form the ground-work of much that is valuable in American theological literature. As a natural result, relief from the heat of religious controversy and sectarian bitterness, was sought in light literature and verse by many of the writers of the period. Among those who excelled as crude versifiers, it is fair to mention William Vaughan, Wm. Morrell, Wm. Wood, Captain John Smith, Roger Williams, and Governor Winthrop. The specimens of their rhymes which have descended to us, indicate a very low order of imagination, and none of them, with the exception of a few quaint and rather humorous verses by Captain John Smith, entitled the *Sea Marke*, rise to the level of the general run of school-boy poetry in our day. Still, dull as these productions are, they supply us in some degree with an inner view of the times, and probably indicate more accurately than any other records, the intellectual amusements of the settlers. Where a partiality for poetry prevails, it is fair to infer the existence of a certain amount of refinement; and as the rythmical writings of these early New Englanders met with applause, the fact is also an evidence of a desire among the people for a description of reading not exclusively religious—a literature at once harmless and moral, to cheer and amuse the mind.

Much inconvenience resulted to both authors and readers in the colonies from the want of a printing establishment, and this early impressed itself upon the leading men of the country. To supply it was the next step, after the institution of an academy for classical learning; and this was done in the autumn of 1638, by the Rev. Mr. Glover, a nonconformist minister, at a period

more than forty years before printing was executed "in any other part of what, before the Revolution, was called British America." Stephen Daye, a native of London, was the first person who printed in New England, his earliest work being a sheet called the *Freeman's Oath*, issued from the press of Mr. Glover, in January, 1639. The work exhibits great want of skill and practical knowledge on the part of the printer.

The first book printed in the United States was the *Bay Psalm Book*. It was executed by Daye, in 1640, and was soon after reprinted in England, where it passed through seventeen editions, the last bearing date 1754; from which it appears to have enjoyed a popularity in the mother country of 114 years' duration. It was for many years a standard authority in Scotland, in which country twenty-two editions were published, the last of which is dated 1759. It enjoyed a more lasting popularity than any American work since, having passed through seventy editions in all, which is remarkable, considering the period in which it flourished.

This book was not strictly original, and is devoid of literary merit. The first *original* work published in New England was a volume of poems, by Mrs. Anne Bradstreet. It was printed at Cambridge, Mass., in 1640, and was not only popular with the colonists, but was republished in London, in 1650, where, according to Edward Phillips, the nephew of Milton, its memory was "not wholly extinct" in 1674. So far, however, as our opportunities of judging of this work extend, it is deficient in merit, although candour must award it some praise. Most of the pieces are insipid, none of them entirely elegant, and but few of them above mediocrity. They are blemished with a straining after historical, biblical, and scientific similes, which are mostly unnatural and laboured. Still, defective as are Mrs. Bradstreet's effusions, she was among the first American writers, and as such deserves to be remembered. Her rythm is far from defective, her language chaste, and her ideas neither altogether puerile nor insipid.

From 1640 until 1661, about twenty different books and pamphlets were printed at Cambridge. The majority of these were of a religious character, and generally inculcated the peculiar views of the Puritans. In fact, the colonial press seems to have been mainly used by religious writers, and so early as 1653, mention is made of an original work, the production of which is strong proof of the literary ability of its author. This was a *Catechism* in the Indian language, by John Eliot, the famous Apostle to the Indians. It was printed at the expense of the corporation in England for the Propagation of the Gospel among the New England tribes, and appears to have been useful, for we observe a second edition of a thousand copies was printed in 1661. Eliot was a laborious and pains-taking writer. In addition to this Catechism he published an Indian version of the *Psalms* in 1659, which subsequently passed through three or four editions; and in 1661, he completed and published his translation of the *New Testament* into the Indian tongue, which was followed in 1663 by the publication in quarto, with marginal notes, of his translation into the same language of both the *Old* and the *New Testament* combined. This was the first Bible printed in America. A second edition, of 2000 copies, was printed in 1685. The second American Bible was in German. It was printed and published at Germantown, Penna, by Christian (or Chris-

topher) Sauer, in 1743. It is said that the first American Bible in English was surreptitiously printed at Boston by Kneeland and Green, in 1752, with the London imprint, but there are doubts about this, as no copy of it can now be found. The first acknowledged American edition of the English Bible was published by R. Aitken, at Philadelphia, in 1782.

In 1664, Eliot translated into Indian, *Baxter's Call to the Unconverted*,—one thousand copies of which were printed,—and in 1666, published an *Indian Grammar* in quarto at Cambridge, New England, which was printed there by Marmaduke Johnson.

Some copies of his *New Testament* were dedicated to Charles the Second, by whom the work was favourably received. Its popularity, however, did not depend upon the King, nor was it extensively known in England. It had a good circulation in the colony, from all we can learn, and the number printed of the various editions exceeded three thousand copies! But few of these exist, and they are more valuable as typographical and historical curiosities than for purposes of practical usefulness. Time and the progressive increase of the Anglo-Saxon race and tongue in America have given them the character of sealed books in the strictest sense of the term, for the language in which they are written is literally "dead," the tribe, and all who had a knowledge of it, being long extinct.

These works were a legitimate result of that theological spirit which prevailed among the northern colonists, and were followed by Newman's *Concordance of the Scriptures*, it being the next religious production of value in point of originality. It was compiled by the light of pine knots in one of the frontier settlements of New England, was the first of its kind, and, for more than a century, was admitted to be the most perfect, holding its place in public estimation until superseded by that of Cruden, which it suggested.

For some years the mind of the colonists was occupied with theology, a natural consequence of emigration arising from difference of religious opinion. Cotton Mather engaged extensively in the disputations of his time, and the number of his writings indicate the excitement of the period, as well as give evidence of his learning and industry. Although his productions are neither brilliant nor profound, he is to be regarded, to some extent, as the representative writer of his age, and was justly considered one of the most learned men of his time. He wrote with facility in seven different languages, was the author of no less than three hundred and eighty-three works, and was enrolled among the Fellows of the Royal Society, being the first American to obtain that honour. His writings, although disfigured with affectation, extravagance, and eccentricity, have a certain vigour not to be overlooked; and Franklin himself bears testimony to the merit of at least one of his productions. He candidly says of Mather's *Essays to do Good*,—"perhaps they gave me a tone of thinking that had an influence on some of the principal events of my life."

From this brief sketch of the most prominent American colonial writers down to 1700, it is evident John Eliot and Cotton Mather were the most remarkable. They differed widely in character, but each exercised a strong influence on the public mind. Writing with nearly all other New Englanders was, as a rule, a mere pastime: with them it was a semi-profession. They wrote and translated to secure an end. Mather was self-willed and

bigoted, as his writings show. Eliot was the very opposite of this. He confined himself to works valuable for the instruction they imparted, and his labours were productive of immediate if not of lasting beneficial results; which was not always the case with the controversial productions of his argumentative contemporaries. As a whole, so far as the results to permanent and general literature are concerned, the early theological writings of America are meagre. Their chief value consisted of a force and sincerity which tended to invigorate the minds of readers, thereby forming the basis of subsequent improvement in American theological essays; and although at times conducing to bigotry, they often, on the contrary, incited to habits of reflection and independent thinking.

CHAPTER II.

SECOND COLONIAL PERIOD.

When a people endeavour to create a literature of their own, they give some indications of nationality likely to be realized. States as well as authors live in books. The effort is in itself commendable, and seldom fails. The colonists from England, who settled what is now the most flourishing part of the United States, stand in strong contrast in this respect with the pioneers of many of the countries of South America, to say nothing of the French colonists of Canada, and even British settlers in India. We are not aware that a native of Brazil, during the period from 1700 to 1770, produced a book of merit; nor can we point to one of worth of the period by a native Anglo-Indian. It may be fairly stated, that of all the nations which have sprung into existence through the medium of European colonization since the discovery of America, the United States is the only one having a healthy literature of its own creation, and to which the general reader of this hemisphere is indebted for original works of a high order. We are aware a Brazilian, a Peruvian, and a Mexican, have produced single books of decided merit, but these by no means constitute a national literature, and are unknown except to the bibliographical student.

Force and purity of style characterized many American writings anterior to the Revolution. This, however, should not be a matter of special wonder. From the year 1700, until the breaking out of the American war, it was the custom, to a wide extent, of the wealthier colonists, to send their sons to Great Britain to be educated; and the rolls of Oxford and Cambridge of the period, as well as those of the London Inns of Court, contain many American names. Good institutions of learning, under excellent and capable instructors, also abounded in the Colonies, and many scholars graduated from these. Those youths who received their education in the parent country, returned to their native land with tastes more or less refined and cultivated, and their writings were in a greater or lesser degree English. It was fashionable then in the transatlantic provinces to imitate the productions of the wits of Queen

Anne's day, as well as those of the reigns of the first two Georges; and the periodicals of the time contain many contributions of no inferior order of merit. From this cause these writings were quite English; but it is gratifying to observe, they exhibited a manly vigour of thought not visible in the productions of the more Puritanical and puerile school. Many of them were political, and yet dashed with the peculiar religious views prevalent in the circles in which their authors moved, or the colonies to which they belonged. And although so tinged, they clearly exhibited a healthy and beneficial transition in thought from the theological to the more purely literary era of American authorship.

Taking the writers of the period in the order of chronology and talents, Jonathan Edwards is deservedly foremost. He was one of the first American authors who gave unequivocal evidence of great reasoning powers and originality of thought, and his strong analytic mind produced at least one metaphysical work "the world will not willingly let die." He displays in his writings that force of thought and keenness of argument only discoverable by great minds; and his works now rank among standard English metaphysics, having long since been pronounced by the most competent authorities to be of the first order. Dugald Stewart describes Edwards as one, "who in logical acuteness and subtlety does not yield to any disputant bred in the Universities of Europe;" and Hazlitt unhesitatingly says that he was "one of the acutest, most powerful, and, of all reasoners, the most conscientious and sincere." He may not unworthily be styled the first man of the world during the second quarter of the eighteenth century; and as a theologian, Dr. Chalmers and Robert Hall declare him to have been the greatest in all Christian ages.

When Richardson broke down the conventionalism of fiction in folios, his racy, natural pictures captivated alike distant colonists and subjects nearer the throne. This occurred in what we conceive ourselves justified in calling the second era of American literature, and tended to relieve the writings of the period of much of the heaviness of the Puritan spirit. In fact, as before intimated, this particular period, from various palpable causes, produced fruits of promise, giving hopes of future results not altogether unfulfilled. The works of Defoe, Steel, Swift, and Addison; of Prior, Pope, Gay, Parnell, and others of the period, were incentives to intellectual exertion in the New World; and there they found imitators of no ordinary ability. Judging from Franklin's brief account of the literary associates of his youth in Philadelphia, it is fair to conclude that the writings of the authors above-named furnished models for the compositions of himself and friends, and his own productions sustain the opinion. One of his early companions, whose style was thus formed, essayed a literary life in the parent country, and although in a fit of youthful folly he called down upon his head the merciless sarcasm of Pope, on the other hand he received the commendation of Charles James Fox. We refer to James Ralph, whose contributions to English literature, notwithstanding the sneer of the Bard of Twickenham, are too valuable to be entirely overlooked. Two lines of malicious sarcasm have tended to deter people from a fair examination of his works, which, if once made, would place him in a much better light than he now enjoys. He wrote a *History of England during the Reigns of William the Third and Queen Anne*, for which he was pronounced by Fox,

the statesman, "a historian of great acuteness and diligence;" which from such a person is valuable praise. Ralph enjoyed a literary pension from the British Government for a short time immediately preceding his death; and so far as our researches enable us to express an opinion, he was the only American upon whom such an honour ever was conferred.

Franklin, whose name is a "household-word" in England, was not only an author of some repute, but his exertions in behalf of science have placed his name high among those who have conferred lasting benefits on their race by their discoveries. His political and philosophical writings exhibit great clearness, as well as skill in composition; and but few have the temerity to deny merit to his admirable *Autobiography*, which is in fact one of the most pleasing compositions in the English language.

From Franklin's early youth until about the year 1770, general literature received much attention, and, did our limits permit, we could name not a few able poetical productions which belong to this era. They display taste as well as scholarship, and are wonderful improvements on the rhymes of the Puritan age.

At a time when miscellaneous and light literature attracted so much notice, it was not altogether unnatural a few practical minds should devote themselves to colonial history; and we take pleasure in recording the fact, inasmuch as the labours of these early American chroniclers have been of great value to subsequent historians, and may be considered as indicating a respect for the opinions and wants of posterity not usually entertained by the fathers of nations. In a literary estimate, the works of Cadwallader Colden may take the first rank among the first American historical writings. He produced a *History of the Five Nations* [of Indians] about 1745, which was republished in London in 1747, and a third edition was published in the same city in 1755. This author turned his attention to the nature of American plants, and supplied Linnæus with a well-written account of between three and four hundred American plants, about two hundred of which were for the first time described in the *Acta Societatis Upsaliensis*. He also wrote on philosophical subjects; and left a collection of unpublished papers, valuable as ante-revolutionary records — from which Mr. Bancroft obtained a vast amount of information not to be had elsewhere.

William Hubbard wrote a narrative *History of New England*, prior to 1700; but the work of Thomas Prince on the same subject, published in 1736 and in 1755, is of far more value. John Callender, a native of Boston, wrote a *Discourse on the History of Rhode Island in* 1739—now valuable for its facts—which was republished in 1838, with notes, and which must ever be considered as the best contribution extant to the early history of the State to which it relates. A full and entertaining *History of King Philip's War* was written by the famous Captain Church in 1716, which reached a second edition in a short time, and is now a standard authority on early New England affairs, particularly during King Philip's time. David Brainerd, who devoted himself to the work of an Indian Missionary, while so engaged, recorded faithfully his adventures, together with his observations on the manners and peculiarities of the various tribes with whom it was his fate to associate. His *Diary* has proved valu-

able to more than one historian, and must remain a faithful picture of the savages inhabiting New England at the early settlement of the country.

Although the austere religion of the Puritans forbade dramatic representations under penalty of severe punishment, it did not succeed in crushing out the desire for the literature of the stage. Some efforts at dramatic composition were made even in New England during the period of which we treat; but nothing perfect was produced there. Thomas Godfrey, a native of Philadelphia, a son of the inventor of the Mariner's Quadrant, wrote the first finished play produced in America. It was composed during a three years' residence in North Carolina, and although deficient in force as a whole, possesses many redeeming points. It is called the *Prince of Parthia*, and considering the author's mathematical predilections, and that he received but a common education in his mother tongue, is quite a creditable performance. Godfrey's father was a companion of Franklin when a youth in Philadelphia, and is mentioned in the *Autobiography*.

This concludes our summary of American literary achievements in this period, and if nothing decidedly *great* was produced, the fruits are at least valuable for the progress displayed towards excellence. A clear style grew into favour. Terseness and purity of expression are observable in nearly all the essays of the time; and as we approach the exciting dawn of the Revolution, we cannot conceal our surprise at the force displayed in very many of the political pamphlets then published. These compositions show another advance-step in American letters, and they assuredly did much towards a habit of independent thinking among the people.

So ends our colonial survey; and, taking the brief period into consideration, together with the duties incident to conquering a wilderness from savages, these contributions to a national literature are as meritorious and numerous as those of England in the corresponding period of her early history.

CHAPTER III.

FIRST AMERICAN PERIOD.

MANY causes were at work at the commencement of the American Revolution, which tended to foster and develope both literary and oratorical talents. The oppressions of the mother country were not the least of these. At first silently endured, then received with murmurs of dissatisfaction, they finally produced boldly-expressed and manful opposition. Speeches and pamphlets were the weapons of attack; and in looking over the writings of those who took the Colonial side of the controversy, our admiration is fairly won by the high literary ability displayed in the written appeals to the parent country. Lord Chatham declared the public documents of the principal statesmen of the American Revolution to be equal to the finest specimens of Greek or Roman wisdom. A clear and forcible form of expression characterises nearly all

these productions, and in many cases they are written with graceful ease. Men who wrote so well possessed a cultivated taste, and the skill they displayed in composition may fairly be attributed to wise mental training, native talents, and that love of the good in literature so widely prevalent among the wealthier colonists during the second period of American literary history. From about 1770 the spirit of eloquence began to give evidence of its existence, and the writings of the country at once assumed a more decidedly national type than ever before. The transition from the stiffness of the Puritan era to the elegance of Queen Anne's age, is not more marked than that from the Georgian to the first American period. Among the most noticeable of the political writings of the time, and these cannot be overlooked in a survey of American literature, are those of James Otis. Some of William Livingston's pamphlets are tersely and smoothly written; and William Dickinson's *Farmer's Letters* were so highly esteemed, both for their able vindication of the rights of the colonists, their force of argument, and dignity of style, as to be republished both in England and France. He was the author of the *Address to the Inhabitants of Quebec*, issued by Congress in 1774; and also, of the first *Petition of Remonstrance to the King*, adopted by the same body.

As might be expected, a vigour was infused into both the speeches and writings of this period. The conventionalism of European literature was cast aside, and the first-fruits of a national American literature were produced. For a time political pamphlets necessarily occupied the field; but, dry as such works always are to the mass of readers, they were extensively read; and, treating as they did upon subjects affecting the individual liberty of every American, they went far to sever that reliance upon Europe for literature which American authorship is now so rapidly consummating, although reluctantly acknowledged by Europeans. As the occasion which gave existence to these pamphlets was removed, works of a more enduring character appeared. One or more narratives of adventure and suffering during the war of the Revolution were published between 1776 and 1790, which will always be valuable for their accuracy of detail and descriptions of the times. In 1791, Bartram, the botanist, published a volume of travels through North and South Carolina, which Coleridge describes as "a work of high merit in every way;" and it may properly be considered as among the valuable contributions to the American literature of this period.

William Henry Drayton of South Carolina, a conspicuous actor in the Revolution, wrote several pamphlets on the politics of the age; and left, at his decease, a large quantity of well-arranged materials for a history of the Revolution, subsequently published under the editorship of his son.

Thomas Jefferson, the third President of the Republic, while yet a young man, published in pamphlet form, *A Summary View of the Rights of British America*, which passed through several editions in London under the supervision of Edmund Burke. His *Notes on Virginia*, a work of interest and merit, was published in Paris in 1784, since which period it has passed through many editions both in Europe and America, ranking at present as a standard authority. And his varied and extensive correspondence is among the most reliable contributions to American political history, containing valuable suggestions, profound observations, and sagacious remarks on men and things.

In a survey of the writers of this period it would be unwise to omit the honoured name of Washington, whose many writings evince a skill in graceful composition not common to military men. The majority of what he wrote was produced in the camp, surrounded by the din of arms, and much of it when he was weighed down by public cares; and yet, it all is remarkable for clearness of expression, force of language, and a tone of lofty patriotism. It is the custom with some persons to speak slightly of his writings, or with an air of compassionate condescension; but we regard them, even in a literary view, as second to none of a similar character of whatever nation, and think they display an intellect which, had it been devoted to literature, would have made for itself a position by no means of a merely secondary character.

Josiah Quincy, jun., of Boston, commenced his career as a political writer in his 23rd year, attracting the notice of the government by the force and logic of his writings. In 1774 he published a pamphlet entitled *Observations on the Act of Parliament commonly called the Boston Port Bill, with Thoughts on Civil Society and Standing Armies*:—a work of sound reasoning and much literary merit. In the same year he sailed for England, where he associated with many of the literary men of the age, corresponding at the time with his friends at home on almost every topic of interest. These letters were published after his death, and constitute the first collection of American epistolary compositions deserving commendation.

Capable writers were not wanting to occupy almost every field in the realm of letters; and as early as 1784, Jeremy Belknap published, at Philadelphia, the first volume of a credible and attractive *History of New Hampshire*. He also wrote an amusing Apologue entitled *The Foresters*, which abounds in genuine humour. And in 1794, he published the first volume of a carefully-written and pleasing series of *American Biographical Sketches*, which form the foundation of an American Biography, and evidently suggested Mr. Sparks' more able and valuable work.

It is worthy of note that to this period of American literature belongs a name known wherever the English language is spoken—that of Lindley Murray, the Grammarian. He was born in Pennsylvania, educated in New York, and his first literary effort was a work on the *Power of Religion on the Mind*, which passed through seventeen editions in the author's life-time, six of which were published in England. He wrote his celebrated *English Grammar* for the use of the pupils at a female boarding-school near York, in England, and first published it in 1795. This incident directed his attention to the defective character of English School-books generally, which he set about to remedy, and soon after issued his widely-known *English Reader*: being extracts from the best authors in the language, arranged and selected for the use of schools. To him the British people are indebted for the best grammar of their language then published, and his practical mind first perceived and remedied the defective character of English School-books.

In very many instances literary reputation at this period was incidental to the politician. The cases of John Jay and Alexander Hamilton are examples. Both of these gentlemen wrote for the *Federalist*. Hamilton, however, contributed the majority of the papers which compose that work—a work "that exhibits," says the *Edinburgh Review*, "an extent and precision of informa-

tion, a profundity of research, and an acuteness of understanding, which would have done honour to the most illustrious statesman of ancient or modern times." But Jay's fame does not rest entirely upon his writings in the *Federalist*. He wrote the *Address to the People of Great Britain*, issued by Congress in 1774, as well as other political papers now of historic interest. His correspondence constitutes a valuable addition to American historical literature.

Of the writers on the Science of Medicine, Dr. Benjamin Rush is conspicuous. Chalmers, in his Biographical Dictionary, says, he "threw more light on the true character of gout, dropsy, and consumption of the lungs, than is to be derived from the investigations of any other author." He also wrote a valuable work on the *Diseases of the Mind*, now a standard authority with Medical men in America, and particularly interesting to the general reader for the ease and purity of its style, and the many personal anecdotes with which it abounds. At least one other medical author of note belongs to the same period. As early as 1771, James McClurg, a native of Virginia, published in London, an *Essay on the Human Bile*, so ably written, says one authority, "and expressed with such beauty and classical elegance of diction, that it was translated into many of the languages of Europe."

Although the period immediately succeeding the subsidence of the Revolutionary excitement was strongly tinctured with a tendency to political discussion, a few able minds freed themselves from this influence, and turned to the study of natural philosophy and physical science. Of these Dr. Benjamin Smith Barton, Professor of various branches of learning in the University of Pennsylvania, merits especial notice as the author of the first American elementary work on Botany, and as being the first person to direct attention to the Indian tribes of America as a subject of ethnological investigation and study. In this scientific field he is the pioneer of Duponceau, Squier, Bartlett, and others, and his *New Views of the Indian Tribes* was the first contribution to the ethnological literature of America.

Theology found able exponents and defenders from 1770 to 1820. President Edwards, a son of the celebrated author of the *Essay on the Freedom of the Will*, wrote a profound *Dissertation on Liberty and Necessity*, and a treatise entitled *The Salvation of all Men Examined and Explained;* both of which works display a high order of intellect in their author.

Among the writers of less note in the same field of investigation, Joseph Bellamy and Samuel Hopkins are conspicuous. But a greater than all was President Timothy Dwight, the successor of Edwin Stiles in the Presidency of Yale College. His *Theology Explained and Defended* still exercises a considerable influence on religious opinion in America, and the circulation it has attained in England indicates a respect for its teachings at once suggestive of its sound reasonings and pure Christian doctrines. There were many other theological authors during this epoch, but the mention of one other name must suffice. Bishop White's writings are numerous, ranging from Lectures on various subjects connected with the Church of England discipline to *Memoirs of the Protestant Episcopal Church in the United States of America*. This contribution to the history of Episcopacy in America deserves to be better known in England, as it explains in concise terms the present organization of the Anglican Church in the United States, a subject not generally un-

American literature, at least contributed much to improve the style of American authors generally. Barlow wrote a heavy epic of indifferent worth, called *The Columbiad;* and a pleasing poem, which describes, in an easy-flowing verse, the virtues of a New England dish, known as *Hasty Pudding.* His works are all inferior to those of William Clifton, a young Philadelphian, who wrote a few songs imbued with the true spirit of lyric poetry. Timothy Dwight, before referred to as a theological writer, was the author of a number of miscellaneous poems, one of which received the praise of Cowper.

As a curious fact in American literature, it is not inappropriate to mention, that one of the best poetical satires of this period was written in London under circumstances of distress. Thomas Green Fessenden, a native of New Hampshire, visited the capital of Great Britain, in 1801, for the purpose of introducing a new hydraulic machine; but failing in his aims, was reduced to want. With that tact so eminently possessed by his countrymen when thrown upon their own resources in desperate cases, he conceived the idea of writing a satire, and took for his subject the Medical Profession and the Metallic Tractors of Perkins, a galvanic application for the cure of all diseases, then much in vogue, and much ridiculed by the profession. His work—*The Terrible Tractoration*—doubtless still fresh in the memory of many now living—was a decided success, brought relief to its author, and passed through several editions in London, besides being republished in New York.

No American devoted himself exclusively to literature as a profession until 1793; and this fact, in fairness, should not be lost sight of when criticising the literature of America prior to that date. Charles Brockden Brown was the first purely professional American author. He wrote well on all subjects connected with *Belles Lettres;* but his chief productions, and those on which his fame mainly rests, are two works of fiction, entitled *Wieland* and *Arthur Mervyn.* They are written with considerable elegance and taste. As the first of American creations in the world of romance, they early attracted attention in England, where they were favourably received, and now constitute a part of Bentley's Library of Standard Romance. Many of Mr. Brown's descriptions of American forest life and scenery, are equal to anything of the kind in Mr. Cooper's writings; and his works are so honourable to the American novel literature of this period, as to make it unnecessary to refer to other in the same department of letters.

It is within our power to name other writers of this period, whose works in the various branches of literature confer honour on themselves and country; but we regard the above enumeration as sufficiently indicating the advance of American literature, in the fifty years under consideration, to make it a work of supererogation in us to extend the list.

Before concluding our observations, however, we offer, in support of our arrangement of American literature into four distinct eras, and more particularly in support of our theory that American national literature properly dates from about the Revolution, the opinion of Charles Brockden Brown on the power of English books on American thought during the time of the Colonies. In speaking of this, he in substance says, that English prejudices then possessed an unusual degree of strength; but that many of the views imbibed from English works during the days of the Colonies were completely re-

moved by the Revolution. That such was the case in a few instances is quite apparent; but the mass of the people did not participate in the movement. Still they were prepared for it in some degree, and a small number of authors, who early had hopes of building up a national literature, took advantage of the auspicious moment, and, by creating a style of thought entirely American, although they acted individually, succeeded in laying the foundation of a structure destined to become, at no distant period, a beautiful temple of mental delights. At first these pioneers had immense difficulties to encounter, from a want of appreciation at home and from ridicule abroad; but they accomplished their commendable and laborious undertaking, and had fairly launched American literature upon its national career at the dawn of the year 1820. By that time they had dispelled the clouds of doubt as to the capability of the American mind for achievements in literature, and to some extent diverted public thought from Europe as an exclusive source of mental supplies. Subsequent writers have taken up authorship as a profession, and in our next chapter we purpose to examine and state the progress of American literature from that time to the present.

CHAPTER IV.

SECOND AMERICAN PERIOD.

Brief as is our survey of American literature as set forth in the preceding chapters, enough, we conceive, has been said to exhibit the gradual advancement of Americans in this important science during the period from 1620 to 1820, or from the earliest settlements made by Englishmen in America down to the end of what we consider the first period of American national literature. The decided progress from 1770 to the last-named date, raised hopes of further achievements already fulfilled, and the era we are now about to consider will be found prolific in works of worth designed to enrich, instruct, or amuse the mind of man.

From the above date until now, American literature has made wonderful advances towards excellence, forcing itself into notice and challenging respect throughout the world. In the thirty-seven years constituting this period the expansion of mind has been commensurate with the political, social, and commercial progress of the nation; and American literature may now be regarded as having a permanent existence. No subject of human knowledge has been overlooked. Many European works have been elucidated by the fresh light of American mind. A new style of thought has been developed, new scenes have been opened to the world, and Europe is receiving compensation in kind for the intellectual treasures she heretofore sent to America.

An examination of the works of American authors who have written since 1820, shows an exemption from puerility not to be expected by those who are in the habit of forming their opinions of American literature from the criticisms which embellish most Reviews.

Great have been the achievements of American historical writers in the period under consideration. Prescott and Bancroft at once attained rank among the ablest historians of the age. Their works are among the most captivating compositions of the present century, and have added to the character and permanency of their country's literature.

Several local histories of more or less value appeared between 1820 and 1830, together with one or more historical works of a national character. In the decade under consideration Washington Irving first essayed history; and, in 1828, published his pleasing narrative of the *Life and Voyages of Christopher Columbus*. The elegance with which the story of the great navigator is told, procured it immediate popularity, and encouraged the author to further exertions of the kind. Soon after he produced *The Voyages and Discoveries of the Companions of Columbus*, written in the same delightful style; and so widely was this work read in England, that its author received three thousand guineas for it from his London publishers, who, it may be remarked, a few years before declined the *Sketch Book*, on the ground that it did not possess sufficient merit to insure its success as a publication.

Another work, not so meritorious however in a literary point, but historically valuable, was published in 1832. Samuel G. Drake, of New Hampshire, who had edited, in 1824, an edition of Captain Church's History of King Philip's War, produced at the period named a comprehensive *Indian Biography*. This was followed, in 1833, by his *Book of the Indians of North America*—a work exhibiting vast research as well as great familiarity with the subject. As it was the first attempt to give an impartial account of the North American Indians, without respect to any one tribe, it rises to the dignity of history; and, having passed through eleven editions, it has just claims to be ranked among standard works, notwithstanding the unambitious style in which it is written.

As early as 1826, Jared Sparks, whose name is honourably connected with American literature, began to collect the *Writings of Washington*, which were subsequently published, and are now so valuable as a contribution to American history; and in 1828, he published the *Life of John Ledyard*, the American traveller, that being the first of his American Biographies. It soon passed through several editions, was translated into German, and published both in England and Germany. Mr. Sparks by these works became a pioneer in American literature of this description; and it is to his credit, as a narrator of history, that his Biographies are mainly drawn from the writings of the persons whose lives he has written. Since he turned his attention to this branch of letters he has enriched American literature by the publication of the *Diplomatic Correspondence of the Revolution*, the Biographies (written by himself) of Gouverneur Morris, Ethan Allen, Benedict Arnold, Father Marquette, De la Salle, Count Pulaski, John Ribault, and Charles Lee. And to many undertakings of great worth, may be added the *Life and Works of Benjamin Franklin*, published in 1840; and, in 1854, the *Correspondence of the American Revolution*, edited from the original manuscripts. His writings are distinguished by clearness and force, and exemption from extravagance of fancy and redundancy of words.

As a worthy companion to the Biographies by Mr. Sparks, the *Life of Elbridge Gerry*, one of the Signers of the Declaration of Independence, by

James T. Austin, published in 1828, deserves special notice. It is a very excellent book, beautifully written, and exceedingly free from exaggeration.

Before the termination of this decade, a second edition of Holme's American Annals, enlarged, with a continuation, was published; and in the same period, Flint's valuable *Geography and History* of the Mississippi valley appeared.

Between 1830 and 1840, some of the best historical works yet produced in the United States were written, and issued to the public. Mr. Bancroft's first volume of the *History of the Colonization of the United States* was published in 1834, and met with immediate success. His second and third volumes were published respectively in 1837 and in 1840. Fennimore Cooper's able *Naval History of the United States* was published in 1839, and however much prejudice may impugn its accuracy, no candid mind will deny its literary worth.

These masterly contributions to American literature were followed by many minor works our space will not allow us to name; and in 1843, Mr. Prescott gave to the public his accurate and elegantly written *History of the Conquest of Mexico*, and in 1847, his *Conquest of Peru*. These works at once attracted attention in Europe, and are justly esteemed among the ablest historical productions of the age. His *Ferdinand and Isabella*, and *Philip the Second of Spain*, the last published in 1856, have given durability to his fame.

In fulfilment of his original design, Mr. Bancroft has brought his narrative down to a recent period; thus giving it the character of a true and comprehensive History of the United States, from the colonization to the present time, and enriching his country with a work that would honour any literature.

Washington Irving has recently employed himself upon a *Life of Washington*, which bids fair to be the most popular work of its kind yet written; and Mr. Motley has produced a *History of the Dutch Republic*, not inferior to the writings of Prescott or Bancroft. This young author has qualifications which give promise of greater eminence than he has yet achieved. Mr. Hildreth has written a meritorious *History of the United States*, valuable for its statements of facts and its general accuracy.

The very best *History of Spanish Literature* yet written is that by Mr. Ticknor. As an intellectual achievement it ranks with the best productions of our time, and is everywhere regarded by scholars as a standard authority. It was published in England in 1849, since which it has passed through one or more editions, notwithstanding its special character, and has been translated into several continental tongues.

This hasty and rather imperfect notice of several of the historical works of this period, will satisfy the most sceptical, that among living historians those of America are not inferior to the best European writers in the same branch of literature, either in respect of style, accuracy, descriptive painting, or philosophical deductions.

We have elsewhere mentioned Charles Brockden Brown as not only the first American who devoted himself to literature as a profession, but as the first American novelist. The success of his works early prompted others to attempt the same difficult path of authorship, and with what result is shown in the popularity of the writings of Cooper, Bird, Kennedy, Irving, Hoffman, and others. Cooper may justly be termed the most successful novelist

America has yet produced, his works being considered essential to every well-selected library. His first purely national novel—*The Spy, a Tale of the Neutral Ground*, was published in 1821, and its patriotic tone, admirable descriptions, and well-sustained narratives, obtained for it a popularity rarely equalled by a work of fiction. This was followed by the *Pioneers*, the *Pilot*, the *Last of the Mohicans*, and the *Prairie*, works which have made the name of Cooper familiar throughout the civilized world. In the *Pilot* he painted sea-life with a force and truthfulness never before depicted, invested his vessels with an actuality truly miraculous, and opened the ocean to the adventurous in literature. His *Pioneers* and *Last of the Mohicans* are not less remarkable for originality. They form the pillars of the literature of the forest and the prairie, and must ever please by the interest attached to their heroes.

In the period now under consideration Miss Sedgwick published several forcible novels illustrative of American life, *Hope Leslie*, and the *Linwoods, or Sixty Years since in America*, still maintaining a respectable rank among the fictions of the day. The female novel writers who have followed her are numerous, and the majority of them are extensively known in Europe. Miss Maria McIntosh has not been heralded to the world in florid language; but her captivating novels of *Praise and Principle*, *Conquest and Self Conquest*, and *Charms and Counter Charms*, will be read when much of the popular froth of the hour is consigned to forgetfulness. Her sensible and graphic story of the *Lofty and Lowly* is a picture of the life of the slave and the master in the Southern States her education qualified her to draw, and has the merit of being more truthful than any slavery novel we remember to have read. It is exempt from the stage embellishments so peculiar to the staple of its class.

A still more powerful female writer than Miss McIntosh, is Mrs. Lydia Maria Child. In the year 1824, she published a New England story, entitled *Hobomok*, which prompted her to further efforts in the same line, and she soon after produced a Revolutionary tale, called *The Rebels*. This introduces many prominent historical personages to the reader, and the nature of the work admitting of occasional speeches, the fair authoress produced one or more of great brilliancy. One of these, which she places in the mouth of the renowned James Otis, is so vigorous and ably sustained that it is often quoted as the actual production of that statesman; and, as such, has been incorporated into several popular American School Books.

Mrs. Stowe is well known to European readers. Her story of *Uncle Tom's Cabin* is probably the most popular fiction of the present century, and must ever mark an era in American literature. It has been so highly praised in Europe that we deem a quotation from a reviewer superfluous. *Dred*, her second slavery romance, did not meet with equal favour, but its literary merits probably surpass those of *Uncle Tom's Cabin*.

Among the prominent female fiction writers of this period it is proper to mention Mrs. Kirkland, Mrs. Southworth, Miss Leslie, and the Misses Warner. The *New Home* and *Western Clearings* of the former are well known to English readers. Mrs. Southworth's *Mark Sutherland* has been republished in this country, Miss Leslie's *Stories* are familiar to many, and the *Wide, Wide World*, *Queechy*, and *Dollars and Cents*, by the Misses Warner, have a

popularity in Great Britain only inferior to that enjoyed by Mrs. Stowe's first successful romance.

The works of Hawthorne were slow to reach a wide-spread circulation; but their unusual merit has secured them at last a permanent place in modern literature. His *Scarlet Letter*, *House of the Seven Gables*, and *Blithedale Romance*, are among the most delightful compositions of the age; and so widely has this been acknowledged, that his works are as familiar now to continental readers through the medium of translations as they are to the people of Great Britain.

Among recent novels based upon foreign adventure, the *Omoo*, *Typee*, and *Mardi*, of Melville, possess irresistible powers of captivation. Poe's *Tales of the Grotesque and Arabesque*, evince a lofty genius, acuteness of observation and masterly skill in composition. These have a European reputation equa to Hawthorne's works. And, although Longfellow is better known in Europe as a poet than as a novelist, his *Hyperion* and *Kavanagh* fully establish his success as a writer of fiction.

W. Gilmore Simms, a southern gentleman, who has devoted himself exclusively to literature as a profession, has written several successful fictions; and it is apparent to all who may take the trouble to investigate the subject, that to his works Mrs. Stowe is largely indebted for the materials of her famous romance. His first contributions to American literature date as far back as 1825, since which period he has given to the world upwards of twenty volumes, mostly however of a miscellaneous character. His style is vigorous and flowing; and his narrative never descends to positive dulness. The *Yemassee*, a novel descriptive of early Carolina adventure and Indian life, is probably the best of his numerous romances, and must maintain a prominent place amongst American works of fiction.

In descriptions of domestic life among the ancients, William Ware has been eminently successful. In 1836 he published an elaborate and pleasing work of this description, entitled *The Fall of Palmyra*, and in 1838, *Probus, or Rome in the Third Century*. These were soon reprinted in England, under the titles of *Zenobia* and *Aurelian*, respectively, changes indicating a dishonest motive in the publishers; but which, strangely enough, have since been adopted by Mr. Ware. As literary performances these books are not inferior to those of Mr. Lockhart of the same nature, and we believe nothing superior to them has been achieved since their publication.

Thomas S. Arthur, another writer of fiction, whose subjects are of a domestic nature, and peculiarly American, deserves mention for the moral influence his unpretending writings are now exercising among a class of readers, both on this and on the other side of the Atlantic. Many of his books have been reprinted in England, not for their extravagance of description, or appeals to passion, but on account of their moral value, and their truthfulness to nature. His *Ten Nights in a Bar Room*, *Tired of House Keeping*, and *True Riches, or Wealth Without Wings*, have all the beauty of *Sandford and Merton*, and inculcate lessons of the soundest philosophy.

Other Americans have produced excellent novels since 1820; but those mentioned are probably the representatives of their distinctive classes, and therefore further reference in detail is unnecessary.

This would seem to be the age of *travel-literature*, judging from the many narratives now published, and the general excellence of such works. No nation has given more good books of this class to the world since 1820 than the United States, considered either with regard to style or information.

The veteran traveller and author, Henry Rowe Schoolcraft, published in 1820 a pleasing narrative of explorations made on the Upper Mississippi and Missouri, in 1819, which was soon republished in London in Sir Richard Phillips's Collection of Voyages and Travels. Since that period Mr. Schoolcraft has done as much as any person living in exploring the North-Western Territory east of the Rocky Mountains; having among other achievements, as early as 1832, successfully penetrated to the source of the Mississippi, at Itasca Lake. The account of his adventures and discoveries, entitled the *Exploration of Itasca Lake, the Actual Source of the Mississippi*, was published in 1834. It is a most entertaining and instructive narrative of wilderness adventure and discovery.

Timothy Flint, in 1826, published a narrative of a *Residence and Wanderings in the Valley of the Mississippi*, which may be regarded as the precursor of this species of Western literature.

Want of space admonishes us to be brief in our notices of travellers, and we are obliged to be satisfied with a hasty reference to the most prominent. It is only necessary to name John Lloyd Stephens, in order to recall his many pleasing volumes to the intelligent reader. His first work, *Incidents of Travel in Egypt, Arabia Petræa, and the Holy Land*, was published in 1837, meeting with remarkable success, not only in the United States, but in Europe. His travels in Greece, Turkey, Russia, and Poland appeared in rapid succession; and in 1841, his great work on Central America was published at New York, and, like its predecessors, was at once successful. Mr. Stephens was the pioneer in Central American exploration, setting the example to E. G. Squier and others, who have so thoroughly explored that most interesting country. Mr. Squier's works are of a more scientific character than those of Mr. Stephens, and furnish us with descriptions of a country not explored by the latter. His observations take a wide range, including everything worthy notice; and his *Nicaragua, its People, Scenery, and Monuments*, first published in 1852, induces us to believe him to be the best informed on Central America of any man now living. His first visit to Nicaragua was in 1848. In 1853 he again visited parts of the same country and the States lying further north, and shortly after published his adventures, entitled *Honduras, Historical and Statistical*. Both these valuable books have had an extensive sale in Europe.

Since the publication of Lewis and Clarke's, and Long's Narratives of Adventures on the Plains and Rocky Mountains, Washington Irving has written his admirable books descriptive of the exploits and explorations of Mr. Hunt and Captain Bonneville, the first of these works being widely known as *Astoria*. The Government has since then fitted out several expeditions to those regions, and their success has added much to this description of literature. Colonel Fremont's various Reports of his discoveries and adventures possess considerable literary merit, and always amply compensate the reader.

Other travellers and navigators despatched on distant and hazardous undertakings, by either public or private munificence, have produced entertaining

and instructive books on remote and comparatively unknown parts of the world; and among these may be mentioned Lieut. Lynch's *Exploration of the Dead Sea;* Herndon's *Exploration of the Valley of the Amazon;* Dr. Kane's narrative of *The United States' Grinnell Expedition in search of Sir John Franklin;* and also the *Arctic Explorations in the years* 1853—1855, by the same adventurous spirit. Captain Wilkes's *Narrative of the United States' Exploring Expedition,* under his command, is a comprehensive and valuable work, full of scientific and general information respecting the oceanic countries visited by the expedition. It is a national monument of which any people might justly be proud. And in the same category may be placed Com. Perry's *Narrative of an Expedition to Japan.* The large edition of this work, published under the auspices of the American Government, is one of the most finished books ever printed. A popular and skilful abridgement of it, entitled *The Americans in Japan,* by Dr. Robert Tomes, of New York, has also been published. It is a most captivating narrative, given with spirit, by a vigorous and charming writer. Dr. Tomes is likewise the author of a graphic description of Isthmus adventures during the first excitement of the California gold discoveries.

An early writer of travels deserving mention was Dr. Ruschenberger. In 1835 he published a volume, entitled *Three Years in the Pacific, by an Officer of the United States' Navy;* and in 1838 a still more valuable *Narrative of a Voyage round the World, including an Embassy to Siam and Muscat,* which last was republished by Bentley, in a mutilated form, soon after its appearance in America.

Among the best works descriptive of Europe produced in this period, are Slidell Mackenzie's *Year in Spain,* first published in Boston in 1829, and afterwards in London; Willis's *Pencillings by the Way,* Colton's *European Life and Manners,* Miss Sedgwick's *Letters from Abroad to Kindred at Home,* Mrs. Sigourney's *Pleasant Memories of Pleasant Lands,* mainly descriptive of England and Scotland, published in 1842, and which doubtless suggested the title of Mrs. Stowe's *Sunny Memories;* and lastly, Sanderson's *American in Paris,* and Hillard's *Six Months in Italy.* Both these works have been republished in England, and one of them in Paris. Mr. Hillard's work has been commended by Earl Stanhope (late Lord Mahon), who says the author "is an accomplished gentleman of Boston, in the United States, who has published an excellent account of his impressions of Italy, bringing to the subject a rich store of classical knowledge, a graceful style, and a remarkable abstinence from any common-place exaggerations."

A long list of works on other countries might be named; but it is believed a simple reference to a few will suffice. Dana's *Two Years before the Mast,* Gregg's *Commerce of the Prairies,* Curtis's *Nile Notes of a Howadji,* Kidder's *Sketches of Brazil,* Headley's *Letters from Italy,* Kendall's *Narrative of the Texan Santé Fé Expedition,* Norman's *Ruined Cities of Yucatan,* Train's *American Merchant in Europe, Asia, and Australia,* J. B. Taylor's *Lands of the Saracen,* Dix's *Winter in Madeira,* and Brace's *Home Life in Germany,* are among the many good books of this class published within the last twenty years.

That America has already produced poets of no ordinary merit will not

be disputed. Mr. Alison asserts that much of the poetry of America is truly beautiful; and those who are acquainted with the best American writings of this class will doubtless agree with him. To produce true poetry, a man must possess the highest genius, he must be a creator, and in this respect he differs from the soldier, whose superior he is. "I would rather be the author of that poem," said General Wolfe, as he repeated the last stanza of Gray's Elegy, "than take Quebec to-morrow;" and he thus unconsciously bore testimony to the superiority of the poet to the man of arms. America has not yet produced a poet like Gray, but she has given birth to many true sons of song.

James K. Paulding and John Pierpont both published several poems of merit prior to 1820; but since that period they have produced their most admired lyrics. A superior poet, however, to either of these, is Richard H. Dana. His first poetical work, *The Dying Raven*, was published in 1825; and in 1827 appeared his *Buccaneer*, his most elaborate composition, and the one upon which his fame as a poet mainly rests. James A. Hillhouse, one of the ripest scholars of his time, wrote, in 1824, a sacred drama, entitled *Hadad*, which competent critics consider unrivalled. He had previously written a poem in blank verse, on the *Judgment*, the merits of which the lovers of true poetry cheerfully acknowledge.

These productions were followed by an elegant *Ode to Shakspere*, written by Charles Sprague, now regarded by many as "one of the most vigorous and beautiful lyrics in the English language." In 1829 the same author produced a finished poem in the heroic measure, entitled *Curiosity*, which was published in Calcutta, as the work of a British officer, with the simple substitution of English for American names, and in this form was reprinted in England, and praised by the critics. Mr. Sprague has since written several pensive lyrics, among which the *Winged Worshippers* and *The Two Brothers* may be specially mentioned. Miss Hannah F. Gould is the authoress of a number of exquisite poems, mostly illustrative of the affections, and all imbued with a deep religious feeling. The most forcible and decidedly meritorious poem produced in the early part of this period, is the *Thanatopsis* of Bryant, written at the age of nineteen, and first published in 1821. Since that period, Mr. Bryant has written much and well. His poems, *To the Evening Wind*, *June*, *To a Water Fowl*, and *The Battle Field*, fully sustain the promise raised by his more youthful works. *The Culprit Fay*, by Joseph Rodman Drake, exhibits a richness of fancy and command of language rarely possessed by an author; and his address to the *American Flag* is a spirit-stirring lyric. Maria Brooks—better known as *Maria del Occidente*—produced a poem, published in London in 1833, which Southey regarded as one of the most remarkable productions of female genius.

Fitz-Greene Halleck's *Marco Bozzaris* and *Ode to Burns*, Percival's *Deserted Wife*, Brainard's *Niagara*, Wilde's *My Life is like the Summer Rose*, Morris's *Woodman, spare that Tree*, Dunn English's *Ben Bolt*, and *Home, Sweet Home*, by Howard Payne, are extensively known in Europe, and as extensively admired. We do not call attention to the last-named song as a specimen of a faultless lyric, but simply to the fact of its American origin. It was first sung at Drury Lane Theatre, in Mr. Payne's opera of *Clari, or the*

Maid of Milan, and its popularity was so great that upwards of one hundred thousand copies were sold within two years, and the publisher realized more than two thousand guineas profit.

It is not denied that America has not yet produced a great epic poet; but she has produced poets both male and female of a high order of talents. Some of Pinkney's and of Hoffman's songs are equal to many of Moore's; and several of Mrs. Sigourney's poems will not suffer by comparison with those of Mrs. Hemans. Whittier has a delicate fancy, and many of his compositions breathe a pure spirit of poetry. Holmes has written many exquisite lyrics, as have also Read, Tuckerman, Prentice, Hoyt, Gallagher, Stoddard, Boker, Morris, and Poe. The poems of the last mentioned partake of the peculiarities everywhere visible in his strong Saxon prose; and his *Raven* is without a compeer. Buchanan Read, although a young man, has written much that will endure the test of time. His *Closing Scene* has been pronounced by the North British Review equal to Gray's Elegy; and his *Passing the Icebergs* is warmly praised in a review of Lord Dufferin's *High Latitudes*, in the *Quarterly Review*, of October, 1857.

There are three American humorous poets whose productions are unrivalled by those of any other living writers. These are Oliver Wendell Holmes, John G. Saxe, and James Russell Lowell. The verses of the first possess much of the peculiar wit for which Thomas Hood was so famous. The story of *Miss Mc Bride*, by Saxe, sparkles with pun and satire; while much of the poetry in Lowell's *Bigelow Papers*, which are written in the peculiar phraseology of New England, is replete with sentiment, wit, and humour.

The sacred poems of N. P. Willis abound in descriptions and sentiments worthy their subjects, exhibiting in their author a perfect mastery of versification, an unusual appropriateness of expression, and the heart of the true poet. There is a tone of religion in these effusions which goes at once to the heart, and when read they are rarely forgotten.

Of American poets now living Longfellow is the most popular in Europe, and the many editions of his works published in Great Britain attest the high estimation entertained of him. Go where you may, some one is to be found who reads his pleasing poems—and this mastery over the good in our nature may properly be considered as an evidence of something approaching to greatness.

Before closing this reference to American poets we take pleasure in referring to the productions of Charles G. Leland, whose poems reveal a freshness as of nature. He is a graceful writer, and is extensively known by his many and most valuable contributions to the *Knickerbocker Magazine*, and they are among the ablest writings which have appeared in that excellent journal. A collected edition of some of these contributions to American *Belles Lettres* appeared at Philadelphia in 1855, under the title of *Meister Karl's Sketch Book*, which at once became popular. Mr. Leland has translated Henry Heine's Reisebilder, in which he has shown such a delicate appreciation of the marvellous beauty of one of Germany's greatest poets—such a thorough mastery of the German idiom—and such a poetic talent—that the translation alone stamps him as a true poet. In fact, the acquaintance of England and America with Germany's great poet dates only since the publication of Mr. Leland's

translation. His acquaintance with Jean Paul, as indicated by *Meister Karl's Sketch Book*, has imbued his mind with the spirit of the humorous poets of Germany, and led him into a style of thought not peculiar to any other American writer.

It is worthy of remark, that although a melancholy tone pervades the majority of American poetry, it is rarely blemished by immorality, or a spirit of morbid dyspeptic sentimentality. True, much of it is far from grand or inspiring—it lacks grasp and originality of thought. Yet, notwithstanding its mediocre character, it still possesses the power to please the mind and improve the heart.

Nothing of very decided mark, either in style, sentiment, or plot, has yet been contributed to dramatic literature by Americans. Still, in the period under notice, this branch of letters has been cultivated by several American writers with at least partial success. John Howard Payne wrote several successful plays, and dramatized many stories. His *Brutus; or, the Fall of Tarquin*, originally produced at Drury Lane Theatre, is not entirely disregarded now by managers; and his version of the drama of *Theresa; or, the Orphan of Genera*, is a stock piece on both sides of the Atlantic. He was a prolific writer, and for several years afforded constant amusement and satisfaction both by his pen and histrionic efforts to the playgoers of London.

So far as our research enables us to form an opinion, the first original American dramatic production of worth brought upon the stage in the United States in this period, was the Indian tragedy of *Metamora*, by John Augustus Stone, written for Edwin Forrest, and by him often performed with success. Its merits are by no means few. In 1829, Judge Conrad wrote *Aylmere*; or, *Jack Cade*, as it is sometimes called; a tragedy of great dramatic interest, and only unpopular in Great Britain because of its ultra democratic tone. It has kept the stage in the United States since its first representation, but, being the property of Mr. Forrest, is not often performed. A superior production, both in a dramatic and a literary point, is Dr. Bird's tragedy of *The Gladiator*, published in 1830, and based upon a well-known incident in Roman history, known as the Rebellion of Spartacus. The author has managed the materials of his story with skill, and his work is creditable to the literature of his country.

Mr. Willis has written two plays, which sustain his reputation as a poet, each possessing great beauties, although defective for the purposes of the stage. They are entitled respectively, *Tortesa, the Usurer*, and *Bianca Visconti*, and were first published in London in 1844; although they had been acted prior to that in the United States.

Competent judges connected with the stage award to Mr. Epes Sargent the credit of having written the best acting tragedy yet produced by an American. It is entitled *Velasco*, was composed expressly for Miss Ellen Tree when in the United States, and by her performed with success, both in Boston and other American cities. It was brought out at the Marylebone Theatre, London, in 1850, and although severely criticised by most of the papers, was performed with applause for a number of nights.

The youngest and most finished in style and language of the dramatic authors of America is George H. Boker. In 1848, then quite a young man, he published his tragedy of *Calaynos*, a story founded on the hostile feeling

between the Spaniards and Moors, which soon became a favourite in the United States, and was produced at Sadler's Wells Theatre, London, in 1849, with much applause. He has written several plays since; and it is but justice to say that all go to establish his claim to an honourable position among the dramatic writers of the age, European or American.

We refer to these contributions to the drama of the United States rather as indications of awakening genius than as works destined to endure,—as productions forming the foundation of a national dramatic literature, and although abounding in faults when tested by fair and severe criticism, still rich in literary beauties. They are but little known on this side of the Atlantic; and those which are, owe their place on the stage mainly to the actor, although abounding in fine poetic passages.

A majority of the great minds of America, whose fruits must yet become an honourable part of the nation's literature, is found among her orators. The speeches and writings of Clay, Webster, Calhoun, and others, whose talents have adorned the Senate of the United States, considered merely as literary productions, excel the efforts of many who aim at a purely literary reputation. They are among the greatest intellectual triumphs of the country. The *Speeches and Forensic Arguments* of Daniel Webster, to say nothing of those of the distinguished men above named, is a contribution to his nation's literature, not less valuable than are the works of Burke to the literature of Great Britain. Webster was an intellectual giant. The ponderous force of his mind strikes every reader of his speeches, and he will ever be regarded as one of the first, if not the very first, statesman of his age. There is a vigour, a power, and a manliness of style about his writings which the scholars, the orators, and the statesmen of future times cannot fail to admire. We look upon his published works as affording the best specimens of American eloquence, and as unsurpassed by anything of the kind in the English language.

CHAPTER V.

SECOND AMERICAN PERIOD, CONTINUED.

In an examination of American literature one is forcibly impressed with the fact that much of it is adapted to the practical purposes of life, and it would seem that in every generation since the formation of the government, the United States have furnished their proportion of this class of writings. Their increase, however, is more marked in the period now under review than in that from 1770 to 1820, and it is but fair to state that their literary excellence and general improvement keep pace with their numbers. It is since 1820 that the legal writers of America have gained the attention and approbation of Europe. There are several names in this department of American authorship which take rank with the ablest British juridical writers. Mr. Alison, who is by no means given to praising extravagantly anything American, says, "this class exhibits a degree of learning, judgment, and penetration, which, honourable to

any country, is in the highest degree remarkable in one, the career of which has so recently commenced." And this, it may be observed, is a far more weighty compliment than a superficial reading would convey. There must be *mind* of the first order to merit such praise, and that America should so early have given birth to such is a fact of which the countrymen of Story, of Kent, and of Wheaton, may justly be proud.

We must content ourselves with a rapid reference to the more prominent of these American jurists, and shall confine ourselves to a few names. Judge Kent published the first volume of his excellent *Commentaries on American Law* in 1826; his second, third, and fourth, between that and 1830. He little expected they would meet with a favourable reception by the public; but they at once took a high place in legal literature, and are now universally considered the first authority of their kind. The clearness with which the writer states his cases, the force of his reasoning, and correctness of his conclusions, are not common to authors of the class.

Wheaton's great works on International Law have supplanted many older authorities of reputation. It would be useless to multiply commendations of this writer. Two of a decided character are deemed ample. The last section of the "Regulations for the Examination of Paid Attachés before the Civil Service Commissioners, approved by the Earl of Clarendon, 1st January, 1856," specifically provides that candidates, on being examined on promotion, "will further be required to satisfy the Commissioners that they possess such a knowledge of International Law as can be acquired from 'Wheaton's Elements of International Law,' and 'Wheaton's History of International Law.'" And the first named of these has recently been formally adopted by the University at Cambridge, England, as the very best work of its kind extant, and as a manual for tuition by the Professor of Legal Science.

Judge Story, whose name is honourably known in Great Britain, produced some minor works prior to 1820; but the writings for which he is most celebrated in Europe—his *Commentaries on the American Constitution*, and on the *Conflict of Laws*—were not published until 1832 and 1834, respectively. The first of these at once secured attention in the Old World, and was translated into both French and German. Since then his *Commentaries upon Equity Jurisprudence* has added to his reputation as a profound lawyer, and no modern legal author is so highly honoured or respected by the profession in Great Britain as Judge Story.

Edmund Livingston's *System of Penal Laws for the United States* displays vast knowledge of the subject, and forms the basis of much that is good in modern jurisprudence. It was first published in 1828. It materially modified the penal laws of the world, and may properly be considered the first complete penal system, based upon philanthrophy, and designed to substitute mildness for severity in the punishment of criminals.

Although Judge Bouvier was by birth a Frenchman; and, according to our arrangement, should be ranked among Foreign writers in America, we deem it not improper, for several reasons, to introduce him here. He went to the United States at an early age, but was not at first designed for the law. His mind, however, was peculiarly adapted to the Legal Profession, and he became an eminent Judge. His two books, *The Institutes of American Law*, and

Dictionary of Law, are among the best works of their kind, and are so considered in Europe. The celebrated German jurist, Mettermeyer, recommends them to European lawyers, as the books they will have to look up to as the great authorities on American practice; and their wide circulation in the United States, and extensive use there, give them a position equal to the works of the ablest American jurists, amongst whom Judge Bouvier may justly be classed.

Other branches of legal research have been treated in a masterly manner by Americans; and some of their works on commercial and maritime jurisprudence supply decisions and elucidations of value. Our space forbids further reference to individual authors, but probably those named have accomplished more that is truly honourable in this branch of American literature than others whose names do not now occur to us, and the high position their works hold in Europe is presumptive evidence of their intrinsic worth.

It is almost universally conceded that the Theological writers of America are among the ablest of modern times. They have opened new stores to the student in Divinity, illumined what was heretofore obscure, and successfully combated the inroads of modern scepticism. Those of the class since 1820, have devoted themselves rather to practical illustration than to theoretical speculation, and the majority of their works breathe far more of the broad spirit of Christianity than might be expected from persons of such opposite creeds in this age of creed bigotry. Of the authors in this department, Robinson, Stuart, Barnes, Norton, Channing, Spring, Cheever, Bush, Alexander, Boardman, Baird, Dewey, Beecher, and Wayland, fairly represent the leading religious *literati* of the United States. Their works are known in both hemispheres, and those of Professor Robinson, Moses Stuart, and Mr. Barnes, have become standard authorities with all classes of Protestant Christians.

Moses Stuart was not alone a Theologian. He was a philologist in the most comprehensive sense, and "the great merit," says one of his American eulogists, "and one for which the gratitude and respect of American scholars must ever be his due, lies in the zeal and ability he has exhibited for a long series of years in bringing to the notice of the English-reading public the works of many of the soundest philologists, and most enlightened and unprejudiced theologians, of Germany; for to his exertions it is in a good degree owing that the names of Rosenmüller, Gesenius, Ewald, De Wette, Hupfeld, Rödiger, Knobel, Hitzig, and others, are now familiar to the present race of biblical students in this country, and to some extent in England."

Since 1820, America has added much to our stores on language. It is indisputable that one of the best Dictionaries of the English Language is an American production; and it is equally indisputable that to America England is indebted for several valuable works on many of the heretofore sealed languages of Asia and Africa, to say nothing of those on the various idioms of the American Indians.

Dr. Webster was engaged on his great work 36 years. The first edition was issued in 1828, in New York, when he was in his 70th year. There were 2500 copies printed in the United States, and 3000 in England. It met with success, and the many editions since demanded by the public indicate its high position in general estimation.

In 1840, a new American edition appeared with several thousand words added, and a revised appendix was again published in 1843. Since then several editions have been published both in England and America, the best being that edited by Professor Goodrich, of Yale College.

Of Webster's Dictionary the London *Times* says, "we can have no hesitation in giving it as our decided opinion that this is the most elaborate and successful undertaking of the kind which has ever appeared;" and the *English Journal of Education* pronounces Dr. Webster "the greatest lexicographer that ever lived."

In continuation of the labours of Dr. Smith Barton, and acting on his suggestions, John Pickering early turned his attention to the language of the North American Indians. His articles in the Memoirs of the American Academy, *On the adoption of a Uniform Orthography for the Indian Languages of North America;* and his article in the Encyclopædia Americana, *on the Languages of America*, are profoundly philosophical, displaying a mastery of his subject, and a knowledge only procurable by immense labour and research. The first of these was published early in the decade from 1820 to 1830; since which it has passed through several editions. *The Remarks on the Indian Languages of North America* made its appearance in book form in 1836.

The British people participate in the fame which attends the spread of their language over the globe, and yet they are probably unconscious of the labours of Americans in this respect. Not only have they extended it by honourable acquisition of territory, through purchase, and never by the sword, but they have through Missionary enterprise made it in some degree familiar to the Central African, and the Sandwich Islander, the native of Burmah, and the dweller on the Euphrates. It is no exaggeration to say that European scholars are much indebted to Americans for their investigations of the Karen, the Siamese, Asamese, Burmese, Chinese, and a whole host of African languages; and to the same for grammars and dictionaries of the Burmese, the Hawaian, the modern Armenian, modern Syrian, and Chaldee tongues. Dr. Judson's *Burmese Dictionary*, Wells Williams' admirable *English and Chinese Vocabulary*, and Mr. Mason's *Grammar and Dictionary of the Karen Language*, are a few of the works of this class in this era which add not a little to the honour of the United States in the philosophical investigation and successful reduction of foreign and comparatively unknown languages, to a system and grammar by which they can readily be acquired by Europeans.

That a country of so vast extent as the United States should have competent naturalists might be reasonably expected; but it is note-worthy that it has produced one, at least, in every respect qualified to describe both the Ornithology and Quadrupeds of America. John J. Audubon first began the publication of his *Birds of America* in 1825, in folio numbers, each containing five plates. The work had a limited circulation, and the first volume was not completed until 1829. The second and third in 1834 and 1835, respectively, and the fourth, or last, on the 20th June, 1838, or more than 12 years after the first number. The original price to subscribers was about 200 guineas, and it is creditable to America that, of 175 subscribers, full one half were Audubon's countrymen. This speaks forcibly for the taste and public spirit of the people of so new a country, and refutes the musty slander that Americans

are incapable of properly appreciating the higher branches of human science and art.

A smaller edition of this work, in 7 volumes, was completed in 1844; and in 1848, the first volume of the *Quadrupeds of America* appeared in quarto, similar to the first edition of the *Birds of America*. In this Audubon had the assistance of his two sons, and Dr. Bachman. In addition to these works, he published an *Ornithological Biography*, but his fame rests mainly upon the larger productions. Of the first, Cuvier said, on the receipt of a copy by the Royal Academy of Sciences of Paris, "it can be described only by calling it the most magnificent monument Art has ever raised to Ornithology;" and the work on Quadrupeds merits equal praise. Audubon was elected a fellow of the Royal Society of London, as well as of several scientific bodies on the continent.

Since the death of Audubon the subject to which he devoted his life has been creditably pursued by Messrs. Cassin and Giraud, whose excellent contributions to our information on American Ornithology entitle them to rank with Audubon as naturalists. *The Illustrations of the Birds of California, Texas, Oregon, and British and Russian America*, by Cassin, published in Philadelphia, in numbers, from 1853 to 1855, and the *Birds of Long Island*, by Giraud, give promise that those gentlemen may yet complete the history left unfinished by the lamented Audubon.

The United States Government has published, in a style of art equal to that of any works of a similar nature, several volumes of the scientific discoveries of the Exploring Expedition, under Captain Wilkes; and of these we may specially notice the Treatises on the Crustacea, Zoophytes, Geology, and Botany.

Several individual branches of natural history have received the attention of competent investigators. *The North American Herpetology; or, a Description of the Reptiles inhabiting the United States*, by Dr. John E. Holbrook, Professor of Anatomy in the Medical College of South Carolina, of which State he is a native, published in royal quarto in 1843, with accurate plates, is really a work of stupendous magnitude, upon a field heretofore almost a desert. The difficulties under which the author laboured would have effectually discouraged any but an extraordinary man, and the manner in which the work has been accomplished is a triumph of patient industry. It must last as long as science has a votary. Since its appearance Professor Holbrook has begun the publication of the *Ichthyology of South Carolina*, in numbers, at Charleston, and the parts which have come under our notice warrant us in expressing the opinion that this work on the fishes of the Southern States will fully sustain the high scientific reputation which Professor Holbrook now enjoys. Agassiz says his descriptions are the clearest and best he ever met with.

Tired with metaphysical investigation, as were the scholars of England, the educated men of America, early in this century, turned their attention to Geology, Botany, Chemistry, Mineralogy, and the kindred sciences, with excellent results. So rapid indeed was the spread of these branches of knowledge when Dr. Webster revised his Dictionary in 1840, that he found it necessary, after a lapse of twelve years, to add several thousand words in order to express the ideas which had passed from technological science into our common language.

As a result of this happy direction given to talents, Professor Hitchcock, as early as 1823, published his *Geology of the Connecticut Valley;* and in 1840, the first edition of his *Elements of Geology*, a second edition of which was soon after demanded, and was issued with an Introductory Notice from the pen of no less a scholar and geologist than the late Dr. John Pye Smith, Divinity Tutor in Homerton College, near London. And it is safe to presume that a man so eminent in the cause of science would not commend a book unless it had merit. The excellent elementary Treatises of Professor Cleveland on Geology and Mineralogy, owe their origin to the direction given by the public to these studies, and are now class-books on the Sciences of which they treat. But the principal American work on these subjects, is that of Professor James D. Dana, of Yale College, whose Report on Geology and Mineralogy connected with the United States Exploring Expedition, is to these sciences, what the Birds of America, of Audubon, and the Reptiles of the United States, of Holbrook, are to Ornithology and Herpetology.

The names of Torrey and Gray are sufficient to remind the intelligent reader of their labours in the science of Botany. The *Botanical Text-Book*, *Elements of Botany*, *Flora of the Northern States*, and *Botany of the United States Exploring Expedition*, of Mr. Gray, rank among the most valuable botanical works of the age; and the *Flora of North America*, by Torrey and Gray, sufficiently indicates the attention the science of Botany has received from Americans.

The names of Hare, Silliman, and Henry are known to European chemists, and their works occupy a place at once honourable to themselves and to their country.

Nathaniel Bowditch appeared as an author on Navigation as early as 1800, when he published his *New American Practical Navigator*. Its value was at once acknowledged, and it is now the only work of its kind in extensive use in the American Marine, and is widely used both in the English and French Service.

In 1829, the same author published the first volume of his translation and elucidation of *La Place's Mecanique Celeste*. The second and third volumes of this work—the idea of which the *London Quarterly Review* declared "savoured of the gigantesque"—appeared respectively in 1832 and 1834; and its great value is now universally conceded. La Place himself was not unmindful of its worth. It elucidates his text, and makes it clear alike to the superficial and the master mathematician. He is reported to have said, "I am sure that Dr. Bowditch comprehends my work, for he has not only detected my errors, but has shown me how I came to fall into them."

The Astronomical works of Professor Loomis, of the New York University, occupy a high position in the estimation of learned men in Europe; and those of Professors Norton, Olmstead, and Mitchell, are likewise highly commended. The *Planetary and Stellar Worlds*, of this last-named author, has passed through several editions in England. The able conductor of the *Astronomical Journal*, at Cambridge, Mass., Dr. Gould, likewise enjoys a great European reputation, as do also Lieutenants Maury and Gillies—the former having been justly and warmly eulogized by Humboldt. The latter is well and favourably known through his accurate and valuable Astronomical Observations in the Southern Hemisphere.

In this list we must not omit mention of a remarkable American woman who has achieved signal success in the science of Astronomy—who, in fact, may justly be termed the Mary Somerville of the United States. Hannah M. Peterson, the only child of the late Judge Bouvier, received her early training from her father, was first introduced to the study of mathematics by her very accomplished husband, and has since cultivated the study of Astronomy with success. Her great work, entitled *Familiar Astronomy*, has won her the applause of the leading men in the science on both sides of the Atlantic.

One other name deserves mention before we conclude our notice of the Americans of this period, who have written on Astronomy. In 1839, Ebenezer Porter Mason, a remarkable young man, who was cut off at the early age of twenty-two, wrote a paper, which was published in 1840, entitled *Observations on Nebulæ*, which gained the admiration of Sir John Herschel, who thus speaks of the work and its lamented author: "Mr. Mason, a young and ardent astronomer, a native of the United States of America, whose premature death is the more to be regretted, as he was (so far as I am aware) the only other recent observer who has given himself, with the assiduity which the subject requires, to the exact delineation of Nebulæ, and whose figures I find at all satisfactory."

The numerous topics connected with Political Economy have received the attention of minds of the highest order. Still a great diversity of opinion exists as to the various theories advanced; and where so much has been written, it is difficult to offer anything entirely new. Henry C. Carey has carefully investigated the subject, disregarding the speculations of the mere theorist, and has based his opinions on the practical workings of the science. His first contribution to this department of American literature was an *Essay on the Rates of Wages*, published in 1835; after which he gave to the public three volumes, respectively, in 1837, 1838, and 1840, on the *Principles of Political Economy;* and in 1838, a very able and explicit work on *The Credit System in France, England, and the United States*, which has been much discussed in Europe. His next and, probably, ablest publication is an attempt to refute the theories of the disciples of the Free Trade School of Political Economists, entitled, *The Past, the Present, and the Future*, first issued in 1848. His last work—*The Principles of Social Science*—the first volume of which appeared during the present year (1858), sustains the reputation of its author. Mr. Carey defends his views with much zeal. His style is clear, terse, and chaste.

Several works of decided worth in this department of human science, but of less originality than those of Mr. Carey, have been written by Americans. *The Elements of Political Economy*, by Professor Wayland, has become a text-book in American Colleges; as has also a very excellent work, entitled *The Principles of Political Economy*, by Henry Vethake, published in Philadelphia, in 1838. This author is a defender of the principles of free-trade, and his arguments have had considerable influence in extending these views in the United States.

As a necessary result of the practical wants of a country like America, many of the writings on Political Economy are on manufactures and the circulating medium. The disturbed state of the currency at various periods, and the unsoundness of the different banking systems attempted in all sections of the

country, have been productive of several sound treatises on currency and banks. The works of Raguet, Tucker, and Gouge, stand forth among a mass of more or less value, all of which have cleared the abstruse subjects of which they treat of much of the obscurity by which they were formerly surrounded.

It is proper to state that metaphysical philosophy has not been neglected in this period. Upham *On the Will*, and Wayland on the *Elements of Intellectual Philosophy*, sustain a high place among modern productions of their class.

Great Britain is heavily indebted to the United States for Juvenile Works adapted to the youthful mind, free from the ridiculous absurdities which characterized the staple of this description of books fifty years ago. The first effort in this branch of popular instructive literature was made by S. G. Goodrich, whose *nom de plume*, of Peter Parley, is familiar to almost every person, both in Great Britain and the United States. The history of this gentleman's career in the world of letters has recently been given to the public in a couple of entertaining volumes of autobiography, and no more pleasant book of instruction has lately come from the American press.

The first production of Peter Parley was *Tales about America*, published in 1827, since which period he has been constantly before the reading public of both hemispheres; and his popularity has been taken advantage of in Great Britain by writers and publishers, who have assumed his *nom de plume* to his pecuniary detriment, as well as to the injury of his literary reputation. He is the author or editor of about 170 distinct volumes, 116 of which bear the name of Peter Parley. And so popular have these works been, that the past sales exceed 7,000,000 of copies, while the present annual demand is 300,000 volumes. His character as a writer has suffered in this country through the publication of a series of compositions bearing the name of Peter Parley, of which servility to English prejudices and a marked slovenliness of style are the distinctive features. So widely has this perversion and abuse of Mr. Goodrich's name been carried, that, up to this time, no less than 35 distinct works, purporting to be by Peter Parley, none of which he ever wrote, have been issued by English publishers.

Mr. Goodrich deserves a higher encomium for his services than the purpose of our work warrants us in pronouncing; and as the pioneer in substituting good books, in accordance with the wants of the times, for the old New England Primer of the Puritan age, and the absurd nursery rhymes of a later period, has, no doubt, prompted others to enter the same field.

Following the example of Mr. Goodrich, some of the most popular American writers, both male and female, have not considered the subject of youthful instruction too humble for their pens. Hawthorne, T. S. Arthur, Jacob Abbot, Miss Mc Intosh, and Grace Greenwood have contributed much to the healthy literature of the young; but few books in the whole range of youthful reading comparing with the fascinating *Tanglewood Tales* of the captivating author of *The Scarlet Letter*.

The United States has already a creditable Medical literature, peculiarly free from the bigotry of the schools. The example of Dr. Rush, in this department of letters, had an influence in directing attention to the subject, and since his time, Americans have done much in this branch of authorship. It will be sufficient for our purpose to name some of the most noted of these writers.

We may especially call attention to the *Dispensatory of the United States*, by Wood and Bache, as a work of great research, which describes the medical properties and effects of many curative agents peculiar to American medical practice. The many editions this work has passed through sufficiently prove its hold on public favour.

Diseases in general, as well as the climate of the United States, have been scientifically treated of by American writers. Dr. Forry, of the United States Army, has written a highly valuable work on *The Climate of the United States, and its Endemic Influences*, which the *London Athenæum* considers "creditable to the Medical science of the United States;" and all the works whose titles are given below, deserve the same praise. *Treatise on the Practice of Medicine*, by Geo. B. Wood; *Elements of Medical Jurisprudence*, by T. R. and John B. Beck; *Elements of Pathological Anatomy*, by S. D. Gross; *Surgical Observations on Tumours*, by John C. Warren; *Principles of Surgery*, by Professor Gibson; *A Treatise on Baths*, by John Bell; *An Examination of the Practice of Blood-letting in Mental Disorders*, by Pliny Earle; *Obstetrics: the Science and the Art*, by C. D. Meigs; *Treatise on the Materia Medica and Therapeutics*, by J. Eberle; *Treatises on the Physical Diseases of Children*, and on the *Diseases of Females*, by Wm. P. Dewees; and the many excellent works of Americans on Dental Surgery, a branch of science in which they seem to excel.

It is honourable to American Medical literature, that Wood's *Practice of Medicine* is regarded by many of the profession here as the best work of the kind in the English language, and is used as a text-book in many of the schools. And Beck's *Medical Jurisprudence*, edited by Drs. Dunlop and Darwell, has passed through seven editions.

Within the past twenty years the Naval and Military writers of the United States have contributed largely to the effectiveness of modern warfare. The works most deserving notice are Major-General Scott's *Infantry Tactics;* Hardee's *Rifle and Light Infantry Tactics; A System of Tactics or Rules for the Exercises and Manœuvres in the Cavalry and Light Infantry, and Riflemen of the United States;* Mordecai's *Artillery for the United States Land Services; Heavy Artillery Instructions*, prepared by a Board of Army Officers for the use of the United States; and the *Ordnance Manual*, for the use of the officers of the United States Army.

Among the works devoted to Naval instruction are Dahlgren's *System of Boat Armament in the United States Navy:* Dahlgren's *Naval Percussion Locks and Primers;* and Stuart on the *Naval Dry Docks and Naval Steamships of the United States.* Lieut. Dahlgren's latest and best work is devoted to *Shells and Shell Guns*, and contains a vast amount of valuable information.

As a part of this subject it is appropriate to mention the excellent instructive works of Professor Mahan, on Civil Engineering, on Field and on Permanent Fortifications; and his *Treatise on Advanced Guard, Outpost, and Detachment Service of Troops*, and the manner of posting and handling them in the presence of an enemy.

There are two recent works of originality to which we desire to direct the attention of professional men; and they are the *Reports and Experiments on the Strength and other Properties of Metals, and on the Manufacture, Proof,*

and Endurance of Cannon (1856); and Mordecai's *Report on Experiments on Gunpowder*. The first of these has already met with much favour in Europe, and has thus far been spoken of by competent judges in terms of unqualified approval.

During the past forty years much attention has been given in America to the Natural Sciences, and the different societies existing in the country devoted to this branch of philosophy, have each contributed more or less to the elucidation of certain mooted points in Ethnology, which were a source of perplexity in bygone times. Dr. Samuel Morton, of Philadelphia, for some years president of the Academy of Natural Sciences in that city, a man of sound scholarship and great abilities, had his attention directed to diversity of form presented by the human cranium while delivering a course of lectures in his native city on anatomy, and not being able at the time to procure crania of all the races, he at once proceeded to make a collection from all parts of the world, of the skulls of the different types of our race, and at his death, in 1851, had secured 918 specimens, all more or less dissimilar. As he advanced his collection, his mind was directed to the peculiarities of the American race; and devoting himself assiduously and scientifically to its investigation, he, in 1839, published his observations and speculations on this type of our species, in a work entitled the *Crania Americana*, with large lithographic illustrations, which at once brought him to the honourable notice of scientific men in Europe and America.

In the course of his investigations he made the acquaintance of Geo. R. Gliddon, American Consul in Egypt, and through his aid procured a large collection of skulls from that country. These he made his study, and, in 1844, published a large and valuable work, entitled the *Crania Egyptiaca*. The subject of Ethnology has since been further illustrated by the publication of Dr. Morton's unedited works under the superintendence of Professor Nott and Mr. Gliddon, to which these gentlemen have added much original matter, and given the title of *Types of Mankind*. This book is one of the most important contributions to Ethnology during the past ten years. Before its publication, Dr. Nott had devoted much time to the subject; and, in 1848, published his principal work, entitled *The Biblical and Physical History of Man*. He has also written several excellent scientific treatises, one of which is devoted to the Natural History of Man, and is a valuable contribution to American Ethnological literature. We may couple with these honoured names those of Bartlett, Squier, Meigs, and Leidy, men of science, whose labours have resulted most satisfactorily, and greatly extended our knowledge of man.

And, following up the same current of investigation, we must not fail to specify some remarkable works of this period, solely devoted to the North American Indians, by which the traits of that singular race have been put upon imperishable record. The gigantic undertaking of Mr. Catlin, and his adventures among the Western tribes, in furtherance of his purpose, are familiar to most Europeans. His paintings, illustrative of Indian life, are daily becoming more and more valuable as records of a declining race; and his writings on the same subject are now a standard authority. These were first published in 1842, under the title of *Letters and Notes on the Manners,*

Customs, and Conditions of the North Americans Indians; and although having no pretensions to literary merit, fill anything but an inferior place in American Ethnological literature. The publication of a work on the same subject, but of a more purely historical nature, was begun at Philadelphia, in illustrated numbers, in 1838, under the joint labours of Thomas L. McKinney, recently of the Indian Department at Washington, and Judge Hall, of Cincinnati, the author of several works on the Great West. As early as 1824 the practice was begun of taking single portraits of Indian chiefs who came to Washington, and to this custom, in a measure, is science indebted for this really splendid work. It is entitled, *The History of the Indian Tribes of North America; with Biographical Sketches and Anecdotes of the Principal Chiefs. Embellished with one hundred and twenty Portraits from the Indian Gallery in the Department of State at Washington.* The *North American Review* says, "the portraits are a noble monument of skill and art, and a most becoming tribute to the memory of the departing tribes."

A very good work on *American Antiquities, and Researches into the Origin and History of the Red Race,* by Alexander W. Bradford, was published in Boston, in 1842, which is clear, able, and instructive. Its philosophy is bold, and the writer, while investigating his subject, has not permitted the fables of visionaries to obscure his reason or hamper research.

CHAPTER VI.

SECOND AMERICAN PERIOD, CONCLUDED.

AMERICANS were never insensible of the charms of elegant literature, and men of learning in all ages of the republic have embellished this department of letters. While some gave their attention to the more fascinating walks of *Belles Lettres,* many minds, such as those of Dr. Channing, John Quincy Adams, Edward Everett, R. W. Emerson, Mr. Whipple, R. H. Dana, Judge Story, and Hugh S. Legare, produced profound criticisms which, for force, style, and analysis, rank with the ablest modern British Essays.

Dr. Channing published an Essay on *National Literature,* in 1823, which gave hopes of further excellence in this branch of letters, which his fine papers on the *Character and Writings of John Milton,* his article on *Bonaparte,* and his captivating essay on *Fenelon,* published respectively from 1826 to 1829, fully realized. These are particularly able. Southey considered them unapproached, and declared their author "a blessing and honour to his generation and country." His pamphlet on *Self Culture* has proved one of the most successful and useful Essays ever published.

Mr. Emerson's Essays are well known in Europe, and the peculiarities of his style need not be described here. His fugitive writings, many of which appeared in a Boston Magazine called *The Dial,* were first published in volume form in 1841. A diversity of opinion exists as to his philosophy; but his literary merit is generally acknowledged.

Much might be said of the writings of Edward Everett, who, during the four years he edited the *North American Review*, supplied full one half the articles it contained. His style is captivating, and many of his papers, particularly those written with care, are masterly compositions.

A prominent southern writer of this class, whose name is but little known in Europe, Hugh S. Legare, has left some scholastic essays on legal and general subjects. His paper on Moore's Life of Byron, published in an early number of the *Southern Review*, which he edited; and who, like Everett when in the chair of the *North American Review*, wrote half its contents, is more discriminating and quite as forcible as the Essay of Macaulay on the same subject.

Of writers whose articles belong to the *Belles Lettres* of America, this period is prolific. The names of Irving, Paulding, Dana, Fay, Prescott, Tuckerman, Poe, Willis, Choate, Wilde, Hawthorne, Cheever, Mitchell, Longfellow, Bryant, Brownson, and a host of others, scarcely less distinguished among male writers; of Mrs. Hale, Mrs. Stephens, Miss Gould, Mrs. Child, Mrs. Kirkland, Miss Leslie, Miss Mc Intosh, Mrs. Sigourney, Miss Planche, Miss Sedgwick, Mrs. Stowe, and other equally familiar female authors, fully sustain the truth of this statement.

We have referred before to the improvements effected by Americans in English School Books. This is a marked feature of the period now under consideration. We are aware that those who occupy lofty seats in the world of letters may be disposed to sneer at us for considering these a part of a nation's literature; but when their practical effects are weighed, they must be regarded in any but a contemptuous light. England at this day receives many excellent compilations from America. A list of such in both the lower and the higher branches of education could be made which form the basis of many English school books now in use. We have shown in a former chapter what Lindley Murray did in this way, and it is worth recording that Woodbridge's School Geography, still published in England, was introduced into this country by Mr. Goodrich, or Peter Parley, in 1823, and it served as a starting point, or new era, in the character of such works in England. This class of American school books is among the best of their kind in the world, and would do credit to any nation. Those of Mitchell and Smith are the most valuable. Morse and Adams, whose works were popular in the early part of this century, gave way to Olney and Willard, who in their turn have been nearly superseded by Mitchell, Smith, and others. The simplicity of these books, the vast amount of instruction they contain, and their comprehensive scope, must command approbation from all but the most prejudiced. The Atlases are remarkable for their beauty and accuracy. They are not mere outlines of countries, sketched upon a surface without reference to either longitude, latitude, or the division of zones; but possess all the excellencies of carefully-prepared maps which have been executed with an eye to entire accuracy in all that pertains to geography. Mitchell's *School Geography* and *Atlas* have, in the space of 15 years, passed through many editions, and in 1852, upwards of 350,000 copies of his various geographical works were sold, and more than 250 persons were constantly employed in their production.

The spelling and reading books for children exhibit a care for youthful instruction deserving the warmest commendation. These are arranged in regular

series, commencing with the lowest elementary branch of learning, and gradually advancing to the perfection of their kind. And it is proper to say that these are everywhere in use. At the close of the last century the *New England Primer* was extensively used; but it was superseded by *Dilworth's Spelling Book*, which, in its turn, was obliged to yield to Webster's more valuable compilation.

The subject of English Grammar has been simplified by Greenleaf, Webster, Kirkham, and Gould Brown. Mr. Greenleaf's book is one of the clearest to the youthful mind ever published. That by Mr. Kirkham is wonderfully concise, and has been widely popular. The large work of Gould Brown, however, is the most elaborate of its kind, and although it is too complicated in its arrangements for elementary instruction, as a searching production on English Grammar, it must be regarded as an able contribution to the philology of the age.

In this department of literature America is entirely independent of Great Britain, and her text books in this branch of education are not surpassed by those of any country. Many of these are class books in England; and among them we may name Professor Anthon's admirable series of Latin and Greek Classics, the truly scholarly *Hebrew and English Dictionary of Gesenius, by Professor Robinson*, and the excellent *Latin-English Dictionary of Mr. Andrews*, founded on the celebrated work of Dr. Freund. In fact this last-named work reminds us that the students of Great Britain have received many valuable educational works of German scholars through the hands of American editors, without being aware of the fact.

The great majority of the school books in the United States are by American authors, and more of this class of books are produced annually in the United States than in all Europe. Even at this date, more than 1,000,000 of *Webster's Spelling Book* are sold yearly.

Our geographical knowledge has been increased by the explorations and publications of Frémont, Kane, Herndon, Bartlett, Maury, Wilkes, Wells, Williams, Squier, and Commodore Perry. The works of these gentlemen have mainly resulted from expeditions of the American government in the cause of science, and their narratives are always instructive. Herndon's *Exploration of the Valley of the Amazon*, Frémont's *Exploring Expedition to the Rocky Mountains, Oregon, and California*, and Commodore Perry's *Narrative* of his recent visits to Japan, record some of the most interesting geographical discoveries within the last forty years.

Due prominence should be given here to the *Physical Geography of the Sea*, by Lieut. Maury of the American navy, as it is not only an aid to navigation, but a contribution to modern science unique in itself. This valuable work was published in 1855, and a second edition, revised and enlarged, was almost immediately printed. Lieut. Maury had before contributed much to the cause of navigation and geography, his wind charts having been long recognised as reliable aids to the mariner. The many excellent maps published in the United States, and charts of the American coasts executed under the care of the government from actual surveys instituted by itself, are a few of this description of our additions to geographical illustration for which we are indebted to America.

There are several phases of American literature which do not enter into the bibliography of any European nation, and we have therefore been obliged to create headings which will describe them. These all belong to the present period. Of them Freemasonry is the senior. This institution has been elucidated to the fraternity by many writers, and a very able work on the *Analogy of Masonry with Christianity*, was published at Jackson, Mississippi, in 1850, which as a literary performance, apart from the interest of its subject, is a remarkable book.

Spiritualism is not calculated, so far as our judgment goes, to add much to our intellectual delights; but the rapid rise of this mystery, and the wonderful increase of its believers in the United States, are subjects of history, and the literature it has already produced is as remarkable a phase of intellectual life as is the subject of Spiritualism itself. We do not profess to any very high regard for the followers of this new light in our world of spiritual darkness, and look upon many of the books which it has given birth to as the offspring of diseased brains; and yet, others of these works are so well written, and withal, with such an air of truthfulness and conscientiousness on the part of their authors, that we are obliged to look upon them with a charitable eye, and if we cannot receive them as dissertations upon metaphysical phenomena, we can regard them as "curiosities of literature," and illustrations of the strange directions the human mind is occasionally induced to take.

Another equally peculiar subject of American authorship is Mormonism. The book of Mormon itself is a very indifferent attempt to unite the sensual phases of the Bible and the Koran, and, as a work, possesses neither elegance nor grammatical correctness. Still, it has given birth to commentaries and expositions, some of which are valuable. And many of the narratives and records of this extraordinary delusion have merits not easily disallowed.

When the madness which produced these shall have expired, and expire it will, as certain as the advance of intelligence, these histories of its existence and conquest will form a curious phase in the literature of America, which the philosopher who may write its history in future years will not pass carelessly by.

Those who have turned their attention to humorous literature in the United States, have in the main succeeded, and the reader is compelled, in spite of himself, to give way to laughter when perusing *The Big Bear of Arkansas*, and the extravagant sketches of unsophisticated genius which go to make up *Georgia Scenes*. The humour of these is genuine. It comes up without effort, and there is a freshness, a spontaneousness about it, which compensates for any absence of conventional refinement the over-fastidious European is apt to seek in such productions. These books are the types of this class of American writing, and are as free from European taint as the air from which they come. There is a smell of the fresh forest about them, the midnight lamp is incapable of imparting. Washington Irving probably set the example in this line of letters, unconsciously we allow, in his *Knickerbocker History of New York*, and in his truthful sketch of *Rip Van Winkle*.

A very excellent *History of the Arts of Design in the United States*, by William Dunlap, was published in 1834, in two octavo volumes, which contains a succinct account of all American artists in every department of design who had made themselves a name up to that time. This work is carefully

written, is unusually accurate in its statements, and is a deserved tribute to the Fine Arts in the United States.

The Agricultural literature of the United States is both extensive and valuable. There are more journals devoted to this science published in the Republic than in all the world besides. This fact gives promise of future achievements in rural literature no other nation is likely to equal. The Federal Government publishes an Agricultural Report yearly of the greatest practical value, which consists in the main of carefully-prepared observations on the products of all parts of the country, on experiments in Agriculture, the introduction of new methods of farming, improvements in implements of husbandry, and the increase of crops, as well as of accurate statements of the success or failure of experiments on new seeds, fruits, and vegetables. It also contains descriptions of experiments on various descriptions of live stock, and is in reality a faithful contemporaneous history of farming in all its branches throughout the United States.

Many excellent State Agricultural Societies exist. These generally publish Annual Reports: the most valuable of which are those of the New York State Agricultural Society. There are about sixteen of these volumes, and they contain a plainly-written account of all that is valuable in Northern Agriculture, as now practised. The reports and transactions of the Southern Central Agricultural Society of Georgia set forth in a concise manner the progress and improvements in the cultivation peculiar to that region. These are valuable publications, and record facts connected with a part of the United States which has ever been and ever must remain preëminently agricultural. The cultivation of the soil has always received the attention of the ablest minds at the South, and the best work on the subject of Calcareous Manures yet published in the Republic is of Southern origin. It is the production of Edmund Ruffin, a Virginia gentleman, who has given almost his entire life to practical Agriculture, was first published about 1837, is replete with sound information, is a standard authority with intelligent farmers north and south, and is a credit to any literature, being written in a pure and captivating style.

Robert R. Livingston, George Clinton, and Dr. Samuel L. Mitchell, have each written ably on the subject of Agriculture, and the remarks of the latter, written and published before Liebig was born, are by some believed far more correct than anything that has emanated from him.

We could enlarge alike our list of subjects as well as that of our books; but what has been done we consider sufficient for the purpose we have in view. Enough has been shown to convince the sceptical that America has not only a literature of her own, but that she has, within the short period of eighty years, created a literature which will not readily die. Since 1820, she has done wonders. The vast, the rapid change for the better in the style and scholarship of American writers in the past thirty-seven years must strike every intelligent mind familiar with American literature. Freedom from common-place expression, from pedantry, from mere words barren of ideas, is almost everywhere visible; and we discover, instead of long platitudes pregnant with verbosity, clear, bold, and vigorous writing—where words are the vehicles of thought, instead of sounding ornaments substituted for ideas.

It is a delicate question whether it is the more difficult task to create a

literature in a language new to letters, or to build up a literature for a new country in an old language already rich in intellectual treasures. In the first case a free field, unknown and unreapt, is open to the mind, rich in flowers sighing to be gathered; while in the other the soil is preöccupied, and the labourer must plant under the umbrageous shade of gigantic trees, whose roots have everywhere penetrated the soil, drawing from it the vitality it contains. And although this last is true of America, she has found it in her rugged and hardy nature to plant between the permeating roots of the literature of the mother country, and produce a growth of new works, which, if not so sublime as those of the parent country, are such as no candid Briton who loves his race can regard with other than feelings of pride.

CHAPTER VII.

FOREIGN WRITERS IN AMERICA.

In the preparation of the preceding chapters we have sedulously kept in view the fact that many foreigners in America, mostly natives of Europe, have added to the literature of the country during the American period, or from 1770 to the present time. And although the majority of these have had their tastes formed and been educated to a great extent in the United States, and may justly regard themselves Americans in principle, feeling, and preference; and notwithstanding their writings are essentially American, still we conceive it proper not to rank them as native authors for obvious reasons, and shall therefore consider them under the expressive and respectful head of Foreign or Collateral Writers.

The majority of this class who emigrated to the United States at an early period subsequent to the Revolution, were men of highly cultivated minds, possessing a just estimate of the good in literature, and a sense of true elegance of style, which, being imparted, did much to sustain a high tone of thought and expression among Americans given to letters. On the other hand, several of these persons, whose influence was unquestionably great over certain minds, displayed a coarseness of style, by no means worthy of imitation, which did much to lower the general taste, and corrupt for a time the clear current of the nation's youthful literature. Much of the vulgarity discoverable in the secondary class of American journals of this day, may be fairly attributed to this influence. It was adopted in newspaper articles, and being adapted to partisan purposes, proved a tempting but pernicious example. Paine's vigorous and sonorous style is blemished with vulgarity; and Cobbett's bold invective, although glowing with fervour, has an insidious tendency to corruption not easily resisted.

It was natural the earliest of these emigrants should participate in the party controversies of the times. Paine, who was undoubtedly the most remarkable man among them, early turned his mind to this description of writing, and his pamphlet of *Common Sense* was published in January, 1776. So

powerful was its effect upon the political world of Great Britain, that a reprint, with many omissions, was published in London in the same year, and other editions followed. His *Crisis* was written at various periods from December, 1776, to December, 1783, and at its conclusion formed a volume of about 200 pages. These were the only works of note he wrote in America, and by general consent they are considered his best.

As a representative of a class of contributors to American literature, whose views on politics and religion differed essentially from those of Paine and Cobbett, both of whom wrote in America, we may mention the justly-honoured name of John Witherspoon. This eminent divine was a lineal descendant of John Knox. His writings are mainly of a religious character: but he has left behind some very valuable works of a political nature. His *Essay on Money*, published before the close of the last century, was probably the first American production written against the repeated issue of paper currency, and many of its predictions have long since been fulfilled. He was for years the efficient President of the College of New Jersey, at Princeton, and, in 1781, published an entertaining volume of vigorously-written essays, entitled *The Druid*, in one of which he comments with singular beauty and force on the corruptions of languages, and the necessity of observing a purity of style among American authors.

A curiosity of literature is found in the history of Mrs. Susanna Rowson, the authoress of the once eagerly-sought for, and not yet forgotten, novel of *Charlotte Temple*. Mrs. Rowson was the daughter of a British naval officer, who was wrecked in 1769, on the coast of New England. He lived with his daughter for some time at Nantasket, but returned to England with her at the breaking out of the Revolution. She became an authoress in London, where she wrote her most successful novel, *Charlotte Temple*. It is founded on events in American life, with which the authoress shows great familiarity, and, like *Uncle Tom's Cabin*, was indebted for its popularity mainly to its speciality and its appeals to the softer feelings of our nature. The story of hardships endured by a simple-minded girl, seduced by a heartless and accomplished villain, and thrown destitute and friendless upon the world, is a subject designed to reach the heart; and no wonder therefore that 25,000 copies of *Charlotte Temple* were sold in a few years, at a time when printing was not done by steam. The popularity of the book, both in Europe and America, was as remarkable as the success of *Uncle Tom's Cabin*, and many of the scenes are quite as ably described.

The great political commotions in Europe incident to the French Revolution and the establishment of American Independence, induced several prominent minds to seek a home in the United States. Of those of this class who emigrated from England, the celebrated Dr. Joseph Priestley merits honourable mention for his contributions to the young nation's literature. He arrived at New York in 1794, and soon after settled at Northumberland, Pa., where he died in 1804. His active mind was never idle, and he early published two volumes on the *Evidences of Revelation*, that being the first work he wrote in America. He also wrote an able reply to Paine's and Volney's attacks upon revealed religion, as well as his *Continuation of the History of the Christian Church, from the Fall of the Western Empire to the present Times*, which he

dedicated to President Jefferson, and published in Northumberland, in Pennsylvania, in 1803. Dr. Priestley was also a contributor to the literary periodicals of the period, and communicated several scientific papers to the *Medical Repository* of New York.

In Dr. Thomas Cooper, a native of London, we have another of those remarkable men whose influence on American thought has not been without its influence. He joined his friend Priestley, at Northumberland, soon after that gentleman's arrival in America, and immediately began a series of Political Essays, which were published in the local Gazette, and afterwards reproduced in book form. He occupied various responsible offices, both judicial and educational, having been appointed, in 1806, President Judge of one of the Common Pleas Districts of Pennsylvania, afterwards Professor of Chemistry in Dickinson College, of Mineralogy in the University of Pennsylvania, and, finally, President of the South Carolina College, at Columbia. He wrote much and well. From 1812 to 1814, in connection with Dr. Coxe, he prepared a valuable work, entitled *The Emporium of the Arts and Sciences*, three of the five volumes being his own labour. In 1819 he published a valuable work on *Medical Jurisprudence;* and in 1826, at Columbia, South Carolina, his *Lectures on the Elements of Political Economy*, a work which advocates in forcible and manly argument free-trade at home and abroad. Dr. Cooper wrote upon *Religion and Man;* and was a strong opponent of the doctrine of the unity of the human race. He died at Columbia, in 1840.

Adventure, or a desire to improve their worldly prospects, led not a few ardent literary spirits to the new Republic. Among the most noted of these was Alexander Wilson, a native of Paisley. His fame rests mainly upon his excellent *American Ornithology;* but he was not unmindful of the lighter pursuits of authorship, and his strong poetical temperament frequently led him into the realms of rhyme. His American productions of this class are far from despicable, and their composition, no doubt, tended greatly to increase his command of language and improve his prose. *The Foresters*, *The Schoolmaster*, and the *Pilgrim*, are the results of his observations either as a woodsman, an instructor, or a wandering naturalist, and contain not only poetical similes and sentiments, but accurate descriptions of parts of the country but little known at the time they were written, and rarely noticed in works of travel.

Wilson turned his attention seriously to the study of the habits of American birds, as early as 1803; and the first of nine volumes on American Ornithology was published in 1808. It was illustrated by excellent plates by Lawson, a Scotchman long resident in America, and but 200 copies were printed. He did not live to complete the work. The eighth volume appeared in November, 1813, soon after his death, and the ninth and last volume was published under the editorship of his friend, George Ord, in 1814. In 1825, a new edition of the last three volumes was prepared and issued; and in 1828, Prince Charles Lucien Bonaparte published four supplementary volumes, thus making the work almost complete, and establishing it as a monument of Ornithology second only to the great work of Audubon, who never failed to award the praise to which Wilson was justly entitled.

Matthew Carey is a name honourably associated with American letters, and as

the father of Henry C. Carey, the political economist, and as an author of note himself, his works merit reference here. He emigrated from Ireland in 1784, and settled in Philadelphia, where he successfully established several newspapers and magazines, to all of which he contributed largely. He was early involved in a controversy with Cobbett; took an active part in politics, and in 1814, when party spirit was bitter and high, published a successful pamphlet, entitled the *Olive Branch*, whose object was the abatement of party violence, and which soon ran through ten editions. He was ever strongly attached to his native land, and published his *Vindiciæ Hibernicæ*, in 1818, in order to correct what he considered the mis-statements of English writers. This is the production upon which his literary reputation mainly rests, and although somewhat dry in style, no less than four editions of it were early demanded by the public.

Peter Duponceau, LL.D., Member of the Academy of Inscriptions of the French Institute, and of other Philosophical Societies, and whose various philological works are favourably known in Europe, emigrated from France to the United States with Baron Steuben, in 1777. He prepared a report, in 1819, on the *Structure of the Indian Languages*, which was published in the Transactions of the American Philosophical Society; and in May, 1835, gained the *Linguistique* Prize founded by Volney, from the French Institute, for his valuable memoir on the *Indian Languages of North America*, which essay was soon after published in Paris. His most profound work—*A Dissertation on the Chinese Language*—was published in 1838, and now holds the position of a high and sound authority on the subject of which it treats. All of Mr. Duponceau's works were written in America.

This branch of Science received much attention from the celebrated Albert Gallatin, a Swiss by birth, whose *Synopsis of the Indian Tribes within the United States*, and work on the *Languages and History of the Nations of Mexico, Yucatan, and Central America*, fully confirm the theories of Pickering, Duponceau, and others. Gallatin was a voluminous political as well as scientific writer, and was United States' minister at different times at both Paris and London. His style is forcible and classical. As an author he did much for both literature and science in America, and was rewarded for his services by the country of his adoption.

Of the more recent foreign writers in America, Dr. Francis Lieber merits our special attention. In 1828, he conceived and began the publication, at Philadelphia, of the *Encyclopædia Americana*, which he completed in 1832. And since that period he has both written much and done much for political and philosophical science in the United States. He has written well on all subjects, and one or more of his lighter works have been republished in London under disguised titles. Among the most valuable of his American productions are *Political Ethics*, 2 volumes, Boston, 1838-39; *Civil Liberty, and Self-Government*, Philadelphia, 1853; *Essays on Labour and Property*, being one of the most valuable contributions to the Science of Political Economy; and his several powerful Essays on Penal Laws, and the Penitentiary system. Dr. Lieber is a native of Berlin, but has long been an American citizen.

At a still later period Dr. Hermann E. Ludewig, a native of Dresden, followed up the investigation of Duponceau and Gallatin. Although he did

not emigrate to the United States until 1844, in 1846 he published his *Literature of American Local History*, a work of great value, and marked originality. At a later time he prepared his work on the *Literature of American Aboriginal Languages*, recently reëdited and published in London; and this must ever be regarded as among the most valuable books of its class. Dry as such a subject is, Dr. Ludewig has invested it with the novelty of attraction, and given it a place in letters. His career was brief in America, as he died there in December, 1856; but not before he had placed his name imperishably among those of distinguished foreigners who have contributed to the young nation's literature.

Since 1820, a number of foreigners have gained distinction by their contributions to the literature of Fiction. Of these William Henry Herbert, a native of London, is probably the most prominent. He seems to have taken up his permanent abode in the United States, and his many works have an American freshness about them not possessed by the writings of G. P. R. James, and other English romance writers who have written in America. Mr. Herbert is a voluminous, as well as a forcible and finished, author. His principal novels are *The Brothers; a Tale of the Fronde*, 1834; *Cromwell*, 1837; *Marmaduke Wyvil*, 1843; and *The Roman Traitor*, 1848. He has a healthy love of field and forest sports, to which we owe three excellent works, entitled, respectively, *My Shooting Box*, *The Warwick Woodlands*, and *Field Sports of the United States*. These sprightly books are evidently written by a conscientious man, and in this respect possess a value for truthful delineation, which the critical reader will look for in vain in the many romances of American forest life, which fill the pages of certain British periodicals under the pretence of being actual narratives. Mr. Herbert is the author of *The Captains of the Old World, their Campaigns, Character, and Conduct, as compared with the Great Modern Strategists:* a work of considerable acumen and analytical power.

In Scientific investigation, no European of the present century has done more in America than Louis Agassiz. Born in Switzerland, educated from boyhood to science, and by nature fond of its teachings, after having distinguished himself in his own country, he sought an extended field of exploration in the United States, where his labours have been duly appreciated. His contributions to our stock of Natural History in its various branches are among the most perfect of their kind, and his labours have identified him indissolubly with American Science. The principal American production upon which his fame will probably rest, is his *Contributions to the Natural History of the United States*, which is in course of publication.

Several foreigners have contributed largely and creditably to American Medical literature. Dr. Draper's *Human Physiology, Statistical and Dynamical*, first published in November, 1856, in New York, according to the London Medical Times and Gazette, " stands first of our physiological treatises." This truly great work has already passed through several editions, and is regarded in Europe, as well as in the United States, as standard authority. It is clearly written, is wide in its scope, original in its views, and is the most successful attempt at popularizing physiology ever made. Dr. Draper is a native of England. Another British writer in America on the same and kindred subjects,

is Dr. Robley Dunglison. His *Dictionary of Medical Science* has long been popular in the United States; and his *Practice of Medicine*, *Human Physiology*, and *Human Health*, established him as one of the clearest headed medical authors of the time. Both he and Dr. Draper have been for many years in the United States, and their works are decided acquisitions to the medical literature of the world.

Quite a number of foreign divines have, within the last forty years, contributed to American literature, but, without partiality, we must confine ourselves to a brief account of the writings of but one of these—Dr. Philip Schaff of Franklin and Marshall College at Lancaster, Pa. His most valued work is an elaborate *History of the Apostolic Church*, first published in German at Mercersburg, Pa., in 1851. This is a clearly written history, imbued with the spirit of Christianity, and remarkable for the comprehensiveness of its character. An edition in German was printed at Leipsic, in 1854, and in the same year an English reprint from an American edition in English appeared at Edinburgh. Dr. Schaff is a Swiss by birth, and is the author of eight other theological works, several of them being of American origin.

Did space permit, or occasion require, we might extend this list of foreign writers in the United States; but we believe this brief reference to a few of the more prominent, as marking the leaders of certain classes, will be sufficient here. We have purposely observed a distinction between native and foreign authors, in order that the really valuable in the native literature of the United States should stand upon its own merits, as well as to show that European ideas have not had such a controlling power over American mind as some prejudiced writers on this side pretend to believe. In fact, we have been forcibly impressed in the course of our long and arduous investigations with the truth, that the originality of American authorship has really risen above a powerful European influence, and, instead of suffering itself to be ingulfed by the waves from the currents of the Old World, has rather imparted its native freshness to them, and escaped their impurities.

CHAPTER VIII.

EDUCATION.

Schools for the education of the youthful colonists were established at an early period in the settlement of both Virginia and New England; but the first institution of learning in the United States deserving the name was founded by the Puritans of Massachusetts Bay. On the 8th of October, 1636, or eight years after the first Pilgrims landed in New England, the General Court at Boston voted £400 towards a school or college, and the following year established it at Newtown, to which place they subsequently gave the name of Cambridge. In 1638, the scheme was fully matured, the Rev. John Harvard having bequeathed for the endowment of the projected academy a sum equal to double the original appropriation, together with a choice library, and in

course of years the school became the time-honoured Harvard College. It is now one of the best-conducted institutions of learning in the world, and contains on its rolls of living graduates the names of Everett, Emerson, Prescott, and Bancroft.

For a considerable period Harvard College was the only institution of its kind in the Colonies, but others were founded as civilization extended, and the increased wealth and wants of the population demanded. At present there are 127 Colleges, 47 Theological Schools, 15 Law Schools, and 40 Medical Schools in the United States; to which might be added the various Public High Schools of the Northern States, all of which are colleges in every essential particular, and are mainly designed for instruction in the higher branches of human knowledge.

The great power, however, of national education is centred in the Public Schools, and we consider these worthy a brief notice here, because of their direct agency in creating a desire for reading among the masses, as well as for the indirect influence they exercise in developing and fostering the literature of the country The settlers of the colony of Massachusetts Bay were well aware of the advantages of public instruction, and to them belongs the honour of having made the first provision for Public Schools in what is now the United States. On the 30th May, 1639, Dorchester, in that province, voted £20 a year, to be paid by the proprietors of Thomson's Island, towards the maintenance of a school in that town for instruction in "English, Latin, and other tongues, also writing;" and in 1645, or only 25 years after the first landing, the constituted rulers passed an act extending the blessing of public instruction to the whole colony so far as practicable. In 1692, they strengthened their enactments, and, for the first time in the world's history, announced the great principle, now a maxim of free government, that all the people of a state should be educated by the state, and this doctrine has been extended into nearly all the members of the American Confederation. In Minnesota, the maxim that "the property of the people should educate the children of the people," is acknowledged and acted upon, and so popular are the Public Schools that large appropriations, both in land and in money, are annually devoted in a majority, if not all the States, to their support, increase, and extension, as the following comprehensive statement will show.

According to the census of 1850 there were nearly 81,000 Public Schools then in the United States. Of these there were 4042 in Maine; 2381 in New Hampshire; 3679 in Massachusetts; 2731 in Vermont; 416 in Rhode Island; 1656 in Connecticut; 11,580 in New York; 1473 in New Jersey; 9061 in Pennsylvania; 194 in Delaware; 898 in Maryland; 22 in the District of Columbia; 2930 in Virginia; 2657 in North Carolina; 724 in South Carolina; 1251 in Georgia; 69 in Florida; 1152 in Alabama; 782 in Mississippi; 664 in Louisiana; 349 in Texas; 353 in Arkansas; 1570 in Missouri; 2680 in Tennessee; 2234 in Kentucky; 11,661 in Ohio; 4822 in Indiana; 4052 in Illinois; 740 in Iowa; 2714 in Michigan; and 1423 in Wisconsin; the remainder being in the various Territories and California, exclusive of New Mexico and Minnesota.

When the Census was taken in 1850, the number of public scholars was 3,354,011, and the total cost of instruction and accommodation yearly, was

9,529,000 dollars. The ratio in the whole Union of Scholars to the population was one to every 5.6 persons including slaves, or one to every 4.6 persons of the white population. In Maine this ratio was one pupil to every 3.1 persons, giving to that State a larger proportion at school than is educated by any other state or country. And the ratio of the Republic, slaves included, demonstrates that the United States exceeds all other countries, Denmark alone excepted, in the number of pupils to the population. They had greatly increased in 1856. The cost of Public Schools that year throughout the Union, so far as could be learned, was upwards of 16 millions of dollars. Of this sum New York provided for her schools 3,544,587 dollars; Massachusetts for hers 2,346,309 dollars; Pennsylvania for hers 2,267,090 dollars; and Ohio for hers 2,732,800 dollars!

The number of schools had been greatly augmented in 1855, for we find there were then 10,469 in Pennsylvania; 11,883 in New York; 4242 in Maine, and a proportional increase in New Jersey, and these reliable data justify us in estimating the existing Public Schools of the Union at nearly 100,000. And the increase of scholars naturally keeps pace with, it if it does not surpass, the increase of schools. In 1850, the pupils attending public schools in New York State were 675,221, whereas in 1856 they numbered 876,603. In 1850 the Public Schools of New Jersey contained 77,920 pupils, whereas the number in 1856 was 176,350. And it is only fair to infer that the same rate of increase characterizes the schools of the South and West, and that the number of pupils at this time in attendance at the Public Schools of the United States is quite 5,000,000.

In this survey we have confined our remarks almost exclusively to the common schools of the country, not making any reference whatever to the many excellent private seminaries which everywhere abound throughout the Union, and in which a majority of the youth of the South of both sexes are educated. They also exert a power, and with lyceums, libraries, and literary and scientific bodies, are a prompting cause of that insatiable desire for literature everywhere so prevalent in the United States, and also aid in the great work now going forward, of creating a new and vigorous literature at once original and fresh, and glowing with nature and vitality.

CHAPTER IX.

INTRODUCTION AND PROGRESS OF PRINTING.

PRINTING exerts such a powerful influence in creating a taste, as well as supplying the existing demand, for literature, that to omit mention here of its history and progress in America, would be to leave a defect in our narrative of an important character.

From careful investigation we find that a printing-office was established at Cambridge, Massachusetts, in 1638, in which, in January, 1639, the art of printing was first practised in what is now the United States; and although

another press with types were added to the office in 1660, these presses were so fully employed, that many original works were sent to England to be printed —a practice which Thomas informs us, in his *History of Printing*, was continued for upwards of eighty years. For more than thirty years all works issued in the British North American Provinces were printed at Cambridge; but in 1674, a second printing-office was established at Boston; and in 1686, the third in the colonies was opened at Philadelphia, where, in that year, printing was first executed in the great State of Pennsylvania.

The art was introduced into New York in 1693, and seems to have slowly extended thence through the other provinces, until the breaking out of the Revolution, when it received a wonderful impulse. It is alleged that it was practised in Maryland as early as 1701, by one Green; but nothing of importance was done there before 1726. It was introduced into Virginia in 1729; into South Carolina in 1730; into New Jersey in 1751; into North Carolina in 1755; into Delaware in 1761; and into Georgia in 1762.

Our facilities for ascertaining when it was first practised in the New England States beyond Massachusetts are extremely few, and we are consequently without any positive data in all cases. It is known, however, that printing was executed in Rhode Island in 1732; and there is proof of the existence of a press in Connecticut in 1709. The art was first practised in New Hampshire in 1756; in Maine in 1780; and in the present State of Vermont about 1781. Its progress westward was even more rapid. The first press set up in the territory of the United States west of the Alleghanies was established in Kentucky in 1786; and the second was located at Knoxville, Tennessee, in 1793. In 1795 printing was introduced into Ohio, at Cincinnati, then a frontier trading-post; and in 1811 it was first practised in what is now the State of Indiana. It was first practised in Louisiana by the French, as early as 1704, but not much was done there before 1803, when the territory was ceded to the United States. At that period there was but one printing-office in Louisiana, whereas, in 1810, or only seven years later, there were about ten. The art was introduced into Missouri and Michigan in 1810; and into Mississippi in 1809. There was a press in Arkansas as early as 1825.

The first printing in Illinois was done at Kaskaskia, by Matthew Duncan, in 1815. It was practised in Wisconsin in 1827, by General Ellis, a pioneer, who, having no press, used a plainer and mallet to make his first impressions. In 1833, this same gentleman procured a press, and printed in that year, at Green Bay, the first newspaper published in Wisconsin. The art was practised in Texas, by the Spaniards as early as 1760, and by the Americans about 1829; and in Iowa, by W. C. Connell, in 1836. In 1832 Iowa was almost entirely a wilderness, and in that year the first house was built in that part of the State adjacent to the present city of Davenport, which place is now noted for its commerce, and no less than three daily papers are published there.

Another instance of the early introduction of the press into new countries by Americans, is found in the history of the State of Minnesota. In 1848 there was not a village in the country. A few scattered log-cabins only marked the presence of the white man. In 1849, April 28, printing was first executed in the territory. The first effort to publish a newspaper was made in 1848, but the printing was done at Cincinnati, and the journal was pub-

lished at St. Paul on the 27th April, 1849. In 1856 there were four printing-offices in St. Paul alone; and not fewer than 31 newspapers were published in the Territory. There were three *dailies* issued in St. Paul. It is believed some effort was made at printing by Mexicans, in California, prior to 1846; but we are unable to discover any evidence of the fact. After a careful perusal of several works on that country we are led to the conclusion that the first regular printing executed there was at Monterey, on the 15th August, 1846. We believe the Mormons began printing at the Great Salt Lake, in 1848; and that the art was practised in Oregon a year or two earlier than that date. It was first practised in Nebraska in 1854, and in Kansas the same year. At this time there are not fewer than twenty different newspapers published in that Territory.

To understand the rapid spread of printing west of the Alleghany Mountains, it must be remembered that the whole country thence to the Pacific Ocean was a dense impenetrable wilderness, inhabited only by savages and wild beasts, with here and there an occasional settler, as late as 1780. And that, at a period within the memory of men now living, there was not a permanent white settlement north of the Ohio, from the Wabash to the Pacific Ocean.

We have imperfectly traced the progress of the art in America, and given dates where obtainable; but this does not exactly convey a clear idea of the magnitude or extent of the printing business in the United States. From tolerably authentic sources it appears there were about 40 printing-offices in the country in 1776; about 375 in 1810; and not less than 900 in 1828. This number had increased to about 1800 in 1840; and in 1850, it had reached to about 4000. In this we do not, of course, include what are called "job offices," but such establishments only as possess facilities for printing either books or newspapers.

It is difficult to obtain correct figures respecting the number of persons employed at the art; and the Census of 1850 is evidently in error on this point. That report says there were 14,740 printers in the country then; but this is obviously incorrect. Allowing but five persons to each printing-office—which is a low average—we have a total of 20,000! But this number is doubtless below the mark, great as it may appear. There are offices in Boston, New York, Philadelphia, Baltimore, New Orleans, Cincinnati, and Washington City, which employ from thirty to two hundred printers each.

The following paragraph illustrates in some degree the extent of the business in a practical manner. There are, in the United States, says a recent authority, 750 paper mills in actual operation, having 2000 engines, and producing 270,000,000 pounds of paper in a year, which is worth, at 10 cents a-pound, 27,000,000 dollars. To produce this quantity of paper, 405,000,000 pounds of rags are required, 1½ pounds of rags being necessary to make 1 pound of paper. The cost of manufacturing, aside from labour and rags, is about 4,050,000 dollars.

There are no reliable data for estimating accurately the capital employed in the printing business in the United States; but it may be fairly conjectured to amount to 24,000,000 dollars. Of this sum, 12,000,000 dollars, at least, are invested in printing materials.

As a single instance of the increase of the business, we may take the city of

Philadelphia. In 1815 there were 40 hand-presses in that city, steam or power-presses being unknown there at that time. Twenty years later the capacity of the presses was about equal to 80 hand, or 16 power presses. During this period but four Treadwell power presses, an inferior description of presses since entirely abandoned, were in use in book-printing, being the only ones in the city. But from 1835 to 1854, the power presses alone had increased to 90, and some of them throw off 20,000 impressions hourly.

CHAPTER X.

REMUNERATION OF AUTHORS.

AUTHORSHIP has assumed the dignity of a profession in the United States; and, notwithstanding the cynical complaints of a few disappointed aspirants for literary fame and fortune, the well-written American book not unfrequently brings its author both fame and profit.

As early as 1817 authorship was occasionally fairly compensated by American publishers. In that year, George Goodrich and Sons paid Noah Webster 40,000 dollars for the copyright of his *Spelling-Book*. And, prior to 1837, a Philadelphia publisher paid 135,000 dollars to native authors; 30,000 dollars of the same being for two works only. Mr. Bancroft had received for his Histories, before 1854, quite 50,000 dollars; and up to that year Mr. Barnes had been paid fully 30,000 dollars for his *Notes on the Gospels*. The Harpers paid Mr. Stephens 30,000 dollars for his entertaining travels, in a few years. Professor Andrews received 6000 dollars for the first edition of his *Latin Lexicon:* and Professor Anthon has been paid upwards of 30,000 dollars for his valuable classical publications.

Ivison and Phinney, of New York, pay Sanders for his educational works about 30,000 dollars per annum; and to Mr. Thompson, the sum of 10,000 dollars yearly, as his share of the profits arising from his Arithmetical books. In the first six months of 1855, there were 244,000 of Sanders' and 38,500 of Thomson's books sold by this firm.

Childs and Peterson, of Philadelphia, have already paid 60,000 dollars, or more than £12,000, to Dr. Kane's family for his *Arctic Explorations in the Years* 1853—1855. This firm exhibits a liberality worthy the warmest praise. Their allowance of one dollar per copy in this case, to the holder of the copyright, is not only liberal, but generous.

We are informed on the best authority that J. B. Lippincott and Co., also of Philadelphia, have paid to Drs. Wood and Bache 80,000 dollars for their *United States Dispensatory:* and Little, Brown, and Co., of Boston, can show receipts for 500,000 dollars paid for copyrights. Of this large sum, 200,000 dollars were given to Judge Story and family, as their part of the profits arising from the sale of the works of that distinguished jurist.

The munificent patronage extended to Agassiz, the celebrated naturalist, in the publication of his *Contributions to the Natural History of the United*

States of America, surpasses any previous similar encourgement given to a scientific man. The work is to consist of ten volumes. Two are already published. The size is a large quarto, and each volume will cost in America, 12 dollars, or about £2 12s.; and although the author never hoped for more than 500 subscribers, he has been rewarded with a list of twenty-five hundred. He himself states these subscribers were obtained "from all the principal cities, and from towns and villages in the west, which a few years since did not exist. From California, from every corner of the United States," they came to encourage him in his work; and the generous patronage thus extended induced him to decline a Professorship at the hands of the French Government.

It is known to all those familiar with American literature, that Washington Irving, Cooper, Willis, Longfellow, and many others of note, live wholly by the profession of letters; and the success of J. B. Taylor is a marked instance of the reward which attends authorship in the United States. When a writer secures public regard, fame and fortune are his. In fact, it may be stated with confidence, and investigation will substantiate the assertion, that, next to the authors of Great Britain, those of the United States are the best paid in the world.

CHAPTER XI.

THE BOOK TRADE AND ITS EXTENT.

We have elsewhere briefly adverted to the business of publishing and bookselling in the United States; but its extent demands that we should devote a separate chapter to its consideration. During the colonial period it was limited. And yet at that early age some rather gigantic schemes were undertaken and successfully carried out. In 1743, Christopher Sower published, at Germantown, Pennsylvania, a quarto edition of 1000 copies of Luther's German Bible, containing 1272 pp., which, it must be acknowledged, would be anything but a slight undertaking at this day. His son subsequently published two large editions of the same work, one in 1762, the other in 1776.

These, however, were rare cases. Until after the revolution, publishing was limited and confined to the reproduction of foreign works. Soon after the establishment of Independence, in 1801, the American Company of Booksellers, consisting of members doing business in New York, Philadelphia, and Boston, was formed. They regulated the sale of books by fairs, and prohibited auction sales by any of their members on pain of expulsion. Since the inauguration of this movement, almost the entire publishing trade of the United States has sprung up. In 1804, the Company offered a gold medal for the best American printing paper, as well as premiums for the best specimens of American binding and printing ink. The beneficial effects of this movement were soon observable in the improved state of American books; and good materials and workmanship having been obtained in all branches of the pub-

lishing business, the trade expanded and increased with great vigour. The plan was strenuously supported by Mathew Carey, of Philadelphia, one of its projectors, who, by his powerful energy, contributed to its success. Publishing houses were soon established in all the large cities of the Union, but Boston for a considerable time was the chief publishing city of the United States. This position, however, she lost long since, and yet in 1855 the value of her book-trade was 5,500,000 dollars, exclusive of the transactions in paper and stationery.

In 1853 there were 355 book-publishing establishments in the United States. At present the number is more than 400. About three-fourths of these are located in New York, Philadelphia, Baltimore, and Boston, the rest being principally in Cincinnati, Charleston, New Orleans, Buffalo, Auburn, Albany, Louisville, Chicago, St. Louis, and Hartford. There are more than 3000 booksellers who dispense the publications of these 400 publishers, besides 6000 or 7000 general dealers who connect the trade in books with the ordinary stock of a "country store."

Some of these publishing establishments are immense. That of the Harpers, in New York, covers half an acre. The building alone cost £40,000! Their annual sales have been estimated at 2,000,000 volumes, and they employ not far from 600 persons.

J. B. Lippincott and Co., in Philadelphia, are said to have the largest book-distributing house in the world. It was established more than thirty years ago, by John Grigg, Esq., one of the most sagacious, prudent, and acute men living, and the father of the present gigantic and admirable American publishing system. Mr. Grigg has been a liberal encourager of American authorship, and his successors pursue his judicious example. Mr. Lippincott, the intelligent head of the firm above mentioned, is an enterprising gentleman, of enlarged views and extraordinary business capacity.

In the first half of 1855, this house had about 10,000 octavo pages of new standard works put into type, and issued from two to fifteen editions of each work. They have the stereotype plates of over 200 volumes, and sell upwards of 50,000 Bibles and Prayer-books every year. Their wholesale customers number about 5000, and for two months of each year they ship about seventy 300 lb. boxes of books daily, or ten tons of literature every twenty-four hours. In 1853 their business was estimated at about 2,000,000 dollars. A single Boston house, but recently established, sold in a very short time 26,500 copies of Henry Ward Beecher's *Lectures*; and the same firm, in the short space of one year, sold 46,000 copies of *Shady Side*, and in nine months 15,000 copies of Mrs. Child's *Life of Hopper*. They published 40,000 copies of the *Lamplighter* in the first two months of its existence, and about 295,000 copies of *Uncle Tom's Cabin* in all.

The house of D. Appleton and Co. have about 800,000 dollars invested in their business, and their sales amounted, in 1853, to quite 1,000,000 dollars. George P. Putnam, of the same city, is also extensively engaged in the publishing business, and during the five years ending with 1856, issued from 400 to 450 volumes, four-fifths of which, at least, were original.

Messrs Childs and Peterson of Philadelphia, one of the most aspiring firms

of the United States have circulated quite 60,000 copies of Dr. Kane's *Arctic Explorations:* and the sale of M. Allibone's *Critical Dictionary*, they have in press, will probably not fall much short of this number.

Phinney and Ivison circulate over 500,000 of Sanders' Reading Books, and 100,000 copies of Thomson's Arithmetical works yearly. The annual sale of Smith's Geography is about 100,000 volumes; and the firm of A. S. Barnes and Co., of New York, sold 800,000 volumes, mostly school-books, in 1853. Another house in the same city have sold, since 1850, more than 300,000 volumes of Cooper's Novels; and of a single modern book, by a comparatively unknown author, they sold 30,000 copies in the short period of thirty days. Mr. Scribner has disposed of more than 200,000 volumes of Headley's Works, and about 75,000 copies of Ik. Marvel's pleasing books. A firm in Hartford have sold 125,000 copies of the *Cottage Bible* within a few years; and another publishing house, at Auburn, sold 70,000 copies of Fanny Fern's first work.

In the infancy of American publishing 500 copies were a good edition. From 1827 to 1837, the ordinary sale of a successful book was from 1000 to 1500 copies; whereas now 1500 of any book can be disposed of, and it is not uncommon to print 10,000. The sale of Irving's works is by hundreds of thousands

Small editions, in fact, are the exception; and immense editions of good English works are quite common. There have been sold in the United States in five years, 80,000 volumes of the 8vo edition of the *Modern British Essayists:* 60,000 volumes of Macaulay's *Miscellanies*, in 3 vols.; 100,000 copies of Grace Aguillar's works in two years; more than 50,000 of Murray's *Encyclopædia of Geography;* 10,000 of Mc Culloch's *Commercial Dictionary:* and 10,000 of Alexander Smith's *Poems* in a few months. The American sale of Thackeray's works is quadruple that of England; Dickens' have sold by millions of volumes. *Bleak House* alone sold to the amount of 250,000 copies in volumes, magazines, and newspapers. Bulwer's last work reached about two-thirds of that number, and more than 100,000 copies of *Jane Eyre* have been disposed of.

Mr. Goodrich, the venerable Peter Parley, in his recently published Recollections of his life, gives some valuable facts respecting the growth of the publishing and bookselling business in the United States. He states the value and description of the books published in the country in 1820, to be as follows:—

	Dollars.
School	750,000
Classical	250,000
Theological	150,000
Law	200,000
Medical	150,000
All Others	1,000,000
	2,500,000

In 1830 this had increased to 3,500,000 dollars, the school-books alone being valued at 1,100,000; and in 1840, there was a further increase to 5,500,000 dollars, the school-books then standing at the value of 2,000,000. In 1850 the trade had more than doubled, the amounts being as follows:—

	Dollars.
School	5,500,000
Classical	1,000,000
Theological	500,000
Law	700,000
Medical	400,000
All Others	4,400,000
	12,500,000!

He estimates the book-trade of 1856 at 16,000,000 dollars; and as his statement is curious, we print it. It is proper, however, to say that this is a low estimate. The Book Trade of Boston is here put down at too low a sum. It was 5,500,000 in 1855.

Books published at	Dollars.
New York City	6,000,000
Albany, Rochester, &c.	600,000
Boston	2,500,000
New Haven, Hartford, &c.	600,000
Philadelphia	3,400,000
Cincinnati	1,300,000
Detroit, Chicago, and Milwaukie	100,000
District of Columbia, by Government	750,000
Baltimore, Charleston, &c. &c. . . .	750,000
	16,000,000

According to the same intelligent authority, the number of persons, in 1842, employed in book publishing, printing, bookbinding, type founding, engraving, plate-printing, and paper-making in the United States, was 418,048, and the amount of business annually done in all these callings was 28,348,912 dollars. 12,000,000 of volumes, 3,000,000 of Nos. of magazines, and 300,000,000 of newspapers were produced annually, the entire capital invested in their production being 16,600,000 dollars, of which 4,000,000 dollars were invested alone in books and magazines.

It is proper to notice here the wonderful change in the relative proportions of British and American books published in the United States since 1820. Mr. Goodrich is an authority for the statement, and we take his word unhesitatingly. He says the consumption in 1820, of American works in the Union, was 30 per cent.; that of British books 70 per cent. In 1830 the consumption of American works was 40 per cent. to 60 per cent of British works. In 1840 it was 55 per cent. of American, to 45 per cent. of British. In 1850 it was 70 per cent. of American to 30 per cent. of British; and in 1856, it was estimated, on reliable data, that the consumption of American books had increased to 80 per cent., while that of British books had decreased to 20 per cent.; or from 70 per cent. of the entire consumption in 1820, to but 20 per cent. in 1856.

This sketch of publishing and bookselling in the United States gives a tolerable idea of the literary demands of the people and the extent of business

done. Already large fortunes have been made by both authors and publishers, and but few other industrial pursuits are more honoured in the country. Within the memory of men now living, the American book-trade has sprung from an incipient to a flourishing condition; and yet, great as has been its progress within the past few years, we look upon it as still in its infancy. Our mental eyes see a future advancement before which all past achievements sink into insignificance; for the time is not far distant when American readers, through the present admirable system of public schools, and the growing power of an able press, will be counted by millions instead of by thousands, and both American and British authors will have their minds brought into contact with that of every intelligent being in a nation of fifty millions of people.

It is quite apparent the age of pernicious literature has nearly past. The tendency is upwards, and public attention is now directed to healthy sentiment. Works of fiction, to be read, must contain something of poetry, elevated sentiment, historical portraiture, or incitement to social improvement. And history, to be popular, must be truthful and ably written. Compilations without ability, and love stories devoid of moral precept, are becoming the garbage of literature.

CHAPTER XII.

NEWSPAPERS AND PERIODICALS.

One of the most powerful engines in the creation of a taste for literature among the masses in the United States is the Newspaper and Periodical Press. The extent and character of this instructor of the public mind, when once fully described, will in some degree explain that universal love of reading so observable in the Republic; and we deem a brief history of it essential to our present object.

This great power in the dissemination of knowledge does not appear to have been extensively used during the colonial periods of American letters; but it is worthy of note, alike in an historical point of view, and as exhibiting the wants of the settlers of New England, and the enterprise of the times, that a news-*placard* was printed in Boston, in 1689, and that a newspaper was begun in the same city, on the 25th of September, 1690. But one copy of this is now known to exist, and that is in the State Paper Office in London. It attracted the attention of the legislative authorities, and as they alleged it "came out contrary to law, and contained reflections of a very high nature," it was suppressed. It was to all intents and purposes a *newspaper*, being devoted to the record of passing events, domestic and foreign; and was therefore really the first of its kind issued in what is now the United States, and as such deserves mention in history. As a further item of historical interest which has been strangely overlooked by American historians, we may here state that in the same year, Governor Fletcher, of New York, caused a

London Gazette to be reprinted in that colony. It contained the details of an engagement with the French.

This first Boston newspaper effort was not forgotten, but in due time was successfully revived. In 1704, one John Campbell, a bookseller, then Postmaster in Boston, established a weekly journal under the title of the *Boston News Letter*, the publication of which was continued until 1776, a period of 72 years. This was followed by the *Boston Gazette*, begun December 21, 1719; and on the next day the *American Weekly Murcurie* was issued from the printing office of William Bradford at Philadelphia, being the third successful American newspaper. The fourth attempt, which resulted favourably, was made on the 18th of August, 1721, by James Franklin, an elder brother of Dr. Franklin, in the establishment at Boston of the *New England Courant*. It was for a time issued in the name of Benjamin Franklin as publisher, then an apprentice in the office, and was discontinued in 1727.

Somewhat more than four years after the publication of the first number of the above-named journal, or on the 16th of October, 1725, William Bradford issued the fifth successful American newspaper under the title of *The New York Gazette*, it being the first journal established in that city. Prior to its appearance no journal had been published between Boston and Philadelphia. Bradford continued its publication between 16 and 17 years, after which it was issued for a time by James Parker.

There was not much increase in the number of newspapers in the colonies up to 1754. In that year there were four in New England, all published in Boston, with an average circulation of but six hundred copies. There were no papers then printed in either Connecticut or New Hampshire, but Pennsylvania and New York each had two.

From 1754 until 1776 the increase was considerable. Seven papers were then published in Massachusetts, one in New Hampshire, two in Rhode Island, four in Connecticut, four in New York, nine in Pennsylvania, two each in Maryland, Virginia, and North Carolina, three in South Carolina, and one in Georgia, or thirty-seven in what afterwards became the Thirteen original States of the American Union; and nine of these were still published in 1810.

It does not appear that a journal was then published in New Jersey, although a Magazine had been printed there as early as 1752.

All the above journals, with one exception, that of the *Advertiser of Philadelphia*, which was published twice a week, because Congress assembled there, were weeklies, which must not be forgotten in the further consideration of this subject.

According to the statistics of the period, the number of newspapers in the United States had increased in 1801 to about 200, or 166 more than existed in 1776. Of these, several were *dailies*: and it is proper here to state that the first American journal of this description was issued at Philadelphia, in 1784. It was called the *Pennsylvania Packet; or, the General Advertiser*, and was continued under the name of *The Daily Advertiser*, until about the year 1837. Another daily, entitled *The New World*, printed in 4to, on half a sheet of medium, was published every morning and evening, Sundays excepted, at Philadelphia, in 1796; but the novel experiment of two daily papers from

the same press does not appear to have been successful at that early date, as the project was abandoned after a few months' trial.

A great increase, however, was exhibited both in the number of journals and their circulation, by the census of 1810, at which time there were 359 newspapers in the Union—27 being dailies—with an annual issue of about 22,321,000 copies. In 1814 the yearly circulation of American newspapers exceeded that of the newspaper press of Great Britain by more than 3,000,000 copies, and since then the excess has been almost quadrupled. For, we find that, while the annual circulation of stamped papers in Great Britain, in 1850, was not quite 92,000,000, the annual issue in the United States at that time was 426,409,978 copies.

In 1824 there were eleven daily papers in Philadelphia, and twelve of the same description in New York. The editions of those of the latter city varied from one to four thousand, which, when we reflect that they were printed on hand presses, must be regarded as a very creditable circulation. From that period forward editions increased even more rapidly, and in 1831 the *Christian Journal and Advocate*, a weekly issue, and the organ of the Methodist persuasion in the United States, had a circulation of twenty-five thousand copies, which was wonderful in those days of hand-presses and balls.

The number of Journals had been greatly augmented in 1828, at which time there were 852 published in the country, with a yearly issue of 68,117,796 copies; and in 1830 this number had increased to 1000, the circulation doubtless being in proportion. The census of 1840 manifested still more wonderful progress. The number was then 1631, and the yearly issue 195,838,673 copies. And in 1850, the number had reached to 2800, with an annual circulation of 426,409,978 copies, or an increase in about twenty years of considerably more than 2000 distinct newspaper publications.

As an appropriate illustration of this increase, it appears that in 1810 there were 3.81 copies to each person; in 1820, the number was 5.92 copies to each person; in 1828, 13.80 copies to each person; in 1850, 21.81 copies to each person in the Union, while there were 12.9 publications to every 100,000 inhabitants, being a condition of the press unknown in any other country.

As before stated, the number of *dailies* in the United States in 1810 was 27. In 1840, it had increased to 138, and in 1850, to 254. At the latter date there were 14 daily papers published in London, 2 in Dublin, and 1 in Glasgow, there being none others in the United Kingdom. There was a paper issued every day in Liverpool, but not from the same press. The issues were from different offices, and on alternate days. The contrast is remarkable.

Above we have a chronological narrative of the origin, increase, and extent of the American newspaper press up to 1850. Since that period the augmentation has been in character with past progress. We are not in possession of comprehensive data on the subject, but a few reliable materials at our command would seem to indicate with some degree of certainty the gigantic advances the American newspaper press has made since then.

In 1850 there were 106 newspapers published in New York City. In the autumn of 1856 the number had reached 120, with an aggregate annual circulation of 80,000,000 copies, the population at the period being about 850,000. At the same time there were 113 newspapers published in Boston,

having a yearly issue of 34,000,000; and 76 in Philadelphia, with a circulation of 48,000,000, making a total in these three cities alone of 209 journals, whose combined annual issue, it is fair to presume, is now 162,000,000 copies. Cincinnati has 30 papers, 16 of which are dailies, with an annual circulation of 9,000,000 of impressions. And although printing was not practised in Minnesota until April, 1849, at a time when nearly the entire country was a wilderness, there were 3 daily journals in St. Paul, in 1856, all well supported, and 31 different newspapers in the Territory. In June, 1857, there were about 20 journals printed in Kansas, not one of which existed in 1853.

Several individual papers in the large cities have an immense circulation. The New York *Herald* in June, 1857, had a daily issue of 70,000 copies. The *Times* circulated 42,000, and the *Tribune* 29,000 daily. The *Sun*, a cent paper published in the same city, had a daily circulation, in 1856, of 50,000.

From three of these establishments dailies, semi-weeklies, and weeklies are issued. The aggregate circulation of one issue of these various editions of the *Herald* is 100,000 copies; of the *Times*, 89,000; and of the *Tribune*, 214,000 copies. The *Public Ledger*, a cent paper published at Philadelphia, has a daily circulation of about 65,000.

We have no means of accurately ascertaining the number of copies daily printed of the leading journals in the southern and western cities, but it is doubtless as great, in proportion to the population, as that of the northern papers named.

In 1850, the dailies of the Union averaged a circulation of 3200 copies each; the tri-weeklies, 851; the semi-weeklies, 1200; and the weeklies, 1365 copies each. The average number issued of each journal was 1785. It is said on good authority that there are firms in New York and Boston who sometimes sell 100,000 papers each in a single day; but many of these are sent to country dealers, or to persons in the large towns near at hand. No person, we feel confident, will venture to doubt that the American people have a greater love for newspaper reading than those of any other nation. This is a well-established fact. In 1850, no less than fifteen newspapers were printed in the United States for every inhabitant of the country.

It is estimated that there are now about 4000 newspapers in the Republic. A Press of such magnitude must exert a corresponding influence, nor do we over-estimate its power when we assert it to be more potent, as a whole, than that of Great Britain. Its universal popularity and cheapness extend its dominion, and create readers. And we must not forget, in our description, that it is not merely local, nor even national, but has a world-wide character. It registers the news of the globe; and in this respect differs essentially from the press of all other countries. It is the daily reading book of the working man, the public educator, and the political instructor. So popular has it become that a town of 2000 inhabitants, which in England would not support a journal of any description, in America has its daily; and cities of 20,000 persons, which in England are content with their semi-weeklies, or weeklies, in the United States support four or five dailies, with as many weeklies. Even villages of a few hundreds of inhabitants have their papers, which, if not supported in the hamlet, draw patronage from the surrounding rural population, and there is scarcely such a curiosity in town or country as a family not in re-

ceipt of a journal. In the cities the working man looks for his morning paper as naturally as he does for his breakfast.

Mr. Knight Hunt, in his "Fourth Estate," makes the following sensible remarks on the influence of the press, and we quote them for their truth: "The prevalence," says he, "or scarcity of newspapers in a country affords a sort of index to its social state. Where journals are numerous the people have power, intelligence, and wealth; where journals are few, the many are in reality mere slaves. In the United States every village has its newspaper, and every city a dozen of these organs of popular sentiment."

Cheapness is a marked peculiarity of an influential portion of the American press. Until 1833, this was not generally the case. In January of that year the first paper for the "million" was tried in New York. At the commencement it was sold at two cents a copy, but at the end of a fortnight was reduced to a cent, and three days after ceased to exist. This failure did not dishearten other capitalists, and in September following the *Sun* was successfully started. It was sold to "carriers" at 62½ cents the hundred, who resold it a cent per copy. It continues to be published, and is profitable. Cent papers were soon after tried in other large northern cities, all of which now support daily *penny* journals.

That many American journals are carelessly conducted we do not deny, but, as a whole, they pay strict attention to morality. Attacks upon religion or delicacy are scrupulously excluded from their columns, and the public fully sustain them in this. No publication of disgraceful character has ever succeeded in the United States. The political press we know is, at times, exceedingly harsh in tone, partisan feeling getting the mastery of sober judgment, but this is not common. It is but proper to say that an indulgence of personality cannot be fairly charged to the American press, the few vile prints that are addicted to the habit being the most decided exceptions and excrescences. A powerful moral force is found in the Religious press. There are 120 papers of this character in the United States, with an estimated weekly circulation of 500,000!

The Journalism of the United States, like the character of the people, is versatile, flexible, and practical. Every interest, every social, and every political doctrine has its organ. Brevity, point, and terseness, characterize the editorials. The editor aims less at fine writing than at felicity and force. At times careless writing is discoverable, but this is owing mainly to the fact that the whole literary labour is too often performed by one man, and he is not equal to the task of always writing elegantly. In truth, the wonder is how one person manages to write so much, and so well, daily, as some American editors we could name.

Of the able journals of the United States, the *National Intelligencer*, at Washington, for moral tone and literary worth has no superior in Europe. The *Journal of Commerce*, *Evening Post*, *Courier and Inquirer*, *Commercial Advertiser*, *Tribune*, and *Times*, at New York; *Pennsylvania Inquirer*, *Press*, and *Evening Bulletin*, at Philadelphia; *Patriot* and *American*, at Baltimore; *Courier* and *Bulletin*, at New Orleans; *Traveller*, *Post*, *Advertiser*, and *Courier*, at Boston; *Inquirer* and *Commercial*, at Cincinnati; *Whig*, at Richmond, Va.; *Journal*, at Louisville; and *Republican*, at St. Louis, would do credit to the

daily journalism of any country. Of the valuable weekly papers, *The Home Journal* and *Independent*, at New York; *Saturday Evening Post* and *Episcopal Recorder*, at Philadelphia; *Telegraph*, at Germantown; and *Scientific American*, at New York, deserve special mention. The list is capable of being extended did our space allow; but as those named fairly represent the ability of the American press, this is not called for, and we can only desire that these in future shall be more quoted from in Europe than heretofore.

The size of many American journals is often objected to in this country, but the objection applies rather to the form than to the actual dimensions. As a rule they seldom exceed in size that of the London newspapers, but as they are ordinarily in *folio*, instead of *quarto*, their appearance is deceptive. The largest of them exceed the dimensions of the London *Times* by a few square inches only. In 1775 but few American papers were larger than cap or demi; in 1785 they were ordinarily medium where paper of that size was procurable; about 1812 they were mostly royal; a few years later double medium; since which the introduction of cylinder presses has increased the scope of newspaper enterprise to such an extent, that the size is no longer known by the old definite terms, but our ears have become as familiar with *blanket* and *mammoth* as were those of our fathers with cap and medium.

The demand for a higher description of ephemeral publications than newspapers is exhibited in the large number of monthly magazines which abound in the United States. In 1810 there were about twenty such publications, but we have not the means of ascertaining the number at present. That they are many, however, is well known, and several of them are conducted with great ability and success. As early as 1820 the *Edinburgh Review* spoke of the *North American Review*, as a work "written with great spirit, learning, and ability," a character it continues to maintain with a list of contributors, amongst whom are Everett, Dr. Robinson, Sparks, and Longfellow.

It would be invidious to particularize other periodicals on account of their literary worth where there are so many; but before closing these brief remarks on the monthly and quarterly publications of the United States, we must refer in terms of eulogy to the high tone and varied excellencies of *Harper's Magazine*, a journal with a monthly circulation of about 170,000 copies, in whose pages are to be found some of the choicest light and general reading of the day.

We speak of this work as an evidence of the literary taste of the American people, and the popularity it has acquired is merited. Each number contains fully 144 pages of instructive matter, appropriately illustrated with good woodcuts, and it combines in itself the racy monthly, and the more philosophical quarterly, blended with the best features of the daily journal. It has great power in the creation and dissemination of a love for pure literature.

The *Knickerbocker Magazine* is one of the oldest, if not actually the oldest of its class, in the United States. This periodical is very ably conducted, has among its contributors some of the leading literary men of the country, has a steady and large circulation, and a deservedly high character.

A more recently established magazine—the *Atlantic Monthly*—bids fair to attain a high position. This is to contain only original contributions from noted authors, in order to afford the public a high-toned periodical at a reason-

able price, as well as to make the project profitable alike to writers and publisher. It already contains good matter, and among its contributors are some of the first writers of the United States and Great Britain.

In January, 1857, the first number of a very useful publication, on the plan of "Notes and Queries," was begun at Boston, under the title of *The Historical Magazine, and Notes and Queries concerning the Antiquities, History, and Biography of America*, which has met with a reasonable amount of patronage, and supplies a vacuum in American periodical literature that has long existed. It is destined to be the repository of many valuable historical fragments, and already serves as a convenient medium of communication between men in all parts of the Union, whose object is the illumination of obscure points in American history, and the elucidation of mooted questions. In the brief period of its existence it has brought to light many curious incidents in the early history of the country heretofore sealed to the mass of readers. Judging from its character it is destined, among other achievements, to secure a uniform system of American bibliography, and to reform that shameful practice, now too prevalent among publishers in the United States, of printing *octavo* and *quarto* editions of the same book from the same plates, as well as to effect the total abolition of the habit so often indulged by American authors and publishers, of giving two or three titles to the same book, and thus by two dishonest practices involving American bibliography in confusion, and surrounding research with every conceivable difficulty.

CHAPTER XIII.

PRINTING PRESSES.

ALMOST as great progress has been made in the improvement of the structure of the printing press in the United States as in the extent and amount of the printing business itself. The first presses used in the colonies were imported from England; although some were manufactured in the country before the Revolution. These were mostly after the model of the invention of Blaew, the time-honoured wooden screw-press, subsequently improved by Adam Ramage, whose name it now bears in the Union. At first Ramage's presses were so constructed that two impressions were required for each side of a medium sheet, the platten being only large enough to cover one-half of a medium form; but he subsequently remedied this defect, if it were one; and after other manufacturers had adopted iron he substituted that material for wood, but not until the popularity of his presses had materially declined. Still, as they are really excellent, they are much in use in the country districts; which cannot be said of the celebrated Columbian press, now obsolete in the United States, although it, strangely enough, maintains its popularity in England. This was invented in 1816. It was soon after introduced into Europe, and in 1818, its inventor received 1500 dollars as a present from the Emperor of Russia, and a gold

medal from the King of the Netherlands, valued at 250 dollars, besides other flattering testimonials from persons of distinction.

This press is an application of the upright lever principle; but being very complicated, and liable to derangement, a more simple one, made by Mr. Wells, of Hartford, Connecticut, soon contended with it for popularity in the Northern States, and both were followed and finally superseded by the Smith press. And, at about the time this last-mentioned invention came into use, the Washington press was brought into notice, taking its place at once with the Smith press, and the two are now the only large hand-presses in general use in the United States. The Washington press is remarkable for its simplicity of construction, great power, cheapness, and the facility with which it can be worked. Like the Smith press, it is an application of the upright lever principle.

The great demand for daily journals in the United States, together with the large editions required of some, early attracted the attention of the publishers of the more successful of these publications to a means for their production more rapid than the ordinary hand-press; and it is not surprising, therefore, that cylinder steam-presses were made use of there soon after their appearance in Europe. We are unable, however, to learn with any degree of accuracy when, where, or by whom the first steam printing press was set up in America; but it is quite certain the Napier press was in operation in New York before 1824. In 1829, Robert Hoe, of New York, father of the present head of the celebrated firm of Hoe and Co., of that city, made an improvement in the Napier press, by which 1500, instead of 1100, copies were thrown off by it in an hour; and in 1835, Richard M. Hoe constructed a double cylinder press, which printed 3000 sheets in an hour. In 1842 this was further increased to 5000 impressions in an hour; and in 1846 an improvement was made by which 10,000 an hour were thrown off. This number, great as it is, was subsequently surpassed; but before describing this last achievement in mechanics as applied to printing, we shall briefly refer to the Adams press.

We are not aware of the date of this invention. Nevertheless it was in use as early as 1838, and is unquestionably the very best steam printing machine for fine book-work. We believe it to be of Boston origin—at all events that city is the sole place of its manufacture. It ordinarily throws off 2500 sheets in an hour, is fed by females, discharges itself, and moves with the precision and ease of an intelligent being. Its work equals the finest produced on the hand-press, although the sheets are of the largest size used in book-printing, and it is in use everywhere from the Atlantic to the Pacific where book-work is done.

The great American improvement, or, more properly speaking, invention, in printing presses, is the result of the talents and industry of R. M. Hoe. and was first put into operation in 1846. It is believed to be the first successful effort to print from types secured around a cylinder, and certainly surpasses all other similar machines designed for that purpose. The first of these presses publicly used was set up in the office of the *Public Ledger*, in Philadelphia, in February, 1847, since which time they have become popular throughout the United States, and have been introduced successfully into Europe. In fact, Mr. Hoe introduced them into Paris in 1849, at which time he attempted to bring them into use in England, but did not succeed. Mr. Applegath's press

was then in high repute in London, and a transatlantic rival was not likely to attract much patronage. Still merit at last asserted its claims, and in May, 1856, the first of this description of presses used in England was put into operation in the office of *Lloyd's Weekly*. The simplicity of so vast a machine, the cylinder being *horizontal*, the ease with which it works, its rapidity, and, more than all, its wonderful capacity for printing large editions, and in some cases throwing off 20,000 copies of a journal like the great London daily in a single hour, claimed for it at once the attention of those most interested in such machines; and in 1856 Mr. Hoe received an order from the proprietors of the London *Times* for a press which is to print 20,000 copies of that paper in an hour. This machine is to be 37 feet long, 18 feet high, and 6½ feet wide. It is to have ten cylinders, and as it will lay off its own sheets, but ten persons will be required to work it, whereas twenty are employed at present on the presses used in striking off a daily edition of the *Times*. Mr. Hoe has also an order for another from the proprietors of *Lloyd's Weekly*, and for one each for the publishers of the *London Illustrated News*, and the *North British Advertiser*; but not having the facilities at home for their construction, in addition to those in hand for American use, he has made arrangements, and is now manufacturing these in Manchester.

Did our subject admit, we could extend this list of American printing presses by a description of those intended for job-work; but a simple reference to them here must suffice. Some of this description of presses are as unique in their line as is the "Type Revolving Printing Machine" of Mr. Hoe among newspaper presses.

Time brings about strange revolutions, and but few of his wonders are more remarkable than the facts this brief sketch contains. In 1770 the Colonies were mainly dependent upon England for printing presses; in 1856, the once dependent colonies—now a vigorous young nation—sent to the mother-country the best invention capable of supplying in sufficient quantities that daily pabulum of the mind so widely demanded by the British nation. It is not irreverent here to say, that the inspired prophecy, "Cast your bread upon the waters, and it shall be returned to you in many days," has in this case found a singular and unlooked-for fulfilment.

CHAPTER XIV.

TYPOGRAPHY—TYPE-FOUNDRIES—PAPER—BINDING, ETC.

AMERICAN typography sixty, or even forty years ago, was quite a different thing to what it is now. At the first-named period, the country was almost wholly dependent upon Europe for type, paper, and printing ink, of good quality, and as these were not easily obtainable, and were always expensive, the larger proportion of the printing done in the republic was necessarily of an inferior character, until the native manufactures of type, paper, and printing ink began to manifest improvement. And we must bear in mind that the

absence of a wide demand for good typography also had weight in preventing its general production: for the majority of the works first printed were both cheap and useful, which circumstances prevented, in a new country, any desired display at fine typography an ambitious printer might cherish. Still, much of the work executed at the close of the last, and the beginning of this, century, equals some of the best English printing of the period. Fry and Kamerer, of Philadelphia, executed some very superior work, their 4to edition of *Barlow's Columbiad* being one of the most creditable specimens of typography of the age; and an edition of the *British Poets*, in fifty neat duodecimo volumes, printed at Philadelphia about 1820, by Mr. William Brown, would do honour now to many establishments of large pretensions. A very handsomely printed edition of *Rees's Cyclopædia*, in 47 vols., was sent forth from the Philadelphia press at the beginning of the present century, and not a few admirable specimens of typography were thrown off by the Boston and New York press. Some excellent work was done in smaller towns, and we have in our possession a copy of the Rev. N. S. Wheaton's *Journal* of a visit to England, Scotland, and France, printed at Hartford, Connecticut, in 1830, before the general introduction of rollers, which, in point of accuracy of composition, and beauty of pressmanship, is a masterpiece of typography. The colour is wonderfully uniform, considering it was put on the type with balls, and yet it does not appear that the book in question was regarded at the time of printing as anything more than an ordinary piece of work.

At the present time book-printing in America has reached a high state of perfection. We have elsewhere referred to the printing-presses of the country, and the work executed on them fulfils the highest expectations. Much of the printing now done for the government at Washington is of the best kind, and *Owen's Geological Survey*, *Perry's Japan Expedition*, the *Reports* of the various surveys of a railroad route to the Pacific, and the different volumes relating to the scientific department of the U. S. Exploring Expedition under Captain Wilkes, are most creditable specimens of American typography. And so are the great majority of the books published by the large publishing houses at New York, Philadelphia, Baltimore, Cincinnati, Boston, Auburn, and Hartford.

The earliest American printers obtained their types from Europe. Christopher Sower, of Germantown, before mentioned as the publisher of a quarto German Bible at that place, established a type-foundry there for casting German letters as early as 1739—some say 1735. This was necessarily small, but it was the nucleus of what is now the largest establishment south of New York, if not the largest in the country. Attempts to establish type-foundries were made both in Massachusetts and Connecticut, about 1768, and Franklin tried the experiment in Philadelphia, in 1775, but all were unsuccessful. Soon after the Revolutionary War a more fortunate attempt was made in the same city by John Baine, a Scotchman, and he was the first who regularly carried on the business of type-founding in the United States. The fragments of his establishment, and among them were the old matrices used by Sower, fell into the hands of Binney and Ronaldson, also Scotchmen, early in the present century, and their foundry was for several years the most extensive in the country. In 1828, it was the only foundry

south of New York, and at that time six or seven persons produced all the types cast in it. The business, however, has increased wonderfully, and at this time there are no less than nine type foundries in Philadelphia alone, employing from 600 to 700 hands, and any one of them produces more than did all the foundries in the country in 1828. We are unable to say what is the number of these establishments now in the United States, but they are quite numerous, and abound from the Atlantic to the Pacific coasts. They supply not only the American Republic, but Canada, the West India Islands, South America, and Mexico. In 1851 there were about twenty-five in all, employing 8000 persons, and the aggregate weight of the type produced in them daily was upwards of 4400 pounds.

It has been erroneously stated that stereotyping was first introduced into the United States only about thirty-five years ago. We have the authority of Thomas for the fact that it was practised by Benjamin Mecum, a nephew of Dr. Franklin, in Philadelphia, in 1775. He cast the plates for a number of pages of the New Testament, and although skilful, was not entirely successful. Mr. Jacob Perkins, of Newburyport, Massachusetts, invented a new plan of stereotyping about 1810, and, coming to England, realized a fortune by printing stamps for the government. It is curious that Massachusetts, the first colony to resist the Stamp Act openly, should send a son of hers to England there to manufacture *stamps* for the use of the British people! The business of stereotyping has much increased of late, as may be supposed, and whereas, but thirty-three years ago, one man was able to do all of it required in Philadelphia, now several hundred persons are employed at the business in that city alone.

Paper-making was first practised in the United States by a family of the name of Rittenhouse, at Roxborough, Penna., if not in 1693, certainly in 1697, for we have positive proof of that in Gabriel Thomas's *History of the Province of Pennsylvania*, written in that year. Since then the business has become extensive, and there are now more than 750 paper-mills in the country, with 2000 engines in constant operation. Much of this paper is excellent; but it cannot be denied that the beauty of American printing is considerably affected detrimentally by the predominance given to cotton rags.

If the consumption of paper be an evidence of the intelligence of a people, those of the United States should be the best informed in the world. In France the yearly production averages about four pounds of paper per head; in England the average is four and three quarter pounds, and in the United States it is quite thirteen and a half pounds per head.

In conclusion, we may say that the Americans have effected much that is creditable to themselves in book-binding. Their books are usually bound in a substantial manner, and, where occasion requires, in a style of elegance and finish not inferior to much of a fine description produced in Europe. Many of their publications are bound in the best style of the art, and the books of the present day, when compared with those of forty years ago, exhibit the whole history of the progress of the arts of printing, paper-making, type founding, and binding, in that period in the United States.

CHAPTER XV.

GENERAL REMARKS.

We have endeavoured in the foregoing pages to supply a few facts respecting American literature, and to place those facts before the reader with as little parade as possible. Where titles are introduced they are intended to represent such works as are the types of their class, books which have received the approval of competent judges, and which are known on both sides of the Atlantic. What has been stated is mainly the result of careful investigation and extensive reading. The object in view, was the arrangement into narrative form, with some regard to chronological order, of such facts as would go towards imparting to the general reader a correct and comprehensive outline of the rise and progress of American literature. How far this object has been accomplished it is for the reader to judge. The whole labour may be a failure: but, if so, we feel confident that the materials we have thrown together are in themselves good, and may yet prove acceptable to readers under the treatment of a writer better qualified than ourselves for the task. We shall be content to know that the facts we have brought to light may tend to remove prejudices now honestly entertained by many Europeans respecting American literature, and that our remarks may incite to further inquiry.

Great authors rise at long intervals. England has but one Shakspeare, and but one Milton. Within the two centuries which have elapsed since the successful settlement of Virginia and Massachusetts, many of her most cherished authors lived. The majority of these, however, are as much American as English. The marked distinction between the two nations did not show itself in their literature before the American Revolution. Then the colonists began to think for themselves, and their writings took the impress of the new state of things. What has been accomplished in the past fifty years should satisfy any American. Another half century of equal progress will leave no doubt as to the fact of an American literature. An English author of distinction, recently returned from the United States, lately stated at a public dinner in London that Great Britain and the United States are now the only depositories of pure literature. An American would hesitate to make such a declaration:—an Englishman could do it with propriety. It is bold. Some may ask, is it correct? Yes. At this time no Continental author can write and publish his independent thoughts without the danger of exile or imprisonment before his eyes. Tyranny must be conciliated at the sacrifice of honest conviction, and *purity* is thus destroyed. And if Continental countries no longer foster a pure literature, where must we seek it? The answer is to be found in Mr. Mackay's speech. Fifty years ago the most sanguine believer in the eventual success of American literature would hardly have ventured to predict, that at this time the most popular living poet in Great Britain would be an American, and that American books would constitute a large and important part of the popular reading of the British public. Yet such is the fact. The wonder is that a country, then so dependent on foreign ideas, should now influence old communities by her thoughts.

It has been justly observed, that we are not so much governed by the opinions

writers teach, as by the sentiments they inspire. For years the teachings of American authors were coldly received in Europe: but the sentiments their writings elicited have rewarded them with a more patient reception at the hands of the present generation than the criticism of thirty years ago augured. And at this period American authors find readers in Europe because of the purity of their style, the originality of their views, and the thoughts they suggest. Notwithstanding all the severe remarks expended on the works of trans-Atlantic writers, their teachings are by no means powerless in the Old World. It is not claiming too much to say that American literature has a marked original character; that much of it is destined to endure for ages, and that it has already a powerful influence in advancing the mental and material welfare of civilized man. It is a recognised power through the sentiments it inspires.

It is not yet forty years since the United States were taunted with the allegation that in the fifty years they had been a nation they had not produced a book that would stand the test of time. The remark was illiberal. A nation's literature is not the growth of a day. Carthage had no literature, although she existed four hundred years in the full enjoyment of the light of Grecian learning. She expired, and left no sign of her mental power. Rome was no better off during the same period, and, had she shared the fate of her rival, the Latin tongue would not now be a depository of pure classical literature. Is it presumptuous, then, to ask whether, if the American Republic were now to meet the doom of Carthage, there is not much in her literature that would not live? Irving's pure English will assuredly continue to adorn the language of which it is a part, so long as that language shall remain recorded. He and his fellow American authors have stampt the impress of their nationality upon the English tongue. In the four hundred years that Rome occupied Britain, she failed to leave a single living evidence of it on the language of the people. But in the eighty-two years of the existence of the United States, the Republic has infused her spirit into the English language, and has extended that language over the greater part of the continent of North America, to say nothing of the remote islands of the Pacific.

The steady progress of American authorship, in the face of unjust opposition, is not the least remarkable event in the history of the nation. A people less self-reliant would have been disheartened with half the illiberal criticism to which the Americans have been subjected. For very many years European critics viewed all Americans books with disdain. As a rule, American works were subjected to the most illiberal tests, and not only underwent the ordeal of severe criticism, but were often received with that prejudice so long entertained in Europe towards everything American. In the first twenty-five years of the present century, American books were often reviewed for the sole purpose of fault-finding and ridicule. The critics had a standard of their own creation, formed from European ideas solely, and never for a moment seemed to imagine that other people had a right to think for themselves, or that what was a proper model in one country might, from the prevalence of a different style of thought and education, be totally unadapted to another. They believed, or pretended to believe, that theirs was the rule of excellence, and in its application not only committed palpable blunders, but dealt unjustly and unkindly with meritorious works, simply because of their origin; and, not content with de-

nouncing the books themselves, wandered abroad to indulge in uncalled-for vituperation of the American people and their institutions. That these ill-advised effusions had a bad effect on both sides of the Atlantic was natural. But their influence has happily past. The feelings they temporarily aroused have been extinguished, and criticism of the order under notice is now only indulged by the envious and illiberal few, American literature being fairly recognised in Europe by all whose opinions merit respect.

To judge properly of a literature the reader ought to have access to a comprehensive collection of the works of which it is composed. Very many American productions will not, from their nature and the limited demand that exists for them, admit of re-production in Europe. The supply must, therefore, depend upon importation, and it is gratifying to the writer, as an American, to mention, that Mr. Trübner, the enterprising projector and publisher of the volume of which these pages form a part, has for years imported into Great Britain books which probably would never have reached Europe without his aid. To him many recent American authors are mainly indebted for their introduction to British readers. His *Bibliographical Guide to American Literature*, published in 1855, was the first effort made in Europe towards a properly arranged list of American books, and the wonderful success it met with was deserved. The want of, and demand for, such a work in Great Britain, were a flattering compliment to American literature. Since its publication American books are in such constant requirement, that scarcely a steamship trading between Liverpool and the United States makes a homeward trip without bringing a consignment for London, and the demand is rapidly on the increase. This fact shows the existence of an extensive appreciation of American literature in Great Britain not publicly known; and it is fair to infer that the books imported by Mr. Trübner make their way into the hands of those capable of forming a just estimate of their value.

Human progress has been so rapid of late years, that deep-rooted national prejudices are fast disappearing from the popular mind. The people of different countries are beginning to see that there is something good in each and every nation—that no one country can arrogate to itself the right to establish on its own ideas a standard of universal excellence, and that, after all, the world is to be improved by an exchange of thoughts, and by a more general and more frequent intercourse among people. One of the fruits of this principle is the increased attention of most European nations to the merits of American literature.

We cannot conclude our remarks without acknowledging that a vast number of comparatively worthless literary productions have an American origin; but in a country so new it would be unfair to expect universal excellence. Worthless books, like worthless individuals, soon pass into oblivion; and, as improvement of the human race is the paramount aim of this age, we have made it a duty to direct attention to the valuable in American literature, in order to make it more generally known. The structure we have reared may want the ornaments of architecture, and the masterly proportions of a grand design; but, while it lacks these, it doubtless has within a fund of information, which will repay the one who has the time to enter its portals.

BENJAMIN MORAN.

PUBLIC LIBRARIES

OF

THE UNITED STATES.

THE early history of Libraries in America derives a special interest for Englishmen from the fact that it is preëminently a record of reciprocal good offices, between some of the best men of both countries. There is not a Library in the United States, of the age of a century and upwards, which does not treasure on its roll of benefactors the name of many a liberal-minded Englishman, who saw that in lending what furtherance he could to the cause of learning in the rising community, he was at once discharging a plain duty, and sowing the seeds of an abundant harvest, of which his own posterity would surely reap a portion, though they might never behold the fields in which it was to grow.

Many have been the flippant and shallow sneers which, in more recent days, have been thrown by writers of a certain school—small, but noisy—at the Americans, for their alleged disregard of literature of the higher order, and especially for their want of those great collections of books, without which thorough scholarship and lofty literary enterprise are alike impossible.

Perhaps an unlucky remark which fell from a North American Reviewer, some years ago, may have been the germ of some of these depreciatory statements. For in these days of countless periodicals a casual and hasty paragraph will sometimes attain a singular vitality by mere dint of repetition. Literature will not be much promoted, observed this writer, by a "facility for accumulating quotations by means of huge libraries." * Of course, a brother critic on this side of the water speedily improves the occasion, by assuring his readers that the "spirit of pride which leads us to contemn what we do not possess, has unhappily had its effect on the Americans, and induced them to undervalue the advantages of public libraries." † Other writers follow the lead, until we find the grave historian of Europe, Sir Archibald Alison, asserting not only that "literature meets with little encouragement in America," but that American historians will have to write the history of the present gener-

* *North American Review*, No. 65.

† *Foreign Quarterly Review*, Vol. vii. p. 227.

ation from the archives of other lands, so "utterly regardless" are their countrymen of "historical records and monuments."

Most true it is that America can show no great encyclopædical collection like the Imperial Library at Paris, or the British Museum Library in London, or the Bodleian at Oxford. Such repositories as these are the slow growth of centuries. They need the combination of many favourable circumstances, and the laborious efforts of several successive generations of benefactors. The rude and arduous pioneer work which the American Colonists had to perform, might well have tasked their utmost energies, to the exclusion of all thought for the wants of their future historians and scholars, in the way of a great public provision of books. That Collegiate and other Educational Libraries, indeed, should be formed in the States may be regarded as but the natural sequence of that wise and far-sighted policy which led the Legislature of Massachusetts to enact (more than two hundred years ago) that "when any town shall increase to the number of one hundred families they shall, under penalty, . . . set up a grammar-school;"*—thus initiating one of the best systems of school organization which the world has seen, and deciding on broad and enduring principles a question, which in the mother-country is to this day made the arena of petty sectarian conflicts. But it would be vain indeed to expect any elaborate collection of the muniments of history, and the rarities of literature, from men who not only had before them the conversion of a vast wilderness into a civilised and religious community, but of whom it might be said with literal truth, that "they who builded and they who bare burdens, ... with one hand wrought at the work, and with the other hand held a weapon."

It will, however, become apparent in the course of our brief review of the rise and progress of Public Libraries in the United States, that even in times of savage warfare and intestine difficulty there have been Americans who were thoughtfully providing for the wants of the men of letters of a more quiet period to come; whilst, on the other hand, the Union, as a country, has long been distinguished for the wide diffusion of a popular taste for reading, and the large facilities presented for the gratification of that taste. The discrimination, too, which time was sure to bring with it, is visibly advancing. No circumstance in recent days has more noticeably affected the book-markets of Europe, than the rapid growth of the American demand for good, choice, and fine books. Always a nation of readers, they are becoming, not indeed a nation of critics, but—what is much better—of generous appreciators of the literature of all Europe, as well as of their own. Seventy years ago it was said of them: "It is scarce possible to conceive the number of readers with which every little town abounds. The common people are on a footing in point of literature with the middle ranks of Europe." But the same writer tells us, that "of expensive publications they have none. A single book of the value of £5 or £10 is nowhere to be found here."† Sixty-four years after these passages were penned, another writer, Mr. Henry Stevens, of Vermont—who has had

* *Charters and general laws of the Colony and Province of Massachusetts Bay.* (Boston, 1814. 8vo.)

† *Bibliotheca Americana* (1789), Preface.

unusual opportunities of forming a correct judgment on such matters—tells us that "a few years ago the veriest trash was deemed good enough for exportation to Jonathan, who was then proverbially not over-particular either as to the edition or condition of his books, provided he had enough of them. Now, however, he buys . . . much more intelligently. . . . He is ready and anxious to secure for his library those literary gems which are so wont to delight the heart and empty the pockets of the bibliophile." * And, above all things, it might have been added, he is eager to collect, at any cost, every work that throws light on the early history of his own country, so utterly wide of the mark is Sir Archibald Alison's unwise assertion, that Americans "are wholly regardless of historical records or monuments."

CHAPTER I.

OF COLLEGIATE LIBRARIES.

I. COLLEGIATE LIBRARIES.

[1.] Library of Harvard College.

THE largest Library (or that which was largest † only a few months ago) is also their oldest. The Library of Harvard College, at Cambridge, Massachusetts, is almost contemporaneous with the College itself, which was founded by the Massachusetts Legislature, at the instance of the celebrated Governor Winthrop, in 1632, and endowed by John Harvard, with his library and half his estate, six years afterwards. To the small, but precious collection of Harvard, were successively added the valuable gifts of Sir Kenelm Digby, Sir John Maynard, Dr. Lightfoot, Dr. Gale, Richard Baxter, Bishop Berkeley, and other benefactors, of the mother country, as well as those of many native Americans. How many interesting associations must have been bound up with those early acquisitions, we may partly estimate from a passage in Baxter's writings: "I purposed," he says, "to have given almost all my library to Cambridge, in New England; but Mr. Thomas Knowles, who knew their library, told me that Sir Kenelm Digby had already given them the Fathers', Councils, and Schoolmen, and that it was Histories and Commentators which they wanted. Whereupon I sent them some of my Commentators and some Histories, among which was Freherus, Reuherus, and Pistorius's Collections . . . . *Now*, I must depend on the credit of my memory." ‡ Reminiscences like this are all that now survive of this first "Harvard Library," the whole of which, with the philosophical apparatus and much other property of the College, as well as the building which it occupied, was destroyed by fire in January, 1764.

The calamity, however, did but give a new impulse to liberal exertion both at home and in England. The Legislature immediately set apart £2000 for a

* Stevens, *My English Library*, Preface.

† Taking into the account, that is, the subsidiary collections called "Society Libraries."

‡ *True History of Councils*, as quoted in Orme's *Life of Baxter*, vol. ii. p. 384.

new building. Almost another £1000 was raised by a public subscription in the State.* Equal zeal was shown in the restoration of the Library, so far as that was possible. The General Assembly of New Hampshire gave books to the value of £300 sterling. The Societies for the Propagation of the Gospel gave an equal sum, to be expended in purchases. Amongst individual benefactors, Thomas Hollis stands preëminent. During the ten years which elapsed between the fire of 1764 and his death, he sent over no less than forty-three cases of books, selected with that keen relish for our best writers, and that acute perception of the pregnant qualities of books as the "fertilizers" of the soul, by which (as well as by some singular crotchets that did nobody much harm) he was so remarkably distinguished. At his death he bequeathed to the College a sum of money, from which there is still a fund of three thousand dollars, the interest whereof is expended in the purchase of books.†

Mr. Brand Hollis followed his uncle's example, both by the gift of books and by a legacy at his death. John Hancock gave £550 in money, and "a large collection of chosen authors." Thomas Palmer, of Boston, gave, in 1772, a set of the Works of Piranesi, and some other choice books; and, nearly fifty years afterwards, bequeathed a library of about 1200 volumes, valued at 2500 dollars. Samuel Shapleigh, who was Librarian at Harvard at the beginning of the present century, gave a piece of land to the Library, and made it his residuary legatee. The fund thence accruing is combined with that of Hollis, and their conjoint interest amounts to about £100 a-year.

In 1818, Israel Thorndike, of Boston, purchased, and presented to Harvard College the celebrated Library of Professor Ebeling, of Hamburgh, consisting chiefly of books relating to America, extending to 3200 volumes; and to which was appended a collection of no less than 10,000 maps and charts. Another remarkable collection of books relating to America was purchased of Mr. D. B. Warden, by Samuel Elliott, of Boston, and similarly presented in 1823. Many other donations of almost equal importance must be passed over without remark. But I cannot omit to record the gift, in 1846, of £100, for the purchase of books, by the late Right Hon. Thomas Grenville. It was one of the latest of a long series of beneficent acts that adorned a life unusually protracted, and the good deeds of which, as all students know, did not terminate with the life.

Twenty years ago, the growth of the Library had outstripped the capabilities of the building. But the munificent bequest of Christopher Gore enabled the Regents to lay, in 1837, the foundation of a new structure, which received the name of Gore Hall, and to which the books were removed in 1841. Mr. Gore

* Jewett, *Notices of Public Libraries in the United States* (1851)—a "Smithsonian Report,"—p. 31.

† Nor is it undeserving of remark that many of his gifts are clothed in that rich and peculiar binding, with the well-known emblems, which still makes the collector's eyes to glisten, however small his general attachment to caps of liberty and "red republicanism." Many of the Hollis volumes at Harvard have MS. notes by the donor. In one of these he speaks of the pains he had taken to collect grammars and lexicons of the "Oriental *root*-languages," in the hope that he might thus help to form "a few prime scholars, honours to their country and lights to mankind."—See the note quoted by Mr. Jewett, in his *Notices of Public Libraries in the United States*, pp. 31, 32.

had been, in his life-time, a liberal benefactor to the Library, especially by the gift of valuable law-books; and the sum ultimately receiveable,—after the lapse of certain life-annuities,—from the bequest of his residuary estate, will fall little short of £20,000 sterling.*

At the time of removal, the Library numbered about 38,000 volumes. In the following year, a sum exceeding £4000 sterling was subscribed by thirty-four gentlemen, of Boston, expressly for the purchase of books, and with a special view to the filling up of deficiencies in certain important departments of the sciences. About 12,000 volumes were purchased, from this source, between the years 1842 and 1850. During the same period about 4000 volumes and upwards of 16,000 pamphlets were presented by various donors. Since 1850 the Library has been dependent for its augmentation on the interest of the Hollis and Shapleigh Fund, and on casual donations.

The Harvard Library is at present divided into four departments: 1. The Public Library, which contains about 61,000 bound volumes, and upwards of 25,000 pamphlets. The MSS. are few and of little importance. 2. The Law Library, which includes the valuable collection of Mr. Justice Story, comprises upwards of 14,000 volumes, and of which the purchased portion, exclusive of many important donations, has cost upwards of £7000. "It includes," says the Catalogue of 1850, "all the American Reports; the Statutes of the United States, as well as of all the States individually; a regular series of all the English Reports, including the Year Books, and also the English Statutes, as well as the principal treatises on American and English law; besides a large collection of Scottish, French, German, Dutch, Spanish, Italian, and other foreign law, and a very ample collection of the best editions of the Roman or Civil Law, together with the works of the most celebrated commentators upon that law." The Catalogue of this excellent collection was prepared by Mr. Charles Sumner, the well-known and respected Senator of the United States. 3. The Theological Library, containing between 3000 and 4000 volumes. It consists chiefly of modern works, but also contains some of the Fathers of the Church in their original texts. And 4. The Medical Library, especially intended for the Medical Students attending the lectures in Boston, and containing about 1300 volumes.†

In addition to these main collections, the "Society Libraries," as they are termed, which at various times have been originated by the students themselves, contain about 12,000 volumes, making a series of collections which amount, in the aggregate, to upwards of 92,000 volumes.

All officers and students of the University; officers of the State Government, and members of the Legislature; clergymen of all denominations, living within ten miles of the Library; all donors to the value of £8, during their residence in Cambridge; and all persons temporarily residing in Cambridge for purposes of study, may borrow books without charge, under the conditions prescribed in the laws of the University. Ready admittance, with all requisite information and facilities for examining and consulting the books, are afforded to all visitors, and the library is extensively used.

* Jewett, *Notices*, &c., *ubi supra*.

† Jewett, *ubi supra*.

[2.] Library of Yale College.

The Library of Yale College may almost be said to have been founded *before* the Institution to which it belongs, since we read in its history, that in the year 1700, eleven of the principal ministers met at New Haven, and formed themselves into an association for the erection of a College in the Colony; and that, at their next meeting—the first after they were organized—each of them brought a number of books, and presenting them to the society, said, *I give these books for the founding of a College in this Colony.**

To this College, as to Harvard, Bishop Berkeley was an early and eminent benefactor. In the dawn of his illustrious career he had said deliberately that he would prefer the headship of an American College—on a scale worthy of the work which he saw to be before it—to the primacy of England. Had he succeeded in imparting to the English government but a tenth part of his own sense of its duties, he would assuredly have lived and died in the position he longed for. As it was, he left America with a truer insight into its great futurity than seems to have been attained by any other man of that generation, and kept through life a most loving regard for its best interests. His donation to Yale was said to be "the finest collection that ever came together at one time into America:" and his name is followed in the donation book by the names of Newton, Halley, Woodward, Bentley, Steele, Burnet, Kennet, Calamy, Edwards, and Henry.

For nearly a century and a half, however, the growth of Yale Library was very slow. But in 1845 a fund was raised for large purchases in Europe, and, by the care and exertions of Professor Kingsley, such a selection of books was made as at once placed the library amongst the best—though not amongst the largest—collections in the Union. On the 1st of January, 1849, the number of volumes was 20,515, and it now exceeds 30,000, exclusive of pamphlets, and of the libraries of the Students' Literary Societies, which number not less than 25,000 volumes. There is a permanent fund of £5400, yielding an annual income of £324 for purchases, and hence accrues a yearly addition of 900 or 1000 volumes.

Numerically, the College Library of Yale contains the smallest portion of its literary stores. The two "Society Libraries," belonging to the students, comprise in the aggregate upwards of 25,000 volumes. Of these the "Linonian" is the oldest, having been founded in 1753. In 1800 it contained but 475 volumes; in 1822, 1187 volumes; in 1842, the number had increased to 8000. It has now nearly 14,000 volumes, and has a good catalogue. The library of the "Brothers in Unity" is of nearly similar date, and contains a nearly equal number of volumes. To this collection bibliographers and book lovers, both in Britain and in America, are indebted for the admirable "Index to Periodical Literature," of Mr. William Frederic Poole. "While connected," says the author in his preface, "with the library of the 'Society of Brothers in Unity' in Yale College, I attempted to . . . make the contents of Periodicals accessible to the students in the preparation of their written exercises, and the discussions of their literary societies." This attempt ultimately resulted in the volume which is now an indispensable part of the bibliographical apparatus of

* Jewett, *ut supra*, p. 70.

a library. Both these collections are of course Lending Libraries, and how extensively they are used will appear from the fact that the aggregate annual issue considerably exceeds the aggregate number of volumes which they contain. The Library of the American Oriental Society is deposited in the College Library building.

[3.] Library of Columbia College.

Next, in chronological order, of the Collegiate Libraries is that of Columbia College, in New York. It originated in the bequest (about 1757) by Mr. Joseph Murray, of his library, with other property, amounting in the whole to £8000. Another collection of about 1500 volumes was bequeathed by Dr. Bristowe. Presents were also received from Lord Bute, and from the University of Oxford, so that the College possessed a considerable Library, when, in 1776, the authorities were directed to make ready "for the reception of troops." "The students were in consequence dispersed, the Library and apparatus were deposited in the City Hall, or elsewhere, and the College edifice was converted into a Military Hospital. Almost all the apparatus, and a large proportion of the books belonging to the College, were wholly lost to it in consequence of this removal; and of the books recovered, 600 or 700 were so only after about thirty years, when they were found, with as many belonging to the New York Society Library, and some belonging to Trinity Church, in a room in St. Paul's Chapel, where, it seems, no one but the sexton had been aware of their existence, and neither he nor anybody else could tell how they had arrived there." *

In 1792, a grant in aid of the restoration of the Library was obtained from the Legislature. In 1813, the library of Professor Kemp, and in 1838, that of Professor Moore, were purchased. It now contains upwards of 14,000 volumes. It is chiefly frequented by the officers of the College, and by students of the three higher classes.

[4.] Library of Brown University.

Brown University—first established at Warren, and thence removed to Providence—was incorporated in the year 1764. The first beginnings of the Library appear to date from 1768, when the Reverend Morgan Edwards, then in England, was authorized to make some small purchases. Eight years afterwards the College building was converted into a barrack and hospital; the students were dispersed, and the books removed; and it was not until after the conclusion of peace, in 1782, that the small library was restored and the College reörganized. Shortly afterwards a liberal subscription was raised for the purchase of books in England.

For many years the chief accessions were obtained by gift or by bequest. Of American donors, Mr. Nicholas Brown, of Providence, and the Rev. Isaac Backus, of Middleborough, were the chief. The former imported from England, expressly for the University, a valuable law library, and afterwards gave £100 to be expended in other purchases; the latter bequeathed a collection of books, the precise number of which is not recorded; but many of them were both valuable and rare. Amongst these is a copy of Roger Williams' famous treatise on "the bloody tenent," on the fly-leaf of which is written, in

* Moore, *Historical Sketch of Columbia College*, p. 62, as quoted by Jewett, *Notices*, &c., p. 94.

the author's hand, "*For his honored and beloved Mr. John Clarke, an eminent witnes of Christ Jesus, ag'st ye bloodie doctrine of persecution,*" &c. Amongst the English donors the most noticeable appear to have been the Rev. William Richards (the historian of Lynn), and Granville Sharp.

Mr. Richards had long carried on a correspondence with American divines, and being a man of liberal principles, had made many inquiries as to the accessibility and unsectarian character of the College at Providence. It was stated to him that, "Although the Charter requires that the President shall for ever be a Baptist, it allows neither him, in his official character, nor any other officer of instruction, to inculcate any sectarian doctrine; it forbids all religious tests; and it requires that all denominations of Christians, behaving alike, shall be treated alike. This Charter is congenial with the whole of the civil government established here by the venerable Roger Williams, who allowed . . . no preëminence of one denomination over another, and none has ever been allowed unto this day." Gratified by this letter, Mr. Richards bequeathed to this College a collection of about thirteen hundred volumes of considerable value, and especially rich, it is stated, in the History and Antiquities of England and Wales. The name of Granville Sharp appears frequently in the list of donors from the year 1785 until the period of his death.

Hitherto the library had been very slenderly provided with the literature and the science of continental Europe. Between the years 1823 and 1845, however, many valuable presents of foreign books were acquired by the liberality of Mr. John Carter Brown, of the Rev. Thomas Carlile, and of the wife of President Wayland. At the sole cost of the first-named gentleman, and by the able instrumentality of Mr. Jewett, then Librarian of Brown University, upwards of 3000 volumes, well selected and well bound, were purchased in France, Germany, and Italy. Amongst them were entire collections of the standard writers of each of those countries; complete sets of the *Mémoires del' Institut de France*, of the *Mémoires sur l'Histoire de France*, of the *Allgemeine Literatur-Zeitung*, and the *Allgemeine Deutsche Bibliothek*; a long series of famous "Galleries," including those of the Vatican, the *Museo Borbonico*, the *Musée Royal*, and the *Musée Français*; the great French work on *Egypt*; Canina's masterly work on *Architecture*; with many others of great value.

Nothing in the history of this institution is more worthy of praise and imitation than is the generous rivalry which has made the good deed of one benefactor a spur to the good intent of another. No sooner had Mr. Carter Brown interposed so effectively on behalf of the Foreign section of the Library, than other friends clubbed together to improve its English department, at the cost of a thousand pounds. In the following year a similar effort on behalf of the Theological department was originated by the Rev. Samuel Osgood, and by this means a fine series of the Fathers of the Church, of the Councils, and of the best writers of the Reformation period were added to the Collection.

Besides these special efforts directed, and wisely directed, to certain particular classes of literature, a permanent fund of £5000 has been formed by subscription, the interest of which is annually expended in purchases; a new building has been erected with capacity to accommodate the growing library for a long time to come; and an excellent catalogue has been prepared

and printed. The number of volumes now exceeds 26,000, exclusively of about 7000 volumes which belong to two literary Societies formed by the students. The Library is extensively used, and is accessible for all literary and studious purposes under very liberal regulations.

[5.] Library of Dartmouth College.

Dartmouth College at Hanover (*New Hampshire*) was founded in 1769, and, by gradual accumulations, has become possessed of about 21,000 volumes, which belong, in nearly equal portions, to the Library of the College properly so called, to that of the Society of Students, designated the "Social Friends," and to that of another Society, called the "United Fraternity."

The other principal College Libraries of the United States—founded subsequently to the commencement of the present century—I can but briefly enumerate. Taking the chief of them only (in chronological order), they are as follows:—

OTHER UNIVERSITY AND COLLEGE LIBRARIES.

Date of Foundation.	Name of College or University.	City or Town where situated.	Name of State.	Aggregate number of vols. (including the Students' Libraries).
1800.	1. VERMONT UNIVERSITY.	Burlington.	*Vermont.*	13,600.
1802.	2. BOWDOIN COLLEGE.	Brunswick.	*Maine.*	26,600.
1802.	3. SOUTH CAROLINA COLLEGE.	Columbia.	*S. Carolina.*	21,400.
1808.	4. ANDOVER THEOLOGICAL SEMINARY.	Andover.	*Massachusetts.*	24,000.
1825.	5. VIRGINIA UNIVERSITY.	Charlottesville.	*Virginia.*	21,200.
1838.	6. UNION THEOLOGICAL SEMINARY.	New York.	*New York.*	about 18,000.

Of these Libraries, the collections at Burlington, Columbia, and Charlottesville, appear to be most noticeable for the care with which they have been selected. The first named is rich in the Greek and Roman classics, and in the literature of Spain and of Scandinavia: the greater portion of the fine library collected by the Hon. George P. Marsh, formerly Minister from the United States to Turkey, being here deposited. The Columbia Library was founded by an act of the Legislature, and receives an annual appropriation for books of £400. Professor Lieber has rendered great assistance in the selection of books, and the collection is said to be more valuable "than many of twice its size."* That at Charlottesville was originally formed and arranged by President Jefferson; enlarged by a legacy of President Madison, and by another —comprising 3380 volumes—of Mr. Christian Bohn. It occupies a fine circular building, erected in 1825, expressly for the Library, at a cost of £14,000.

There are many other collegiate libraries, of which no notice can here be taken, the numerical contents of which, however, are enumerated in our "Statistical Table."

* Jewett, *ut supra*, p. 155.

CHAPTER II.

OF PROPRIETARY AND SUBSCRIPTION LIBRARIES.

THE first establishment of proprietary libraries in the United States connects itself with the illustrious name of Franklin; and to narrate the rise in other words than his own would be impertinent. "At the time," he says, "when I established myself in Pennsylvania, there was not a good bookseller's shop in any of the Colonies to southward of Boston . . . . . Those who loved reading were obliged to send for their books from England; the members of 'the Junto' [a sort of half convivial, half literary club, mainly of Franklin's foundation] had each a few. We had left the ale-house where we first met, and had hired a room to hold our club in. I proposed that we should all of us bring our books to that room, ... and for some time this contented us . . . . But soon [in 1731] I set on foot my first project of a public nature, that for a subscription library. I drew up the proposals . . . and, by the help of my friends in 'the Junto,' procured fifty subscribers of forty shillings each to begin with, and ten shillings a-year for fifty years, the term our company was to continue. We afterwards [in 1742] obtained a charter, the company being increased to one hundred. *This was the mother of all the North American Subscription Libraries* now so numerous. It is become a great thing itself, and continually goes on increasing." "These libraries," adds Franklin, "have improved the general conversation of the Americans, made the common tradesmen and farmers as intelligent as most gentlemen in other countries, and perhaps have contributed, in some degree, to the stand so generally made throughout the Colonies in defence of their privileges."*

[1.] Library Company of Philadelphia.

It is worth while to remark that, when Franklin took this step, no town in England possessed a subscription library. Liverpool appears to have been amongst the earliest towns which took action in this direction, and there no such library was formed until 1756.† Bristol did not possess one until 1772.‡ Nor is it less to the honour of Franklin, and of Philadelphia, that one of the first regulations which was made for the management of the Library, directed that it should be *publicly and gratuitously accessible as a library of reference.* The instructions to the first Librarian, Louis Timothee, expressly empower him to permit "any civil gentleman to peruse the books of the library in the library-room." The first donor to the infant Library was Peter Collinson, "Mercer, in Gracious Street, London," and the second, William Rawle, of Philadelphia (who gave Spenser's works in six volumes). Franklin himself succeeded Timothee as Librarian for three months. In 1738, a piece of ground was granted to the society by John Penn; and, within little more than thirty years

* *Autobiography* (Sparks' Edition), p. 97.

† Brooke, *Liverpool as it was . . . in the last century*, p. 89.

‡ Tovey, *The Bristol City Library*, p. 000.

of the establishment of the Library, it was stated in a report that "many other libraries, after our example and on our plan, have been erected in this and the neighbouring provinces, whereby useful knowledge has been more generally diffused *in these remote corners of the earth.*" *

In August, 1774, an order was made that the Librarian should "furnish the gentlemen who are to meet in Congress, in this city, with such books as they may have occasion for during their sitting, taking a receipt for them. A similar privilege was afterwards accorded to the legislature of Pennsylvania. In 1777, the Library was, for a time, converted into a military hospital. During the nine months of the British occupation of Philadelphia, the Library sustained no injury, except (as during the whole period of the war) from the non-importation of books. The funds which had accumulated in the interval were expended, on the conclusion of peace, in a large accession of English and foreign literature. In instructing their agent as to the purchases they wished to make, the Committee write thus:—"We shall confide entirely in your judgment to procure us such books of modern publication as would be proper for a public library, and though we would wish to mix the utile with the dulce, we should not think it expedient to add to our present stock anything in the *novel* way."

In 1789, a new building was erected for the reception of the books, and an inscription was placed on the corner-stone, which is worth quotation:—

Be it remembered
in honour of the Philadelphia youth
(then chiefly artificers),
that in 1731, they cheerfully,
(at the instance of Benjamin Franklin,
one of their number),
instituted the PHILADELPHIA LIBRARY,
which, though small at first,
is become highly valuable and extensively useful,
and which the walls of this edifice
are now destined to contain and preserve;
the first stone of whose foundation
was here placed the 31st Aug., 1789.

The collection founded by Franklin had scarcely been arranged in its new habitation when the addition to it of the library of James Logan (the friend of William Penn, and the first president of the Pennsylvania Council) made an enlargement of the building necessary. This "collection of rare and valuable books, principally in the learned languages, and in the existing languages of the continent of Europe, . . . which, having formed it at considerable expense, he was anxious should descend to posterity, . . . Mr. Logan had endowed and vested in Trustees, for the use of the public for ever."† The library thus bequeathed was enlarged by the brother and son of the founder. At the time of annexation it contained about 4000 volumes. Large additions have since been made by purchase (as well from the sale of the original building and site, as from the founder's endowment), and also by donation. In 1828, Mr.

* *Address presented to John Penn*, 1763, quoted by Jewett, *ut supra*, p. 116.
† *Catalogue of the Loganian Library* (Ibid. p. 121).

William Mackenzie, an eminent collector, bequeathed "all his books printed before the beginning of the eighteenth century, and eight hundred volumes more to be chosen by the Trustees, from his French and Latin books of later date." This valuable bequest amounted to 1519 volumes "of great rarity and value," and 3566 volumes were subsequently purchased from the Executors. 500 selected volumes were also left by Mr. Mackenzie to the Philadelphia Library, and its Directors made a purchase of 1466 additional volumes.* The present contents of the Loganian collection exceed 10,000 volumes, and they are thoroughly accessible to the public at large.

The progress of the Philadelphia Library during the present century has been still more considerable. By the bequest of a native of Ireland, Mr. Henry Cox, it received a large number of MSS. relating to Irish history, including, it is said, the *original* correspondence of James I. with the Privy Council of Ireland for upwards of twelve years, with other historical documents, the value of which remains unknown.† Shortly afterwards (in 1803) another British subject, the Rev. Samuel Preston, Rector of Chevening, in Kent, bequeathed his library of above two thousand five hundred volumes, many of them, it is stated, "very splendid works, selected with great taste and judgment." Mr. Preston, it appears, was an intimate friend of Benjamin West. In the following year John Bleakley, of Philadelphia, bequeathed a thousand pounds to the library, of which he had long been a director. At a subsequent period about 5000 volumes were purchased on very favourable terms of James Cox, an artist, since deceased. Amongst these were many valuable works on the fine arts, and many rarities. By these varied means, the Philadelphia Library, which, seventy years ago, contained but little more than 5000 volumes, has now grown to upwards of 50,000 volumes.

Much to the honour of the Association, "citizens and strangers are permitted to consult the books without charge." ‡ The privilege of borrowing is of course restricted to shareholders and subscribers. "The number of persons who consult the library is," it is stated, "very considerable." §

[2.] Library of the American Philosophical Society.

Another Philadelphia Library—that of the AMERICAN PHILOSOPHICAL SOCIETY—is of considerable antiquity, and now contains upwards of 20,000 volumes. The Society itself dates from 1742, was also founded by Franklin, and is the oldest of its kind in the United States; but of the precise date when its collection of books was begun, there seems to be no record. The Society also possesses a considerable number of MSS., Maps, and Prints.

[3.] Redwood Library at Newport.

The Redwood Library, at Newport, Rhode Island, appears to rank next to the Philadelphia Libraries in point of date, though there is great difference between it and them in point of extent. But this collection is intrinsically more valuable than might be inferred from

* *Catalogue of Books belonging to the Library Company of Philadelphia* (1835), Preface, p. x. *seqq.*

† But for so many similar examples, the possession of State papers of a date comparatively recent by a private person would excite suspicion as to the manner of their obtainment. Can this Mr. Henry Cox have been a descendant of the Irish Historian, and Lord Chancellor, Sir Richard Cox?

‡ Catalogue, &c., *ut supra*, p. xi. § Jewett, *ut supra*, p. 122.

its smallness. Abraham Redwood, the founder, gave, in 1717, the sum of £500 for the purchase of standard books in London. A sum of £5000 was speedily subscribed by the citizens for the erection of a building to receive them (to which sum was ultimately added £1200 more), and a site was freely presented by Mr. Henry Collins.* In its very infancy the Redwood Library had the distinction of attracting to Newport the Rev. Ezra Stiles, who for so many years elevated the town and Colony by his learning and his public spirit, and of whom Channing has said, that in his early years he regarded no human being with equal reverence.† Mr. Stiles was long Librarian, and was the means of adding to the collection many works of great value.

Here, as elsewhere, the Revolutionary war interrupted the peaceful pursuits of literature; but here, too, an enlightened public opinion saw in the transient evil the seeds of permanent good, and was patient. The Library suffered more from the perils of the time than some others; and when these were over its progress met with a check in the death of the founder. Of late years a revived interest has been evinced in its growth and usefulness, but it does not yet number 5000 volumes.

[4.] New York Society Library.

The Library of the NEW YORK SOCIETY dates from 1754, when (according to Smith's History of New York) "a set of gentlemen undertook a subscription towards raising a public library, and in a few days collected near £600, which were laid out in purchasing 700 volumes of new well-chosen books." They subsequently obtained what remained of a "*Public City Library*," which had been established more than half a century before, but had fallen into a neglected and dilapidated condition. In 1772 the Society was incorporated.

During the occupation by the British troops, this Library seems to have suffered more injury than was sustained by similar institutions in most of the other occupied towns. John Pintard (of whom mention will be made hereafter, in connection with the "Historical Society of New York") affirmed, as an eye-witness, "that the British soldiers were in the habit of carrying away the books in their knapsacks, and bartering them for grog." In 1788, however, vigorous exertions appear to have been made for the recovery, augmentation, and improvement of the collection.

Originally located in the City Hall, this Library has had the singular fortune of occupying within sixty years three new buildings, each of them expressly erected for its reception. Its temporary abodes included, it has, within little more than that period of time, had *six* different habitations. The moving cause is not explicitly stated, but would seem to have been the rapid increase in the value of sites favourable to commerce. In 1795, when removed to its first new building, it contained about 5000 volumes. When transferred to its second, in 1840, it had grown to about 27,000 volumes. In the present year,

* *Catalogue of the Redwood Library*, 1843, Preface. (Quoted by Jewett, pp. 48, 49.)

† *Christian Worship: a Discourse at Newport, R. I.*, 27 July, 1836 (*Works*, vol. ii. p. 207). In this discourse Dr. Channing speaks of the Redwood Library as "yonder beautiful edifice, now so frequented and so useful as a public library, but once so deserted that I spent day after day, and sometimes week after week, amidst its dusty volumes without interruption from a single visitor."—*Ibid.* p. 205.

in which has occurred its latest change of abode, it possesses somewhat more than 40,000 volumes. If we may judge from the spirited address which was delivered before the shareholders in February last, by its able Librarian, Mr. Mac Mullen, "on the past, the present, and the future of the New York Society Library," it is now on the threshold of a new and energetic career of usefulness.

Amongst the minor collections which, from time to time, have merged into that of the Society Library, two merit special mention. The one was the gift (indirectly) of an English clergyman; the other, that of the descendant and representative of John Winthrop, the founder of Connecticut.

In 1729, Dr. Millington, Rector of Newington, bequeathed his library to the Society for the Propagation of the Gospel in Foreign Parts, by whom it was presented to the Corporation of New York, "for the use of the clergy and gentlemen of New York, *and the neighbouring provinces*." The Winthrop Collection consists of 275 volumes, and was presented in 1812. Of its worth as an illustration of American history—apart from all other value—not a word need be said. A good catalogue of the entire Library was published in 1850.*

[5.] Library Society of Charleston.

Eight years after the foundation of the Redwood Library in Rhode Island, and almost contemporaneously with the establishment of the New York Society, a few young citizens of South Carolina formed themselves into a "Library Society" at Charleston. Backed by larger means they had, at the outbreak of the Revolutionary war, not only amassed upwards of 5000 volumes (rich in classical literature), but had gathered a fund of £20,000, with a view to the "establishment of an institution for education in connection with their library." In addition to its own collection, the Society had also inherited the valuable library of Mr. Mackenzie, bequeathed to it "for the use of a College when erected in this province." In the terrible fire, which, in January, 1778, destroyed nearly one-half of Charleston, the Society's Library almost totally perished. Only 185 volumes out of between five and six thousand were saved. Mackenzie's Library fared better, nearly two-thirds of the books being saved, but of these many belonged to broken sets.

It was not until 1792 that any effectual steps could be taken for the restoration of the Library. Then, however, they were taken with vigour. In 1811, 7000 volumes had been collected. The present number exceeds 21,000, nearly the whole of which have been purchased. The name which appears most frequently as a donor of books is that of an eminent French botanist. Many years ago, André Michaux, in the travels undertaken for the preparation of his noble work on the Forest Trees of North America, met with liberal hospitality in Carolina. "Scarcely a year," says the preface to the Catalogue of 1826, "for some time past, has elapsed without our receiving from him some volume or work as a testimonial of his remembrance."

[6.] Library of the Salem Athenæum.

Salem, in Massachusetts, commenced what is now its "Athenæum Library," in 1760. The war checked the growth of the "Social Library," as it was then called, but laid the foundation

* Mac Mullen, *Lecture*, &c., *ubi supra* (1856) *passim*; Smith, *History of New York*, [under the year 1754]; Jewett, *Notices*, &c., pp. 86—88.

of another and a better one. The present collection has been formed by the union of the two.

Dr. Richard Kirwan, the well-known chemist and mineralogist, had sent part of his library across the Irish Channel in a vessel which became the prize of an American privateer. When brought into Beverley for sale, some eminent clergymen and men of science, of Massachusetts, combined for its purchase, and made it the ground-work of the "Philosophical Library" of Salem. The books of Kirwan became a seed-plot to the mind of Bowditch. The illustrious expounder and continuator of the *Mécanique Celesté*, half-a-century afterwards, bequeathed a thousand dollars to the Salem Athenæum, as a token of his remembrance of the benefit. In 1810, the two collections were conjoined, and the "Athenæum" received a charter of incorporation. It now contains about 12,700 volumes,—is rich in works of science, and in the Transactions of learned Societies,—and has a valuable series of pamphlets.

[7.] Library of the Portland Athenæum.

In 1765 a collection of books, on a similar plan to that of Salem, was commenced at Portland, and, like that, has now merged into the Library of the Portland "Athenæum." The number of volumes is about 8000.* No other Library on the Proprietary or Subscription principle of much importance occurs during the remainder of the last century. Early in the present century that of the New York Historical Society was founded by John Pintard † (who is deservedly remembered in New York for many good deeds, and merits to be remembered by all lovers of books for his keen enjoyment of them up to the age of eighty-six. "Books," said he, "give me a downy pillow"). It now numbers nearly 18,000 volumes; is, of course, especially well-provided in American history, and continues to be a library for reference, not for lending.

[8.] Library of the New York Historical Society.

[9.] Library of the Boston Athenæum.

The Library of the Boston "Athenæum" stands saliently out from amongst its compeers, alike for its extent, its liberality of access, its richness in departments not usually well-filled in American libraries, and for a precious remnant which it includes of the library of George Washington.

Founded in 1806, it has, within half-a-century, amassed more than 60,000 well-selected and well-arranged volumes, and these are lodged in a noble building which is already capable of accommodating half as many more. For books and building together, a sum of *fifty-four thousand pounds* sterling has been raised by subscription and donation (independently of the annual subscriptions for maintenance and ordinary expenses). This has been done quietly and without ostentation; and the greater part of the sum has been raised within the last ten or eleven years. Of such an indication of public spirit Boston may well be proud.

As may be expected under such circumstances, the bulk of this fine collection has accrued from systematic purchases. George Watson Brimmer gave, in 1838, a "magnificent series of books on the Fine Arts;" and, between the years 1823 and 1826, three several small and special Boston Collections—

* *Annual Report of Portland Athenæum*, Oct., 1854, p. 5.

† *Semi-Centennial Celebration of the New York Historical Society* (1854), p. 48.

time has brought to bear on the first plan. Originally, it was an association of merchants' clerks, to the exclusion as well of merchants as of all others. Within seven years the collection had grown sufficiently to need better accommodation than seemed attainable without the erection of a new building. In 1828, a meeting of prominent merchants was convened with a view to the provision of a suitable structure by a joint-stock. It was to be named "Clinton Hall," and the shareholders the "Clinton Hall Association." The members of the latter became, *ipso facto*, members of the library society.* The building thus erected—at a cost of about £11,000—was opened in 1830. At that date the Library possessed but 6000 volumes. During the next thirty years 37,000 volumes were added, at a cost of £13,071 sterling (45,356 dollars), from which number must be deducted about 6000 volumes (of the more ephemeral sort) worn out during the same period. So that the increment, since 1820, would pretty accurately represent the actual contents of the Library in 1850, as respects mere numbers. During the same period 14,616 members were admitted.

In 1853 it was found to be desirable that a more capacious building should be procured. A joint-stock fund was again resorted to, with such success as led to the obtainment and thorough adaptation to its new purpose, of a very suitable building, at a cost, including furniture, of £49,200, nearly the whole of which has been defrayed. When the small remainder of debt shall have been paid off, the entire income of the "Clinton Hall Association" will be applied to the increase and improvement of the Library.

The total number of volumes in the Library on the 1st of May, 1856, was 46,383, of which 3588 had been added during the preceding sixteen months. Of these 3004 were purchased, and 584 presented. The sum expended in books and periodicals was about £900, and in binding about £300. Of the presented books, the greater part were public documents, including the "Annals of Congress."†

The Reading Rooms are amongst the finest in America, and are probably better supplied with periodicals in all departments of literature, both English and foreign, than any other. The New York Mercantile Association owes the perfection of this department, as it does the general efficiency of the institution, to the talents and energy of its Librarian, Mr. S. Hastings Grant.

[14.] Mercantile Library of Cincinnati; and of [15.] St. Louis.

The "Mercantile Library Association of Cincinnati" was formed in 1835, and incorporated in the following year. It now (1856) contains 16,423 volumes, and its annual aggregate circulation is about 30,000 volumes.‡ That of St. Louis dates but from 1846.§ It now contains about 13,000 volumes,‖ the money value of which, with the other property of the Association, is estimated at upwards of £9000. The annual circulation, during 1855, was 15,219 volumes.

CHAPTER III.

OF CONGRESSIONAL AND STATE LIBRARIES.

THE first Library of Congress was founded in April, 1800. [1.] Congress Library. [1800.] It was collected under the superintendence of Mr. Gallatin, Dr. Mitchell, of New York, and others. Though small, it was valuable, and is said to have been much resorted to in the early days of Washington City. On the 24th of August, 1814, it was totally destroyed by the British Army.

The loss induced Mr. Jefferson to offer to Congress his well-selected library of 7000 volumes. It was purchased in 1815 (for £4600 sterling), and became the nucleus of the fine collection which, on the , was partially destroyed by fire. Both books and catalogue were arranged in subjects, according to Bacon's Classification of Human Knowledge, of which Mr. Jewett has said very appropriately: "It was not intended by its author as a bibliographical system. Nor has any improvement which it has received rendered it convenient or useful for that purpose. The system was introduced by Mr. Jefferson, and, unfortunately, has been continued here long after its abandonment in most other Libraries." * At the time of this second calamity, the Library contained upwards of 50,000 volumes of printed books. The MSS. were but few. The then yearly appropriation for the purchase of miscellaneous books was £1000, and for that of law-books £200.

About 20,000 volumes were saved from the fire; including the greater portion of Jefferson's valuable collections on the History and Political Affairs of America, and nearly all the books of the law department. At the beginning of 1854, at least an equal number of volumes had been added to the salvage. With a liberality worthy of the occasion, Congress had appropriated to this purpose 85,000 dollars (£17,000). The purchases are controlled by a joint committee of the two Houses.

In the course of 1855, the number of volumes had grown to upwards of 60,000, including many extensive and costly sets, such as the Archæological and Scientific Works of Rosellini, Champollion, Humboldt, and Lord Kingsborough; complete sets, or sets as nearly complete as were procurable, of *The London Gazette* (for one hundred and ninety years); of the History, Debates, Journals, and Papers of the British Parliament (an entire series of which now considerably exceeds 3000 volumes); of *The Times*, and of *The Boston Centinel*; with many works on American History, both valuable and rare.

Of this most important Library, a thoroughly good catalogue might well be looked for. The *plan* of such a catalogue has been elaborately prepared by Professor Jewett, and has been published under the following title: "*Smithsonian Report, on the construction of Catalogues of Libraries, and their publication by means of separate stereotyped titles.* . . . . By Charles C. Jewett, *Washington*, 1853."

* *Notices*, &c., p. 139.

In the preparation of the Catalogue thus indicated, a considerable advance appears to have been made, although circumstances have recently occurred which have delayed its progress. That all difficulties may be completely overcome, and a problem be solved, the solution of which will ultimately improve the working of every great library in the world, must be hoped for ardently.

[2.] Other National Libraries at Washington.

In addition to the Library of Congress, the capital of the Union possesses a "House of Representatives' Library," with about 35,000 volumes; a "Department of State Public Library," which comprised, in 1853, about 10,000 volumes;* another collection—accruing from the legal exaction of copies of new books—which, in 1850, contained about the same number of volumes;† in addition to the special collections (Military, Technological, and Astronomical) of the War Office, the Patent Office, and the National Observatory. In 1854 these special libraries contained, in the aggregate, upwards of 15,000 volumes.

[3.] State Library of New Hampshire, at Concord. [1770.]

The earliest State Library was that of New Hampshire, founded at Concord, about 1770. The best furnished is that of New York, which was not commenced until 1818, but is rapidly taking rank amongst the most important of American libraries. During the long interval which elapsed between the establishment of these two libraries, only two others of the same kind were formed—that of Pennsylvania, at Harrisburg, in 1816, and that of Ohio, at Columbus, in the following year. Now, such libraries are to be found in a majority of the States.

As the name implies, these libraries are maintained at the public charge, and primarily for the use of the respective legislatures and public functionaries; virtually they are accessible to all persons having any studious or serious purpose. The Library at Concord contains about 5500 volumes, of which about two-thirds relate to legal and political subjects. That at Harrisburg contains upwards of 10,000 volumes, occupying two rooms in the State House. That at Columbus contains about 16,000 volumes, and is extensively used. About 3000 persons annually consult the Library, and about 1800 volumes are annually lent out.‡ Part of the expenses of maintenance are defrayed by the profits which accrue from the sale of the State Reports and Documents. The Library occupies a room 118 feet by 22 feet, and is open for eleven hours daily (Sundays excepted) in summer, and for thirteen hours daily in winter.

[4.] Of Pennsylvania, at Harrisburg. [1813.]

[5.] Of Ohio, at Columbus. [1817.]

[6.] Of New York, at Albany. [1818.]

The State of New York is unrivalled both for the liberality with which its Public Library has been supported from public funds, and for the care and energy with which it has carried out the system of domestic and international exchanges. It is a sufficient proof of the former assertion to state that there has been expended on its account (chiefly during the last 12 or 14 years) upwards of £20,000, in addition to the contributions of individuals, and of public institutions; whilst of the successful results, as respects New York, of the plan of library exchanges, the distinguished writer (Mr George Livermore, of Boston) of an article

* Norton's *Literary Register* (1854), p 103. † Jewett's *Notices*, p. 140.
‡ Jewett, *ut supra*, p. 171

entitled "Public Libraries," in the *North American Review* of July, 1850, has said: "No one can look over the printed list of donations to the New York State Library, procured through M. Vattemare's agency, without feeling that *that* State, at least, has good cause to speak well of his scheme, and its results;" although he adds, "but our conviction is strong that the system does not possess the elements of permanent or long-continued vitality."

In 1845 the Library contained but about 10,000 vols. It was then placed under the management of the Regents of the University of New York, as Trustees ex-officio. In 1850 the number of volumes had already grown to 23,274, of which 9870 related directly to legislation. Three years afterwards the number had increased to 34,279. It now exceeds 41,000, exclusive of MSS., of which mention will be made hereafter. Thus, under the vigorous management of the Trustees of the University, the Library has been quadrupled within about ten years. Nor is its merely numerical increase the chief thing that merits notice.

In 1849 a Select Committee of the New York Assembly reported on the results of the increased appropriation, and on the general progress of the Library. After various details the committee proceed thus: "An examination will convince all that it has become a worthy object of state pride. Already the law department is considered the most perfect of any similar collection in the States. It is believed, also, that nowhere can be found so many useful works on America and American affairs. The most unwearied pains have been taken; Europe and this country have been ransacked to procure everything valuable in this department. The value of these books cannot be estimated in money, for money could not replace many of them. There are also valuable scientific, statistical, documentary, and miscellaneous works, otherwise inaccessible to Americans generally.*

What is termed the "Warden Collection," is especially rich in the materials of American history, and was acquired in 1845, at a cost of £800.†

Amongst the MSS. of the State Library are included an important series of Charters, Commissions, Letters Patent, and other similar documents of the highest interest for the American historian, from Charles the Second's grant to the Duke of York, of March, 1664, down to the period of independence. In 1853 the legislature authorized the purchase of the correspondence and other papers of George Clinton, first Governor of the State of New York. They have since been admirably arranged and indexed, and a portion of them, relating to the celebrated case of Major André, has been placed in frames under glass for more ready examination and secure preservation.‡

The Library is accessible for reading and consultation *to every citizen.* Members of the Legislature, only, are *of right* permitted to borrow books, and that only during the session of the Legislature. By a law of May, 1844, it is enacted that "the State Library" shall be kept open every day in the year, Sundays excepted, during such hours in each day as the Trustees may direct.

This period has been fixed at twelve hours daily. The illustrated works

* Report printed in *Assembly Documents* of 1849, as quoted by Jewett, *Notices*, &c., p. 75.

† Ibid. p. 74; *Annual Report of Trustees*, 15th Jan., 1849, p 6.

‡ *Annual Report of the Trustees*, 22nd Jan., 1856, p. 8.

and prints are exhibited on two days in the week only, and then under judicious regulations.* The extent to which the Library is used is, as might be expected, very considerable.

To the late Mr. O. Rich, formerly consul for the United States at Valencia, and afterwards of London; to Jonathan Goodhue, an eminent and most respected New York merchant; to M. Vattemare; and, above all others, to the lamented Theodric Romeyn Beck, LL.D., so long Secretary to the Regents of the University, this Library is indebted for its rapid progress, its excellent selection and comprehensiveness, and its liberal accessibility.

[7.] Of NEW JERSEY, at Trenton. [1824.]

[8.] Of INDIANA, at Indianapolis. [1825.]

[9.] Of MASSACHUSETTS, at Boston. [1826.]

New Jersey possesses a State Library, organized in 1824, at Trenton, which, though still small, is in progress. That of Indiana was founded in 1825; is also, as yet, of inconsiderable extent, but it now increases at the rate of 250 volumes per annum on the average, and is widely accessible both as a consulting and a lending library. Massachusetts established its State Library, at Boston, by a law of March, 1826, which enacted that "all books and MSS. belonging to the Commonwealth, and now in any of the departments of the State House, shall be collected, deposited, and arranged . . in the room . . . called the Land Office." During the eleven years from 1838 to 1848 inclusive, the annual appropriation for the purchase of "such books, MSS., and charts, as tend to illustrate the resources and means of improvement of this Commonwealth, or of the United States," was about £80 a year, and the number of volumes added to the library during that period was 4680.

The collection includes many books of great value—such as Audubon's *American Birds*; Hamilton's *Collection of Antiquities*; Botta's *Monuments de Ninive*; the *Acta Historica Ecclesiastica nostri temporis*, printed at Weimar, between the years 1741 and 1774;—some of which are the results of the system of international exchange. But its greatest treasure is the series of Records of the General Court of Massachusetts, commencing in 1629, and extending to October, 1777. These Records contain the entire legislative history, and much of the religious history of Massachusetts, between these periods. No books in the Library, it is said, are consulted more frequently or with more interest.† It is fortunate, therefore, that the volumes thus extensively used are only authenticated transcripts, the originals of which are preserved in the Archives of the Secretary of State.

Of the remaining State Libraries our mention must be very brief. They are all in their infancy, but several of them evince such a sense of the public value of institutions of this kind, on the part both of the authorities and of the citizens at large, as cannot fail to insure their progress. Maryland established its State Library in 1827, which now contains about 15,000 volumes, and has an annual income of £100 for new purchases. Missouri had the misfortune to lose its library by fire in 1837, eight years after its foundation. Measures were taken

[10.] Of MARYLAND, at Annapolis. [1827.]

[11.] Of MISSOURI, at Jef-

* Rules and Regulations subjoined to the *Catalogue of the New York State Library* (1850), pp. 1055—1059.

for the formation of a new collection, which, in 1849, contained 4637 volumes,* and now contains about 6000. The State Library of Virginia dates from 1828, and contains about 15,000 volumes. That of Kentucky was founded in 1834. It contained, in 1849, about 8000 volumes,† and now contains nearly 10,000. Maine began its State Library in 1836, and has now 15,500 volumes. Here also considerable advantages appear to have been derived from M. Vattemare's system of exchanges. As to the use of the Library, "probably 2500 persons," it is stated, consult it each year. The State Library of Connecticut is of still more recent formation. In an able report addressed by the State Librarian, Mr. Trumbull, to the General Assembly, in 1855, it is remarked: "As yet Connecticut has only the beginning of a library, ... far from being adequate to supply necessary books of reference to the Legislators, Judges, State Officers, and others who have occasion to resort to it. Its increase has been necessarily very slow, having been mainly dependent on exchanges with other States, on the receipt of public documents and other works distributed by Congress, and (since 1849) on the operations of the system of international exchange, for which the State is largely indebted to the good offices and untiring exertions of M. Vattemare, now the accredited agent of the State for that end."‡ The Report proceeds to point out the various classes of books, the collection of which most merits the care of the Legislature, and is likely to open a new and prosperous era in the annals of the Library. Of other State Libraries recently commenced, an enumeration will be found in the appended "Statistical Table."

CHAPTER IV.

OF TOWN LIBRARIES.

THOSE who have followed our historical summary thus far, will have, we think, no difficulty in assenting to the assertion which preceded it, that the provision of Libraries in the United States is—all things fairly taken into account—a very honourable one. But we now approach a quite new epoch in the history of American Libraries, which bids fair, if it but proceed as it has begun, to eclipse all preceding efforts in this direction. The libraries whose progress we have been reviewing, however well stored, generously supported, and liberally managed, are, in almost every instance, dependent for their maintenance on the fluctuating and insecure resource of voluntary contributions, and for their accessibility on the favour and goodwill of their Directors. The State Libraries are, indeed, an exception, but, from their very nature and object, the usefulness of these is limited, or almost limited, to lawyers and

* Jewett, *Notices*, &c., p. 181. † Ibid. 166.

‡ *Report*, &c., Hartford, 1855, p. 5.

public men. Up to the year 1848, no Town or City Library, strictly so called, existed within the breadth of the Union.

By "Town Library," we mean a library which is the property of the town itself, and enjoyable by all the townspeople. Such a library must be both freely and of right accessible, and securely permanent. It must unite direct responsibility of management with assured means of support. No such library existed in the United States until that of Boston was founded, in 1848. Nor did any such library exist in the United Kingdom until after the passing of the "Libraries Act," in 1850.

[1.] Free Public Library of the City of Boston.

By chapter 52, of the Statutes of 1848, the Massachusetts Legislature enacted that the City of Boston might, from the city funds, establish a Public Library, and expend 5000 dollars (£1000) a year for its maintenance.* In aid of the first expenses, £200 was given by Mr. Bigelow, and large contributions of books were made by Mr. Winthrop and Mr. Edward Everett.

The earlier steps in the realization of this project were slow but sure. They proved conclusively (were proof needed) that under judicious regulation the levying of rates for Public Libraries may become a spur, not a hindrance, to private munificence. The first money donation which followed that of the Mayor of Boston was one of ten thousand pounds (50,000 dollars) from Mr. Joshua Bates for the purchase of books.† This princely gift was invested, and it put the Library at once into possession of a permanent augmentation fund of £600 a year. Mr. Jonathan Phillips followed with another gift of £2000, to be similarly applied.

In an admirable Report, presented to the City Council, in July, 1852, the Trustees develope their views as to the plan of the new Library, and their desire to awaken "a general interest in it, as a City Institution, important to the whole people, as a part of their education, an element of their happiness and prosperity;" regarding that course as being "the surest way to make it at last *a great and rich library for men of science, statesmen, and scholars, as well as for the great body of the people*, many of whom are always successfully struggling up to honourable distinctions, and all of whom should be encouraged to do it." ‡

It was not until the 20th of March, 1854, that the Boston City Library was opened to readers, nor until the 2nd of the following May that it was opened to borrowers It begun with about twelve thousand volumes, and, before the close of the year, this number was increased to 16,553, of which 6360 had been presented, and the remainder purchased. The aggregate issues during the first six months amounted to about 40,000 volumes. The Committee thus close their first Report on the actual working of the Library: "The benefits that must follow from such an institution, fitted, as the Public Library is, to continue by home-reading, and self-culture, the education begun by our excellent system of Free Schools, your Committee will not pretend to estimate. Indeed, if this Library should be liberally fostered and administered by the persons to whom its support and care are intrusted, all its benefits to

* Jewett, *Notices*, &c., p. 48.

‡ *City Documents* of 1852, No. 37, p. 20.

the intellectual, moral, and religious training of our community, and especially of our children, can neither be measured nor foreseen."*

The Legislature of Massachusetts took a further step in advance on the subject in 1851, by passing "an Act to authorize cities and towns to establish and maintain Public Libraries." American legislation differs from British so widely in the particulars of prolixity and verbosity, that the entire Act may be cited and read with little expenditure of type, or of time.

1. "Any City or Town of this Commonwealth is hereby authorized to establish and maintain a Public Library within the same, with or without Branches, for the use of the inhabitants thereof, and to provide suitable rooms therefor, under such regulations for the government of said Library as may from time to time be prescribed by the City Council of such city, or the inhabitants of such town;

2. "Any City or Town may appropriate for the foundation and commencement of such Library, as aforesaid, a sum not exceeding one dollar for each of its ratable polls, in the year next preceding that in which such appropriation shall be made; and may also appropriate annually, for the maintenance and increase of such Library, a sum not exceeding twenty-five cents for each of its ratable polls in the year next preceding that in which such appropriation shall be made;

3. "Any Town or City may receive in its corporate capacity, and hold and manage any devise, bequest, or donation, for the establishment, increase, or maintenance of a Public Library within the same."

[2.] Free Public Library of the City of New Bedford.

The first town to take action under this Statute was New Bedford, by whose Council a Free Library was established, in August, 1852. The proprietors of a Subscription, or "Social Library," transferred their collection to the new foundation, which was opened for public use on the 3rd of March, 1853, with about 6000 volumes.† This number has been, within about three years, increased to 9000; and in their fourth Report the Trustees are enabled to affirm that "it is undoubtedly true that no act of the municipal authorities of New Bedford has reached with its recreative and improving operation so large a part of our population, and probably none has ever met so universally and deeply the approbation of the people .... A Free Public Library is the crowning glory of the system of public education, which has been from our earliest history the pride of Massachusetts." ‡

In a Report of the preceding year there is a passage bearing on a point which is always interesting in connection with the present subject—that of the selection of the books: "While care has been taken," say the Trustees, "that no publication injurious to the public morals should find a place upon our shelves, we have endeavoured to divest ourselves, in our efforts to place before our fellow-citizens the means of a more extensive and genial culture, of all narrow and sectarian partialities. In this respect we are gratified to be able to state that no difference of opinion has for a single moment interrupted the harmony and unanimity of our proceedings." §

[3.] Astor Free Library of the City of New York.

Whilst the "Old Bay State" was beginning to form Town Libraries, by wise and foreseeing legislation, aided by the munificence of merchants who may, without any flattery, be said to be "as princes in the earth;" that munificence unaided was providing, in the chief city of the "Empire State," a library on the largest scale and of the widest accessibility.

John Jacob Astor, a native of the little village of Waldorf, near Heidelberg, was brought to London whilst yet a mere youth. By dint of great industry and frugality, he found himself, at the close of the American war, in possession of a small sum which he invested in merchandise suited to the New York market. On his voyage thither he formed an acquaintance with a furrier—a countryman of his own—and, by his advice, invested the proceeds of his venture in the fur trade. "He began his career," says his friend and biographer, "of course, on the narrowest scale, but he brought to the task a persevering industry, rigid economy, and strict integrity. To these were added an aspiring spirit that always looked upward; a genius bold, fertile, and expansive; a sagacity quick to grasp, and convert every circumstance to its advantage, and a singular and never wavering confidence of signal success."* With the good fortune that so often attends sagacious activity, Mr. Astor again found himself in London at a critical occasion;—at the period, namely, when a treaty was concluded which, for the first time, opened a direct commercial intercourse between Canada and the United States. He entered immediately into a contract with the North-West Company for furs. In the course of thirteen or fourteen years he had amassed means enough to launch the gigantic commercial enterprise known as the "American Fur Company" (afterwards the "South-West Company"), with a capital of one million of dollars, wholly furnished by himself. With that famous episode in the history of this enterprise, the splendid though unsuccessful attempt to establish an American colony beyond the Rocky Mountains, Mr. Washington Irving has made all the world familiar.

To have failed in a great project, which undoubtedly aimed as much at public as at private advantage, and to know that such failure resulted mainly from the supineness of the people and of the government in the furtherance of their own interests, would, perhaps, have deterred most men from busying themselves much about the public thereafter. With Mr. Astor, however, it was otherwise. Whether or not the precise channel which his munificence has chosen was the result of any reflections upon the share that popular ignorance may have had in the ill fortune of the greatest enterprise of his life, is but matter of conjecture. Be that as it may, his foundation at New York is the noblest contribution towards the dispelling of popular ignorance, and the facilitating of mental culture, which any American citizen has yet left behind him.

In a codicil, dated 22nd August, 1839, to his last will, Mr. Astor says: "Desiring to render a public benefit to the City of New York, and to contribute to the advancement of human knowledge and the general good of society, I do, by this codicil, appropriate four hundred thousand dollars (£80,000 sterling) out of my residuary estate to the establishment of a Public

* Washington Irving, *Astoria*, p. 11 [Edition of 1851].

Library in the City of New York . . . . . to the intent that the said amount be . . disposed of, as follows, namely:—

1. 'In the erecting of a suitable building for a Public Library;

2. 'In furnishing and in supplying the same from time to time with books, maps, charts, ... furniture, and other things appertaining to a Library for general use, upon the most ample scale and liberal character;

3. 'In maintaining and upholding the building, and other property, and in defraying the necessary expenses of . . . the accommodation of persons consulting the Library.'

"The said Library is to be accessible at all reasonable times and hours, for general use, free of expense, to persons resorting thereto. . . . . I further direct that a sum, not exceeding 75,000 dollars (£15,000), may be expended in the erection of a building for the Library; 120,000 dollars (£24,000) may be expended in the purchase of books, ... and the residue shall be invested as a fund for the maintaining and gradually increasing of the Library." Mr. Astor proceeded to name the first Trustees (Washington Irving, W. B. Astor, Daniel Lord, James G. King, Joseph G. Cogswell, Fitz-Green Halleck, Henry Breevort, Samuel B. Ruggles, Samuel Ward, and Charles Astor Bristed), in addition to the Chancellor of the State of New York, and the Mayor of the City, for the time being, who are always to be Trustees, ex-officio. The Trustees were incorporated by an Act of the Legislature of the 18th Jan., 1849, and it was enacted that all the property of the Corporation, real and personal, "shall be exempt from taxation in the same manner as that of the other incorporated Public Libraries of this State," and that "the said Trustees shall, in the month of January of every year, make a Report to the Legislature for the year . . . preceding, of the condition of the said Library, of the funds, and other property of the Corporation, and of its receipts and expenditures during each year." *

Mr. W. B. Astor, the son of the founder, shortly afterwards presented to the Library the sum of 12,500 dollars (£2500 sterling †), for the special purpose of forming a complete technological department, by the purchase of books on every branch of practical industry and the mechanic arts. In 1849, Mr. Joseph G. Cogswell was chosen Superintendent, or Principal Librarian. In March, 1850, the corner-stone of the new building was laid, and in the summer of 1853 the building was completed. Its architect was Mr. Alexander Sæltzer, a pupil of Schinkel, and its style may be termed Florentine. The entire structure is fire-proof. The dimensions of the principal Library Hall are one hundred feet by sixty, and this room alone is capable of containing 100,000 volumes. The reading rooms are stated to be capable of accommodating 500 persons. The structure was completed for the £15,000 specified by the founder, and the cost of the fittings, about £3500 more, was defrayed by surplus interest which had accrued whilst the building was in progress. On the 1st February, 1854, it was opened for public use, with about 80,000 volumes of books.

In the selection of books, the aim has obviously been to give no preference to special classes of literature, but to collect a library which should be at once

* Jewett, *Notices*, &c., pp. 88—91.

† *Annual Report of the Trustees* of the Astor Library, 1854, p. 11.

select and encyclopedical. And, undoubtedly, with the resources and the prospects of the Astor Library, this was the right course. In "Theology," its books at the opening amounted to 3752 volumes, including the best editions of the Hebrew and Greek Scriptures; numerous versions of them in the principal languages of Europe and the East; most of the Benedictine Editions of the Fathers; the great collections of Councils, and the best English Divines, both early and recent. In "Jurisprudence" it numbered 3107 volumes, and is especially rich in the modern law of Continental Europe, and in British law. The American law department was, for the most part, reserved for future opportunities. In moral and mental "Philosophy," the number of volumes was 1500. In the "Mathematical Sciences," about 5000, including the collections of Halley and Legere. The astronomical section is especially rich. Of works of "Natural History" there were 4249, including the splendid and costly works of Martins, Wallich, Audubon, Gould, Sibthorp, Lambert, and Chenu. In "Chemistry, Physics generally, and the Useful Arts," upwards of 5000 volumes, in addition to 2000 volumes of the Transactions of Scientific Societies; and in "Fine Arts" 2500 volumes; on the first fifty of which, say the committee, 2975 dollars (£595 sterling) were expended. In the "Medical Sciences" the number of volumes was 1751.

The Historical Department contained, at the opening of the Library, 20,350 volumes, of which 3407 were on the History of America. This part of the collection includes most of the early Spanish writers, early Voyages in all languages, and a long series of histories of the War of Independence, and of works relating thereto. In the class "Politics," the principal contents of the Library, at the same period, consisted of Journals, Debates, and Reports of the British Parliament, and of other European legislatures, and amounted to 2880 volumes.

In the class "Literature," the section of Linguistics seems to be best provided. It contained at the opening 2100 volumes, including the best works on Ægyptology (to use the fashionable phrase) and on the Oriental languages, —some of them of great value and rarity. In the whole it has Grammars and Dictionaries of 104 different languages. In the Literature of Greece and Rome, the Library counted 3100 volumes,—the *apparatus criticus* included. In that of Italy, 1761, and in that of France, 3101 volumes. Of Spanish and Portuguese literature there were 673; of Dutch, 156; of German, about 1400; and of Scandinavian, 809 volumes. In the Hungarian and Sclavonic languages collectively, the number of volumes was but forty-one. In English literature there were 3400 volumes; 300 of which were exclusively Shakespearian. It need scarcely be added that this enumeration of *languages* has relation to the class "Literature" only. Of Polygraphic and Miscellaneous works the number of volumes was nearly 5000.

If, then, we group these several statements into a simpler and more comprehensive classification, the broad result may be stated thus:—

	Volumes.
1. Theology	3,752
2. Philosophy	1,500
3. History	20,350
4. Politics and Law	5,987
5. Sciences and Arts	20,500
6. Literature and Polygraphy	26,141
Total	78,230

For the systematic comprehensiveness and the judicious selection which alike characterize this fine Library, New York is eminently indebted to Mr. Cogswell, who made two several journeys to Europe in search of books, visiting every European book-mart of much importance, and who himself inaugurated the Library, in the best possible manner, by presenting to it a series of books, in every section of Bibliography, amounting to nearly 5000 volumes.

Very wisely, the Trustees have determined that the Astor Library shall be a Library for consultation, not for borrowing, although it is by no means certain that "a free library of circulation is a practical impossibility in a city as populous as New York," as Mr. Cogswell seems to think.* Nor is it practicable—ponder it as we may—to perceive *why* a mere conjecture, expressed thus—"One hundred volumes a day is a *low average* of the daily use," is "a statement with respect to the extent of the use of the library, as exact as the nature of the case will admit;" or *why* "it would not be easy to say which department is most consulted," since both difficulties would be instantly removed by the simple expedient of registering the issues, as has long been done in libraries where the issue of *five* or *six* hundred volumes a-day is not a "low average," but an ascertained fact. These, however, are little blemishes in what is otherwise a most interesting Report of the first year's working of the Library, and are sure to disappear from future Reports.

Especially interesting is the statement, that "Very few have come to the Library without some manifestly distinct aim. . . . . It is shown by experience that the collection is *not* too learned for the wants of the public. . . . . In the linguistic department it possesses Dictionaries and Grammars, and other means of instruction, in more than a hundred languages and dialects, four-fifths of which have been called for during the first year of its operation. Our mathematical, mechanical, and engineering departments are used by great numbers; . . . . students at a distance have found it a sufficient object to induce them to spend several weeks in New York, to have the use of them. The same remark applies to Natural History. . . . . The books have been carefully used, and the rules of quiet and order invariably observed."

It remains to be added, that the present yearly income is £2483, and the ordinary expenses of maintenance £1142, which leaves £1341 a-year available for the purchase and binding of books.

* *Annual Report on the Astor Library* (1854).

CHAPTER V.

OF THE SMITHSONIAN INSTITUTION.

The Smithsonian Institution was founded by an Act of the Congress of the United States of America, on the 10th August, 1846, in pursuance of the bequest by James Smithson, of all his property to the United States, in order to the establishment of an institution "at Washington, under the name of the 'Smithsonian Institution' . . . . for the increase and diffusion of knowledge among men."

James Lewis Macie (afterwards called Smithson) appears to have been a natural son of Sir Hugh Smithson, Bart., who was created Duke of Northumberland, in 1766 (and shortly afterwards "Vice-Admiral of all America"), after his marriage with the heiress of the Percies. Mrs. Elizabeth Macie, his mother, is said to have been of the Wiltshire family of Hungerford. Little is known of his life, save that he was educated at Oxford, that he cultivated a knowledge of chemistry, was well acquainted with Cavendish, and contributed to the *Philosophical Transactions* several analytical papers on chemical subjects; that he was proud of his descent, yet keenly sensitive on the score of the "bar sinister" in his escutcheon; ambitious of leaving a name that, to use his own words, "would live in the memory of men when the titles of the Northumberlands and the Percies are extinct or forgotten," yet willing to make his purpose wholly contingent on the birth of no child or children to a nephew who survived him; that he passed most of his life on the Continent, and died at Genoa in 1829, unmarried, leaving a fortune of about £120,000 sterling.

Mr. Smithson is said to have been a man of reserved manners and sensitive feelings; but an anecdote (almost the only one which has survived of him) shows that he must have possessed considerable coolness and strength of nerve. "Happening to observe a tear gliding down a lady's cheek, ... he submitted it to reägents, and detected what was then called microcosmic salt, with muriate of soda, and, I think" (Mr. Davies Gilbert, President of the Royal Society, is the narrator), "three or four more saline substances held in solution."

The will of the founder of the Smithsonian Institution, bears date 23rd Oct., 1826. In it he describes himself as "James Smithson, son of Hugh, first Duke of Northumberland, and Elizabeth, heiress of the Hungerfords, of Audley, and niece of Charles the Proud, Duke of Somerset." After bequeathing an annuity to a former servant, he leaves the whole of the income arising from all his property, of what nature soever, "to Henry James Hungerford, my nephew, heretofore called Henry James Dickinson, son of my late brother, Lieutenant-Colonel Henry Louis Dickinson," for his life, and then directs that "should the said Henry James Hungerford have a child or children, legitimate *or illegitimate*," such child or children should inherit the whole of his property of every kind absolutely and for ever. Failing such issue (as proved to be the case), he bequeathed the whole—subject to the annuity already mentioned—

" to the United States of America," in the few words cited above, and without further detail of his intentions.

The Act of Congress, which organized the Institution, created a Board of Regents, directed the construction of a suitable building, empowered the Regents to appoint officers, which "said officers shall be removable by the Board of Regents, whenever in their judgment the interests of the Institution require any of the said officers to be changed;" and enacted that "the said Regents shall make, from the interest of said fund, an appropriation, *not exceeding an average of* 25,000 *dollars annually, for the gradual formation of a Library composed of valuable works pertaining to all departments of human knowledge.*" Of all remaining monies, "not herein appropriated, or not required for the purposes herein provided," * the Regents are directed to make such disposal as they may deem best suited for the promotion of the testator's purpose; and by the 10th section it is enacted that one copy of all books, maps, and prints, for which copyright shall be secured, shall be delivered to the Librarian of the Smithsonian Institution, and one other copy to the Librarian of the Congress Library, for the use of such Libraries respectively.†

Congress Appropriation for the Smithsonian Library.

The amount received by Mr. Rush on behalf of the United States was £103,013 sterling. "He brought it over in sovereigns—deposited it in the Mint of the United States, where it was re-coined into American eagles,—thus becoming a part of the currency of the country. This money was afterwards (and unwisely) lent to some of the new States, and a portion of it was lost; but it did not belong to the United States—it was the property of the Smithsonian Institution—and the government was bound in honour to restore it. Congress has acknowledged this by declaring that the money is still in the Treasury of the Union, bearing interest at the rate of six per cent., and annually producing a revenue of about 30,000 dollars (£6000 sterling)." ‡

The plan which was adopted for carrying out the founder's object, proposed,

1. To stimulate men of talent to make original researches, by offering suitable rewards for memoirs containing new truths;

2. To appropriate annually a portion of the income for particular researches;

3. To publish a series of periodical reports on the progress of the different branches of knowledge;

4. To publish occasionally separate treatises on subjects of general interest;

"The Act of Congress," continues the *Programme of Organization*, "establishing the Institution contemplated the formation of a Library and Museum; and the Board of Regents, including these objects in the plan, . . . resolved to divide the income into equal parts. One part to be appropriated to . . . . publications and researches; the other . . . . to the formation of a library and a collection of objects of nature and of art. These two plans are not incompatible with each other."

* Copy of the Will, Act, &c., in Appendix to *Eighth Annual Report of the Board of Regents*, &c. (1854), pp. 107—123.

† Ibid. (*Programme of Organization*), pp. 128—133.

‡ Henry (Extract from an Address), p. 121.

On this double basis the expenditure of the Smithsonian bequest was for a short time regulated, being modified, however, by the necessity of providing, first of all, an adequate building for the transaction of business and preservation of the Collections. To this last-named purpose—the erection of a building—no part of the capital fund was appropriated. Interest had accrued to no less an amount than £48,400 sterling. This sum was devoted to the structure; but the trustees determined to keep it invested until a further sum of £30,000 had accrued, in the expectation that the two sums would both cover the entire expenditure on this head, and leave a sufficient balance to be invested as a permanent "fabric-fund" to keep the building in repair. The main structure was completed in 1855, and its total cost was £59,882 (299,414 dollars). The aggregate amount of accumulated interest up to the same date, was about £87,000. So that, in the words of the *Ninth Annual Report*, "the fund originally bequeathed by Smithson remains undiminished in the Treasury of the United States, and there is now on hand nearly 140,000 dollars (£28,000) to be added to the principal."

At the very outset of the Institution two widely different views as to the relative importance of the several spheres of action, specified in the Act of Congress, and in the *Programme of Organization*, obtained, as well within the Board of Regents as without it. The one party regarded the formation and efficient maintenance of a great Library, with its subsidiary collections, as beyond all question the most valuable result which the Smithson bequest could yield. Their opponents esteemed the institution and encouragement of scientific researches, on the one hand, and, on the other, the widest possible dissemination of the fruits of such researches, by means of the press, to be far more valuable than any conceivable gathering of books, or of the other appliances of learning. The former alleged that to amass a splendid Library was at once to lay a broad foundation both for the increase and the diffusion of human knowledge, and to secure a tangible and enduring return, visible to all eyes, for the money expended. The latter relied on the vagueness and universality of the testator's few words of direction—"the increase and diffusion of knowledge AMONG MEN,"—as, of themselves, constituting a clear proof that no plan of expenditure, the fruits of which were wholly or chiefly local, could honestly carry out his purpose.

There is so much of undeniable truth in each of these statements, taken singly, and each of them is so far from embodying the whole truth of the question in hand, that a fair distribution of the funds between the two great objects of (1) gathering the tools of knowledge, and (2) of teaching men how rightly to use them, may well appear to be rather the wise solution of a difficult problem than a mere compromise between conflicting opinions. And with a little more of patience and mutual forbearance on the part of those who had to work out the plan, it would, we think, have been found practicable enough. An income of £6000 or £7000 a-year would not, indeed, have always sufficed to carry on simultaneously the formation of a great Library, and the production and diffusion of a series of scientific investigations of a high order. But it required no memory of uncommon retentiveness to call to mind the names of Brown and Peabody, of Bates and Astor; and no logical faculty, unusually acute, to make the right deduction from the reminiscence. A systematic

well-chosen, and preëminently *scientific* library at Washington would have been, at every step of its progress, increasingly useful even in the direct furtherance of the "active operations" of the Smithsonian Institution. No such library ever was, or ever will be, formed by a mere system of "exchanges," although such a system is an admirable aid and auxiliary. Honest and persevering effort for the obtainment of such a library, if made side by side with an energetic furtherance of the scheme of publication, would have gathered support from *all* quarters; whilst a contrary course has divided the friends of the Smithsonian Institution into two jealous and even hostile camps. In the lives of institutions, as in those of individuals, there are occasions when bold enterprise and unquestioning faith show themselves to be qualities as prudent as they are powerful.

For the present, however, the Library portion of the Smithsonian scheme has sustained a check. But a foundation has been laid, which, at some day or other, will assuredly be worthily built upon. About 19,000 volumes have been collected. Of this number about 9350 have been purchased; upwards of 8000 have been obtained by donation and exchange; about 4300 have been delivered under the Copyright Act; 873 volumes are stated in the Reports to have come "by deposit." Of the extent of the collection in the several classes of literature no adequate statement has appeared. In appropriating the funds available for book-buying, Mr. Jewett very judiciously recommended the collection, in the first instance, of works of bibliography, and a considerable proportion of the purchases have accordingly been in this department. Of the books presented the majority are Periodicals and Transactions of learned Societies.* The Reading-Room, it is stated (in the "*Eighth Annual Report*"), "has continued to be a place of great resort for citizens and strangers. The list of periodicals is extensive, and comprises many of the best scientific and literary journals of this country and of Europe." †

Of the other operations of the Smithsonian Institution we can speak with unmixed satisfaction. It has already published nine volumes of "*Contributions to Knowledge*;" besides several minor but useful works, as, for instance, a good "*Report on recent Improvements in Chemical Arts.*" Of the contents of the former, a complete list is subjoined in its appropriate place. They are, it will be seen, very comprehensive. In addition to the entire range of the Natural Sciences, they include contributions of real value in History and in Philology.

It has also erected a Magnetic Observatory at Washington; has in various ways promoted astronomical pursuits; and has established a valuable system of meteorological investigation throughout the whole extent of the Union. And, finally, it has organized and has successfully carried into practical working a comprehensive scheme of scientific and literary correspondence and exchanges throughout the world, the probable ultimate advantages of which are not easily calculable. That an institution, which in eleven years has accomplished so much, may surmount all temporary difficulties, and prosecute

* The first part of a list of works of this kind has been published by way of Appendix to the Seventh Volume of the *Smithsonian Contributions.*

† *Eighth Report*, p. 30 (1854. 8vo).

‡ *I. e.* in the body of Bibliography under Sciences generally.

its career with ever increasing activity and success, must be the ardent desire of all lovers of knowledge, whether they be Americans or Europeans.

CHAPTER VI.

OF PUBLIC SCHOOL AND DISTRICT LIBRARIES.

In addition to the various classes of Libraries which have been already enumerated, many of the States have School and District Libraries, more or less completely organized, but in most cases having a direct connection with the Common School legislation of the State to which they belong.

Public School Libraries of Massachusetts,

In the *Twelfth Report of the Secretary of the Board of Education of Massachusetts* (November, 1848), it is stated that the then number of volumes in the Public School Libraries of that State was 91,539; and their estimated value 42,707 dollars (£8540). "It would be difficult," it is added, "to mention any way in which a million of dollars could be more beneficially expended than in supplying the requisite apparatus and libraries for our Common Schools."

and of New York.

The School districts throughout the State of New York are furnished with libraries out of funds annually appropriated (since 1838) by law to that purpose. The number of volumes in these libraries was, in 1844, 1,145,250; in 1845, 1,203,139; in 1846, 1,310,986; and in 1847, 1,338,848 volumes. "Selections for the District Libraries are made from the whole range of literature and science, with the exception of controversial books, political or religious. History, Biography, Poetry, Philosophy, Fiction, indeed every department of human knowledge contributes its share to 'the District School Library'..... These libraries are not so much for the benefit of children attending school as for those who have completed their Common School education. Its main design was to throw into school districts, and to place within the reach of all the inhabitants, a collection of good works on subjects calculated to enlarge their understandings, and store their minds with useful knowledge."* The *Report of the Board of Education* of New York City, presented in 1855, recommends the extension of this plan to the Grammar Schools of the City.†

There are also, in the State of New York, 172 libraries attached to Academies and Seminaries, under the general supervision of the Regents of the University, who annually report to the Legislature *inter alia* the number of volumes, and the estimated value of the books in each Academy. These 172 libraries contained, in 1855, 91,296 volumes, and their estimated value was 88,432 dollars (or £18,259 sterling).‡ The following is a comparative view of these Academy Libraries in the years 1848, 1850, and 1855, respectively:—

* Reports of 1836 and of 1849, quoted by Jewett in *Notices*, &c., p. 105.

† *Thirteenth Annual Report of Board of Education of the City and County of New York*, 1855, p. 68.

‡ *Sixty-eighth Annual Report of the Regents of the University of the State of New York*, March, 1855, pp. 173–225.

Year.	No. of Libraries.	Aggregate No. of Volumes.
1848	153	63,365
1850	154	65,524
1855	172	91,296

District Libraries of Rhode Island.

In Rhode Island, within the four years 1846—1849, public libraries were establisbed in every town of the State with only four exceptions, and mainly by the exertions of the enlightened and energetic Commissioner of Public Schools, Mr. Henry Barnard. These libraries are small, but are composed of well-selected books, and are accessible to the whole population. Another public-spirited man, Mr. Amasa Manton, of Rhode Island, has been the chief founder of ten libraries in as many villages of that State, which now contain in the aggregate upwards of 5000 good books.*

Even in the newer States—such as Indiana and Michigan—progress is being made in a similar direction, and by express legislative enactment. Indiana provided, in the law which laid out the State into counties, for the appropriation of a piece of land in each county to the establishment of a public library. In Michigan "the law has for several years made it the duty of the supervisor to assess a half mill tax upon each dollar of the taxable property of his township for the purchase of a Township Library . . . . . The constitution of the State provides that 'the clear proceeds of all fines assessed in the several counties for any breach of the penal laws shall be exclusively applied to the support of said libraries.' 'Although,' it is added, 'according to the returns there are [1847] but 300 Township Libraries in the 425 townships of the State, from which reports have been received, still there is a very gratifying increase in the number of these libraries, and the extent of their circulation. There are 30 more such libraries reported this year than last, containing in all 42,926 volumes, which is 6938 more than they contained, according to the reports received, in the year 1846. These libraries circulate through 1349 districts, which shows an increase of 268 over any former year. Communications received from several counties afford very gratifying evidence of their increased usefulness.'"†

CHAPTER VII.

GENERAL SUMMARY OF THE PUBLIC LIBRARIES OF THE UNITED STATES.

In the Smithsonian "*Report on Public Libraries*" of 1849, Mr. Jewett stated their total number, in all the States collectively, at 10,199, and their aggregate contents at 3,753,964. According to the Census Returns, commenced in 1850, but not completed until 1853, the total number of libraries,

* Jewett, *Notices*, &c., p. 63. † *Ibid.* p. 185.

more or less accessible to the public, was 15,615, and the aggregate number of volumes therein contained, 4,636,411.

Mr. Jewett's classification was seven-fold, namely: I. *State Libraries;* II. *Social Libraries;* III. *College Libraries;* IV. *Students' Libraries;* V. *Libraries of Academies and Professional Schools;* VI. *Libraries of Scientific and Historical Societies;* VII. *Public School Libraries.* The Census classification was five-fold, namely: I. *Public Libraries* (in the usual sense of that term as applied in the United States); II. *School Libraries;* III. *Sunday School Libraries;* IV. *College Libraries;* V. *Church Libraries.* The classification employed in these pages differs from both. In presenting the reader with a brief and general Summary of the results, it will therefore be expedient first to state them separately, and then to place side by side such of the several items as admit of comparison. Mr. Jewett's Summary will stand thus:—

Summary of Libraries in 1849, according to Mr. Jewett.

	No. of Libraries.	Aggregate No. of vols.
1. "State" Libraries	39	288,937
2. "Social" Libraries	126	611,334
3. "College" Libraries	126	586,912
4. "Students'" Libraries	142	254,639
5. "Libraries of Academies," &c. ..	227	320,909
6. "Libraries of Scientific and Historical Societies"	34	138,901
7. "Public School" Libraries ..	9505	1,552,332
Total ..	10,199	3,753,964

If the same results be classified according to the several States, ranking these in the order of the relative *number of volumes* publicly accessible *in each State*, they will read thus:

	Name of State.	Population of State in 1850.	No. of Libraries in 1849.	Aggregate No. of vols. in 1849.
1.	New York	3,097,394	8284	1,756,254
2.	Massachusetts	994,514	762	415,658
3.	Pennsylvania	2,311,786	80	287,519
4.	District of Columbia ..	51,687	20	148,673
5.	Ohio	1,980,427	48	104,634
6.	Connecticut	370,792	19	98,638
7.	Virginia	1,426,661	30	89,180
8.	Maryland	583,034	46	84,565
9.	Rhode Island	147,545	45	79,341
10.	Michigan	397,654	381	65,235
11.	Kentucky	982,405	27	63,440
12.	South Carolina	668,507	14	59,914
13.	New Hampshire ..	317,976	50	57,178
14.	Maine	583,169	31	56,856
15.	Tennessee	1,002,614	21	47,356
16.	New Jersey	489,555	17	46,305
17.	Indiana	988,416	16	40,000
18.	Missouri	682,044	19	37,506
19.	Georgia	906,185	24	35,632

	Name of State.	Population of State in 1850.	No. of Libraries in 1849.	Aggregate No. of vols. in 1849.
20.	Vermont	314,120	23	34,299
21.	Louisiana	517,762	6	30,000
22.	North Carolina.. ..	869,039	8	24,247
23.	Illinois	851,470	27	19,916
24.	Alabama	771,671	37	18,077
25.	Delaware	91,532	5	16,700
26.	Mississippi	606,526	108	15,650
27.	Wisconsin	305,391	35	7163
28.	Florida	87,444	4	5537
29.	Minnesota	6,077	2	3200
30.	Iowa	192,214	5	2660
31.	Texas	212,592	4	1631
32.	Arkansas	209,897	1	1000
33.	California	92,597		
	Total	23,197,995	10,199	3,753,964

Summary of Libraries in 1850, according to the Census Returns.

According to the Census Returns of 1850 the then number of Libraries, other than "private" (of which, also, the Census took an account), ran thus:—

	No. of Libraries.	Aggregate No. of Volumes.
1. "Public" Libraries	1217	1,446,015
2. "School" Libraries	12,067	1,647,404
3. "Sunday School" Libraries ..	1988	542,321
4. "College" Libraries	213	942,321
5. "Church" Libraries	130	58,350
Total	15,615	4,636,411

Summary of Libraries in 1856, as enumerated in the following "Statistical Table."

In the following "*Statistical Table of the Public Libraries of the United States,*" with which we conclude this branch of our subject, the returns of 1849, as stated by Mr. Jewett, are, for the purpose of comparison, given side by side with those of 1856, so far as we have been able to ascertain them from the latest Reports, or from other and personal information. Where these are lacking, the estimated contents, in 1856, of the Library in question is based on the average accessions of preceding years, as officially reported. A summary of the general results of this table will be found on its last page:—

STATISTICAL TABLE OF THE LIBRARIES OF THE UNITED STATES OF AMERICA.

I. STATE OF MAINE.

Name of City or Town.	Name of Library.	When founded.	No. of Vols. in 1849.	Average annual increase.	Estimated No. of Vols. in 1864.
1 Augusta ..	State	1836	9000	500	12500
2 Bangor ..	Theological Seminary ..	1832	7500	400	10300
3 Brunswick ..	Bowdoin College	1802	24750	530	28460
4 Houlton ..	Forest Club	1849	200		
5 Portland ..	Athenæum	1827	6170		
6 Waterville ..	Waterville College ..	1820	8484	50	8834

II. STATE OF NEW HAMPSHIRE.

1 Concord ..	(1.) New Hampshire Historical Society ..	1823	1500		
	(2.) Methodist Biblical Institute	1846	1000	250	2750
	(3.) State	1850	4700	120	5540
2 Dublin ..	(1.) Union	1793	438		
	(2.) Ladies'	1799	161		
	(3.) Juvenile	1822	1500?		
3 Exeter ..	Phillips' Academy	1783	2200		
4 Gilmanton ..	Theological Seminary ..	1835	4300		
5 Great Falls	Manufacturers' and Village		2200		
6 Hanover ..	(1.) Dartmouth College ..	1769	20600		
	(2.) Northern Academy of Arts and Sciences ..	1841	1500		
7 Meridan Village ..	Kimball Union Academy	1814	2000	140	2980
8 New Hampton	Theological Seminary ..	1821	2200		
9 Northfield ..	New Hampshire Conference Seminary		1000		

Name of City or Town.	Name of Library.	When founded.	No. of Vols. in 1849.	Average annual increase.	Estimated No. of Vols. in 1860.
10 PORTSMOUTH..	(1.) Athenæum	1817	7284	200	8684
	(2.) St. John's Church ..		500		
	(3.) Unitarian Church ..		678		
11 SANBORNTON..	Public		300		
12 WAKEFIELD ..	Wakefield and Brookfield Union	1797	500		

III. STATE OF VERMONT.

1 BURLINGTON..	University of Vermont ..	1800	12250	200	13650
2 MIDDLEBURY..	Middlebury College ..	1800	8417		
3 MONTPELIER..	(1.) State		3500		
	(2.) Historical and Antiquarian Society	1838			
4 NORWICH ..	Norwich University ..	1843	1032	200	2432

IV. STATE OF MASSACHUSETTS.

1 AMHERST ..	Amherst College	1821	13700	120	14540
2 ANDOVER ..	(1.) Theological Seminary	1808	20249	500	23749
	(2.) Phillips' Academy ..		1000		
	(3.) English High School		800		
3 BOSTON ..	(1.) Prince, or South Church	1758	1800		
	(2.) Library of the American Academy of Arts and Sciences	1780	8000	150	9050
	(3.) Library of the Massachusetts Historical Society	1791	7000	100	7700
	(4.) Boston	1794	12150	250	13900
	(5.) Boston Athenæum ..	1806	50000		
	(6.) Apprentices'	1820	4000	175	5225
	(7.) Library of the American Board of Foreign Missions	1822	3500	150	4550
	(8.) Social Law	about 1822?	3000		
	(9.) General Court, or State	1826	7400	425	10400
	(10.) Library of the Boston Society of Natural History	1830	3500	100	4200
	(11.) American Statistical Association.. ..	1839	2000		
	(12.) New England Genealogical Association ..	1845	1500		

Name of City or Town.	Name of Library.	When founded.	No. of Vols. in 1849.	Average annual income.	ESTIMATE: No. of Vols. in 1864.
BOSTON [*continued*]	(13.) Mercantile .. .. [incorporated	1845]	7059	400	9859
	(14.) Bowditch	1846			
	(15.) Library of the American Oriental Society ..	1849?	400		
	(16.) Free City	1852

	(9.) Collection of the Library Company ..	1814	5000	50	5350
	(10.) National Institute ..	1840	3000		
	(11.) Apprentices'		2000		
	(12.) Observatory	1842	500		

XIII. STATE OF VIRGINIA.

Name of City or Town.	Name of Library.	When founded.	No. of Vols. in 1849.	Average annual Increase.	Estimated No. of Vols. in 1864.
1 Berryville ..	Academy	1830?	1000		
2 Bethany ..	College	1840	2280		
3 Boydtown ..	Randolph Macon College ..	1832	6000		
4 Charlottesville ..	Virginia University ..	1825	18378	413	21300
5 Emory ..	Libraries of the Emory and Henry College	1839	8000	250	9750
6 Fairfax ..	Theological Seminary ..		4955	50?	5300
7 Lexington ..	(1.) Washington College ..	1776	4997	40	5200
	(2.) Military Institute ..	1841	2500	250	4250
8 Prince Edward County	(1.) Theological Seminary ..	1828	4306	50?	4650
	(2.) Hampden-Sidney ..	1835	8000		
9 Pruntytown	College	1840	2000		
10 Richmond ..	(1.) State	1828	14000	500?	17500
	(2.) Historical Society ..	1835	1200		
	(3.) Richmond College ..	1843	1200		
11 Romney ..	Literary Society	1819	1000		
12 Williamsburg	College	1692?	5000		

XIV. STATE OF NORTH CAROLINA.

1 Chapel Hill	University	1795	11847		
2 Mecklenburg County ..	Davidson College		1200		
3 Raleigh ..	State		3000		
4 Salem ..	Fayette Academy	1804	1500		
5 Wake Forest	College		4700		

XV. STATE OF SOUTH CAROLINA.

1 Charleston ..	(1.) Library Society .. [Destroyed by fire in 1778.]	1748	20000	180	21260
	(2.) Apprentices'	1824	8500	500	12000
	(3.) College	1810	2000		

	Name of City or Town.	Name of Library.	When founded.	No. of Vols. in 1849.	Average annual increase.	Estimated No. of Vols. in 1866.
	CHARLESTON .. [*continued*]	(4.) Medical Society ..	1834	2450	100?	3100
2	COLUMBIA ..	(1.) S. C. College	1802	18400	500	22000
		(2.) Theological Seminary ..	1830	4754		
3	FAIRFIELD ..	Theological Seminary ..	1826	1500		
4	LEXINGTON ..	Theological Seminary ..	1833	1560		

XVI. STATE OF GEORGIA.

1	ATHENS ..	Franklin College	1831	10267	130	11200
2	AUGUSTA ..	Medical College	1833	4000	150	5000
3	MILLEDGEVILLE ..	Oglethorpe College ..	1838	4000		
4	OXFORD ..	Emory College	1839	2700		
5	PENNFIELD ..	Mercer College	1838	3000		
6	SAVANNAH ..	Historical Society		7000		

XVII. STATE OF ALABAMA.

1	LAGRANGE ..	College		3000		
2	MARION ..	Howard College	1842	1500		
3	MOBILE ..	Franklin Society	1835	1454		
4	SPRING HILL	College		4000		
5	TUSCALOOSA ..	Alabama University ..	1831	7123	150	8200

XVIII. STATE OF FLORIDA.

1	PENSACOLA ..	Naval Hospital	1847	1337		
2	ST. AUGUSTINE	Judicial		2000		
3	TALLAHASSEE	State	1845	2000		

XIX. STATE OF MISSISSIPPI.

Name of City or Town.	Name of Library.	When founded.	No. of Vols. in 1849.	Average annual increase.	Estimated No. of Vols. in 1856.
1 Jackson ..	State	1838	5000	300?	7000
2 Claiborne County ..	Oakland College	1831	6000		
3 Oxford ..	College	1848	1600		
4 Washington ..	College		1000		

XX. STATE OF LOUISIANA.

1 Baton Rouge	State	1838	7000	300	9000
2 Bringiers ..	Jefferson College		6000		
3 Jackson ..	Louisiana College		2000		
4 New Orleans	Public School		10000		

XXI. STATES OF TEXAS AND ARKANSAS.

GENERAL SUMMARY OF THOSE LIBRARIES ONLY WHICH ARE COMPRISED IN THE PRECEDING TABLE.

Class.	Character of the Libraries.	No. of Libraries in each class.	Estimated No. of Vols. in the Aggregate.	Average No. of Vols. in each Library of the several classes respectively.
I.	COLLEGIATE	149	1,083,954	7274
II.	PROPRIETARY	133	819,594	6162
III.	STATE and CONGRESSIONAL	36	333,321	9258
IV.	TOWN and PAROCHIAL ..	11	94,188	8562
V.	SCHOOL	12	40,830	3402
	Total ..	341	2,371,887	

Having no information of later date than that contained in the Census of 1850 (p. cxxxiii. *supra*) respecting the "Public School," "District," and "Township" Libraries, I have not included them in this Statistical Table. Many of them are itinerating collections. It is obvious, therefore, that in this case, especially, wear and tear will considerably affect the numbers from time to time, as well as the ordinary contingencies of increase or loss. The careful revision and reprinting of Mr. Jewett's Report of 1849 has been for several years promised by the Smithsonian functionaries, and is much to be desired.

EDWARD EDWARDS.

TRÜBNER'S

BIBLIOGRAPHICAL GUIDE

TO

AMERICAN LITERATURE.

I.

BIBLIOGRAPHY.

Adams.—Typographia: a brief Sketch of the origin, rise, and progress of the Typographic Art, with practical directions, by Thomas F. Adams. 8vo. Philadelphia, 1837.

Wells, A.M. Vols. 1 to 8, 12mo, with portraits. Boston, 1850 to 1857. cloth. 7s. 6d. per annual volume.

This work, commenced in the year 1850, and issued in January annually, contains all important facts discovered or announced during the year. Each volume is distinct in itself, and contains *entirely new matter*, with a fine portrait of some distinguished scientific man. As it is not intended exclusively for scientific men, but to meet the wants of the general reader, it has been the aim of the editor that the articles should be brief and intelligible to all. The editor has received the approbation, counsel, and personal contributions of the prominent scientific men throughout the country.

Encyclopædia Americana.—A popular Dictionary of Arts, Sciences, Literature, History, Politics, and Biography. A New Edition, including a copious collection of Original Articles in American Biography, on the basis of the Seventh Edition of the German Conversationes Lexicon, edited by

Francis Lieber, assisted by E. Wrigglesworth. 13 vols. 8vo, cloth. Volume XIV. Supplementary Volume, edited by Henry Vethake, LL.D. Philadelphia, 1829 to 1831. Volume XIV., Philadelphia, 1846. £6 6s.

The Editor has added largely in the literary and historical part; Mr. R. Walsh, the American Biography; Mr. Bradford, the American Geography; Mr. Ingersoll, on Trade and Manufacture.

Holbrook.—Scientific Tracts, by Josiah Holbrook. 3 vols. 8vo. Boston. 18s.

Iconographic Encyclopædia of Science, Literature, and Art, systematically arranged, by G. Heck, with 500 quarto Steel Plates, by German Artists; the Text translated and edited by Professor Spencer F. Baird, of Dickinson College, Carlisle, New York. 4 vols. 8vo, text, and 2 vols. 4to, plates, half-morocco. £9 0 0

Memoirs of the American Academy of Arts and Sciences. Old Series, 4 vols., 1785 to 1818; New Series, 5 vols., 1833 to 1855. 4to. Boston.

VOL. I. PART 1.

A Philosophical Discourse, publicly addressed to the American Academy of Arts and Sciences, in Boston, on the eighth of November, 1780; when the President was inducted into office, by James Bowdoin, Esq., President of the Academy.

ARTICLE

1. A method of finding the Altitude and Longitude of the nonagesimal Degree of the Ecliptic: with an Appendix, containing calculations from corresponding Astronomical Observations, for determining the difference of Meridians between Harvard-Hall, in the University of Cambridge, in the Commonwealth of Massachusetts, and the Royal Observatories at Greenwich and Paris. In a Letter from the Rev. Joseph Willard, President of the University, and Corresponding Secretary of the American Academy of Arts and Sciences, to the Hon. James Bowdoin, LLD., President of the Academy. 1
2. A Memoir on the Latitude of the University at Cambridge: with observations of the Variation and Dip of the Magnetic Needle, by Samuel Williams, F. A. A. Holles Professor of Mathematics and Natural Philosophy in the University 62
3. A Table of the Equations to equal Altitudes, for the Latitude of the University of Cambridge, 42° 23′ 28″ N., with an account of its Construction and Use, by the Rev. Joseph Willard, President of the University 70
4. Astronomical Observations made in the State of Massachusetts, by Professor Williams 81
5. Some Select Astronomical Observations made at Chelsea, lat. 42° 25′: and 26″ in June, East of the University of Cambridge, by Rev. Phillips Payson, F.A.A. 124
6. Observations of the Transit of Mercury over the Sun, November 12, 1782, at Ipswich, by Rev. Manasseh Cutler, F.A.A. 128
7. A Memoir containing Observations of a Solar Eclipse, October 27, 1780, made at Beverly; also of a Lunar Eclipse, March 29, 1782; of a Solar Eclipse, April 12, and of the Transit of Mercury over the Sun's Disc, November 12, the same year, made at the President's House in Cambridge, by Rev. Joseph Willard, President of the University 129
8. Observations of a Solar Eclipse, October 27, 1780, made at St. John's Island, by Messrs. Clarke and Wright, in a Letter from Mr. Joseph Peters to Caleb Gannett, A.M. Rec. Sec. Amer. Acad. 143
9. Observations of a Solar Eclipse, October 27, 1780, made at the University in Cambridge, communicated by Caleb Gannet, A.M., Rec. Sec. Amer. Acad. 146
10. An Observation of a Solar Eclipse, Oct. 27, 1780, at Providence, by J. Brown 149
11. Observations of the Solar Eclipse of the 27th of October, 1780, made at Newport, Rhode Island, by Mons. de Granchain; translated from the French, and communicated by the Rev. President Willard 151
12. An Account of the Observations made in Providence, in the State of Rhode Island, of the Eclipse of the Sun, which happened the 23rd day of April, 1781, by Benjamin West, Esq., F.A.A., communicated by the Rev. President Willard 156
13. Account of the Transit of Mercury, observed at Cambridge, November 12, 1782, by James Winthrop, Esq., F.A.A. 159
14. Observations of an Eclipse of the Moon, March 29, 1782, and of an Eclipse of the Sun, on the 12th of April following, at Ipswich, lat. 42° 38′ 30′, by the Rev. Manasseh Cutler, F.A.A. 162
15. On the Extraction of Roots, in a Letter to Mr. Caleb Gannett, Rec. Sec. F.A.A., by Benjamin West, Esq. F.A.A. 165
16. A new and concise Method of computing Interest at Six per Cent. per Annum, by Philomath 173
17. Several ways of determining what sum is to be insured on an Adventure, that the whole Interest may be covered, by Mercator 183

Memoirs of the American Academy of Arts and Sciences—*Continued.*

VOL. I. PART 2.

ARTICLE
1. Observations upon an Hypothesis for solving the Phenomena of Light: with incidental Observations, tending to show the Heterogeneousness of Light, and of the Electric Fluid, by their Intermixture, or Union, with each other, by James Bowdoin, Esq. 187
2. Observations on Light, and the Waste of Matter in the Sun and fixed Stars, occasioned by the constant Efflux of Light from them; with a Conjecture, proposed by way of query, and suggesting a mean, by which their several Systems might be preserved from the Disorder and final Ruin, to which they seem liable by that waste of Matter, and by the Law of Gravitation, by J. Bowdoin 195
3. Observations tending to prove, by Phænomena and Scripture, the Existence of an Orb, which surrounds the whole visible material system, and which may be necessary to preserve it from the ruin, to which, without such a counterbalance, it seems liable by that universal principle in matter, Gravitation, by J. Bowdoin. 208
4. An Account of a very uncommon Darkness in the States of New England, May 19, 1780, by Samuel Williams, A.M., Holles Professor of Mathematics and Philosophy in the University of Cambridge 234
5. An Account of the Effects of Lightning on two Houses, in the city of Philadelphia, in a Letter from the Hon. Arthur Lee, Esq., F.A.A, to the Hon. James Bowdoin, LL D. Prof. A.A. 247
6. An Account of the Effects of Lightning on a large Rock in Gloucester, in a Letter from the Rev. Eli Forbes, to the Rev. Manasseh Cutler, F.A.A. . . . 253
7. An Account of a very curious Appearance of the Electrical Fluid, produced by raising an Electrical Kite in the time of a Thunder-shower, in a Letter from Loammi Baldwin, Esq., F.A.A., to the Rev. Joseph Willard, President of the University of Cambridge, and V.-Pres. A.A. 257
8. Observations and Conjectures on the Earthquakes of New England, by Professor Williams, F.A.A. 260
9. An Account of West River Mountain, and the Appearance of there having been a Volcano in it, in a letter from Daniel Jones, Esq., of Hindsdale, to the Rev. Joseph Willard, President of the University at Cambridge . . . 312
10. An Account of Eruptions, and the present appearances, in West River Mountain, in a Letter from Mr. Caleb Alexander, of Northfield, to Mr. Caleb Gannett, Rec. Sec., A.A. 316
11. Observations made at Beverly, lat. 42° 36′ N., long. 70° 45′ W., to determine the Variation of the Magnetical Needle, by Rev. Joseph Willard, President of the University of Cambridge, V.-Pres. A.A. 318
12. Magnetical Observations made at Cambridge, by Stephen Sewall, F.A.A., Hancock Professor of the Oriental Languages in the University . . . 322
13. An Historical Register of the Aurora Borealis, from August 8th, 1781, to August 19th, 1783, by Caleb Gannett, A.M., Rec. Sec. A.A. 327
14. A Comparative View of Thermometrical and Barometrical Observations at Cambridge, by Rev. Edward Wigglesworth, S. T. P. Holles, F.A.A. . . . 334
15. Meteorological Observations at Ipswich, in 1781, 1782, and 1783, lat. 42° 38′ 30″ N., long. 70° 45′ W., by Rev. Manasseh Cutler, F.A.A. and M.S., and Member of the Philosophical Society at Philadelphia 336
16. An Account of several Strata of Earth and Shells on the Banks of York River, in Virginia; of a Subterraneous Passage, and the sudden Descent of a very large Current of Water from a Mountain near Carlisle; of a remarkably large Spring near Reading, in Pennsylvania; and also of several remarkable Springs in the States of Pennsylvania and Virginia, in a Letter from the Hon. Benjamin Lincoln, Esq., F.A.A., to the Rev. Joseph Willard, V.-Pres. A.A., and President of the University of Cambridge 372
17. An Account of large quantities of a Fossil Substance, containing Vitriol and Sulphur, found at Lebanon, in the State of New Hampshire, accompanying a Specimen, in a Letter from the Rev. Jeremy Belknap, F.A.A., and Member of the Philosophical Society at Philadelphia, to Samuel Williams, LL.D., F.A.A., and Holles Professor of Mathematics and Philosophy in the University at Cambridge 377
18. An Account of Yellow and Red Pigment, found at Norton, with the Process for preparing the Yellow for use; accompanied with Specimens, in a Letter from the Rev. Samuel Deane, F.A.A., to Mr. Caleb Gannett, Rec. Sec. A.A. . 378
19. An Account of an Oil-Stone found at Salisbury, in a Letter from the Rev. Samuel Webster, to Mr. Caleb Gannett, Rec. Sec. A.A. 380
20. Observations on the Culture of Smyrna Wheat, in a Letter from Benjamin Gale, F.A.A., Member of the Philosophical Society at Philadelphia, and Fellow of the Royal Society of London, to his Excellency James Bowdoin 381

Memoirs of the American Academy of Arts and Sciences—*Continued.*

ARTICLE
21. An Account of an Experiment for raising Indian Corn in poor Land, in a letter from Joseph Greenleaf, Esq., to the Rev. John Clark, F.A.A. . . . 383
22. An Account of a singular Apple-Tree, producing fruit of opposite qualities: a part of the same apple being frequently sour, and the other sweet, in a letter from the Rev. Peter Whitney to the Rev. Joseph Willard, V.-Pres. A.A., and President of the University in Cambridge 386
23. A Letter from the Hon. Benjamin Lincoln, Esq., F.A.A., to the Hon. James Warren, Esq., F.A.A., relating to the ingrafting of Fruit-Trees, and the growth of Vegetables; enclosing the Observations of his Friend on the Growth of Trees downward, after the first year 388
24. An Account of some of the Vegetable Productions naturally growing in this part of America, botanically arranged, by the Rev. Manasseh Cutler, F.A.A. M.S., and Member of the Philosophical Society at Philadelphia . . . 396
25. A Letter on the Retreat of House-Swallows in Winter, from the Hon. Samuel Dexter, Esq., to the Hon. James Bowdoin, Esq., Pres. A.A. . . . 494
26. An Account of an Air-Pump on a new construction: with some Observations on the common Air-Pump, and Mr. Smeaton's Improvement, in a Letter from the Rev. John Prince to the Rev. Joseph Willard, President of the University of Cambridge 497
27. A description of a Pump-Engine, or an Apparatus to be added to the common Pump, to answer the purpose of a Fire-engine, invented by Mr. Benjamin Dearborn, extracted from his Letters to the Hon. James Bowdoin, Esq., President, communicated by the President 520
28. A Description of a Fire-Engine of a new construction, by the same, extracted from a Letter to the same 523
29. Observations upon the Art of making Steel, by the Rev. Daniel Little, F.A.A. 525

VOL. I. PART 3.

1. An Account of the Horn Distemper in Cattle, with Observations on that Disease, by the Hon. Cotton Tufts, M.D., F.A.A., and M.S., in a Letter to the Rev. Joseph Willard, Cor. Sec. A.A. 529
2. Case of a remarkably large Tumour, found in the cavity of the Abdomen, by Joshua Fisher, F.A.A. and M.S. 537
3. Remarks on the Effects of Stagnant Air, by Ebenezer Beardsley, Surgeon of the 22nd Regiment of the American Army, in the campaign of 1776 . . 542
4. A remarkable case of Gun-shot wound, communicated in a Letter from Barnabas Binney, Hospital Physician and Surgeon in the American Army in 1782, to the Hon. Benjamin Lincoln, Esq., F.A.A. 544
5. A Bill of Mortality for the Town of Salem, for the years 1782 and 1783, by Edward Augustus Holyoke, M.D., F.A.A., and M.S., in a Letter to Mr. Caleb Gannett, Rec. Sec. F.A.A. 546
6. A History of a large Tumour, in the region of the Abdomen, containing hair, by John Warren, Esq., F.A.A. and M.S., and Professor of Anatomy and Surgery in the University of Cambridge 551
7. Experiments on the Waters of Boston, by J. Feron, late Surgeon-Major of his Most Christian Majesty's Squadron, under M. de Ternay's command, in North America, and of His Majesty's Marine Hospitals at Boston and in Rhode Island, F.M.S. 556
8. Observations on the Longevity of the Inhabitants of Ipswich and Hingham, and Proposals for ascertaining the Value of Estates held for Life, and the Reversion of them, in a Letter from the Rev. Edward Wigglesworth, F.A.A., and Hollesian Professor of Divinity in the University of Cambridge, to the Hon. James Bowdoin, Esq., Pres. A.A. 565

VOL. II. PART 1.

An Eulogy on the Hon. James Bowdoin, Esq., LL.D., late President of the American Academy of Arts and Sciences; who died at Boston, November 6, A. D. 1790. Delivered before the Society, January 26, 1791, by John Lowell, one of the Councillors of the Academy.
1. Geometrical Methods of finding any required series of Mean Proportionals between given extremes, by James Winthrop, Esq., F.A.A. 9
2. A Rule for trisecting Angles geometrically, by James Winthrop, Esq., F.A.A. 14
3. Rules for resolving two cases in Oblique Spherical Trigonometry, by William Croswell, A.M., Teacher of Navigation 18
4. Observations of an Annular Eclipse of the Sun at Cambridge, April 3, 1791, by Samuel Webber, A.M., F.A.A. Holles Professor of Mathematics and Philosophy in the University of Cambridge 20
5. Observations of the Transit of Mercury over the Sun's Disc, November 5, 1789,

Memoirs of the American Academy of Arts and Sciences—*Continued.*

ARTICLE
4. Application of Napier's rule for solving the cases of right-angled spheric Trigonometry to several cases of oblique-angled spheric Trigonometry, by Nathaniel Bowditch, A.M., F.A.A. 33
5. Two Tables of the Varieties in the first and second cases of Oblique Spherics, enclosed in a Letter to the Hon. John Davis, Esq., Recording Secretary of the American Academy of Arts and Sciences, by William Croswell, A.M. . 38
6. Remarks on the Construction of the Common Scale-beam, with a description of the new Gold Standard-beam, invented by the author, Benjamin Dearborn, F.A.A. 40
7. A Proposal for adjusting a new scale to the Mercurial Thermometer, enclosed in a Letter to the late Rev. President Willard, dated August, 1789, by Ed. A. Holyoke, M.D., F.A.A. 51
8. An Account of the Springs and Wells on the Peninsula of Boston, with an attempt to explain the manner in which they are supplied, in a Letter to the Hon. John Davis, Esq., Recording Secretary of the American Academy of Arts and Sciences, by John Lathrop, D.D., F.A.A. 57
9. On the Origin and Formation of Ice Islands, and their dangerous effects in Navigation, pointing out a certain and easy method of timely forewarning seamen of their approach, even in the darkest night, by A. Fothergill, M.D., F.R.S., A.P.S., &c. 69
10. Effects of Lightning on several Persons in the House of Samuel Cary, Esq., of Chelsea, August 2nd, 1799, in a Letter to the Hon. John Davis, Esq., Recording Secretary of the American Academy of Arts and Sciences, by John Lathrop, D.D., F.A.A. 82
11. Effects of Lightning on the House of Captain Daniel Merry, and several other Houses in the vicinity, on the evening of the 11th of May, 1805, in a Letter to the Hon. John Davis, Esq., Recording Secretary of the American Academy of Arts and Sciences, by John Lathrop, D.D., F.A.A. 86
12. Effects of Lightning on the House of the Rev. Silas Moody, of Arundel in Maine, August 17, 1807, in a Letter to the Rev. Dr. Eliot, by the Rev. Silas Moody, A.M. 92
13. Effects of Lightning on the House of Captain Thomas Manning, in Portsmouth, New Hampshire, in a Letter to the Rev. Dr. Eliot, by the Rev. Timothy Alden, jun., A.M., S.H.S. 93
14. Experiments respecting Dew, intended to ascertain whether Dew is the descent of Vapour during the night, or the Perspiration of the Earth or of Plants, or whether it is not the effect of Condensation, by Noah Webster, Esq., F.A.A. 95
15. Account of Rain, &c., that fell in Charlestown, Massachusetts, in ten years, by Joseph Barrell, Esq. 104
16. Account of Meteorological Observations made in Georgia and South Carolina, by Abiel Holmes, D.D., F.A.A. 107

VOL. III. PART 2.—1815.

17. Meteorological Observations at Grove Plantation, five miles south of Natchez, by Winthrop Sargent, Esq. 113
18. Abstract of Meteorological Observations made at Michillimakkinak, in the latitude of about 46° N., and longitude of about 84° 30′ W., from August 1802, to April 1803, both inclusive, by Josiah Dunham, Esq. 116
19. Meteorological Observations made at Bowdoin College, in a Letter to Mr. Levi Hedge, F.A.A., Tutor in Harvard College, by Parker Cleaveland, A.M., Professor of Mathematics and Natural Philosophy 119
20. The Quantity of Water (including the snow reduced to water) which fell in Stow, from 1792 to 1804, according to the observations of the Rev. Jonathan Newel, A.M. 122
21. A curious Phenomenon of Vision, in a Letter to ———, by the Rev. Peres Fobes, LL.D., F.A.A. 123
22. Hard Water softened by Farinaceous Soap, with the Process for making the same, by the Rev. Daniel Little, F.A.A. 125
23. Mineralogical Observations made in the Environs of Boston, in the years 1807 and 1808, enclosed in a Letter to the Hon. John Davis, Esq., and by him communicated, by S. Godon, F.A.A. 127
24. Account of Fossil Shells, with the Author's reasons for attending to the same, in a Letter to Levi Hedge, F.A.A., by Parker Cleaveland, A.M., Professor of Mathematics and Natural Philosophy in Bowdoin College . . 155
25. Account of Pawpaw, or Cowry Shells, found in Dorchester, by Thaddeus Mason Harris, A.M., F.A.A. 159
26. Observations on a Singular Natural Production, in which one part appears to be

Memoirs of the American Academy of Arts and Sciences—*Continued.*

ARTICLE
a plant and the other an insect, accompanied with a Specimen, by the Rev. Manasseh Cutler, LL.D., F.A.A. 161
27. Account of the Writings on Dighton Rock, in a Letter to the Hon. John Davis, Esq., Recording Secretary of the American Academy of Arts and Sciences, by Mr. E. A. Kendal 165
28. Account of a Stone Bust, supposed to be an Indian god, by Ezra Stiles, D.D., LL.D., late President of Yale College 192
29. Account of Copper Coins found in Medford, Massachusetts, in a Letter to the Hon. John Quincy Adams, Esq., Corresponding Secretary of the American Academy of Arts and Sciences, by the Rev. Thaddeus Mason Harris, A.M., F.A.A. . 195
30. An Attempt to explain the Inscription on Dighton Rock, in a Letter to the Rev. Samuel Webber, D.D., by the Hon. John Davis, Esq., LL.D., F.A.A. . 197
31. Animadversion on the dangerous practice of Sleeping on the Damp Ground, and of Exposure to the Night Air, particularly where the animal powers are diminished, illustrated on philosophical principles, enclosed with a Letter to Aaron Dexter, M.D., F.A.A., by A. Fothergill, M.D., F.R.S., &c. 206
32. An Estimate of the Height, Direction, Velocity, and Magnitude of the Meteor that exploded over Weston, in Connecticut, December 14th, 1807, by N. Bowditch 213
33. An Analysis of Sulphate of Barytes, from Hatfield, Massachusetts, by John Gonham, M.D. 237
34. An Investigation of the Apparent Motion of the Earth, viewed from the Moon, arising from the Moon's Librations, by James Dean, Professor of Mathematics and Natural Philosophy in the University of Vermont 241
35. Observations of the Eclipse of the Sun of September 17th, 1811, made at Portland, by the Rev. Ichabod Nichols 246
36. Observations of the Eclipse of the Sun of September 17th, 1811, made at Bowdoin College, Brunswick, by Parker Cleaveland, Professor of Mathematics and Natural Philosophy 247
37. Observations of the Eclipse of the Sun of September 17th, 1811, made at Burlington, Vermont, by Professor Deane 249
38. Observations of the Solar Eclipse of September 17th, 1811, made at Nantucket, by the Hon. Walter Folger, jun. 252
39. On the Eclipse of the Sun of September 17th, 1811, with the Longitudes of several places in this country, deduced from Observations of the Eclipses of the Sun, and Transits of Mercury and Venus, that have been published in the Transactions of the Royal Societies of Paris and London, the Philosophical Society held at Philadelphia, and the American Academy of Arts and Sciences, by Nathaniel Bowditch 255
40. Astronomical Observations made near the centre of the Village of Deerfield, Massachusetts, by Epaphras Hoyt, Esq. 305
41. Observations of the Comet of 1811, by John Farrar, Professor of Mathematics and Natural Philosophy in Harvard College 308
42. Elements of the Orbit of the Comet of 1811, by Nathaniel Bowditch . 313
43. An Estimate of the Height of the White Hills in New Hampshire, by Nathaniel Bowditch 326
44. A Method of displaying at one view all the Annual Cycles of the Equation of Time in a complete revolution of the Sun's Apogee, by Professor Deane . 329
45. An Account of some Electrical Phenomena, by the Rev. Timothy Alden . 333
46. An Account of a singular property of Lamprey Eels, by Joseph Tilden, Esq. 335
47. On the Variation of the Magnetic Needle, by Nathaniel Bowditch . 337
48. A Description of a Cometarium, by Professor Dean 344
49. An Account of an Earthquake in New England, by the Hon. Samuel Tenney 346
50. An Account of several Shocks of an Earthquake in the Southern and Western Parts of the United States, by his Excellency W. Sargent, Esq. An Abstract of Meteorological Observations made at Cambridge, N. E., by Professor Farrar 361
51. An Abstract of Meteorological Observations made at Andover, Massachusetts, by Professor Farrar 399
52. On the Motion of a Pendulum suspended from two points, by N. Bowditch . 413
53. A Demonstration of the Rule for finding the Place of a Meteor, in the second problem, page 218 of this Volume, by Nathaniel Bowditch . . . 437
54. A Memoir of the Present State of the English Language in the United States of America, with Vocabulary, containing various words and phrases which have been supposed to be peculiar to this country, by John Pickering, Esq. . 439

VOL. IV. PART 1.—1818.

Some Accounts of the Life and Writings of Benjamin Count Rumford, by Jacob Bigelow, M.D., Rumford Professor in Harvard University.

Memoirs of the American Academy of Arts and Sciences—*Continued.*

ARTICLES

1. A New Investigation of Kepler's Problem, by F. T. Schubert . . . 1
2. On a Mistake which exists in the Solar Tables of Mayer, La Lande, and Zach, by Nathaniel Bowditch, LL.D. 28
3. On the Calculation of the Oblateness of the Earth, by means of the observed lengths of a pendulum in different latitudes, according to the method given by La Place, in the second volume of his "Mécanique Céleste," with Remarks on other parts of the same work, relating to the Figure of the Earth, by Nathaniel Bowditch 30
4. Method of correcting the Apparent Distance of the Moon from the Sun, or a Star, for the effects of Parallax and Refraction, by Nathaniel Bowditch, LL.D. . 50
5. On the Method of Computing the dip of the Magnetic Needle in different Latitudes, according to the Theroy of M. Biot, by Nathaniel Bowditch, LL.D. . 57
6. Remarks on the Methods of Correcting the Elements of the Orbit of a Comet, in Newton's "Principia," and in La Place's "Mécanique Céleste," by Nathaniel Bowditch, LL.D. 62
7. Remarks on the usual Demonstration of the Permanency of the Solar System, with respect to the Eccentricities and Inclinations of the Orbits of the Planets, by Nathaniel Bowditch, LL.D. 74
8. Facts serving to show the Comparative Forwardness of the Spring Season in the different parts of the United States, by Jacob Bigelow, M.D., Rumford Professor in Harvard University 77
9. Some Observations on the Sea Serpent, by William D. Peck, A.M., F.A.A., Professor of Natural History in Harvard University . . . 86
10. An Account of the violent and destructive Storm of the 23rd of September, 1815, by John Farrar, Professor of Mathematics and Natural Philosophy in Harvard University 92
11. An Account of a singular Electrical Phenomenon observed during a snow-storm, accompanied with thunder, by John Farrar, Professor of Mathematics and Natural Philosophy in Harvard University 98
12. Observations Carpologicæ in Kamelliam et Theam, a W. D. Peck, A.M., A.A., Soc. Hist. et Agric. Mass. Socio., Hist. Nat. Professor . . 103
13. Remarks on Doctor Stewart's Formula for Computing the Motion of the Moon's Apsides, as given in the Supplement to the Encyclopædia Britannica, by Nathaniel Bowditch, LL.D. 110
14. Description of several Halos and Parhelia, observed at Brunswick, Maine, by Parker Cleaveland, Professor of Mathematics and Natural Philosophy in Bowdoin College 120
15. Outlines of the Mineralogy and Geology of Boston and its vicinity, with a Geological Map, by J. F. Dana, M.D., and S. L. Dana, M.D. . . 129
16. On the Pronunciation of the Greek Language, by John Pickering, A.A.S. . 225
17. On the Meteor which passed over Wilmington, in the State of Delaware, November 21st, 1819, by Nathaniel Bowditch, LL.D. 295
18. Occultation of Spica by the Moon, observed at Salem, by Nathaniel Bowditch 306
19. On a Mistake which exists in the calculation of M. Poisson, relative to the distribution of the Electrical Matter upon the surfaces of Two Globes, in volume xii. of the "Mémoires de la Classe des Sciences Mathématiques et Physiques de l'Institute Impérial de France," by Nathaniel Bowditch, LL.D. . . 307
20. On the Orbit of the Comet of 1811, by Alexander M. Fisher, A.M., Professor of Mathematics and Natural Philosophy in Yale College, communicated in a Letter to the Hon. Nathaniel Bowditch 309
21. Elements of the Comet of 1819, by Nathaniel Bowditch, LL.D. . . 317
22. On the adoption of a Uniform Orthography for the Indian Languages of North America, by John Pickering, A.A.S. 319

APPENDIX.

Account of Father Rale's Indian Dictionary.
23. Observations made with Fahrenheit's Thermometer, at Salem, Massachusetts, from the year 1793 to the year 1818, both inclusive, being the last 26 years of a period of 33 years' Observations, the First Series of Seven Years of which was published in the Memoirs of the American Academy, in the year 1793, by Edward Augustus Holyoke, M.D., President of the American Academy of Arts and Sciences 361
24. Results of Meteorological Observations made at Williamstown, Massachusetts, by Chester Dewey, Professor of Mathematics and Natural Philosophy in William College 387
25. On the Extraordinary Darkness that was observed in some parts of the United States and Canada, in the month of November, 1819, by Frederick Hall, Professor of Mathematics and Natural Philosophy in Middlebury College, Vermont 393
26. On an Inscription from the Columbarium of the Freedmen and Slaves of Livia

NEW SERIES, VOL. I.—1833.

A Discourse in commemoration of John Adams and Thomas Jefferson; delivered before the American Academy of Arts and Sciences, October 30, 1826, by John Thornton, Kirkland, Vice-President of the Academy . . . iii
1. Remarks on Longevity and the Expectation of Life in the United States, relating more particularly to the State of New Hampshire, with some Comparative Views in relation to foreign countries, by J. E. Worcester, A.A.S. . . 1
2. A Table of the Longitude and Altitude of the Nonagesimal Degree in 42° 23′ 28″ of North Latitude (the Ellipticity of the Earth being assumed to be one three-hundredth, and the Obliquity of the Ecliptic 23° 27′ 40″), for every minute of the Right Ascension of the Meridian, with the Corrections of the Table for a Decrease of 100″ in the Obliquity, and of 1000″ in the Geographical Latitude, by Robert T. Paine, A.A.S. 45
3. On the Latitude of Boston, by Robert T. Paine, A.A.S. . . . 70
4. Tables of the Present Value of a Life-Annuity at any Age, according to Dr. Wigglesworth's Bill of Mortality, by J. Ingersoll Bowditch . . 73
5. Occultations and Eclipses observed at Dorchester, Massachusetts, by W. Cranch Bond 79
6. Observations on the Comparative Rates of Marine Chronometers, by W. Cranch Bond 84
7. Remarks and Inquiries concerning the Birds of Massachusetts, by Thomas Nuttall, A.A.S. 91
8. A Meteorological Journal from the year 1786 to the year 1829, inclusive, by Edward A. Holyoke, M.D., A.A.S. With a Prefatory Memoir, by Enoch Hale, M.D., A.A.S. 107
9. Remarks on the Mineralogy and Geology of Nova Scotia, by Charles T. Jackson and Francis Alger 217
10. Table showing the Present Value of the Right of Dower of a Married Woman in any Real Estate, provided she survives her Husband, by J. I. Bowditch . 331
11. Description of a new Stand for a Reflecting Telescope, by the Rev. John Prince, LL.D., A.A.S. 334
12. Latitudes and Longitudes of Several Places in the United States, as determined by Observation, by Robert T. Paine, A.A.S. 338
13. Tables exhibiting the Number of White Persons in the United States, at every Age, deduced from the last Census, by J. Ingersoll Bowditch . . 345
14. Description of a Machine called a Gypsy, for Spinning Hemp and Flax, by Daniel Treadwell, A.A.S. 348
15. A Dictionary of the Abnaki Language, in North America, by Father Sebastian Rasles; with an Introductory Memoir and Notes, by John Pickering, A.A.S. 370
Statutes of the Academy 575
Fellows of the Academy 583
Officers for the year 1833 594

VOL. II.—1846.

1. An Account of the Magnetic Observations made at the Observatory of Harvard University, Cambridge, by Joseph Lovering, A.A.S., and W. Cranch Bond, A.M. Communicated by Joseph Lovering, A.A.S. 1
2. An Account of the Magnetic Observations made at the Observatory of Harvard University, Cambridge. Communicated by Joseph Lovering, A.A.S. . 85
3. On the Practice of Circummeridian Altitudes at Sea or on Shore, by Captain W. F. W. Owen, R.N., A.A.S. 161
4. The Latitude of the Cambridge Observatory, in Massachusetts, determined from Transits of Stars over the Prime Vertical, observed during the months of December, 1844, and January, 1845, by William C. Bond, A.A.S., Major James D. Graham, A.A.S., and George P. Bond, by Benjamin Peirce, A.A.S. . 183
5. On the Language and Inhabitants of Lord North's Island in the Indian Archipelago; with a Vocabulary, by John Pickering, President of the Academy 205
6. A Vocabulary of the Soahili Language, on the Eastern Coast of Africa, by Samuel K. Masury. Communicated by Charles Pickering, M.D., A.A.S. . . 248
7. A Synopsis of the Fishes of North America, by David Humphreys Storer, M.D., A.A.S. 253
Fellows of the Academy 551
Officers of the Academy for 1845-6 562
Statutes of the Academy 563

Memoirs of the American Academy of Arts and Sciences—*Continued.*

ARTICLE

NEW SERIES, VOL. III.—December, 1848.

Eulogy on Hon. John Pickering, LL.D., President of the Academy, by Daniel Appleton White i

1. Chloris Boreali-Americana: Illustrations of New, Rare, or otherwise Interesting North American Plants, selected chiefly from those recently brought into Cultivation at the Botanic Garden of Harvard University, Cambridge, by Asa Gray, M.D. Decade I. With ten Plates 1
2. Contributions to the Bryology and Hepaticology of North America, by W. S. Sullivant, A.M. Part I. With five Plates 57
3. Occultations and Eclipses observed at Dorchester and Cambridge, Massachusetts, by W. Cranch Bond, Director of the Observatory, W. C. Bond, jun., and George P. Bond 67
4. An Account of the Nebula in Andromeda, by George P. Bond, Assistant at the Cambridge Observatory. With one Plate
5. Description of the Nebula about the Star θ Orionis, by W. Cranch Bond, Director of the Cambridge Observatory. With one Plate 87
6. Some Methods of Computing the Ratio of the Distances of a Comet from the Earth, by George P. Bond, Assistant at the Cambridge Observatory . 97
7. An Attempt to discriminate and describe the Animals that made the Fossil Footmarks of the United States, and especially of New England, by Edward Hitchcock, LL.D., President of Amherst College, &c. With twenty-four Plates . 129
8. On Platygonus compressus: a new Fossil Pachyderm, by John L. Le Conte, M.D. With four Plates 257

APPENDIX.

9. Report on the Discovery and Nomenclature of the Eighth Satellite of Saturn, by Edward Everett, LL.D. 275

VOL. IV. PART 1.—1849.

1. Plantæ Fendlerianæ Novi-Mexicanæ: an Account of a Collection of Plants made chiefly in the Vicinity of Santa Fé, New Mexico, by Augustus Fendler; with Descriptions of the New Species, &c., by Asa Gray, M.D. . . . 1
2. Upon the Geological Action of the Tidal and other Currents of the Ocean, by Charles Henry Davis, A.M., U.S.N. With three Plates . . . 117
3. History and Transformations of Corydalus cornutus, by S. S. Haldeman, A.M. With a Plate 157
4. Internal Anatomy of Corydalus cornutus, in its Three Stages of Existence, by Joseph Leidy, M.D. With two Plates 162
5. Contributions to the Bryology and Hepaticology of North America, by William S. Sullivant, A.M. Part II. With five Plates 169
6. Description of the Observatory at Cambridge, Massachusetts, by William Cranch Bond, A.M. With six Plates 177
7. On some Applications of the Method of Mechanical Quadratures, by George P. Bond 189
8. Illustrations of Fossil Footprints of the Valley of the Connecticut, by James Deane, M.D. With nine Plates 209

PART II.—1850.

1. Contributions to the Natural History of the Acalephæ of North America, by Louis Agassiz. Part I. On the Naked-eyed Medusæ of the Shores of Massachusetts, in their Perfect State of Development. With eight Plates . . . 221
2. Contributions to the Natural History of the Acalephæ of North America, by Louis Agassiz. Part II. On the Beroid Medusæ of the Shores of Massachusetts, in their Perfect State of Development. With eight Plates . . 313

APPENDIX.

Fellows of the American Academy of Arts and Sciences . . . 377
Statutes of the American Academy of Arts and Sciences . . . 384

VOL. V. PART 1.—1853.

1. Astronomical, Magnetical, and Meteorological Observations, made at Panama, New Grenada, by W. H. Emory 1
2. Plan of an Ancient Fortification at Marietta, Ohio, by Winthrop Sargent. With a Plate 25
3. Researches upon the Origin, Mode of Development, and Nature of the Spermatic Particles among the Four Classes of Vertebrated Animals, by Waldo J. Burnett, M.D. With a Plate 29
4. A History of the Fishes of Massachusetts, by David Humphreys Storer, M.D., A.A.S. With eight Plates 49

Memoirs of the American Academy of Arts and Sciences—*Continued.*

5. A Scientific Account of the Inner Harbour of Boston, with a Synopsis of the General Principles to be observed in the Improvement of Tidal Harbours, by Charles Henry Davis, A.M., A.A.S., M.A.P.S., &c. 93
6. Observations on a New Ring of the Planet Saturn, by W. C. Bond. With a Plate 111
7. On the Rings of Saturn, by G. P. Bond 113
8. A History of the Fishes of Massachusetts, Part 2, by David Humphreys Storer, M.D., A.A.S. With eight Plates 122
9. The Tornado of August 22nd, 1851, in Waltham, West Cambridge, and Medford, Middlesex County, Massachusetts, by Henry L. Eustis, A.M. With a Map. 169

PART 2.—1855.

13. Caroli a Linné ad Bernardum de Jussieu ineditæ, et mutuæ Bernardi ad Linnæum Epistolæ; curante Adriano de Jussieu 179
11. The Numerical Relation between the Atomic Weights, with some Thoughts on the Classification of the Chemical Elements, by Josiah P. Cooke, jun., A.M. 235
12. A History of the Fishes of Massachusetts, by David Humphreys Storer, M.D., A.A.S. With seven Plates, continued 257
13. Plantæ Novæ Thurberianæ: the Characters of some New Genera and Species of Plants, in a Collection made by George Thurber, Esq., of the late Mexican Boundary Commission, chiefly in New Mexico and Sonora, by A. Gray, M.D. 297
14. On the Affinities of the Genus Vavæa, Benth.; also of Rhytidandra, Gray. By Asa Gray, M.D. 329
15. On Two New Crystalline Compounds of Zinc and Antimony; and on the Cause of the Variation of Composition observed in their Crystals, by Josiah P. Cooke, jun., A.M. With a Plate 337
16. Discussion of Observations for the Isodynamic, Isogonic, and Isoclinal Curves of Terrestrial Magnetism, on and near the Line of the Boundary Survey between the United States and Mexico, made in 1849, 1850, 1851, and 1852, under the orders of W. H. Emory, and combined with Observations at San Francisco (California), and Dollar Point (East Base), and Jupiter (Texas), furnished by A. D. Bache. With a Map 372
17. Descriptions of New Species of Fossils, from the Cretaceous Formations of Nebraska, with Observations upon Baculites Ovatus and B. compressus, and the Progressive Development of the Septa in Baculites, Ammonites, and Scaphites, by James Hall and F. B. Meek. With eight Plates 379

Statutes and Standing Votes of the American Academy of Arts and Sciences i
Fellows of the American Academy of Arts and Sciences ix

National Calendar (The), for 1820 to 1824, and 1828 to 1836. 14 vols. 8vo. Washington, 1820—1836.

From 1825 to 1827 no Volumes were published.

National Institution for the Promotion of Science. 8vo. Washington.

Constitution and Bye-Laws of the National Institution for the Promotion of Science, established at Washington, May, 1840. 8vo, pp. 14. Washington, 1840.

Constitution of the National Institution for the Promotion of Science, established at Washington, May, 1840. Amended and ordered to be printed, April, 1841. 8vo, pp. 19. Washington, 1841.

Constitution and Bye-Laws of the National Institute for the Promotion of Science, printed by order of the Institute. 8vo, pp. 18. Washington, 1849.

Bulletin of the Proceedings of the National Institution for the Promotion of Science, established at Washington in 1840. 8vo, pp. i.—66. Washington, 1841.

Communications printed in the Bulletin: Duponceau, P. S.: On the Institution, its Organization, Bulletin, &c., p. 11.—Weld, J.: Account of the Establishment of the Royal Dublin Society, p. 14.—Maury, M. F.: Importance of Exploring the Bottom of the Sea, p. 17.—Poinsett, J. R.: On the Objects and Importance of the National Institution, p. 19.—Hughes, G. W.: Meeting of the British Association in 1840, and Trip to the Isle of Arran, p. 33.—Idem: Geological and Mining Observations made during a Tour in England and Wales, 49.

Second Bulletin of the Proceedings of the National Institution for the Promotion of Science, Washington, D. C., March, 1841, to February, 1842. With 5 lithographic Plates. 8vo, pp. 67—220. Washington, 1842.

Communications. Read, G.: On the Motril Cotton cultivated in Granada, Spain,

Proceedings of the American Academy of Arts and Sciences, 1846—1855, Vols. I. to III. 8vo. Boston, 1847—1855.

Proceedings of the American Philosophical Society, 1838—1853. Vols. I. to V. 8vo. Philadelphia, 1840—1854. price per volume 7s. 6d.

Reports of Explorations and Surveys, to ascertain the most practicable and economical Route for a Railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War, in 1853-4, according to Acts of Congress of March 3, 1853, May 31, 1854, and August 5, 1854. Vols. I. and II. 4to. Washington, 1855, 1856. £4 4s.

CONTENTS OF VOL. I.

Report of the Secretary of War.—Examination of the Reports of the several Routes explored.—Railway Memoranda.—Letter of Major General Thomas S. Jesup.—Report of Governor J. J. Stevens.

CONTENTS OF VOL. II.

Report of Explorations for a Route for the Pacific Railroad, near the 38th and 39th Parallels of North Latitude, from the mouth of the Kansas River, Mo., to the Sevier Lake, in the Great Basin, by Lieut. E. G. Beckwith.—Report of Explorations for a Route for the Pacific Railroad, of the line of the 41st Parallel of North Latitude, by the same.—Geological Report of the country explored under the 38th and 41st Parallel of North Latitude in 1853-4, by James Schiel, M.D., Geologist for the expeditions.—Letter from Professor J. W. Bailey, upon infusorial fossils submitted to him by Dr. Schiel.—Report on the Botany of the Expedition, by John Torrey and Asa Gray. Route under the 41st Parallel of North Latitude, and route under the 38th and 39th Parallel of North Latitude.—Synopsis of a Report of Reconnoissance of a Railroad Route from Puget Sound, via South Pass, to the Mississippi River, by Fred. W. Lander.—Methods pursued in determining the data upon which are based the Maps and Reports of the Survey.—Report on the Botany of the Expedition, by John Torrey and Asa Gray. Route near the 32nd Parallel of North Latitude.—Report on the Geology of the Route, near the 32nd Parallel, by William C. Blake.—Extract from Report of a Military Reconnoissance, made in 1846 and 1847, by Lieut.-Col. W. H. Emory. Route near the 32nd Parallel of North Latitude.

Silliman.—The American Journal of Science and Arts, 1818—1837, conducted by Benjamin Silliman, M.D., LL.D., from 1838—1845, conducted

Silliman.—The American Journal of Science and Arts—*Continued.*

by Professor Silliman and Benjamin Silliman, jun. 100 numbers, published quarterly, forming 49 volumes; Volume L. being the index to the whole series. New York, 1818 to 1819. New Haven, 1820 to 1845. Ditto New Series, conducted by Professor Silliman, B. Silliman, jun., and James D. Dana, 1846 to 1856, 66 numbers, forming 22 volumes, published bi-monthly; No. 30 containing the index for Volumes I. to X., and No. 60 for Volumes XI. to XX. New Haven, 1846—1856. And continued in connection with Professor Asa Gray, Cambridge, Mass., Professor Louis Agassiz, Cambridge, Mass., and Dr. Walcot Gibbs of New York; published bi-monthly, at 5s. per part.

The above periodical used to be published formerly every quarter; it appears now every two months, and we do not think it presumptuous to assert that it will soon, in its inevitable progress, become a monthly publication. It is indeed a work of self-denial and true patriotism, alike honourable to the country from whence it started into life, as to the gentlemen who undertook the task of publishing it. The United States possessed, 40 years ago, viz. 1817, but one strictly scientific periodical, namely, "The Journal of Mineralogy;" but on account of the ill-health of the editor, even that suddenly ceased to appear. Colonel Gibbs, meeting, some time after, Mr. Silliman, Professor of Chemistry, Mineralogy, and Geology, at Yale College, New Haven, observed to him that the honour of the country was compromised if Natural Philosophy were left without an organ in America. Professor Silliman was easily won; he set to work immediately, and having secured the assistance of several fellow-labourers, he published, in 1818, the first number of this Journal. Professor Silliman said, at starting, "I feel that this work will absorb my whole life;" and the experience of some thirty odd years has fully borne out his prediction. Innumerable obstacles combined to mar its success. After a year's duration, it had no more than 350 subscribers; and the expenses not being covered, the publisher threatened stopping it. Professor Silliman was compelled to enter his own securities for the money borrowed of some banker.

With the end of the 10th volume there was no other alternative left to Professor Silliman, but to stop the publication, or to take the whole burden of the undertaking upon his own shoulders. The expenditure having absorbed the income, it was evident that the work could not be continued unless a fresh loan were contracted. Professor Silliman, being convinced that his object could only be attained by unremitting efforts, did not falter, bought the whole stock of the Journal, and took upon himself both the scientific as well as the publishing responsibility of the work.

Since that period its visible progress proves its success; though we cannot help confessing, that notwithstanding the care with which it is conducted, and in spite of its great and well-merited fame, Science, not the editor, reaps the greatest benefit from it. Many years proved materially unsuccessful, and even now it scarcely covers its expenses. To do justice to Mr. Silliman and his son, whom he associated with the undertaking in 1838, we must observe that the result would have been quite the reverse, had he been actuated by feelings of self-interest.

Even now, whilst the engravings illustrating each Part of the Journal are masterpieces, Professor Silliman keeps up a very expensive system of exchanges of his Journal with the whole world; and there is no society, no library, no school, or college in the United States to which he would refuse sending it gratuitously.

These are facts which, for the honour of American Literature, cannot be too much extolled.

Smithsonian Institution, Washington, Publications of—

Smithsonian Contributions to Knowledge. Vol. I., 4to, pp. 346, with 48 Plates, and 207 Woodcuts. Containing—

Ancient Monuments of the Mississippi Valley; comprising the Results of extensive original Surveys and Explorations, by Messrs. Squier and Davis.

Smithsonian Contributions to Knowledge. Vol. II., 4to, pp. 464, and 24 Plates. 1851. Containing—

1. Researches relative to the Planet Neptune, by Sears C. Walker, Esq. pp. 65.
2. On the Vocal Sounds of Laura Bridgeman, the Blind-Deaf Mute, at Boston, compared with the Elements of Phonetic Language, by Dr. Francis Lieber. pp. 32, and 1 Plate.
3. Microscopical Examination of Soundings, made by the United States Coast Survey, off the Atlantic Coast of the United States, by Professor J. W. Bailey. pp. 16, and 1 Plate.
4. Contributions to the Physical Geography of the United States, by Charles Ellet, jun. pp. 64, and 1 Plate.

6. The Law of Deposit of the Flood-Tide; its Dynamical Action and Office, by Charles Henry Davis, Lieutenant of the United States Navy. pp. 14.
7. Description of Ancient Works in Ohio, by C. Whittlesey. pp. 20, and 7 Plates.
8. Occultations visible in the United States during the year 1852, computed by John Downes, Esq. pp. 34.
9. Ephemeris of Neptune for the year 1852, by Sears C. Walker, Esq. pp. 10.

Smithsonian Contributions to Knowledge. Vol. IV., 4to, pp. 416. 1852. cloth. Containing—

A Grammar and Dictionary of the Dakota Language, collected by the Members of the Dakota Mission, edited by the Rev. S. R. Riggs, A.M., Missionary of the American Board for Foreign Missions.

Smithsonian Contributions to Knowledge. Vol. V., 4to, pp. 538, and 45 Plates. 1853. Containing—

1. Introduction. pp. 16.
2. A Flora and Fauna within Living Animals, by Joseph Leidy, M.D. pp. 68, and 10 Plates.
3. Memoir on the Extinct Species of America Ox, by Joseph Leidy, M.D. pp. 20, and 5 Plates.
4. Anatomy of the Nervous System of Rana Pipiens, by Jeffries Wyman, D.D. pp. 52, and 2 Plates.
5. Nereis Boreali-Americana; or, Contributions to the History of the Marine Algæ of North America, by William Henry Harvey, M.D., M.R.I.A. Part II. Rhodospermeæ. pp. 262, and 24 Plates.
6. Plantæ Wrightianæ Texano-Neo Mexicanæ. Part II. An Account of a Collection of Plants, made by Charles Wright, A.M., in Western Texas, New Mexico, and Sonora, in the years 1851 and 1852, by Asa Gray, M.D. pp. 120, and 4 Plates.

Smithsonian Contributions to Knowledge. Vol. VI., 4to, pp. 476, and 53 Plates. 1854. Containing—

1. Introduction. pp. 16.
2. Plantæ Frémontianæ; or, Description of Plants collected in California, by Colonel J. C. Frémont, by John Torrey, F.L.S. pp. 24, and 10 Plates.
3. Observations on the Batis Maritima of Linnæus, by John Torrey, F.L.S. pp. 8, and 1 Plate.
4. On the Darlingtonia Californica, a new Pitcher Plant from Northern California, by John Torrey, F.L.S. pp. 8, and 1 Plate.
5. Synopsis of the Marine Invertebrata of Grand Manan, or the Region about the Bay of Fundy, by William Stimpson. pp 68, and 3 Plates.
6. On the Winds of the Northern Hemisphere, by James H. Coffin, Professor of Mathematics and Natural Phil. in Lafayette College. pp. 200, and 13 Plates.
7. The Ancient Fauna of Nebraska; or, a Description of Remains of Extinct Mammalia and Chelonia, from the Mauvaises Terres of Nebraska, by Joseph Leidy, M.D., Prof. of Anatomy in the University of Pennsylvania. pp. 126, and 25 Plates.
8. Occultations for 1853.

Smithsonian Institution, Washington, Publications of—*Continued.*

Smithsonian Contributions to Knowledge. Vol. VII., 4to, pp. 216, 73 Plates, and 2 Maps. Containing—

1. Introduction. pp. 16.
2. An Account of a Tornado near New Harmony, Ind., April 30, 1852; with a Map of the Track, &c., by John Chappelsmith. pp. 12, 1 Map, and 1 Plate.
3. Notes on New Species and Localities of Microscopical Organisms, by J. W. Bailey, M.D. pp. 16, and 1 Plate.
4. The Antiquities of Wisconsin, as surveyed and described by J. A. Lapham, Civil Engineer, &c., on behalf of the American Antiquarian Society. pp. 108, 55 Plates, and Map of Wisconsin.
5. A Memoir of the Extinct Sloth Tribe of North America, by Joseph Leidy, M.D. pp. 70, and 16 Plates.

Smithsonian Contributions to Knowledge. Vol. VIII., 4to, pp. xl., 528, with 9 Plates. Containing—

1. Introduction. pp. 16.
2. Archæology of the United States; or, Sketches, Historical and Bibliographical, of the Progress of Information and Opinion respecting Vestiges of Antiquity in the United States, by Samuel F. Haven. pp. 172.
3. On the Recent Secular Period of the Aurora Borealis, by Denison Olmstead, LL.D. pp. 52.
4. The Tangencies of Circles and of Spheres, by Benjamin Alvord, Major of the U. S. Army. pp. 16, and 9 Plates.
5. Researches, Chemical and Physiological, concerning certain North American Vertebrata, by Joseph Jones, M.D. pp. 150, and 27 Woodcuts.

APPENDIX.

Record of Auroral Phenomena observed in the higher Northern Latitudes, compiled by Peter Force. pp. 122.

Publications of Learned Societies, and Periodicals in the Library of the Smithsonian Institution, May, 1856. Part II. pp. 38.

Each Article from any of the above Volumes can be had separately.

Transactions of the Albany Institute.—3 vols., 8vo. Albany, New York, 1831—1855.

CONTENTS OF VOL. I.

List of Officers for the year 1828 2
Advertisement 3
ARTICLE
1. Table of Variations of the Magnetic Needle, copied from one furnished by the late General Schuyler, to S. De Witt, Surgeon-General . . . 4
2. On the Luminous Appearance of the Ocean, by Lieut. Thomas Ingalls, of the United States Army, Corresponding Member 8
3. On the Geographical Botany of the United States, Part 1st, by L. C. Beck 10
4. On some Modifications of the Electro-Magnetic Apparatus, by Joseph Henry 22
5. Notes on Mr. Pickering's Vocabulary of Words and Phrases, which have been supposed to be peculiar to the U. S., with preliminary observations by T. Romeyn Beck 25
6. On the Uvularia Grandiflora as a remedy for the Bite of the Rattlesnake, by J. G. Tracy 32
7. An Examination of the Question whether the Climate of the Valley of the Mississippi under similar Parallels of Latitude is warmer than that of the Atlantic Coast, by Lewis C. Beck, M. D. 34
8. Observations on the Geological Features of the south side of the Ontario Valley, in a Letter to T. Romeyn Beck, M. D., by James Geddes, Civil Engineer . 55
9. Statistical Notices of some of the Lunatic Asylums in the United States, by T. Romeyn Beck 60
10. Observations on the great Grauwacke Region of the State of New York, by James O. Morse, of Cherry Valley, Cor. Member 84
List of Officers for 1829 86
11. Topographical Sketch of the State of New York, designed chiefly to show the general Elevations and Depressions of its Surface, by Joseph Henry . 87
12. An Account of a Man who lived fifty-three days on water, by James M'Naughton, Professor of Anatomy and Physiology in the University of the State of New York 113
13. Monograph of the Cones of North America, including three new species, by Jacob Green, Professor of Chemistry in Jefferson Medical College, Philadelphia, Cor. Member 121

Transactions of the Albany Institute—*Continued.*

ARTICLE
14. Observations on the Coal Formations in the State of New York, in connection with the Great Coal Beds of Pennsylvania, by James Amos Eaton 126
15. The Dolia of the United States, by J. Green, M.D., Professor, &c. . 131
16. Notes on the American Shells figured in the Supplement to the Index Testaceologicus, by Jacob Green, M.D., Professor, &c. . . . 134
17. Address delivered before the Lyceum of Natural History (now the second part of the Institution), at its First Annversary, March 1, 1824, by J. R. Beck 137
18. Note respecting the Ranunculus Lacustris, by Lewis C. Beck and James G. Tracy 148
19. Reclamation of Salamanders, in a letter to the Baron F. Cuvier, from J. Green, M.D., Professor, &c. 150
List of Officers for 1830 152
20. Discourse delivered before the Albany Institute, at its First Anniversary after its Incorporation by the Legislature, April 23, 1830, by Benjamin F. Butler, a Member of the Third Department 153
21. Notice of the Graphite of Ticonderoga, by George W. Clinton . . 233
22. On the Apparent Radiation of Cold, by Benjamin F. Joslin, M.D., Professor of Mathematics in Union College, Cor. Member 236
23. Elements of the Solar Eclipse of February 12, 1831. Together with a partial calculation for the Latitude and Longitude of Albany, by Stephen Alexander, A.M., Cor. Member 243

No. PLATES.

1. Electro Magnetic Apparatus.
2. Principal Heights and Elevations in the State of New York.
3. Conus Mus; Marylandicus; Pealii; Leucosticus Mamillaria.
4. Dolium Zonatum.
5. Ranunculus Lacustris.
6. The Sun at the instant of its Greatest Obscuration, Feb. 12, 1831.

CONTENTS OF VOL. II.

ARTICLE
1. Abstracts of Meteorological Observations made at the City of Albany, and calculations tending to establish its mean Temperature, by T. Romeyn Beck, M.D. 1
2. Observations on the Solar Eclipse of July, 1832, and the Longitude of Albany, in a letter to Simeon De Witt, first Vice-President, from Stephen Alexander, A.M., Corresponding Member 30
3. Annual Address delivered before the Institute, April 3, 1833, by A. Dean 33
4. Description of a new Crustaceous Animal found on the shores of the South Shetland Islands, with remarks on their Natural History, by James Eights, Naturalist to the Exploring Expedition of 1830, and Corresponding Member of the Albany Institute 53
5. On the Functions of the Moon, deduced from Observations made on the total Eclipse of the Sun, June 16, 1806, by Simeon De Witt 70
6. Astronomical Observations made at Berlin, Worcester County, Maryland, Feb. 1831, with some of their results, by Stephen Alexander, A.M., Tutor in the College of New Jersey, Corresponding Member 84
7. Report of the Committee appointed to Constitute the Meteorological Observations on the 21st of June, September, December, and March . . .
8. Annual Address delivered before the Institute, April 19, 1836, by Samuel S. Barnard, LL.D. 113
9. Report of the Committee appointed to continue the Meteorological Observations on the 21st of March, June, September, and December . . 152
10. Report of the Committee appointed to continue the Meteorological Observations on the 21st of March, June, September, and December; containing hourly observations of the Barometer, Thermometer, Winds, Weather, &c., made at different places, on the 21st and 22nd of December, 1836. And Meteorological Tables from Illinois, Florida, New York City, Albany, Montreal, Quebec, L. C., and Amsterdam in Holland 185
11. Annual Address delivered before the Institute, April 27, 1837, by Matthew Henry Webster, A.M. 225
12. Meteorological Observations made on the days suggested by Sir John F. W. Herschel . . . . . .
13. An Account of the burning of Schenectady in 1690, drawn up from Manuscript Records, by Geo. W. Carpenter. Read, Feb. 6, 1834 . . . 263
14. Annual Address delivered before the Albany Institute, April, 1838, by James Ferguson, Esq. 275
15. Eulogium on the Life and Services of Simeon de Witt, Surveyor-General of the

Transactions of the Albany Institute—*Continued.*

ARTICLE

State of New York, Chancellor of the University, &c., by T. Romeyn Beck, M.D. Delivered by appointment before the Albany Institute, April 23, 1835.

16. Description of a new Animal belonging to the Crustacea, discovered in the Antarctic Seas, by the Author, James Eights (Genus Glyptonotus) . . 331
17. Observations on the Geological Features of the Post Tertiary formation of the City of Albany and its vicinity, by James Eights 335

CONTENTS OF VOL. III. 1855.

Catalogue of the Albany Institute Library, founded 1793. Prepared by George Wood.

CONTAINING

List of Officers.—Charter.—Constitution.—Bye-Laws.—Journal of Proceedings.—New Fossils, by Evans and Shumard.—New Species of Productus by Prout.—Glycerin by Schiel.—Phyllotaxis by Hilyard.—Mastodon Remains by Koch.—Burnt Brick from Nineveh, by Seyffarth.—Indian Stone Graves, by Wislizenus.—New Fossil Crinoidea, by Shumard.—Belcher's Artesian Well, by Litton.—Meteorological Observations.—List of Works in the Library. With Plates, illustrating Papers.

Transactions of the American Philosophical Society. 4to. Philadelphia.

OLD SERIES, CONTENTS OF VOL. I.—1769.

A Description of an Orrery executed on a New Plan, by D. Rittenhouse, A.M.

Calculation of the Transit of Venus over the Sun, as it is to happen June 3, 1769, in lat. 40 N., long. 5 h. W. from Greenwich, by D. Rittenhouse, A.M., communicated June 21, 1768.

An Account of the Transit of Venus over the Sun, June 3, 1769, as observed at Norriton in Pennsylvania, by the committee appointed for that observation. Drawn up and communicated in behalf of the committee, by Rev. William Smith, D.D.

An Account of the Transit of Venus over the Sun, June 3, 1769, and of the Transit of Mercury, Nov. 9, both as observed in the State House Square, Philadelphia, by the committee appointed for those observations. Drawn up and communicated in behalf of the committee, by the Rev. John Ewing, A.M.

An Account of the Transit of Venus over the Sun, June 3, 1769, as observed near Cape Henlopen, in Delaware, by the committee appointed for that Observation. Drawn up and communicated in behalf of the committee, by Mr. Owen Biddle.

An Account of the Transit of Venus over the Sun, June 3, 1769, as observed at Providence, New England. Drawn up by Benjamin West, A.M., and transmitted to the Society by Mr. Joseph Brown.

Observation of the Transit of Venus, and Eclipse of the Sun, June 3, 1769, made at the Royal Observatory, Greenwich, by the Rev. Nevil Maskelyne, B.D., F.R.S., and Astronomer Royal. Transmitted by himself, and communicated to the American Philosophical Society, by William Smith, D.D.

Some Account of the Transit of Venus, and Eclipse of the Sun, as observed at the Lizard Point, June 3, 1769, by Mr. John Bradly, extracted from a paper of the Astronomer Royal.

A Letter from the Rev. Nevil Maskelyne, B.D., F.R.S., Astronomer Royal, to the Rev. William Smith, D.D., Provost of the College of Philadelphia, giving some account of the Hudson Bay and other northern observations of the Transit of Venus, June 3, 1769.

An Account of the Terrestrial Measurement between the Observatories of Norriton and Philadelphia; with the difference of Longitude and Latitude thence deduced, by William Smith, D.D.

Apparent Time of the Contacts of the Limbs of the Sun and Venus, with other circumstances of most note in the different European Observations of the Transit, June 3, 1769.

An Improvement in the Construction of Godfrey's (commonly called Hadley's) Quadrant, by the Rev. John Ewing, A.M.

An Essay on Comets, and an account of their luminous appearance; together with some conjectures concerning the Origin of Heat, by Hugh Williamson, M.D.

Observations on the Comet of June and July, 1770, with the Elements of its Motion, and the Trajectory of its Path, in two letters from David Rittenhouse, A.M. to William Smith, D.D., Provost College, Philadelphia.

Transactions of the American Philosophical Society—*Continued.*

An Account of the same Comet, in a letter from the Right Hon. William Earl of Stirling, to William Smith, D.D., Provost College, Philadelphia.

An Easy Method of Deducing the Time of the Sun's passing the Meridian, per clock, without the help of the Equation Tables, by equal altitudes, taken on two succeeding days, by David Rittenhouse, A.M. Communicated by William Smith, D.D., Provost College, Philadelphia.

An Account of the Transit of Mercury over the Sun, Nov. 9, as observed at Norriton in Pennsylvania, by the committee appointed for that Observation. Drawn up and communicated by direction and in behalf of the committee, by William Smith, D.D., Provost College, Pennsylvania.

The Sun's Parrallax deduced from a comparison of the Norriton Observations of the Transit of Venus, 1769, with the Greenwich and other European Observations of the same, by William Smith, D.D., Provost College, Philadelphia.

An Essay on the Cultivation of the Vine, and the Making and Preserving of Wines suited to the different climates of North America, by the Hon. Edward Antill, Esq. Communicated by Mr. Charles Thompson.

The Method of Curing Figs, and Observations on the Raising and Dressing of Hemp, by the Hon. Edward Antill, Esq.

Observations concerning the Fly Weevil, that destroys the Wheat; with some useful discoveries and conclusions concerning the Propagation and Progress of that pernicious Insect; and the methods to be used for preventing the destruction of the Grain by it, by Colonel Langdon Carter, of Sabine Hall, Virginia. Communicated by Colonel Lee, of Virginia.

Observations on the same subject, by the Committee of Husbandry, &c.

Observations on the Native Silk Worm of North America, by Mr. Moses Bartram.

A Memoir on the Distillation of Persimons, by Mr. Isaac Bartram.

Account of an Oil made from the Seeds of the Sunflower, by Dr. Otto of Bethlehem. Communicated by Dr. Thomas Bond.

An Essay on the Expressing of Oil from the Sunflower Seed, by John Morgan, M.D.

A Letter on the Expressing of a fine Oil from Bean Seed, by Mr. John Morel, of Georgia. Communicated by Mr. Charles Thompson.

The Method of Destroying Wild Garlic, by Mr. Henry Hollingsworth, of Elk Ridge.

A Method of Preserving Pease from the Worms, by Mr. Peter Miller, of Eprata. Communicated by Mr. Charles Thompson.

An Easy Method of Preserving Subjects in Spirits, by L. Nicola, Esq.

A Letter from Bethlehem, on making Currant Wines.

A Letter from Dr. Lorimer, of West Florida, to Hugh Williamson, M.D., containing some remarks on the Climate, Vegetable Productions, &c.

A Catalogue of such Foreign Plants as are worthy of being encouraged in the American Colonies, for the purposes of Medicine, Agriculture, and Commerce.

Directions for Putting up Seeds and Plants so as to preserve them in a State of Vegetation, for being transported to distant countries. An attempt to account for the change of climate which has been observed in the Middle Colonies in North America, by Hugh Williamson, M.D.

An Account of the Eruption of Mount Vesuvius in 1767; in a letter from an English gentleman residing at Naples, to John Morgan, M.D., Prof. Med. Coll. Philadel.

A Description of a Self-moving or Sentinel Register, invented by Mr. William Henry, of Lancaster, in Pennsylvania.

An Account of a Machine for Pumping Vessels at Sea without the Labour of Men, by Richard Wells, Esq.

An Abstract of sundry Papers and Proposals for Improving the Inland Navigation of Pennsylvania and Maryland, by opening a communication between the Tide Waters of Delaware and Chesapeake Bay; illustrated with a Map, &c.

A Description of a Machine for Cutting Files.

An Analysis of Chalybeate Waters of Bristol, in Pennsylvania, in two Letters from Dr. John De Normandie of Bristol, to Dr. Thomas Bond of Philadelphia, V. P. of the American Philosophical Society.

Remarkable case of a Tetanus and Locked Jaw cured by amazing quantities of Opium, by Dr. Archibald Gloster of Antigua. Communicated by John Morgan, M.D., Prof. of Physic, Coll. Philadelphia.

An Account of the Effects of the Strammonium, or Thorn Apple, by Benjamin Rush, M.D., Prof. of Chym., Coll. Philadelphia.

An Inquiry into the Nature, Cause, and Cure of the Angina Suffocativa, Sore Throat Distemper, by Samuel Bard, M.D., Prof. Physic, King's Coll. New York; communicated by John Morgan, M.D., Prof. Physic, Coll. Philadelphia.

An Account of an Aurora Borealis, from a correspondent at Lancaster, Pennsylvania.

An Account of a Horizontal Wind-Mill, by Mr. Thomas Gilpin.

An Account of a New Species of Grape Vines, by Mr. John Jones, at Indian, Worcester County, Maryland.

Transactions of the American Philosophical Society—*Continued.*

OLD SERIES, VOL. II.—1786.

A Letter from Dr. B. Franklin to Dr. Ingenhausz, Physician to the Emperor at Vienna, on the Causes and Cures of Smoky Chimneys.
Explanation of an Optical Deception, by Mr. Rittenhouse.
Description of the White Mountains, in New Hampshire, by the Rev. J. Belknap.
Description of a remarkable Rock and Cascade, near the western side of the Youghiogeny River, by Thos. Hutchins, Esq.
Description of a New Stove for burning Pit-coal, and Consuming all its Smoke, by Dr. Franklin.
Letter to Mr. Nairne, of London, from Dr. Franklin, proposing a slowly sensible Hygrometer for certain purposes.
A Theory of Lightning and Thunder Storms, by Andrew Oliver, Esq., of Salem, in the State of Massachusetts.
Theory of Water-spouts, by Andrew Oliver, Esq.
Experiments on Evaporation, and Meteorological Observations made at Bradfield, New England, by the Rev. Samuel Williams, A.M.
A Letter from J. Madison, Esq., to D. Rittenhouse, Esq., containing Meteorological Observations.
Description of a Machine for Measuring a Ship's Way through the Sea, by F. Hopkinson, Esq.
Account of an Electrical Eel; or, the Torpedo of Surinam, by William Bryant, Esq.
Observations on the Numb Fish, or Torporific Eel, by H. C. Flagg, of South Carolina.
A Letter to David Rittenhouse, Esq., from John Page, Esq., and from D. Rittenhouse, to J. Page, concerning a remarkable Meteor seen in Virginia and Pennsylvania.
Description of the Grotto at Suatara, by the Rev. Peter Miller, of Ephrata, communicated by William Barton, Esq.
An Account of some Experiments on Magnetism, in a Letter to John Page, Esq., at Williamsburg, from D. Rittenhouse, Esq.
New Method of placing a Meridian Mark, in a Letter to the Rev. Dr. Ewing, Provost of the University, by D. Rittenhouse, Esq.
Account of a Worm in a Horse's Eye, by F. Hopkinson, Esq.
Observations on a Comet lately discovered, communicated by D. Rittenhouse, Esq.
Extract from a Letter from the Rev. Jeremy Belknap, containing observations on the Aurora Borealis.
A Letter from J. Madison, Esq., to D. Rittenhouse, Esq., containing Experiments and Observations upon what are commonly called the Sweet Springs.
A Letter from the Rev. Jeremy Belknap, on the Preserving of Parsneps by drying.
An Optical Problem, proposed by Mr. Hopkinson, and solved by Mr. Rittenhouse.
An Inquiry into the Cause of the Increase of Bilious and Intermitting Fevers, in Pennsylvania, with Hints for preventing them, by Benjamin Rush, M.D., Professor of Chemistry in the University of Pennsylvania.
An Account of the late Dr. Hugh Martin's Cancer Powder, with Brief Observations on Cancers, by Dr. Benjamin Rush.
Majores Observationes Astronomicæ.
Observations on the Cause and Cure of the Tetanus, by Dr. Benjamin Rush.
Letter concerning Chimneys, addressed to his Excellency, Benjamin Franklin, LL.D., President of the State of Pennsylvania, and of the American Philosophical Society, &c., by Dr. Rufton.
Observations on the Annual Passage of Herrings, by Mr. John Gilpin.
Observations on a Solar and Lunar Eclipse, communicated to the Society by M. M. de Grauchain, Major-General of the French Squadron.
An Account of the Transit of Venus over the Sun, June, 1769, as observed at Newbury, Massachusetts, by the Rev. Samuel Williams, A.M.
An easy and accurate Method of finding a true Meridian Line, and thence the Variation of the Compass, by Robert Patterson.
Astronomical Observations, communicated by Mr. Rittenhouse.
A Letter from Mr. Otto to Dr. Franklin, with a Memoir on the Discovery of America.
The Antiseptic Virtues of Vegetable Acid and Marine Salt, combined in various Disorders accompanied with putridity, communicated in a Letter to John Morgan, M.D., F.R.S., and Professor of the Theory and Practice of Physic at Philadelphia, by William Wright, M.D., of Trelawney, in Jamaica.
Medical History of the Cortex Ruber, or Red Bark, communicated by Dr. J. Morgan.
Account of Two Hearts found in one Partridge.
Conjectures concerning Wind and Water Spouts, Tornados, and Hurricanes, communicated by Dr. John Perkins, of Boston, to Dr. John Morgan.
The whole Process of the Silk-Worm, from the Egg to the Cocoon, communicated to Dr. John Morgan, in Two Letters from Messrs. Hare and Skinner, &c., in London, July 27th, 1774, and February 24th, 1775.
The Art of making Anatomical Preparations by Corrosion, by Dr. John Morgan.

Transactions of the American Philosophical Society—*Continued.*

Of a living Snake in a living Horse's Eye, and of other unusual Productions of Animals, by Dr. John Morgan.

Some Account of a Motley-coloured or Pied Negro Girl and Mulatto Boy, exhibited before the Society, in the month of May, 1784, for their examination, by Dr. John Morgan, from the History given of them by their owner, Mons. Le Valois, Dentist to the King of France, at Guadalupe, in the West Indies.

Extract of a Letter from Bernard Romans, of Pensacola, dated August 20th, 1773, on an improved Sea Compass.

OLD SERIES, VOL. III.—1793.

Conjectures concerning the Formation of the Earth, in a Letter from Dr. B. Franklin to the Abbé Soulaire.

A New and curious Theory of Light and Heat, in a Letter from Dr. B. Franklin to David Rittenhouse, Esq.

Description of the Process to be observed in making large Sheets of Paper in the Chinese manner, with one smooth surface, communicated by Dr. Franklin.

Queries and Conjectures relative to Magnetism and the Theory of the Earth, in a Letter from Dr. B. Franklin to Mr. Bowdoin.

Explanation of a singular Phenomenon, first observed by Dr. Franklin, and not hitherto satisfactorily accounted for, in a Letter from Mr. R. Patterson to Dr. Benjamin Rush.

An Account of an Earthy Substance found near the Falls of Niagara, and vulgarly called the "Spray of the Falls;" together with some Remarks on the Falls, by Robert M'Cauflin, M.D., communicated by Benjamin Smith Barton, M.D.

Observations on the Probabilities of the Duration of Human Life, and the Progress of Population in the United States of America, in a Letter from William Barton, Esq., to David Rittenhouse, Esq.

Extract of a Letter from Andrew Ellicott to David Rittenhouse, Esq., dated at Pittsburg, November 5th, 1787, containing Observations made at Lake Erie, on that singular Phenomenon, by Seamen termed Looming.

An Account of the Sugar Maple Tree of the United States, and of the Methods of obtaining Sugar from it; together with Observations upon the advantages both public and private of this Sugar, in a Letter to Thomas Jefferson, Esq., Secretary of State to the United States, and one of the Vice-Presidents of the American Philosophical Society, by Dr. B. Rush.

Memoir of Jonathan Williams, on the Use of the Thermometer in discovering Banks, Soundings, &c.

An Account of the most effectual means of preventing the deleterious consequences of the bite of the Crotalus Horndus, or Rattle-snake, by Benjamin Smith Barton.

Magnetic Observations made at the University of Cambridge, Massachusetts, in the year 1788, by Dr. S. Williams.

Accurate Determination of the Right Ascension and Declination of Bootes and the Pole Star, in a Letter from Mr. Andrew Ellicott to Mr. R. Patterson.

Account of several Houses in Philadelphia struck with Lightning, June 7th, 1789, by D. Rittenhouse, Esq., and Dr. John Jones.

An Account of the Effects of a Stroke of Lightning on a House furnished with two Conductors, in a Letter from Messrs. David Rittenhouse and Francis Hopkinson, to Mr. R. Patterson.

Experiments and Observations on Evaporation in Cold Air, by C. Westar, M.D.

Postscript to Mr. Barton's Letter to Dr. Rittenhouse, of the 17th of March, 1791.

New Notation of Music, in a Letter to Francis Hopkinson, Esq., by Mr. R. Patterson.

Observations on the Theory of Water-Mills, &c., by W. Waring.

Astronomical Observations, communicated by David Rittenhouse, Esq.

A Letter from Dr. Rittenhouse to Mr. Patterson, relative to the method of finding the Sum of the several Powers of the Sines, &c.

Index Flora Lancastriensis auctore Henrico Muhlenburg, D.D.

Investigation of the Power of Dr. Barker's Mill, as improved by James Rumsey, with a Description of the Mill, by W. Waring.

A Thermometrical Journal of the Temperature of the Atmosphere and Sea, on a Voyage to and from Oporto, with explanatory Observations thereon, to David Rittenhouse, Esq.

First Memoir of Observations on the Plants denominated Cryptogamic, by M. de Beauvois.

A Letter from Major Jonathan Heart, to Benjamin Smith Barton, M.D., containing Observations on the Ancient Works of Art, the Native Inhabitants, &c., of the Western Country.

An Account of some of the Principal Dyes employed by the North American Indians, extracted from a Paper communicated by the late Mr. Hugh Martin.

Transactions of the American Philosophical Society—*Continued.*

An Account of the Beneficial Effects of the Caffia Chamacrifla in recruiting worn-out lands, and enriching such as are naturally poor, together with a Botanical Description of the Plant, by Dr. James Greenway, of Dinwiddie Co., in Virginia.

An Account of a Hill, on the borders of North Carolina, supposed to have been a Volcano, in a Letter from a Continental Officer residing in that neighbourhood, to Dr. J. Greenway, near Petersburg in Virginia.

An Account of a Poisonous Plant growing spontaneously in the Southern part of Virginia, extracted from a Paper communicated by Dr. James Greenway.

Description of a Machine for Measuring a Ship's Way, in a Letter from Francis Hopkinson, Esq., to Mr. John Vaughan.

An Inquiry into the question, Whether the Apis Mellifica, or Tree-Honey Bee, is a Native of America, by Benjamin Smith Barton, M.D.

An Account of a Comet, in a Letter to Mr. R. Patterson, by D. Rittenhouse, Esq.

Cadmus; or, a Treatise on the Elements of Written Language, illustrating, by a philosophical division of speech, the power of each Character, thereby mutually fixing the Orthography and Orthoepy; with an Essay on the Mode of Teaching the Surd, or Deaf, and consequently Dumb, to speak, by William Thornton, M.D., honoured with the Magellanic Gold Medal, by the Philosophical Society, in December, 1792.

Observations on the Theory of Water-Mills (continued from p. 193), by W. Waring.

An Improvement on Metallic Conductors, or Lightning Rods, in a Letter to D. Rittenhouse, Esq., from Mr. R. Patterson, honoured with the Magellanic Premium, by an award of the Society, in December, 1792.

An easy and expeditious Method of dissipating the Noxious Vapour commonly found in Wells and other Subterraneous Places, by Ebenezer Robinson, of Philadelphia.

A Method of Draining Ponds in Level Grounds, by Jeffi Higgins, of Delaware.

Observations on the Severity of the Winter, 1779 and 1780, by the Rev. Matthew Wilson, of Lewis, dated 22nd June, 1780.

A Description of a New Standard for Weights and Measures, in a Letter from Mr. John Cooke, of Tipperary, in Ireland, to Thomas Jefferson, Esq.

Description of a Spring Block, designed to assist a Vessel in Sailing, by Francis Hopkinson, Esq., of Philadelphia, honoured with the Magellanic Gold Medal, by an award of the Society, in December, 1790.

A Botanical Description of the Podophyllum Diphyllum of Linnæus, in a Letter to Charles Peter Thunberg, M.D., Knight of the Order of Wasa, Professor of Medicine and Botany, in the University of Upsal, &c., &c.

Observations on the Construction of Hospitals, by Mr. Le Roy, Member of the Royal Academy of Sciences, extracted from an Essay on the subject, which, with several elegant plans, was transmitted by the Author to the Society, but could not be inserted entire, as it contained many remarks of local nature, respecting Paris only.

OLD SERIES, VOL. IV.—1799.

Experiments and Observations relating to the Analysis of Atmospherical Air, by the Rev. Dr. J. Priestly.

Further Experiments relating to the Generation of Air from Water, by the Rev. Dr. J. Priestly.

To Determine the true Place of a Planet, in an Elliptical Orbit, directly from the Pean Anomaly, by converging Series, by David Rittenhouse, Esq.

On the Improvement of Time-keepers, by David Rittenhouse, President of the Society.

On the Expansion of Wood by Heat, in a Letter from David Rittenhouse, Esq.

A Letter from Mr. Andrew Ellicott, to Mr. R. Patterson, in two parts.

Of the Aberration of the Stars, Mutation of the Earth's Axis, and Semi-annual Equation, by Mr. Andrew Ellicott.

A Letter from Mr. Andrew Ellicott to Mr. R. Patterson. A Method of calculating the Eccentric Anomaly of the Planets.

Method of raising the Common Logarithm of any number immediately, by David Rittenhouse, Esq.

Experiments on Evaporation, by C. Wistar, M.D. A Memoir concerning the Fascinating Faculty which has been ascribed to the Rattle-Snake and other American Serpents, by Benjamin Smith Barton, M.D.

Some Account of an American Species of Dipus or Jerboa, by B. Smith Barton, M.D.

A Letter from Mr. John Heckewelder to Benjamin Smith Barton, M.D., giving some account of the remarkable instinct of a bird called the Nine Killer.

An Inquiry into the Causes of the Insalubrity of Flat and Marshy Situations; and directions for preventing or correcting the effects thereof, by William Currie.

Description of a Machine for saving Persons from the upper stories of a house on fire, by Nicholas Collin, D.D., the inventor; with a drawing from the Model.

A Disquisition on Wool-bearing Animals, by Dr. James Anderson, of North Britain, in a letter dated December 6, 1794.

Transactions of the American Philosophical Society—*Continued.*

An Easy and Accurate Method of adjusting the Glasses of Hadley's Quadrant on land for the Back Observation, by Mr. Robert Patterson, in a letter to David Rittenhouse, Esq.

Later Communications by the Author on this subject, with the sample taken from the fleece of a sheep brought from Jamaica to England.

An Essay tending to improve intelligible Signals, and to discover an Universal Language. From an anonymous correspondent in France (probably the inventor of the Telegraph), translated from the French.

Memoir on the subject of a New Plant growing in Pennsylvania, particularly in the Vicinity of Philadelphia, by Mr. Beauvois.

A Letter from Colonel Winthrop Sargent, to Benjamin Smith Barton, M.D., accompanying Drawings, and some account of certain articles which were taken out of an ancient Tumulus, or Grave, in the Western Country.

A Drawing of some Utensils, or Ornaments, taken from an old Indian Grave, at Cincinnati, County of Hamilton, and Territory of the United States, North-west of the River Ohio, August 30, 1794, by Colonel Winthrop Sargent. Communicated by Benjamin Smith Barton, M.D.

Observations and conjectures concerning certain Articles which were taken out of an Ancient Tumulus, at Cincinnati, in the County of Hamilton, and Territory of the United States, North-West from the River Ohio, in a letter from Benjamin Smith Barton, M.D., to the Rev. Joseph Priestly, LL.D., F.R.S., &c.

Barometrical Measurement of the Blue Ridge, Warm Springs, and Alleghany Mountains, in Virginia, taken in the summer of the year 1791.

Miscellaneous Observations relative to the Western Parts of Pennsylvania, particularly those in the neighbourhood of Lake Erie, by Andrew Ellicott.

Observations made on the Old French Landing at Presqu' Isle, to determine the latitude of the Town of Erie, in a letter from Andrew Ellicott, to Robert Patterson, Secretary of the Society.

Hints relative to the stimulating effects of Camphor upon Vegetables, by Benjamin Smith Barton, M.D.

Supplementum Indicis Floræ Lancastriensis auctore Henrico Muhlenburg. Communicated by Dr. Barton.

On the mode, most easy and effectually practicable, of drying up the Marshes of the Maritime parts of North America, by Thomas Wright, Licentiate of the College of Surgeons in Ireland, and Teacher of Anatomy.

A Memoir on the Discovery of certain Bones of a Quadruped of the Clawed kind, in the Western parts of Virginia, by Thomas Jefferson, Esq.

A Letter from Mr. John Heckewelder, to Benjamin Smith Barton, M.D., containing an account of an Animal called the Big Naked Bear.

Experiments and Observations on Land and Sea Air, by Adam Seybert, M.D.

Translation of a Memoir on a new Species of Siren, by M. D. Beauvois.

Observations intended to favour a supposition that the black colour (as it is called) of the Negroes is derived from the Leprosy, by Dr. Benjamin Rush.

An Improvement in Boats for River Navigation, described in a Letter to Mr. Robert Patterson, by Nicholas King.

General Principles and Constructions of a Sub-marine Vessel, communicated by D. Bushnell of Connecticut, the Inventor, in a letter of October, 1787, to Thomas Jefferson, then Minister Plenipotentiary of the United States at Paris.

The Description of a Mould Board of the least resistance, and of the easiest and most certain construction, taken from a letter to Sir John Sinclair, President of the Board of Agriculture at London.

Experiments on Magnetism, communicated in a letter to Thomas Jefferson, Esq., by the Rev. James Madison, President of William and Mary College.

Thermometrical Observations made at Fort Washington, commencing June, 1790, and ending April, 1791, by Daniel Britt and G. Turner, to which are added, for some time, the Rise and Fall of the Ohio. Communicated by G. Turner.

Calculations relating to Grist and Saw Mills, for determining the quantity of Water necessary to produce the desired effect when the Head and Fall are given, in order to ascertain the dimensions of a new-invented Steam Engine, intended to give motion to water-wheels in places where there is no fall, and but a very small stream or spring, by John Nancarrow.

Memoir on Amphibia, by M. de Beauvois. An Appendix to the two articles in this volume (p. 1), by Dr. Priestly, in a letter to B. S. Barton, M.D.

An Inquiry into the comparative effects of the Opium Officinarum, extracted from the Papaver Somniferum, or White Poppy, Linnæus; and of that procured from the Lactuca Sativa, or common cultivated Lettuce of the same Author, by John Redman Coxe, M.D., an Honorary Member of the Philadelphia Medical Society and a Senior Member of the Chemical Society of Philadelphia.

Transactions of the American Philosophical Society—*Continued.*

Experiments and Observations on the Atmosphere of Marshes, by Adam Seybert, M.D.
An Account of a Kettle for boiling inflammable Fluids, in a letter from Thomas P. Smith to Robert Patterson.
An Essay on the New Method of treating the Effusion which collects under the Skull after Fractures of the Head, by J. Devese, Officer of the Health of the first class in the French Armies.
Memoir on the Sand-hills of Cape Henry, Virginia, by B. Henry Latrobe, Engineer.
Supplement to Mr. Latrobe's Memoir.
Account of Crystallized Basaltes found in Pennsylvania, by Thomas P. Smith.
Observations for determining the Latitude and Longitude of the Town of Natchez, by Andrew Ellicott, Esq., Commissioner on the part of the United States for running the line of Demarcation between them and the Spanish Territory. Communicated to the Society by R. Patterson.
An Answer to Dr. Joseph Priestly's considerations on the doctrine Phlogiston, and the Decomposition of Water; founded upon demonstrative Experiments, by James Woodhouse, M.D., Professor of Chemistry in the University of Pennsylvania, &c.
Philological view of some very Ancient Words in Several Languages, by the Rev. Nicholas Collin, D.D., Rector of the Swedish Church in Pennsylvania.
Memoir of the Extraneous Fossils denominated Mammoth Bones; principally designed to show, that they are the remains of more than one species of nondescript Animals, by George Turner, Member of the A.P.S., Honorary and Corresponding Member of the Bath and West of England Society, &c.
Description of a Speedy Elevator, by the inventor, Nicholas Collin, D.D., with two drawings from a model, representing it folded and wound up.
A Description of the Bones deposited by the President in the Museum of the Society, and represented in the annexed plates, by C. Wistar, M.D., Adjunct Professor of Anatomy, &c., in the University of Pennsylvania.

OLD SERIES, VOL. V.—1802.

Experiments on the Transmission of Acids, and other Liquors, in the form of Vapour, over several Substances, in a hot Earthen Tube, by Dr. Joseph Priestly.
Experiments relating to the change of place in different kinds of Air through several interposing substances, by Dr. Joseph Priestly.
Experiments relating to the Absorption of Air by Water, by Dr. Joseph Priestly.
Miscellaneous Experiments relating to the doctrine of Phlogiston, by Dr. Joseph Priestly.
Experiments on the Production of Air by the Freezing of Water, by Dr. Joseph Priestly.
Experiments on Air exposed to Heat in Metallic Tubes, by Dr. Joseph Priestly.
Some Account of the Poisonous and Injurious Honey of North America, by Benjamin Smith Barton, M.D.
On the Ephoron Leukon, commonly called the White Fly, of Passaic River, by Dr. Williamson.
Remarks on certain Articles found in an Indian Tumulus at Cincinnati, and now deposited in the Museum of the American Philosophical Society, by George Turner.
A Drawing and Description of the Clupea Tyrannus, and Oniscus Prægustator, by Benjamin Henry Latrobe, F.A.P.S.
A Description of a newly invented Globe Time-Piece, by the Rev. Burgiss Allison.
A Description of the Pendant Planetarium, by Burgiss Allison, A.M.
On the use of the Thermometer in Navigation, by William Strickland.
Sur les Vegétaux, les Polypes, et les Insectes, by Dupont de Nemours.
Memoir on the Analysis of Black Vomit, by Dr. Isaac Cathrall.
Observations on the Soda, Magnesia, and Lime, contained in the Water of the Ocean; showing that they operate advantageously, thereby neutralizing Acids, and among others the Septic Acid; and that Sea-water may be rendered fit for washing clothes without the Aid of Soap, by Samuel L. Mitchell, of New York.
Description of a Stopper for the Openings by which Sewers of the Cities receive the Water of their Drains, by Mr. John Fraser, of Chelsea, London.
A Memoir on Animal Cotton, or the Insect Fly Carrier, by M. Baudry des Lozieres, Member of Several Academies, and Founder of the Society of Sciences and Arts at Cape François.
Note concerning a Vegetable found underground, in a letter from Colonel Bull.
Astronomical and Thermometrical Observations made at the Confluence of the Mississippi and Ohio Rivers, by Andrew Ellicott.
Astronomical and Thermometrical Observations made on the boundary between the United States and his Catholic Majesty, by Andrew Ellicott.
Observations on the Figure of the Earth, by Joseph Clay, M.A.P.S.
Description of some Improvements in the common Fire-place, accompanied with

Transactions of the American Philosophical Society—*Continued.*

Models, offered to the consideration of the American Philosophical Society, by C. W. Peale, and his son Raphaelle.

Appendix No. 1. An Account of a Method preventing the premature Decay of Peach Trees, by John Ellis, of New Jersey.

Description of a Method of cultivating Peach Trees, with a view to prevent their premature Decay, confirmed by the experience of Forty-five Years in Delaware State and the western parts of Pennsylvania, by Thomas Coulter, Esq., of Bedford County, Pennsylvania.

OLD SERIES, VOL. VI.—1809. PART 1.

An Account of the Language of Signs among certain North American Indians, by William Dunbar, Esq., of Natchez, on the Mississippi, Member of the Society. Communicated by Thomas Jefferson, Esq.

Meteorological Observations for one entire year, ending the 31st of January, 1800, made by William Dunbar, Esq., at the Forest, 4½ miles east of the Mississippi, in Lat. 31° 28′ N. and Long. 91° 30′ W. of Greenwich; on the eminence about 180 feet above the level of the highest waters of the annual inundation of the Mississippi. Communicated by the President of the Society.

Description of a singular Phenomenon seen at Baton Rouge, by William Dunbar, Esq. Communicated by the President of the Society.

A Short and Easy Rule for finding the Equation for the change of the Sun's Declination, when equal altitudes are used to regulate a Clock or other Time-piece, by Andrew Ellicott, Esq. Communicated by the author.

Account of an extraordinary Flight of Meteors (commonly called Shooting-Stars), communicated by Andrew Ellicott, Esq., as extracted from his Journal, in a Voyage from New Orleans to Philadelphia.

An improved Method of Projecting and Measuring Plane Angles, by R. Patterson, communicated by Andrew Ellicott, Esq.

Sur le Théorie des Vents, par M. Dupont de Nemours.

Extracts of a Letter from William Dunbar, Esq., of Natchez, to the President of the Society, relating to Fossil Bones found in Louisiana, and to Lunar Rainbows found west of the Mississippi.

Meteorological Observations made by William Dunbar, Esq., at the Forest, 4 miles west of the Mississippi, in lat. 31° 28′ N. and long. 91° 30′ W. of Greenwich, for the year 1800; with remarks on the State of the Weather, Vegetation, &c., calculated to give some idea of the climate of that country.

Abstract of a Communication from Mr. Martin Duralde, relative to Fossil Bones, &c., found in the country of Apelonsas, west of the Mississippi, to William Dunbar, Esq., of Natchez, and by him transmitted to the Society.

Observations made on a Lunar Eclipse, at the Observatory in the City of Philadelphia, on the 21st of September, 1801, by R. Patterson and A. Ellicott.

On the Hybernation of Swallows, by the late Col. Antes, communicated by Dr. Barton.

Astronomical Observations made at Lancaster, Pennsylvania, chiefly with a view to ascertain the Longitude of that Borough, and as a test of the accuracy with which the Longitude may be found by Lunar Observation, in a Letter from A. Ellicott to R. Patterson.

Notices of the Natural History of the northerly parts of Louisiana, in a Letter from Dr. John Watkins to Dr. Barton.

On Two Species of Sphex, inhabiting Virginia and Pennsylvania, and probably extending through the United States, by Benjamin H. Latrobe.

Memorandum of a New Vegetable, Muscipula, by Dr. Barton.

On the Claying of Sugar, describing a new economical mode of conducting that Process, by Jonathan Williams, Esq.

An Account of some new-discovered Islands and Shoals in the Indian Seas, by Mr. Thomas, an Officer on board the American Ship "Ganges."

First Report of Benjamin H. Latrobe, to the American Philosophical Society, in answer to the inquiry, "Whether any and what Improvements have been made in the Construction of Steam-Engines in America?"

An Account of the Fusion of Strontites, and Volatilization of Platinum, and also of a new arrangement of Apparatus, communicated by Robert Hare, jun.

An Account and Description of a Cock, with two Perforations, contrived to obviate the necessity of a Vent-peg in tapping air-tight casks, by Robert Hare, jun.

Some Account of a new Species of a Northern American Lizard, by Dr. Barton.

Continuation of Astronomical Observations made at Lancaster, Pennsylvania, in a Letter from A. Ellicott to R. Patterson.

Observations and Experiments relating to equivocal and spontaneous Generation, by Dr. J. Priestly.

Observations on the Discovery of Nitre in common Salt, which had been frequently mixed with Snow, in a Letter to Dr. Wistar from Dr. J. Priestly.

Transactions of the American Philosophical Society—*Continued.*

A Letter on the supposed Fortifications of the Western Country, from Bishop Madison, of Virginia, to Dr. Barton.

Supplement to the Account of the Dipus Americanus, in the Fourth Volume of the Transactions of the Society, No. 12, by Dr. Barton.

Hints on the Etymology of certain English Words, and on their affinity to Words in the Languages of different European, Asiatic, and American (Indian) Nations, in a Letter from Dr. Barton to Dr. Thomas Beddoes.

Astronomical Observations made by Jose Joaquin de Ferrer, chiefly for the purpose of determining the Geographical Position of various places in the United States and other parts of North America, communicated by the author.

Description of the River Mississippi and its Delta, with that of the adjacent parts of Louisiana, by William Dunbar, Esq., of Natchez, communicated by the author, through the President of the Society.

Abstract of Meteorological Observations for the years 1801, 1802, and 1803, made at Natchez, by William Dunbar, Esq.

Proceedings of the Society on the Death of their late eminent Associate, Dr. Joseph Priestly.

OLD SERIES, VOL. VI.—1818. PART 2.

Appendix to Memoir, No. 30 of the 1st Part of this Volume, on the Mississippi, by William Dunbar, of Natchez.

Demonstration of Geometrical Theorem, by Joseph Clay, Esq., of Philadelphia.

An Account and Description of Captain W. Mugford's Temporary Rudder, and for which the Extra Magellanic Premium was awarded.

Facts and Observations relative to the Beaver of North America, by Mr. John Heckewelder, in answer to Queries proposed to him by Professor Barton.

Memoir on the Occultation of Aldabaran by the Moon, on the 21st of October, 1793, by J. J. de Ferrer.

The Geographical Position of Sundry Places in North America and the West Indies, calculated by J. J. de Ferrer :—

From an Occultation of the first Satellite of Jupiter by the Moon, observed at New Orleans, by Mr. A. Ellicott, and at the Royal Observatory of the Island of Leon, by Don J. Ortis de Canelas, and at the National Observatory, Paris, by M. Mechain, on the 18th day of January, 1799.

From the Passage of Mercury over the disc of the Sun, May 7th, 1799.

From an Egress of Mercury from the Sun's disc, observed by Mr. A. Ellicott, at Miller's Place, Coenecuch River.

Determination of the Diameters of the Sun and Mercury, Conjunction in the Ecliptic, and error of the Tables in Longitude.

Continuation of the Astronomical Observations made at Lancaster, Pennsylvania, by Mr. A. Ellicott.

A Description of a Cave on Crooked Creek, with Remarks and Observations on Nitre and Gunpowder, by Samuel Brown, M.D., of Lexington, Kentucky.

An Essay on the Vermilion Colour of the Blood, and on the different Colours of the Metallic Oxides, with an application of these principles to the Arts, by S. F. Conover, M.D.

Observations of the Eclipse of the Sun, June 16th, 1806, made at Lancaster, by A. Ellicott, Esq.

Observations of the same, made at the Forest, near Natchez, by William Dunbar, Esq.

Observations of the same Eclipse, made at Kinderhook, in the State of New York, by J. J. de Ferrer and J. Garnett.

Observations on the same, made at Bowdoin College, in the District of Maine, by a Member of the Society.

On finding the Longitude from the Moon's Meridian Altitude, by William Dunbar.

An Account of the Freestone Quarries on the Potomac and Rappahanoc Rivers, by B. H. Latrobe.

Further Observations on the Eclipse of the 16th of June, 1806; a Determination of the Longitude of Natchez and New Orleans; also an Investigation of the Semi-Diameters of the Sun and Moon, by J. J. de Ferrer.

Observations on the same Eclipse, made by Simeon de Witt, Esq., of Albany, State of New York.

Description and Use of a new and simple Nautical Chart, for working the different Problems in Navigation, for which the extra Magellanic Premium was awarded, by John Garnett, Esq., of New Brunswick, New Jersey.

Observations to serve for a Mineralogical Map of the State of Maryland, by S. Gordon.

Memoir on the Meteoric Stones which fell from the atmosphere in the State of Connecticut, on the 14th of December, 1807, by Benjamin Silliman, Professor of Chemistry in Yale College, and Mr. James S. Kingsley.

Transactions of the American Philosophical Society—*Continued.*

Observations on the Comet which appeared in September, 1807, in the Island of Cuba, made by J. J. de Ferrer.
Continuation of the Astronomical Observations made by him at the same place.
Also the following calculations by him:—
Solar Eclipse of June 16th, 1806, in the City of Havana.
Longitude of Havana by the Observations compared with the new Tables published at Paris in 1806.
Passage of Venus over the Disc of the Sun, June 3rd, 1769.
Passage of Mercury over the Disc of the Sun, November 12th, 1782.
Passage of Mercury over the Disc of the Sun, November 5th, 1787.
Annular Eclipse, April 3rd, 1791.
Notes, with Corrections, to be applied to the Geographical Situations inserted from page 158 to page 164, in the 1st Part of the present Volume of Transactions, by J. J. de Ferrer.
Additional Observations on the Solar Eclipse of June 16th, 1806, by the same.
Observations on the Comet, 1807-8, by W. Dunbar.
Correspondence between Capt. William Jones, of Philadelphia, and William Jones, Esq., Civil Engineer, of Calcutta, relative to the Principles and Practice of Building in India.
Observations on the foregoing Correspondence, by B. H. Latrobe, Surveyor of the Public Buildings of the United States.
A general Method of finding the Roots of Numeral Equations, to any degree of exactness, with the application of Logarithms, to shorten the operation, by J. Garnett, Esq.
On the best Angles for the Sails of a Windmill, by John Garnett, Esq.
Extract of a Letter from a Member of the Society, relative to the Great Cold, in Hallowell, Massachusetts, in 1807.
Statement of Deaths and Diseases in the City and Liberties of Philadelphia, for 1807, 1808, communicated by the Board of Health.
An Account of Experiments made on Palladium, found combined with Pure Gold, by Joseph Cloud, an Officer of the Mint of the United States.
Observations on the Geology of the United States, explanatory of a Geological Map, by W. Maclure.
Astronomical Observations made at the Havana, 1809, by J. J. de Ferrer.
Notice of a new Machine for Steering Vessels.

NEW SERIES, VOL. I.—1818.

On the Geology of the United States of North America, with Remarks on the probable effects that may be produced by the Decomposition of the different classes of Rocks, on the Nature and Fertility of Soils, applied to the different States of the Union, agreeably to the accompanying Geological Map, by William Maclure, with two Copper-plates.
Astronomical Observations made at Lancaster, Penns., communicated by A. Ellicott.
Abstracts of Calculations to ascertain the Longitude of the Capitol in the City of Washington, from Greenwich Observatory, England, by William Lambert.
Investigation of the Figure of the Earth, and of the Gravity in different Latitudes, by Robert Adrain.
Memoir on Leaden Cartridges, by William Jones.
Tables of the Altitudes of Mountains in the States of New York, New Hampshire, and Vermont, calculated from Barometrical and Thermometrical Observations, by A. Partridge, Capt. of the Corps of Engineers, United States Army.
On the Population and Tumuli of the Aborigines of North America, in a Letter from H. H. Brackenbridge, to Thomas Jefferson.
An Account of some Experiments made on crude Platinum, and a new Process for separating Palladium and Rhodium from that metal, by Joseph Cloud, Assayer of the Mint, United States.
An Attempt to ascertain the Fusing Temperature of Metals, by Joseph Cloud.
An Inquiry into the causes why the Metals in a solid state appear to be specifically lighter than they are in a state of fusion, by Joseph Cloud.
Observations and Conjectures on the Formation and Nature of the Soil of Kentucky, by J. Correa de Serra.
An easy Solution of a useful Problem in Arithmetic, by James Austin.
On the Geological Formation of the Natural Bridge of Virginia, by F. W. Gilmer.
Analysis of the Blue Iron Earth of New Jersey, by Thomas Cooper.
On Vanishing Fractions, by J. Mansfield, Prof. Milit. Academy, W. Point.
An Account of Pyrometrical Experiments made at Newark, New Jersey, in April, 1817, by F. R. Hasser, with a Plate.
English Phonology; or, an Essay towards an Analysis and Description of the Component Sounds of the English Language, by P. S. Duponceau.

Transactions of the American Philosophical Society—*Continued.*

On Fossil Reliquia of unknown Vegetables in the Coal Strata, by the Rev. Henry Steinhauer, with four Plates.

An Account of a large Wen successfully extirpated, by J. S. Dorsey, M.D., with a Plate.

An Account of an Improvement made on the Differential Thermometer of Mr. Leslie, by Elisha De Butts, M.D. Plate.

Description of a Rolling Draw-gate, as applied to Water-Mills, invented and communicated by Nathan Sellers. Plate.

Description of an Indian Fort in the neighbourhood of Lexington, Kentucky, by Charles W. Short, M.D. Plate.

Description of an improved Piston for Steam-Engines, without hemp-packing, by P. A. Browne. Plate.

On Bleaching, by Thomas Cooper. Plate.

Description and Use of a simple Appendage to the Reflecting Lector, which is rendered capable of measuring all possible Altitudes on Land by reflection from an artificial horizon, by Robert Patterson. Plate.

Description and Use of a very simple Instrument for setting up Sun Dials, and for many other useful purposes, by Robert Patterson.

Observations made at an early period, on the Climate of the country about the River Delaware, collected from the Records of the Swedish Colony, by Nicholas Collin, Rector of the Swedes' Church, Philadelphia.

Research concerning the Mean Diameter of the Earth, by Robert Adrain.

An Improvement in the common Ship Pump, by R. Patterson (see No. 36).

Observation on those Processes of the Ethmoid Bone, which originally forms the Spheroidal Sinuses, by C. Wistar, M.D. Plate.

An Account of two Heads found in the Morass, called the Big Bone Lick, and presented to the Society by Mr. Jefferson, by Caspar Wistar, M.D. With two Plates.

An Account of a case of Disease, in which one side of the Thorax was at rest, while the other performed the motion of Respiration in the usual way, by Caspar Wistar, M.D.

Description of several species of Chondropterigious Fishes of North America, with their varieties, by C. A. Le Sueur.

Investigation of a Theorem, proposed by Dr. Rittenhouse, respecting the summation of the several powers of the Sines; with its application to the Problem of a Pendulum vibrating in Circular Arcs, by Owen Nulty.

A Monograph of North American Insects, of the genus Cicindela, by Thomas Say.

Description and rationale of the operation of a simple Apparatus, which may serve as a substitute for the Ship Pump, and which will require no manual labour whatever; being a Supplement to the paper No. 39, on that subject, by Robert Patterson.

Abstracts and Results from eight Annual Statements (1809 to 1816) published by the Board of Health of the Deaths, with the Diseases, Ages, &c., in the city and liberties of Philadelphia, by John Vaughan.

NEW SERIES, VOL. II.—1828.

Description of Insects of the Families of Carabæi Hydrocanthari of Latreille, inhabiting North America, by Thomas Say.

Description and Chemical Analysis of the Retinasphalt, discovered at Cape Sable, Magothy River, Ann Arundel County, Maryland, by G. Troost.

Analysis of the Chrysoberyls of Haddam and Brazil, by Henry Seybert.

Geological Account of the Valley of the Ohio, in a letter from Daniel Drake, M.D., to Joseph Correa de Serra.

Tables of Observations on the Winds, the Currents, the Gulf Streams, the Comparative Temperature of the Air and Water, &c., made on the North Atlantic Ocean during the Twenty-six Voyages to and from Europe (principally between Philadelphia and Liverpool), between the years 1799 and 1817 inclusive, by John Hamilton.

Observations on the Trap Rocks of the Connewago Hills, near Middletown, Dauphin County, and of the Stony Ridge, near Carlisle, Cumberland County, Pennsylvania, by the Hon. John B. Gibson.

An Account of two North American Species of Cyprus, discovered in the State of Georgia; and of four Species of Kyllingia, found on the Brazilian Coast, and on the Rio de la Plata, South America, by William Baldwin, M.D.

Catalogue of Plants collected during a journey to and from the Rocky Mountains during the summer of 1820, by E. P. James, attached to the Exploring Expedition, commanded by Major S. H. Long, of the United States Engineers, by whom it was communicated to the Society, with the permission of the Hon. J. C. Calhoun, Secretary of War.

Remarks on the Sand Stone and Floetz Trap Formations of the western part of the

Transactions of the American Philosophical Society—*Continued.*

Valley of the Mississippi, by E. P. James, attached to the Exploring Expedition commanded by Major S. H. Long, of the United States Engineers, by whom it was communicated to the Society, with the permission of the Hon. J. C. Calhoun, Secretary of War.

Some Observations on the Anatomy and Physiology of the Alligator of North America, Lacerta Alligator, Gmel., Crocodilus Lucius, Cuvier. Communicated to the American Philosophical Society by M. N. Hents, Member of the Academy of Natural Sciences of Philadelphia.

Analysis of the Hydraulic Lime used in constructing the Erie Canal, in the State of New York, by Henry Seybert.

Papers on various subjects connected with the Survey of the Coast of the United States, by F. R. Hassler.

For a list of the several papers contained in this number, see page 420.

Mémoire pour accompagner le Tableau des Observations Météorologiques faites à Washington, depuis le 17 Avril, 1823, jusqu'au 18 Avril, 1824. Par Jules de Wallenstein, Membre Correspondant de l'Académie d'Histoire de Madrid.

On the Language, Manners, and Customs of the Berbers, or Brebers, of Africa. Communicated by William Shaler, Consul of the United States at Algiers, in a series of letters to Peter S. Du Ponceau, and by the latter to the Society.

Solution of the General Case of the Simple Pendulum, by Eugenius Nulty.

Notice of a new Crystalline Form of the Yenite of Rhode Island, by Dr. G. Troost.

NEW SERIES, VOL. III.—1830.

Experiments to determine the comparative Quantities of Heat evolved in the Combustion of the principal Varieties of Wood and Coal used in the United States for Fuel; and also to determine the comparative Quantities of Heat lost by the Ordinary Apparatus made use of for their Combustion, by Marcus Bull.

A Grammar of the Language of the Lenni Lenape, or Delaware Indians. Translated from the German MS. of the late Rev. D. Zeisberger, for the American Philosophical Society, by P. S. Du Ponceau.

Description of Eleven new Species of North American Insects, by N. M. Hents, Professor of Modern Languages in the University of North Carolina.

Description of six new Species of the Genus Unio, embracing the anatomy of the Oviduct of one of them, together with some Anatomical Observations on the Genus, by Isaac Lea.

On the Geographical Distribution of Plants, by C. Pickering, M.D.

An Account of some Human Bones found on the Coast of Brazil, near Santas, by C. D. Meigs, M.D.

Some Observations on the Moulting of Birds, by George Ord.

Experiments made on the Poison of the Rattle-Snakes; in which the Powers of the Hieraceum Venosum, as a Specific, were tested: together with some Anatomical Observations on this Animal, by R. Harlan, M.D.

On the Motion of Solids on Surfaces, in the two Hypotheses of Perfect Sliding and Perfect Rolling, with a particular examination of their small Oscillatory Motions, by Henry James Anderson, Professor of Mathematics and Astronomy, Columbia College, New York.

General Observations on the Birds of the Genus Tetrao; with a Synopsis of the Species hitherto known, by Charles Lucien Bonaparte, Prince of Musignano, &c.

Conchological Observations on Lamarck's Family of Naiades, by P. H. Nicklin.

Some further Experiments on the Poison of the Rattle-Snake, by R. Harlan, M.D.

Description of a new Genus of the Family of Naiades, including eight Species, four of which are new; also a description of eleven new Species of the Genus Unio from the Rivers of the United States, with observations on some of the Characters of the Naiades, by Isaac Lea.

Remarks on the use of the Maxillæ in Coleopterous Insects, with an account of two Species of the Family Telaphoridæ, and of three of the Family Mordellidæ, which ought to be the Type of two distinct Genera, by N. M. Hentz.

Description of a new Species of the Genus Astacus, by R. Harlan, M.D.

Notice of an Anatomical Peculiarity observed in the Structure of the Condor of the Andes (Vultur gryphus, Linn.), by R. Harlan, M.D.

On the Construction of the Eclipses of the Sun, by John Gummere.

Description of a Fragment of the Head of a new Fossil Animal discovered in a Marl Pit, near Moorestown, New Jersey, by Isaac Hays, M.D.

Description of a new Genus and new Species of extinct Mammiferous Quadruped, by John D. Godman, M.D.

NEW SERIES, VOL. IV.—1834.

Grammatical Sketch and Specimens of the Berber Language, preceded by four letters

Transactions of the American Philosophical Society—*Continued.*

on Berber Etymologies, addressed to the President of the Society, by William B. Hodgson, Esq.

Description of a new Species of Sanacenia, by Thomas Nuttall.

Description of a Species of Orang from the North-eastern Province of British East India, lately the kingdom of Assam, by Richard Harlan, M.D.

Silver Ores reduced by the Method of Becquerel, by Andres del Rio.

Observations on the Naiades, and Descriptions of New Species of that and other Families, by Isaac Lea.

Description of a new Genus of the Family Melaniana of Lamarck, by Isaac Lea.

Reports of a Committee of the American Philosophical Society, on Astronomical Observations; containing observations made in different parts of the United States, on the Solar Eclipse of February 12, 1831.

Synopsis Fungorum in America Boreali Media degentium. Secundum observationes Ludovici Davidis de Schweinitz.

Descriptions of the Inferior Maxillary Bones of Mastodons in the cabinet of the American Philosophical Society, with Remarks on the Genus Tetracaulodon (Godman), &c., by Isaac Hays, M.D.

On Irradiation, by Benjamin F. Joslin, M.D., Professor of Mathematics and Natural Philosophy in Union College, Schenectady, New York.

Names which the Lenni Lenape, or Delaware Indians, who once inhabited this country, had given to Rivers, Streams, Places, &c., &c., within the now States of Pennsylvania, New Jersey, Maryland, and Virginia; and also names of Chieftains and distinguished Men of that nation; with the significations of those names, and Biographical Sketches of some of those men, by the late Rev. John Heckewelder, of Bethlehem, Pennsylvania.

Notice of Fossil Bones found in the Tertiary Formation of the State of Louisiana, by Richard Harlan, M.D.

Notice of the Discovery of the Remains of the Ichthyosaurus in Missouri, N. A., by Richard Harlan, M.D.

Descriptions of New North American Insects, and Observations on some already described, by Thomas Say.

NEW SERIES, VOL. V.—1837.

On the Diurnal Variation of the Horizontal Needle, by Alexander Dallas Bache, Professor of Natural Philosophy and Chemistry in the University of Pennsylvania.

Observations on the Naiades, and Descriptions of New Species of that and other Families, by Isaac Lea.

On the Visceral Anatomy of the Python (Cuvier), described by Dandin as the Boa Reticulata, by J. P. Hopkinson, M.D., and J. Pancoast, M.D.

On the Longitude of the Hall of the American Philosophical Society, deduced from an Occultation of Aldebaran, observed by T. C. Walker, January 5th, 1830.

On the Crystals developed in Vermiculite by Heat, by Andus del Rio, Professor of Mineralogy in the American School of Mines.

Collections toward a Flora of the Territory of Arkansas, by Thomas Nuttall.

A remarkable Arrangement of Numbers, constituting a Magic Cyclo-oolite, by E. Nulty, of Philadelphia.

Observations to determine the Magnetic Dip, at Baltimore, Philadelphia, New York, West Point, Providence, Springfield, and Albany, by A. D. Bache, Professor of Natural Philosophy and Chemistry, and Edward H. Courtenay, Professor of Mathematics in the University of Pennsylvania.

Contributions to Electricity and Magnetism, by Joseph Henry, Professor of Natural Philosophy in the College of New Jersey, Princeton; late of the Albany Academy. No. 1. Description of a Galvanic Battery for producing Electricity of different intensities.

Contributions to Electricity and Magnetism, by Joseph Henry: No. 2. On the influence of a Spiral Conductor in Increasing the Intensity of Electricity from a Galvanic Arrangement of a Single Pair, &c.

Collection of Observations on the Solar Eclipse of November 30th, 1834, made at Philadelphia, Haverford, West Hills, Baltimore, the University of Virginia, Norfolk, Cincinnatti, and Nashville.

De Lingua Othomitorum Dissertatio, auctore Emanuele Naxera, Mexicano, Academiæ Literariæ Zacatecarum Socio.

Practical Rule for calculating from the Elements in the Nautical Almanac the circumstances of an Eclipse of the Sun for a particular place, by John Gummere, Teacher of Natural Philosophy and Mathematics in the Friends' School at Haverford, Pennsylvania.

Contributions to the Geology of the Tertiary Formations of Virginia, by William B.

Transactions of the American Philosophical Society—*Continued.*

Rogers, Professor of Natural Philosophy in the University of Virginia, and Henry D. Rogers, Professor of Geology in the University of Pennsylvania.

Observations on the Sulphurous Ether and Sulphate of Etherine (the true Sulphurous Ether), by R. Hare, M.D., Prof. of Chemistry in the University of Pennsylvania.

On the Difference of Longitude of several Places in the United States, as determined by Observation of the Solar Eclipse of November 30th, 1834, by Edward H. Courtenay, Professor of Mathematics in the University of Pennsylvania.

On the Reaction of the Essential Oils with Sulphurous Acid as evolved in union with Ether in the process of Etherification or otherwise, by R. Hare, M.D.

Of Sassambrin, a Resin evolved by Sulphuric Acid from Oil of Sassafras, which is remarkable for its efficacy in reddening that acid in its concentrated State, by R. Hare, M.D.

Process for Nitric Ether, or Sweet Spirits of Nitre, by means of an approved Apparatus, by R. Hare, M.D.

Description of an Electrical Machine, with a Plate, four feet in diameter, so constructed as to be above the operator; also of a Battery Discharger employed therewith, and some observations on the causes of the Diversity in the Length of the Sparks, erroneously distinguished by the terms Positive and Negative, by R. Hare, M.D.

On the Causes of the Tornado, or Water-Spout, by R. Hare, M.D.

Description of an Air-Pump of a new construction, which acts either as an Air-Pump or Condenser, or as both; enabling the operator to exhaust, to condense, to transfer, a Gas from one cavity to another, or to pass it through liquid, by R. Hare, M.D.

Of an improved Barometer Gauge Endiometer, by R. Hare, M.D.

On the Cause of the Collapse of a Reservoir while apparently subjected within to great pressure from a Head of Water, by R. Hare, M.D.

Sundry Improvements in Apparatus on Manipulation, by R. Hare, M.D.

Notes and Diagrams illustrative of the directions of the forces acting at and near the surface of the Earth, in different parts of the Brunswick Tornado of June 19th, 1835, by A. D. Bache.

Deductions from Observations made and Facts collected on the Path of the Brunswick Spout of June 19, 1835, by J. P. Espy., Memb. of the Amer. Phil. Society.

On the Relative Horizontal Intensities of Terrestrial Magnetism at several places in the United States, with the Investigation of Corrections for Temperature, and Comparisons of the Method of Oscillation in full and rarified air, by A. D. Bache.

NEW SERIES, VOL. VI.—1839.

Description of New Fresh-water and Land Shells, by Isaac Lea.

Descriptions of New North American Insects, and Observations on some already described, by Thomas Say; continued from Vol. IV., N. S., p. 480.

Notice of a Vein of Bituminous Coal recently explored in the vicinity of the Havana, in the Island of Cuba, by Richard Cowling Taylor and Thomas G. Clemson.

Observations on the Changes of Colour in Birds and Quadrupeds, by John Bachman, D.D., President of the Literary and Philosophical Society of Charleston, S. C.

Determination of the Longitude of several Stations near the Northern Boundary of Ohio, from Transits of the Moon and Moon-culminating Stars observed in 1838, by Andrew Talcott, late Capt. of the U. S. Engineers; by Sears C. Walker.

On the Magnetic Dip at Several Places in the State of Ohio, and on the relative Horizontal Magnetic Intensities of Cincinnati and London, by John Locke, M.D., Professor of Chemistry and Pharmacy, Medical College of Ohio, in a Letter to John Vaughan, Esq., Librarian of the Amer. Phil. Society.

New Formulæ relative to Comets, by E. Nulty.

Account of a Tornado which, towards the end of August, 1838, passed over the suburbs of the City of Providence, in the State of Rhode Island, and afterwards over a part of the Village of Somerset; also an Extract of a Letter on the same subject, from Z. Allen, Esq., of the City of Providence. Communicated by R. Hare, M.D.

Contributions to Electricity and Magnetism, by Joseph Henry. No. 3. On Electro-Dynamic Induction.

Engraving and Description of an Apparatus for the Decomposition and Recomposition of Water employed in the Laboratory of the Medical Department of the University of Pennsylvania, by R. Hare, M.D.

Improved Process for obtaining Potassium, by R. Hare, M.D.

Engraving and Description of a Rotatory Multiplier, or one in which one or more Needles are made to revolve by a Galvanic Current, by R. Hare, M.D.

Contributions to the Geology of the Tertiary Formations of Virginia, 2nd Series, by William B. Rogers and Henry D. Rogers.

Contributions to the Geology of the Tertiary Formations of Virginia, 2nd Series, continued; being a Description of several Species of Meiocene and Eocene Shells not before described, by William B. Rogers and Henry D. Rogers.

Transactions of the American Philosophical Society—*Continued.*

Report of the Committee on the Solar Eclipse of May 14th and 15th, 1836.
Abstract of Meteorological Tables in the possession of the Amer. Phil. Society.

NEW SERIES, VOL. VII.—1841.

Observations to determine the Magnetic Dip at various Places in Ohio and Michigan, by Elias Loomis, Professor of Mathematics and Natural Philosophy in Western Reserve College; in a Letter to Sears C. Walker, Esq., M.A.P.S.
Letter from the Rev. Charles Gutslaff to John Vaughan, Esq., on the Chinese System of Writing.
Letter from Mr. Duponceau to the same; ordered by the Society to be published, with the preceding one, to which it is an answer.
On the Extrication of the Alkalifiable Metals, Barium, Strontium, and Calcium, by Robert Hare, M.D.
Astronomical Observations made at Hudson Observatory, latitude 41° 14′ 37″ N. and longitude 5h. 58m. 42s. W., with some account of the Building and Instruments, by Elias Loomis, Professor of Mathematics and Natural Philosophy in Western Reserve College, Hudson, Ohio.
Description of an Apparatus for deflagrating Carburets, Phosphurets, or Cyanides, in Vacuo, or in an Atmosphere of Hydrogen; with an Account of some results obtained by these and by other means, especially the isolation of Calcium, by Robert Hare, M.D.
Upon a New Compound of the Dento-Chloride of Platinum, Nitric Oxide, and Chlorohydric Acid, by Henry D. Rogers and Martin H. Boje, Graduate of the University of Copenhagen.
On the Longitude of several Places in the United States, as deduced from the Observations of the Solar Eclipse of September 18th, 1838, by E. Otis Kendall, Professor of Mathematics in the Central High School of Philadelphia.
On the Patella Amæna of Say, by Isaac Lea.
Observations of the Magnetic Intensity at 21 Stations in Europe, by A. D. Bache.
Additional Observations of the Magnetic Dip in the United States, by Elias Loomis.
On a New Principle in regard to the Power of Fluids in Motion to produce Rupture of the Vessels which contain them; and on the distinction between Accumulative and Instantaneous Pressure, by Charles Bonnycastle, Professor of Mathematics in the University of Virginia.
On the Storm which was experienced throughout the United States, about the 20th of December, 1836, by Elias Loomis.
Observations on Nebulæ, with a fourteen-feet Reflector, made by H. L. Smith and E. P. Mason, during the year 1839, by E. P. Mason.
Engraving and Description of an Apparatus and Process for the rapid Congelation of Water by the explosive evolution of Ethereal Vapour, consequent to the combined influence of Rarefaction and the absorbing power of Sulphuric Acid, by Robert Hare, M.D.
On the Insufficiency of Taylor's Theorem, as commonly investigated; with objections to the demonstrations of Poisson and Cauchy, and the assumed generalization of Mr. Peacock; to which are added a new investigation, and Remarks on the Development and Continuity of Functions, by Charles Bonnycastle.
Notice of the Oolitic Formation in America, with Descriptions of some of its Organic Remains, by Isaac Lea.
Observations to determine the Horizontal Magnetic Intensity and Dip, at Louisville, Kentucky, and at Cincinnati, Ohio, by John Locke, M.D., Professor of Chemistry in the Medical College of Ohio.
Observations upon the Meteors of August, by C. G. Fershey, City Engineer of Natchez, and late Professor of Mathematics and Civil Engineering, Jefferson Coll., Miss.
On the Change effected in the Nitrates of Potash and Soda by the limited application of Heat, with the view of obtaining pure Oxygen, by which they are only partially convertible into Hypo-Nitrites; also on a liquid and a gaseous ethereal compound resulting from the reaction of nascent Hypo-Nitrious Acid with the elements of Alcohol, by R. Hare, M.D.
Descriptions of a New Species and Genera of Plants in the natural Order of the Compositæ, collected in a Tour across the Continent to the Pacific, a residence in Oregon, and a visit to the Sandwich Islands and Upper California, during the years 1834 and 1835, by Thomas Nuttall.
Description of Nineteen New Species of Colimacea, by Isaac Lea.

NEW SERIES, VOL. VIII.—1843.

Contributions to Electricity and Magnetism, by Joseph Henry.
Description of an entire Head and various other Bones of the Mastodon, by William E. Horner, M.D., and Isaac Hays, M.D.

Transactions of the American Philosophical Society—*Continued*

On the Cecidomyia Destructor, or Hessian Fly, by Miss M. H. Morris.
Remarks on the Dental System of the Mastodon; with an account of some Lower Jaws in Mr. Koch's collection, St. Louis, Missouri, where there is a solitary Tusk on the right side, by William E. Horner, M.D.
Observations to determine the Magnetic Intensity at several places in the United States, with some additional Observations of the Magnetic Dip, by Elias Loomis.
On the Perchlorate of the Oxide of Ethule, or Perchloric Ether, by Clark and Martin H. Boye.
Observations on the Storm of December 15, 1839, by William C. Redfield, A.M.
On the Perturbations of Meteors approaching near the Earth, by Benjamin Pierce, A.A., Hollis Professor of Mathematics and Natural Philosophy in Harvard University; in a letter to S C. Walker, Esq.
Researches concerning the Periodical Meteors of August and November, by Sears C. Walker, A.P.S.
Astronomical Observations made at Hudson Observatory, latitude 41° 14′ 40″ North, and longitude 5h. 25m. 45s. West, by Elias Loomis.
Expansion of F. $(x+h)$, by Pike Powers, of the University of Virginia.
Description of New Fresh-water and Land Shells, by Isaac Lea.
Description and Notices of New and Rare Plants in the Natural Orders, Lobeliaceæ, Campanulaceæ, Vaccinieæ, Ericaceæ, collected in a journey over the continent of North America, and during a visit to the Sandwich Islands and Upper California, by Thomas Nuttall.
Observations on the Geology of the Western Peninsula of Upper Canada and the western part of Ohio, by William B. Rogers and Henry D. Rogers.
Observations of the Magnetic Dip in the United States. 4th Series, by E. Loomis.
Supplementary Observations on the Storm which was experienced throughout the United States, about December 20, 1836, by Elias Loomis.
Astronomical Observations made at several places in the United States, by J. N. Nicollet.
Observations of Encke's Comet, at the High School Observatory, Philadelphia, March and April, 1842; with the Fraunhofer Equatorial, by Sears C. Walker and E. Otis Kendall.
Observations of the Magnetic Dip, made in the United States in 1841, by J. N. Nicollet.

NEW SERIES, VOL. IX.—1846.

Continuation of Mr. Lea's Paper on Fresh-water and Land Shells.
Account of a Trigonometrical Survey of Massachusetts, by Simeon Borden, Esq.; with a comparison of its Results with those obtained from Astronomical Observations, by Robert Treat Paine, Esq. Communicated by Mr. Borden.
Observations on Egyptian Ethnography, derived from Anatomy, History, and the Monuments, by Samuel George Norton, M.D.
On two Storms which were experienced throughout the United States in the month of February, 1842, by Elias Loomis.
On the Conversion of Benzoic into Hippuric Acid, by James C. Booth and Martin H. Boye.
Account of the Observatory and Instruments in the United States Military Academy at West Point; with observations on the Comet of 1843, by W. H. C. Bartlett.
Memoir of the Character and Prospects of the Copper Region of Gibara, and a Sketch of the Geology of the North-east part of the Island of Cuba, by R. C. Taylor.
Notice of Fossil Arborescent Ferns of the Family Sigillaria, and other Coal Plants, exhibited in the Roof and Floor of a Coal Seam in Dauphin County, Pennsylvania, by Richard C. Taylor.
Description of some new Fossil Shells from the Tertiary of Petersburg, Virginia, by Henry C. Lea.
Description of new Fresh-water and Land Shells, by Isaac Lea.
Observations made in the years 1838, 1839, 1840, 1841, 1842, and 1843, to determine the Magnetical Dip and the Intensity of Magnetical Force in several parts of the United States, by John Locke, M.D., Professor of Chemistry and Pharmacy in the Medical College of Ohio.
Observations of the Magnetic Dip, made at several positions, chiefly on the South-western and North-eastern frontiers of the United States; and the Magnetic Declination at two positions on the River Sabine, in 1840, by Major James D. Graham, of the United States Corps of Topographical Engineers.

NEW SERIES, VOL. X.—1853.

Astronomical Observations made at Hudson Observatory, latitude 41° 14′ 42″ 6‴ North, and longitude 5h. 25m. 39s. 5‴ West. 3rd Series, by Elias Loomis.
Supplementary Note on the Construction and different Forms of the Magic Cyclovolute, by E. Nulty.

Transactions of the American Philosophical Society—*Continued.*

Materials towards a History of the Coleoptera Longicornia of the United States, by S. S. Haldeman.
Description of New Fresh-water and Land Shells, by Isaac Lea.
Memoir explanatory of a new Perpetual Calendar, Civil and Ecclesiastical, Julian and Gregorian, by William M'Ilvaine.
On the Corpus Lutium, by Charles D. Meigs, M.D., Member of the American Philosophical Society, Professor of Midwifery and Diseases of Women and Children in Jefferson Medical College.
Investigations which led to the Detection of the Coincidence between the Computed Place of the Planet Leverrier, and the Observed Place of a Star recorded by Lalande, in May, 1795, by Sears C. Walker.
Memoir on the Reproduction of the Opossum, Didelphis Virginiana, by Charles D. Meigs, M.D.
On some of the Results of a Series of Experiments relative to different parts of Gunnery, by Captain Robert F. Stockton, of the United States Navy. Communicated by Professor Henry.
On the Decomposing Power of Water at High Temperatures, by R. A. Tilghman.
On the Neutral Sulphate of the Oxide of Ethyle, and the products of its Decomposition by Water, by Charles M. Wetherill, Doctor of Philosophy.
De Calculo Eclipsium Besseliano Commentatio, Auctore Dre. Gustavo Adolpho Jahn, Lipsiæ, 1848.
On the Longitude of Washington, computed from the Moon Culminations, observed during the years 1839—1842, inclusive, by Lieut. J. M. Gilliss.
On the Accuracy of the Tabular Longitude of the Moon to be obtained by the constitution of New Lunar Tables, by Miers Fisher Longstruth.
On the Organization of the Genus Gregarina of Dufour, by Joseph Leidy, M.D.
Some observations on Nematoidea Imperfecta, and descriptions of three Parasitic Infusoriæ, by Joseph Leidy, M.D.
Meteorological Observations at Napa Keang (Loo Choo), 1848, 1849, made by Dr. Bettelheim.
Description of New Species of the Family Unionidæ, by Isaac Lea.
Description of a New Genus (Basistoma) of the Family Melaniana, together with some New Species of American Melaniæ, by Isaac Lea.
Description of a New Species of Helix from California, and a new characteristic form of certain American Colimaceæ, by Isaac Lea.
On the Fossil Foot-marks in the Red Sandstones of Pottsville, Schuylkill County, Pennsylvania, by Isaac Lea.
Description of an Extinct Species of American Lion, Felis Atrox, by J. Leidy, M.D.
A Memoir on the Extinct Dicotylinæ of America, by Joseph Leidy, M.D.
Chemical Examination of two Minerals from the neighbourhood of Reading, Pennsylvania; and on the Occurrence of Gold in Pennsylvania, by Charles M. Wetherill, Ph. D.
On a New Variety of Asphalt (Melan. Asphalt), by Charles M. Wetherill, Ph. D.
On the Decomposition of the Alkaline Sulphates, by Hydrochloric Acid and Chlorine, by R. A. Tilghman.
Notes on the Classification of the Carabidæ of the United States, by J. L. Le Conte.
Revision of the Elateridæ of the United States, by John L. Le Conte, M.D.

APPENDIX.

Index of Genera.

NEW SERIES, VOL. XI. PART 1.—1857.

Biographical Memoir of the late François André Michaux, by Elias Durand.
On Adiposine, and its formation, by Charles D. Wetherill, Ph. D.
Revision of the Cicindelæ of the United States, by John L. Le Conte, M.D.
On a new Genus of Bridæ, from Cuba, by Edward Halowell, M.D.
Notice of some New and Rare Species of Scincidæ in the collection of the Academy of Natural Sciences of Philadelphia, by Edward Halowell, M.D.
Notice of Remains of the Walrus discovered on the coast of the United States, by Joseph Leidy, M.D.
Descriptions of the Remains of Fishes from Carboniferous Limestone of Illinois and Missouri, by Joseph Leidy, M.D.
Remarks on Saurocephalus and its allies, by Joseph Leidy, M.D.
Observations on the Extinct Peccary of North America; being a sequel to "A Memoir of the Extinct Dicotylinæ of America, by Joseph Leidy, M.D.
Remarks on the Structure of the Feet of Megalonyx, by Joseph Leidy, M.D.
Notes on certain Modes of Measuring Minute Intervals of Time, by J. C. Adamson.

United States Exploring Expedition.

VOL. I. to V.—Narrative of the United States Exploring Expedition, during the years 1838, 1839, 1840, 1841, and 1842, by Charles Wilkes, U. S. N., Commander of the Expedition, 5 vols., royal 8vo, cloth.—Vol. I. Portrait of Commander Wilkes, 2 Maps, 18 plates, and 83 woodcuts.—Vol. II. Portrait of Commander Hudson, 3 Maps, 13 plates, and 60 woodcuts.—Vol. III. One Map, 12 plates, and 60 woodcuts.—Vol. IV. Three Maps, 15 plates, and 38 woodcuts.—Vol. V. Four Maps, 15 plates, and 54 woodcuts. New York (1844), 1855, 1856. £5 5s.

VOL. VI.—Ethnography and Philology, by Horatio Hale, Philologist of the Expedition, 4to. Ethnography, pp. 225, 3 Maps; Philology, pp. 229 to 666. Philadelphia, 1846.

VOL. VII.—Zoophytes, by James D. Dana. The letter-press in one volume 4to, pp. 740. Philadelphia, 1846. The Atlas of 61 plates in folio. Philadelphia, 1849.

VOL. VIII.—Mammalia and Ornithology, by Titian R. Peale, one of the Naturalists of the expedition. 4to, 20 woodcuts, 15 plates of Mammalia, and 84 plates of Birds, pp. xxv. and 338. Philadelphia, 1848. (suppressed.)

VOL. IX.—The Races of Men, and their Geographical Distribution, by Charles Pickering, M.D. 4to, pp. vii., 447, and 12 coloured plates. Philadelphia, 1848.

VOL. X.—Geology, by James D. Dana. 1 vol. of letter-press, 4to, pp. xii. and 756, with a Map, and a folio volume containing 21 plates and 4 pp. of text. Philadelphia, 1849.

VOL. XI.—Meteorology. Journal of Meteorological Observations, by Charles Wilkes, U. S. N., Member of the American Philosophical Society, &c.; with 25 Illustrations, Map, and 24 plates, 4to, pp. lviii. and 726. Philadelphia, 1851.

VOL. XII.—Mollusca and Shells, by Augustus A. Gould, M.D. 4to, pp. xv. and 510. Philadelphia, 1852. The Atlas is not published yet.

VOL. XIII.—Crustacea, by James D. Dana. The letter-press in 2 parts, 4to, pp. 1620. Philadelphia, 1852, 1853. Atlas, complete in 96 engraved and partly coloured plates, large folio. Philadelphia, 1855.

VOL. XIV.—Botany. Phanerogamia, by Asa Gray, M.D. Vol. I., with a folio Atlas of 100 plates, 4to, pp. 777. New York, 1854. Atlas. New York, 1857.

VOL. XV.—The Geographical Distribution of Animals and Plants, by Charles Pickering, M.D., Member of the Scientific Corps attached to the expedition. 4to, pp. 168, and an Index of Foreign Words. Boston, 1854.

VOL. XVI.—Botany. Cryptogamia, Filices, including Lycopodiaceæ and Hydropterides, by William D. Breckenridge. 4to, pp. 357, and an Atlas of 46 plates, folio. Philadelphia, 1855.

This expedition consisted of six vessels from the United States Navy, and was absent about four years. The Narrative contains comprehensive and interesting accounts of Madeira, Brazil, Terra del Fuego, Chili, Peru, Panmotu Group, Tahiti, Samoan Group, New South Wales, New Zealand, the Islands of the South Pacific and Antarctic Oceans, the New Antarctic Continent, California, and the North-west Coast of Oregon. The scientific results of this expedition are of the highest importance, and it is to be regretted that government has published only one hundred copies of each of the Reports thereon (Vols. VI. to XVI.).

III.

THEOLOGY.

BIBLICAL COMMENTARIES, ECCLESIASTICAL BIOGRAPHY AND HISTORY, MISSIONARY ENTERPRISE, SACRED PHILOLOGY, SERMONS, ETC., ETC.

Abeel.—The Missionary Convention at Jerusalem, by the Rev. David Abeel. 12mo. New York, 1838.

Abeel.—Memoirs of the Rev. David Abeel, by the Rev. G. R. Williamson. 18mo. New York, 1849. cloth. 3s.

Adams.—The Psalms of Life. A Compilation of Psalms, Hymns, Chants, Anthems, &c., embodying the Spiritual, Progressive, and Reformatory Sentiment of the present Age, by John S. Adams. 12mo. pp. 262, Boston, 1857. cloth. 5s.

Adams.—Letters of John Quincy Adams to his Son, on the Bible and its Teachings. 18mo, pp. 128. Auburn, 1848. cloth. 2s. 6d.

Adams.—The Friends of Christ in the New Testament. Thirteen Discourses by Nehemiah Adams, D.D., Pastor of Essex Street Church, Boston. Second Edition, 8vo. Boston, 1853. cloth. 7s. 6d.

Adams.—Christ a Friend. Thirteen Discourses by Nehemiah Adams, D.D., 8vo, pp. 290. Boston, 1855. cloth. 6s.

Adams.—The Communion Sabbath, by Nehemiah Adams, D.D., Pastor of Essex Street Church, Boston. 8vo, pp. 216. Boston, 1856. cloth. 6s.

Adams.—The Elements of Christian Science, a Treatise upon Moral Philosophy and Practice, by William Adams, S.F.P. 8vo. Philadelphia, 1850. cloth. 12s. 6d.

Adams.—The Three Gardens—Eden, Gethsemane, and Paradise; or, Man's Ruin, Redemption, and Restoration, by William Adams, D.D. crown 8vo, pp. 284. New York, 1856. cloth. 6s. 6d.

Akerly.—Voltaire and Rousseau against Atheists; or, Essays and detached pages from those writers, in relation to the Being and Attributes of God. Selected and Translated by I. Akerly. 12mo. New York. cloth. 3s.

Alexander.—Brief Compendium of Bible Truth, by Archibald Alexander, D.D. With Portrait. 12mo. New York. cloth. 5s. 6d.

Alexander.—Thoughts on Religious Experience, by Archibald Alexander, D.D. post 8vo. Philadelphia. 4s. 6d.

Alexander.—The Canon of the Old and New Testaments ascertained, or the Bible complete without the Apocrypha and unwritten Traditions: a new edition, revised for the Presbyterian Board of Publications, by Archibald Alexander, D.D. 12mo, pp. viii. and 359. Philadelphia, 1851. 5s.

Alexander.—Biographical Sketches of the Founder and Principal Alumni of the Logan College, &c., by A. Alexander, D.D. 8vo. Philadelphia, 1851.

Alexander.—Outlines of Moral Science, by Archibald Alexander, D.D. 12mo. New York, 1852. cloth. 5s. 6d.

Alexander.—A History of the Israelitish Nation, from their Origin to their Dispersion at the Destruction of Jerusalem by the Romans, by Archibald Alexander, D.D., late Professor in the Theological Seminary at Princeton, New Jersey. 1 vol. 8vo. Philadelphia, 1853. cloth. 15s.

Alexander.—The Life of Archibald Alexander, D.D., First Professor in the Theological Seminary at Princeton, New Jersey, by James W. Alexander, D.D. royal 8vo, pp. xii. and 700, with a Portrait. New York, 1854. cloth. 16s.

Alexander.—The Earlier Prophecies of Isaiah, by Joseph Addison Alexander. 8vo. New York, 1846. 15s.

Alexander.—The Later Prophecies of Isaiah, by Joseph A. Alexander. 8vo. New York, 1847. 15s.

Alexander.—Isaiah Illustrated and Explained, by Prof. J. A. Alexander: an Abridgment of the Author's Critical Commentary on Isaiah. 2 vols. 12mo. New York, 1851. cloth. 16s.

Alexander.—The Psalms Translated and Explained, by Joseph A. Alexander. 3 vols. 8vo, pp. 1100. New York, 1850. cloth. £1 4s.

Alexander.—A Commentary on the Acts of the Apostles, by J. A. Alexander, D.D. 2 vols. 12mo. New York, 1857.

Alexander.—Consolation, in Discourses on Select Topics, addressed to the Suffering People of God, by W. Alexander, D.D. 8vo. New York, 1853. cloth. 12s.

Alger.—History of the Cross of Christ, by the Rev. William R. Alger. 18mo, pp. 96. Boston, 1851. 2s 6d.

Alleine.—Life and Death of the Rev. Joseph Alleine, A.B. To which are added his Christian Letters; with a Preface by Alexander Duff, D.D. 8vo. New York, 1840.

Allen.—Reason, the only Oracle of Man; or, a Compendious System of Natural Religion, by Col. Ethan Allen. 8vo, pp. 172. Boston, 1854. 3s. 6d.

Allen.—Memoir of the Rev. Benjamin Allen, by the Rev. Thomas G. Allen. 8vo. Philadelphia, 1832.

Biblical Repertory and Princeton Review, edited by the Rev. Charles Hodge, D.D. Published quarterly. 8vo. Philadelphia. sewed. Annual subscription, 16s. 28 vols. published at the end of 1856.

Biblical Repository and Classical Review, conducted by Drs. Robinson, Peters, Edwards, and others, from the commencement in 1831 to July, 1850, with General Index to 1st and 2nd series, by Dr. Agnew; in all 80 parts. 8vo. New York. sewed.

Bibliotheca Sacra and American Biblical Repository. Conducted by Professor E. A. Park, and T. H. Taylor, M.A., of Andover, with the special co-operation of Dr. Robinson, and Professors H. B. Smith, G. E. Day, D. H. Allen, Dr. W. Lindsay Alexander, of Edinburgh, and Dr. Samuel Davidson, of Manchester. In quarterly parts, at 3s. 6d. Annual subscription, 14s. January, 1844, to December, 1856, 52 numbers, forming 13 vols. 8vo. Andover.

Bibliotheca Sacra.—Index to the Bibliotheca Sacra and American Biblical Repository, vols. I. to XIII.; containing an Index of Subjects and Authors, a Topical Index and a List of Scripture Texts, by W. F. Draper. 8vo, pp. vi, 14, and 224. Andover, 1857. 12s.

In 1843, Professor Edward Robinson commenced the Publication of the Bibliotheca Sacra, or Tracts and Essays connected with Biblical Literature and Theology. The work was published at New York. In 1844 it was removed to Andover, and its plan was enlarged and somewhat modified. The New Series came under the editorial care of Professor B. B. Edwards and Professor E. A. Park, assisted by Dr. Robinson and others. Its title was changed to Bibliotheca Sacra and Theological Review.

In January, 1851, the American Biblical Repository was transferred from New York to Andover, and united with the Bibliotheca Sacra, under the present title, Bibliotheca Sacra and American Biblical Repository.

The Biblical Repository was established at Andover, by Professor Edward Robinson, in 1831. In 1835, the American Quarterly Observer, which was commenced in Boston, in 1833, by Professor B. B. Edwards, was united with it, and Professor Edwards became sole editor of the combined periodicals. The Repository, thus united, continued to be published at Andover till 1837, when it was removed to New York, under the Editorial care of Absalom Peters, D.D. From October, 1840, to April, 1842, the Rev. S. B. Treat was associated with Dr. Peters. In 1842 he resigned his place to J. Holmes Agnew, D D. In July, 1842, Dr. Peters retired, and Dr. Agnew became sole editor. In 1845 Dr. Agnew transferred his office to the Rev. W. H. Bidwell, who conducted the work for three years, when it passed into the hands of the Rev. J. M. Sherwood, under whose charge it continued until its union with the Bibliotheca Sacra in 1851.

The Repository had then closed its Sixth Volume, Third Series; the Bibliotheca Sacra, its Seventh Volume, Second Series. Thus the present Volume (1856) is the Thirteenth of the Bibliotheca Sacra, and the Twelfth of the Repository in the continued Series, and the Forty-fourth of the Repository in the entire Series.

Professor Edwards retired from the editorial care of the work in 1852. During the past five years it has been edited by Professor Edwards, A. Park, and Samuel H. Taylor, LL.D., Principal of Philadelphia Academy, Andover, Massachusetts.

The First Series of the Repository was commenced in January, 1831; the Second, 1839; and the Third, 1845. The First Series of the Bibliotheca Sacra consists of only Three Numbers, published in 1843. Of the Two Works there have been published 44 Volumes, which are thus designated—

BIBLICAL REPOSITORY.

First Series, 12 vols. 1831—1838.
Second Series, 12 vols. 1839—1844.
Third Series, 6 vols. 1845—1850.

BIBLIOTHECA SACRA.

First Series, 3 Numbers, 1843.
Second Series, 13 volumes, 1844—1856.

An Index to the First and Second Series of the Repository, extending from 1831 to 1844, was prepared and published by Dr. Agnew. Mr. Draper's Index embraces the Second Series of the Bibliotheca Sacra, from 1844 to 1856, and the American Biblical Repository since the Union in 1851.

Blaikie.—The Philosophy of Sectarianism; or, a Classified View of the Christian Sects in the United States; with Notices of their Progress and Tendencies, illustrated by Historical Facts and Anecdotes, by the Rev. Alexander Blaikie. 8vo. Boston, 1854. cloth. 6s. 6d.

Linn.—An Analytical Index of Parallel Reference to the Cases adjudged in the several Courts of Pennsylvania: with an Appendix containing a Collection of Cases overruled, decreed, doubted, or limited in their Application, by Samuel Linn, Esq. 8vo, pp. 768. New York, 1857. £1 10s.

Livermore.—A Treatise on the Law of Principal and Agent, and of Sales by Auction, by S. Livermore. 2 vols. 8vo. Baltimore, 1818. sheep. £1 10s.

Livingston.—Report made to the General Assembly of the State of Louisiana of the Plan for the Penal Code for the said State, by Edward Livingston, Member of the House of Representatives from the Parish of Plaquemines. 8vo. New Orleans, 1822.

Livingston.—System of Penal Law for the United States, by Edward Livingston (afterwards Secretary of State). folio. Washington, 1828.

Livingston.—A System of Penal Law for the State of Louisiana, consisting of a Code of Crimes and Punishments, a Code of Procedure, a Code of Evidence, a Code of Reform and Prison Discipline, a Book of Definitions. Prepared under the Authority of a Law of the said State, by Edward Livingston. To which are prefixed, a Preliminary Report on the Plan of a Penal Code, and Introductory Reports to the several Codes embraced in the System of Penal Law. royal 8vo, pp. 745. Philadelphia, J. Ray, Jun. 1833.

First printed at New Orleans, in 1823 and 1824, and the year following, in French, at the same place.

Livingston.—A Penal Code for the State of Louisiana. 8vo. Philadelphia, 1834. £1 5s.

Livingston.—Law Register: containing a Complete List of Lawyers in the United States; to which is added, a Treatise on the Rights, Duties, and Liabilities of Lawyers (for the two years beginning May, 1856, and ending May, 1858), by John Livingston. imp. 8vo, pp. vi. and 356. New York, 1856. 18s.

Lockwood.—Lockwood's Reports. An Analytical and Practical Synopsis of all the Cases Argued and Reversed in Law and Equity, in the Court for the Correction of Errors of the State of New York, from 1799 to 1847, by Ralph Lockwood. 8vo. New York, 1848. £1 5s.

Lomax.—Digest of the Laws of Real Property, by John Taylor Lomax. 3 vols. 8vo. Richmond, 1855. £5 5s.

Loomis.—The Laws of the Common Carrying Trade, also of Marine and Life Insurance, by J. V. Loomis. 18mo. New York. 3s.

Loring.—The Principles and Rules of the Law regulating the Property of Husband and Wife, and Civil Actions therefore, by Edward G. Loring. 8vo. Boston, 1856.

Loring.—Arbitration of Common Law in Equity, and under the Statutes of the States of the United States, by E. G. Loring, Esq. 8vo. Boston, 1856.

Mackeldey.—Compendium of Modern Civil Law, edited by Prof. Philip Ignatius Kaufmann. 2nd American from 12th German edition, by Prof. Ferdinand Mackeldey. 8vo. New York, 1855. £1 10s.

M'Kenney.—Code of the Civil and Criminal Procedure of the State of New York, reported complete by the Commissioners on Practice and Pleadings, by M'Kenney. 2 vols. 8vo. Albany. £2 16s.

M'Laughlin.—Appointments of Auditors, &c., by the Inferior Courts of Philadelphia, briefly Reviewed, by D. M'Laughlin. 8vo. Philadelphia, 1851.

Manual for the Use of the Legislature of the State of New York, for the Year 1855. 16mo, pp. 443. Albany, N. Y., 1855. 6s.

Marvin.—Legal Bibliography; or, a Thesaurus of American, English, Irish, and Scotch Law Books; together with some Continental Treatises, interspersed with Critical Observations upon their various editions and authority;

to which is prefixed a copious List of Abbreviations, by T. G. Marvin. 8vo, pp. viii. and 800. Philadelphia, 1847.

This book being intended for practical purposes, not for the study of Bibliography, the titles are given with the usual inversion, which renders a manual more accessible, but almost destroys the possibility of reconstruing the real words of the title page. The number of pages is not stated.

We are unable to judge how far this book is complete, and must content ourselves with the Author's own opinion on the subject, which is given in the following words :—

"With regard to Law books of the United States, this Volume will be found to contain a tolerably complete list. For this department of the Work, in addition to the resources afforded by the ample Library of the Dow Law School, gentlemen in various States have kindly rendered me material assistance, to whom I am under very great obligation." (The Author then goes on to thank several Scholars to whom he is especially obliged.)

The list is alphabetical, and has no systematical Index, which is a great defect.

Mayo and **Moulton.**—Army and Navy Pension Laws, and Bounty Lands of the United States; with Resolutions of Congress, from 1776 to 1852, by Robert Mayo and F. Moulton. 8vo. Washington, 1852. £1 1s.

Philadelphia, 1855. £2 2s.

Wharton.—A Treatise on the Law of Homicide in the United States: to which is appended a Series of Leading Cases on Homicide, now out of Print, or existing only in Manuscript, by Francis Wharton. 8vo, pp. 538. Philadelphia, 1855. £1 5s.

Wharton and **Stillé.**—A Treatise on Medical Jurisprudence, by Francis Wharton, and M. Stillé, M.D., Lecturer on the Principles and Practice of Medicine in the Philadelphia Association for Medical Instruction. 8vo, pp. 844. Philadelphia, 1855. £1 16s.

Wheeler.—A Practical Treatise on the Law of Slavery: being a Compilation of all Decisions made on that subject, in the several Courts of the United States and State Courts; with Copious Notes and References to the Statutes and other Authorities, systematically arranged, by Jacob D. Wheeler, Esq., Counsellor at Law. 8vo, pp. xviii. and 476. New York, 1837. sheep.

Whittaker.—Practice and Pleading under the Code; with Appendix of Forms, and Text of Code and Rules, by Henry Whittaker. 2nd and revised edition. 2 vols. 8vo. New York, 1854.

V.

MEDICINE AND SURGERY.

ANATOMY, BALNEOGRAPHY, DENTISTRY, MATERIA MEDICA, MEDICAL JURISPRUDENCE, OBSTETRICS, PATHOLOGY, PHYSIOLOGY, PSYCHOLOGY, VETERINARY ART.

Alden.—Historical Sketches of the Origin and Progress of the Massachusetts Medical Society, by Ebenezer Alden, M.D., Fellow of the Society. 8vo. Boston, 1838.

American Journal of Insanity, edited by the Medical Officers of the New York State Lunatic Asylum. Published Quarterly, in 8vo Parts, 4 Parts forming a volume. Vol. XIII., commencing in July, 1856. Utica, N. Y. annual subscription, £1 4s.

American Journal of Dental Science, edited by Chapin A. Harris, M.D., D.D.S., Alfred A. Blandy, M.D., D.D.S., and A. Snowden Piggot, M.D. 8vo. Published at Philadelphia in Quarterly Parts. sewed. 6s.

American Journal of the Medical Sciences, edited by Isaac Hays, M.D, 8vo. 1841 to 1857, 68 Numbers, forming 34 Volumes, and continued Quarterly. Philadelphia, 1841 to 1857. per part, 7s. 6d.

American Medical Monthly, edited by E. H. Parker and J. H. Douglas. New York. annual subscription, 18s.

Andral.—Essay on the Blood in Disease, by G. Andral. Translated by Drs. Meigs and Stillé. 8vo. Philadelphia. 7s.

Andral.—Manual of Diagnosis of Diseases of the Heart, preceded by Clinical Researches for the Study of those Affections, by G. Andral. Translated from the French by S. Kneeland, Jun., M.D. 12mo. Philadelphia. 5s.

Aran.—Practical Manual of the Diseases of the Heart and Great Vessels; a Work intended to facilitate and extend the Study of these Diseases, by F. A. Aran. Translated by W. A. Harris, M.D. 18mo. Philadelphia. 6s.

Armstrong.—The Summer of the Pestilence; a History of the Ravages of the Yellow Fever in Norfolk, Virginia, A.D. 1855, by George D. Armstrong, D.D., Pastor of the Presbyterian Church, in Norfolk. 12mo, pp. 192. Philadelphia, 1856. cloth. 2s. 6d.

Arthur.—A Popular Treatise on the Diseases of the Teeth; including a Description of their Structure and Modes of Treatment, together with the usual Mode of Inserting Artificial Teeth, by Robert Arthur, D.D.S. 28 Illustrations. 12mo, pp. 188. Philadelphia, 1846. cloth. 3s. 6d.

Atlee.—Notes on M. Bernard's Lectures on the Blood; with an Appendix, by Walter F. Atlee, M.D. crown 8vo, pp. 224. Philadelphia, 1854. cloth. 5s.

Bartlett.—An Essay on the Philosophy of Medical Science, by Elisha Bartlett. 8vo. Philadelphia, 1844. cloth. 12s.

Bartlett.—The History, Diagnosis, and Treatment of the Fevers of the United States, by Elisha Bartlett, M.D. 4th edition, revised by A. Clark, M.D. royal 8vo, pp. xxxii. and 610. Philadelphia, 1856. cloth. 18s.

Barton.—The Cause and Prevention of Yellow Fever, contained in the Report of the Sanitary Commission of New Orleans, by E. H. Barton, M.D., A.M., Chairman of the Sanitary Commission, &c. &c.; with a large Plan of New Orleans. 8vo, pp. 348. Philadelphia, 1855. cloth 12s.

Baudelocque.—Treatise on Puerperal Peritonitis, by A. C. Baudelocque. Translated by G. S. Bedford. 8vo. New York, 1831. 9s.

Beck.—Elements of Medical Jurisprudence, by Theodoric Romeyn Beck, M.D., LL.D., Professor of Materia Medica in the Albany Medical College, &c. &c., and John R. Beck, M.D., Professor of Materia Medica and Medical Jurisprudence in the College of Physicians and Surgeons of the City of New York, &c. 10th edition. In 2 vols. 8vo, pp. xxiii. and 866, and 948. Albany, 1850. sheep. £4

Beck.—Essays on Infant Therapeutics; to which are added, Observations on Ergot, History of the Origin of Mercury in Inflammatory Complaints: together with the Statistics of Death from Poisoning in New York, in the years 1841—1843, by John B. Beck, M.D. 2nd edition. 12mo. New York, 1855. 3s. 6d.

Beck.—Adulterations of various Substances used in Medicine and the Arts, with the means of Detecting them, intended as a Manual for the Physician, the Apothecary, and the Artizan, by L. C. Beck. 12mo. New York, 1846. 9s.

Bedford.—Clinical Lectures on the Diseases of Women and Children, by Gunning S. Bedford, A.M., M.D. 4th edition. 8vo, pp. xvi. and 602. New York, 1856. cloth. 18s.

Beecher.—Letters to the People, on Health and Happiness, by Catherine E. Beecher. 16mo, pp. 224. New York, 1856. cloth. 3s. 6d.

Bell.—Treatise on Baths; including Cold, Sea, Warm, Hot, Vapour, Gas, and Mud Baths. Also on the Watery Regimen, Hydropathy, and Pulmonary Inhalation; with a Description of Bathing in Ancient and Modern Times, by John Bell. 12mo. Philadelphia. 12s.

Bell.—The Mineral and Thermal Springs of the United States and Canada, by John Bell, M.D. 12mo, pp. 394. Philadelphia, 1855. cloth. 4s. 6d.

Bernard and **Huette.**—Illustrated Manual of Operative Surgery and Medical Anatomy, by MM. Ch. Bernard and Ch. Huette. Edited, with Notes and Additions, and adapted to the Use of the American Medical Student, by W. H. Van Buren, M.D., and C. E. Isaacs, M.D.: with 112 Plates. 8vo, pp. 540. New York, 1855. £2 10.

Bernard and **Huette.**—The Same. Coloured Plates £4 10s.

Berzelius.—The Kidneys and Urine, by J. J. Berzelius. Translated from the German, by M. H. Boye and F. Leaming, M.D. 8vo. Philadelphia. 7s. 6d.

Bigelow.—Boylston Prize Dissertation for 1844. Manual of Orthopedic Surgery, by H. J. Bigelow. 8vo. Boston, 1845. 9s.

Bigelow.—American Medical Botany; being a Collection of the Native Medicinal Plants of the United States, containing their History and Chemical Analysis, and Properties and Uses in Medicine, Diet, and the Arts: with Coloured Engravings, by Jacob Bigelow, M.D. 60 Plates, royal 8vo. Vol. I. 1817, pp. xi. and 197. Vol. II., 1818, pp. xvi. and 199. Vol. III., 1820, pp. x. and 197. Boston.

Bigelow.—Nature in Disease, illustrated in various Discourses and Essays: to which are added, Miscellaneous Writings, chiefly on Medical Subjects, by Jacob Bigelow, M.D. crown 8vo, pp. 400. Boston, 1854. cloth. 7s. 6d.

Billard.—Treatise on the Diseases of Children, founded on recent Clinical Observations and Investigations in Pathological Anatomy, made at the Hospice des Enfans Trouvés; with a Dissertation on the Viability of the Child, by C. M. Billard: with Notes by Dr. Ollivier, of Angers. Translated from the French, with an Appendix, by James Stewart, M.D. 8vo. Philadelphia, 1850. 18s.

Bird.—Practical Treatise on the Diseases of Children and Infants at the Breast. Translated from the French of Bouchut; with Notes and Additions, by Peter Hinckes Bird. 8vo. Philadelphia, 1855.

Bischoff.—Bischoff's Tracts on Generation. Translated by Drs. Gilman and Tellkampf. 8vo. New York. 4s. 6d.

Blakiston.—Practical Observations on Certain Diseases of the Chest, and on the Principles of Auscultation, by P. Blakiston. 8vo. Philadelphia, 1848. cloth. 7s. 6d.

Blandin.—Treatise on Topographical Anatomy, by F. Blandin. Translated from the French by Dr. A. S. Doane: with additional matter, and Atlas of Plates. 4to. New York, 1834. cloth. £1 16s.

Bodenheimer.—On the Diseases of the Rectum, Anus, and Contiguous Textures, by Dr. Bodenheimer. 8vo. Cincinnati, 1847.

Bond.—Practical Treatise on Dental Medicine, being a Compendium of Medical Science as connected with the Study of Dental Surgery, by Thos. E. Bond. 2nd edition. 8vo. Philadelphia, 1852. 12s.

Boston Medical and Surgical Journal. Published weekly, in Octavo Numbers, at Boston. This Journal arose from the combination, in 1828, of two publications,—the New England Quarterly Journal, begun in 1812, and the Boston Medical Intelligencer, begun in 1823,—and has entered, in August 1856, upon its 55th volume. annual subscription, £1 1s.

Bostwick.—An Inquiry into the Cause of Natural Death, or Death from Old Age; developing a new and certain method of preventing the Consolidation or Ossification of the Body, and of thus indefinitely prolonging vigorous, elastic, and buoyant Health; and of rendering Parturition easy and safe, by Homer Bostwick, M.D. 12mo, pp. 160. New York, 1851. cloth. 4s.

Bouns.—Life: its Relations, Animal and Mental; an Inaugural Dissertation, by J. Dickson Bouns, A.M., M.D. 8vo, pp. 59. Charleston, 1857. sewed. 1s. 6d.

Bowditch.—The Young Stethoscopist; or, the Student's Aid to Auscultation, by Henry I. Bowditch, M.D., one of the Physicians of Mass. Gen. Hospital. 2nd edition. 12mo. New York. sheep. 7s. 6d.

Brierre de Boismont.—Hallucinations; or, the Rational History of Apparitions, Visions, Dreams, Ecstacy, Magnetism, and Somnambulism, by A. Brierre de Boismont, Docteur en Médecine de la Faculté de Paris, &c. &c. 1st American from the 2nd enlarged and improved Paris edition. 8vo. Philadelphia, 1853. cloth. 14s.

Translated by Thomas Cooper, M.D. To which are added, two Tracts on Materialism, and an Outline of the Association of the Ideas, by Thomas Cooper, M.D. 8vo. Columbia, S. C., 1831.

Broussais.—History of Chronic Phlegmasiæ, by F. G. V. Broussais. 2 vols. 8vo. Philadelphia, 1831. £1 4s.

Buchanan.—Outlines of Lectures on the Neurological System of Anthropology, as discovered, demonstrated, and taught in 1841, 1842. In four Parts, by Joseph R. Buchanan, M.D. 8vo, pp. iv. and 400. Cincinnati, 1855. 12s.

Buffalo Medical Journal and Monthly Review of Medical and Surgical Science, edited by Austin Flint and Sanford B. Hunt. Buffalo. Annual subscription, 16s.

Burke.—The Mineral Springs of Western Virginia, with Remarks on their Use, and the Diseases to which they are Applicable. 2nd edition. To which are added, a notice of the Fauquier White Sulphur Springs, and a Chapter on Taverns, by W. Burke. 8vo. New York, 1846, and Richmond, 1851. 5s.

Bushe.—On Malformations, Injuries, and Diseases of the Rectum and Anus, by Geo. Bushe. with 4to Atlas of Plates. 8vo. New York. £1 7s.

Byrne.—An Essay to Prove the Contagious Character of Malignant Cholera; with brief Instructions for its Prevention and Cure, by Bernard M. Byrne, M.D. 2nd edition. 8vo, pp. 160. Philadelphia, 1855. cloth. 5s.

Cabanis.—An Essay on the Certainty of Medicine, by P. J. G. Cabanis. Translated by R. La Roche, M.D. 8vo. Philadelphia, 1823.

Caldwell.—On Malaria, by Charles Caldwell. 8vo. New York. 6s.

Carnochan.—Treatise on Etiology, Pathology, and Treatment of Congenital

Dislocations of the Head of the Femur, by John M. Carnochan. Illustrated with Plates. 8vo. New York, 1850. 14s.

Carson.—Illustrations of Medical Botany, consisting of Coloured Figures of the Plants affording the important articles of the Materia Medica, and descriptive letter-press, by Joseph Carson, M.D. 2 vols. 100 coloured Plates. 4to. Philadelphia, 1847. £7 7s.

Carson.—Synopsis of a Course of Lectures on Materia Medica and Pharmacy, by Joseph Carson, M.D. 8vo. Philadelphia, 1852. cloth. 9s.

Cazeaux.—A Theoretical and Practical Treatise on Midwifery, including the diseases of Pregnancy and Parturition, by P. Cazeaux, Adjunct Professor in the Faculty of Medicine of Paris, &c. &c. (Adopted by the Royal Council of Public Instruction.) Translated from the Fifth French edition, with occasional Notes and a copious Index, by W. R. Bullock, M.D. with Illustrations. 8vo, pp. 992. Philadelphia, 1857. £1 4s.

Ceily.—Observations on the Variolæ Vaccinæ as they occasionally appear in the Vale of Aylesbury, by R. Ceily, M.D. 1 vol. 8vo, with 35 coloured Engravings. Worcester, 1840.

Ceily.—Further Observations with Variolæ Vaccinæ, by R. Ceily, M.D. 1 vol. 8vo, with Engravings. Worcester, 1842.

Channing.—Etherization in Childbirth: illustrated by Five Hundred and Eighty-one Cases, by Walter Channing, M.D. 8vo, pp. viii. and 400. Boston, 1848. cloth. 14s.

Channing.—The Reformation of Medical Science, demanded by Inductive Philosophy. A Discourse delivered before the New York Physicians' Society, on their Anniversary, November 21, 1838, by W. Channing, M.D. 2nd edition. 8vo, pp. 71. New York, 1851. 1s. 6d.

Channing.—A Physician's Vacation; or, a Summer in Europe, by Walter Channing. crown 8vo, pp. iv. and 564. Boston, 1856. cloth. 7s. 6d.

Chailly.—A Practical Treatise on Midwifery, by M. Chailly. Translated from the French, and edited by G. S. Bedford, A.M., M.D. Illustrated with 21 Woodcuts. 8vo, pp. 536. New York, 1845. cloth. 14s.

Chapman.—Compendium of Lectures on the Theory and Practice of Medicine, delivered by Professor Chapman in the University of Pennsylvania. Prepared, with permission, from Dr. Chapman's Manuscripts, and published, with his approbation, by R. D. Benedict, M.D. 8vo. Philadelphia. 12s.

Charleston Medical Journal and Review; edited and published by C. Happoldt, assisted by Drs. Cain and Brewer. Published every alternate month. Charleston. each, 4s.

Clymer.—Diseases of the Genito-Urinary Organs, by M. Clymer. 8vo.

Coates.—An Address on the History of Organic Development, and the Means of Improving the Mental and Physical Faculties, by Reynell Coates, M.D. 8vo. Philadelphia, 1839.

Coates.—Syllabus of a Course of Lectures on Physiology, by Reynold Coates, M.D. 8vo. Philadelphia, 1840.

Cock.—A Manual of Obstetrics, by Thomas F. Cock, M.D. crown 8vo, pp. 250. New York, 1854. cloth. 6s.

Cole.—The American Veterinarian: containing Diseases of Domestic Animals, their Causes, Symptoms, and Remedies; with Rules for Restoring and Preserving Health by good management, also for Training and Breeding. by S. W. Cole. New York. 3s.

Colombat.—Treatise on the Diseases and Special Hygiene of Females, by De L'Isére Colombat. Translated from the French, with additions, by Charles D. Meigs, M.D. New edition, revised, with Woodcut Illustrations. 8vo. Philadelphia, 1845. £1 1s.

Condie.—Practical Treatise on the Diseases of Children, by D. F. Condie. 3rd edition. 8vo. Philadelphia, 1850. 18s.

Cook.—A Treatise on the Principles and Practice of Physio-Medical Surgery, for the Use of Students and Practitioners, by Wm. H. Cook, M.D.,

Professor of Therapeutics and Materia Medica in the Physio-Medical College of Ohio, late Professor of Surgery in the same Institution. Illustrated. 8vo, pp. 714. cloth. £1 10s.

Coolidge.—Statistical Report on the Sickness and Mortality in the Army of the United States, compiled from the Records of the Surgeon-General's Office, embracing a period of sixteen years, from January, 1839, to January, 1855, by Richard H. Coolidge, M.D., Assistant Surgeon, U. S. Army. Map. 4to, pp. 703. Washington, 1856. £1 1s.

Corson.—A Paper on the Effects of Lead on the Heart, by John W. Corson, M.D. 8vo, pp. 24. New York, 1856. sewed. 1s. 6d.

Coxe.—The Writings of Hippocrates and Galen. Epitomised from the original Latin Translations, by John Redman Coxe, M.D. 8vo, pp. 682. Philadelphia, 1846. cloth.

Cruveilhier.—Cruveilhier's Anatomy of the Human Body, edited by Granville S. Pattison, M.D. with 300 Engravings. 8vo. New York. 18s.

Dadd.—American Cattle-Doctor: containing the necessary Information for Preserving the Health, and Curing the Diseases, of Oxen, Cows, Sheep, and Swine; with a great variety of Original Recipes, and valuable Information in reference to Farm and Dairy Management, whereby every man can be his own Cattle-Doctor, by G. H. Dadd, Veterinary Practitioner. New York, 1857. 6s.

Dadd.—Anatomy and Physiology of the Horse, with Anatomical and Questional Illustrations; containing also a Series of Examination on Equine Philosophy and Anatomy; with Instructions in reference to Dissection, and the Mode of making Anatomical Preparations; to which is added, a Glossary of Veterinary Technicalities, Toxicological Chart, and Dictionary of Veterinary Science, by G. H. Dadd. New York, 1857. plain, 12s. col. plates, £1 4s.

Dana.—Treatise on Lead Diseases, by S. L. Dana. 8vo. Lowell, Massachusetts. cloth. 14s.

Darrach.—Anatomy of the Groin, with Anatomical Remarks, by W. Darrach. with Engravings. royal 8vo. Philadelphia, 1844. 9s.

De Jongh.—The Three Kinds of Cod-Liver Oil: their Properties considered, by L. J. De Jongh. 12mo. Philadelphia, 1849. cloth. 5s.

Dean.—Principles of Medical Jurisprudence: designed for the Professions of Law and Medicine, by Amos Dean, Counsellor at Law, and Professor of Medical Jurisprudence in the Albany Medical College. 8vo. New York, 1850. bound. £1 10s.

Dental Monitor (the), edited by J. G. Ambler, M.D.

Dental News-letter (the), edited by J. D. White and J. R. McCurdy, D.D.S.

Dental Register of the West (the), edited by James Taylor, M.D., D.D.S. Published by order of the Mississippi Valley Association of Dental Surgeons.

Dewees.—Compendious System of Midwifery, chiefly designed to facilitate the Inquiries of those who may be pursuing this branch of Study, by William P. Dewees. Illustrated by occasional Cases and with many Engravings. 11th edition. 8vo. Philadelphia. 18s.

Dewees.—Treatise on the Physical and Medical Treatment of Children, by William P. Dewees. 9th edition, with the Author's last improvements and corrections. 8vo. Philadelphia. 18s.

Dewees.—Treatise on the Diseases of Females, by William P. Dewees. 9th edition, with the Author's last improvements and corrections. 8vo. Philadelphia. 18s.

Dickson.—The Principles of the Chronothermal System of Medicine, with Fallacies of the Faculty, by Samuel Dickson, M.D. With an Introduction and Notes by William Turner, M.D. 8vo. New York, 1845.

Dickson.—Elements of Medicine: a Compendious View of Pathology and Therapeutics; or, the History and Treatment of Diseases, by Samuel Henry Dickson, M.D., LL.D. 8vo, pp. 752. Philadelphia, 1855. cloth. £1 1s.

Dixon.—The Scalpel; a Journal of Health, adapted to popular and profes-

sional reading, and the exposure of Quackery. Edited by Edward H. Dixon, M.D. Vol. I. 8vo. New York, 1849.

Dixon.—Scenes in the Practice of a New York Surgeon, by Edward H. Dixon, M.D. With 8 Illustrations by Darley. crown 8vo, pp. 407. New York, 1855. cloth. 7s. 6d.

Drake.—The Northern Lakes, a Summer Residence for the Invalids of the South, by Daniel Drake, M.D., Professor in the Medical Institute of Louisville. 8vo, pp. 29. Louisville, Kentucky, 1842.

Drake.—A Systematic Treatise, Historical, Etiological, and Practical, on the Principal Diseases of the Interior Valley of North America, as they appear in the Caucasian, African, Indian, and Esquimaux Varieties of its Population. 19 Maps and Plates. 8vo, pp. xvi. and 878. Cincinnati, 1850. cloth. £1 16s.

Drake.—A Systematic Treatise, Historical, Etiological, and Practical, on the Principal Diseases of the Interior Valley of North America, as they appear in the Caucasian, African, Indian, and Esquimaux Varieties of its Population. by Daniel Drake, M.D. 2nd series. Edited by S. Hanbury Smith, M.D., and Francis G. Smyth, M.D. 8vo, pp. 986. Philadelphia, 1854. bound. £2 5s.

Draper.—Human Physiology, Statical and Dynamical; or, the Conditions and Course of the Life of Man, by John William Draper, M.D., LL.D. Illustrated with nearly 300 Engravings. 8vo, pp. xvi. and 650. New York, 1856. cloth. £1 5s.

Du Bouchet.—The Family Dentist, including the Surgical, Medical, and Mechanical Treatment of the Teeth, by C. A. Du Bouchet. 18mo. Philadelphia. cloth. 3s.

Dunglison.—The Medical Student; or, Aids to the Study of Medicine, by Robley Dunglison, M.D. 8vo. Philadelphia, 1837.

Dunglison.—Human Health; or, the Influence of Atmosphere and Locality, Change of Air and Climate, Seasons, Food, Clothing, Bathing and Mineral Springs, Exercise, Sleep, Corporeal and Intellectual Pursuits, &c., on Healthy Man; constituting Elements of Hygiène, by Robley Dunglison. New edition. 8vo. Philadelphia, 1844. 14s.

Dunglison.—Practice of Medicine; a Treatise on Special Pathology and Therapeutics, by Robley Dunglison. 3rd edition. 2 vols. 8vo. Philadelphia, 1848. £1 12s.

Dunglison. — General Therapeutics and Materia Medica, adapted for a Medical Text-Book, by Robley Dunglison: with 120 Illustrations. 3rd edition, revised and improved. 2 vols. 8vo. Philadelphia, 1850. £1 8s.

Dunglison. — Human Physiology, by Robley Dunglison. 7th edition, revised and enlarged, with nearly 500 Illustrations. 2 vols. Philadelphia, 1850. £1 16s.

Dunglison.—Dictionary of Medical Science, Ninth Edition; containing a concise Explanation of the various Subjects and Terms of Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Obstetrics, Medical Jurisprudence, &c., with the French and other Synonymes; Notices of Climate and of celebrated Mineral Waters: Formulæ for various Officinal, Empirical, and Dietetic Preparations, &c., by Robley Dunglison, M.D. An entire new edition, revised and enlarged. 1 vol. 8vo. Philadelphia, 1851. 16s.

Dunglison.—New Remedies; with Formulæ for their preparation and administration, by Robley Dunglison, M.D. 7th edition, with numerous additions. 8vo, pp. 770. Philadelphia, 1856. bound. £1 4s.

Earle.—An Examination of the Practice of Bloodletting in Mental Disorders, by Pliny Earle, M.D. 8vo, pp. 126. New York, 1855. cloth. 6s.

Earle.—Institutions for the Insane, in Prussia, Austria, and Germany, by Pliny Earle, M.D., Visiting Physician to the Lunatic Asylum of New York, &c. &c. 8vo, pp. 248. New York, 1855. 8s.

Eberle.—Treatise on the Diseases and Physical Education of Children, by J. Eberle. 3rd edition. 8vo. Philadelphia. 18s.

Eberle.—Treatise on the Practice of Medicine, by John Eberle: with Notes and Additions, by George McClellan, M.D. 6th edition. 2 vols. 8vo. Philadelphia, 1840. £2 2s.

Eberle.—Notes of Lectures on the Theory and Practice of Medicine, by J. Eberle. 12mo. Philadelphia, 1844. sheep. 6s.

Eberle.—Treatise of the Materia Medica and Therapeutics, by J. Eberle. 4th edition. 8vo. Philadelphia, 1847. £1 4s.

Esquirol.—Treatise on Insanity, by M. Esquirol. Translated, with Notes, by E. K. Hunt. 8vo. Philadelphia, 1845. 14s.

Eve.—A Collection of Remarkable Cases in Surgery, by Paul F. Eve, M.D. Professor of Surgery in the Medical Department of the University of Nashville. 8vo, pp. 858. Philadelphia, 1857. sheep. £1 1s.

Ferris.—Treatise on Epidemic Cholera, as in New York in 1834, by F. T. Ferris. 8vo. New York, 1835. cloth. 7s. 6d.

Fisher.—Description of the Distinct, Confluent, and Inoculated Small-Pox, Varioloid Disease, Cow-Pox, and Chicken-Pox, with 13 Coloured Plates, by J. D. Fisher. 1 vol. 4to. Boston, 1834. £1 16s.

Fisher.—On the Use of Iodide, of Ethyle, and other Hydro-carbon Compounds in Pulmonary Consumption, by Henry Fisher, M.D. 12mo. New York, 1855.

Fitch.—A System of Dental Surgery, in three Parts: I. Dental Surgery as a Science; II. Operative Dental Surgery; III. Pharmacy connected with Dental Surgery, by Samuel Sheldon Fitch, M.D., Surgeon-Dentist. 8vo, pp. 574. New York, 1829. £1 12s.

Fitch.—Six Lectures on the Uses of the Lungs; and Causes, Prevention, and Cure of Pulmonary Consumption, Asthma, and Diseases of the Heart; on the Laws of Longevity; and on the Mode of Preserving Male and Female Health to an Hundred Years, by Samuel Sheldon Fitch, A.M.,M.D .12mo, pp. 324. New York, 1847. 3s. 6d.

Flagg.—Ether and Chloroform: their Employment in Surgery, Dentistry, Midwifery, Therapeutics, &c., by J. F. B. Flagg, M.D. Surgeon-Dentist. 12mo, pp. 190. Philadelphia, 1851. cloth. 5s.

Flint.—Clinical Report on Chronic Pleurisy, based on an Analysis of Forty-seven Cases, by Austin Flint, M.D. 8vo, pp. 58. Buffalo, 1853. cloth.

Flint.—Clinical Reports on Continued Fever, based on Sixty-four Cases; with Remarks on the Management of Continued Fever; the Identity of Typhus and Typhoid Fever; Diagnosis, &c.,: to which is added, a Memoir on the Transportation and Diffusion, by Contagion, of Typhoid Fever, as exemplified in the Occurrence of the Disease at North Boston, Erie County, N.Y., by Austin Flint, M.D. 8vo, pp. 390. Buffalo, 1853. cloth. 12s.

Flint.—Physical Exploration and Diagnosis of Diseases affecting the Respiratory Organs, by Austin Flint, M.D., Professor of the Theory and Practice of Medicine in the University of Louisville, &c. 8vo, pp. 636. Philadelphia, 1856. cloth. 16s.

Foltz.—Endemic Influence of Evil Government and Diseases of the Island of Minorca, by J. M. Foltz. 8vo. New York.

Forceps (the); a Quarterly Journal devoted to the advancement of Dental Science, published by the New York Teeth Manufacturing Company.

Forrest.—The Great Pestilence in Virginia; being an Historical Account of the Origin, General Character, and Ravages of the Yellow Fever in Norfolk and Portsmouth in 1855; together with Sketches of some of the Victims, Incidents of the Scourge, &c., by William S. Forrest. 12mo, pp. 326. New York, 1856. cloth. 6s.

Forry.—The Climate of the United States, and its Endemic Influences; based chiefly on the Records of the Medical Department, United States' Army, by Samuel Forry, M.D.: with a Map. 8vo, pp. 380. New York, 1842. 16s.

Fosgate.—Sleep Psychologically considered, with reference to Sensation and

Memory, by Blanchard Fosgate, M.D., Physician to the New York State Prison at Auburn. 12mo. New York, 1850. cloth. 4s. 6d.

Fox.—The Natural History and Diseases of the Human Teeth: containing the History of the Formation and Structure of the Teeth; the Symptomatic Diseases incidental to the first Dentition; the Changes which take place during the second Dentition; and the Treatment to prevent and remedy Irregularities in the Arrangement of the Teeth: also, the History and Treatment of the Diseases of the Teeth, the Gums, and the Alveolar Processes, with the Operations which they respectively require: to which are added, Observations on other Diseases of the Mouth, and on the Mode of fixing Artificial Teeth, by Joseph Fox. 23 Plates. 4to. New York. £2 5s.

Fox and Harris.—The Diseases of the Human Teeth: their Natural History and Structure, with the Mode of applying Artificial Teeth, &c. &c., by Joseph Fox and Chapin A. Harris: with 250 Illustrations on 30 Plates. 8vo, pp. 440. Philadelphia, 1846. sheep. 18s.

Gallup.—Outlines of the Institutes of Medicine, by J. A. Gallup. 2 vols. 8vo. Boston, 1839.

Galt.—Treatment of Insanity, by J. M. Galt. 8vo. New York. 10s.

Galt.—Practical Medicine; illustrated by Cases on the most important Diseases, by J. M. Galt. 8vo. Philadelphia. 16s.

Gannal.—History of Embalming, and of Preparations in Anatomy, Pathology, and Natural History; including an Account of the New Process of Embalming, by J. N. Gannal. Translated from the French, with Notes and Additions, by R. Harlan, M.D. 8vo. Philadelphia, 1840.

Gardner.—The Causes and Curative Treatment of Sterility; with a Preliminary Statement of the Physiology of Generation, by Augustus K. Gardner, A.M., M.D.; with Coloured Lithographs and numerous Woodcut Plates. 8vo, pp. 170. New York, 1856. cloth. 14s.

Gardner.—Medical Chemistry, for the Use of Students; being a Manual of the Science, with its Applications to Toxicology, Physiology, Therapeutics, Hygiene, &c., by D. P. Gardner. 12mo. Philadelphia, 1849. 9s.

Gerhard.—Lectures on the Diagnosis, Pathology, and Treatment of Diseases of the Chest, by W. W. Gerhard. New edition, 8vo. Philadelphia, 1854. 12s.

Gibson.—Rambles in Europe, in 1839; with Sketches of Prominent Surgeons, Physicians, Medical Schools, Hospitals, Literary Personages, Scenery, &c., by Wm. Gibson, M.D. 8vo. Philadelphia, 1841.

Gibson.—Three Lectures Preliminary to a Course on Surgery at the Pennsylvania University, by Wm. Gibson. 8vo. Philadelphia, 1850.

Gluge.—An Atlas of Pathological Histology, by Gottlieb Gluge, M.D., Professor of Physiology and Pathological Anatomy in the University of Brussels. Translated, with Notes and Additions, by Joseph Leidy, M.D. in 1 volume, very large imperial 4to, with 320 Figures, plain and coloured, on 12 Plates. Philadelphia, 1851. cloth. £1 8s.

Goddard.—The Anatomy, Physiology, and Pathology of the Human Teeth; with the most approved Methods of Treatment; including Operations, and the method of making and setting Artificial Teeth, by B. T. Goddard. 30 Plates. 4to. New York, 1854. £1 16s.

Gould.—A Report on Food and Diet; with Observations on Dietetical Regimen suited for Almshouses, Prisons, and Hospitals; also, on Heating, Ventilation, &c.; with Practical Recommendations, by the Hon. John Gould. 8vo. New York, 1852.

Grant.—Memoir of William R. Grant, M.D.; with a Notice of the History of the Fœtal Circulation; read to the College of Physicians, by Washington L. Atlee, M.D. 8vo. Philadelphia, 1853.

Green.—A Treatise on Diseases of the Air-Passages; comprising an Inquiry into the History, Pathology, Causes, and Treatment of those Affections of the Throat, called Bronchitis, Chronic Laryngisis, Clergyman's Sore Throat,

&c., &c., by Horace Green, A.M., M.D. 2nd edition, revised and enlarged. 8vo. New York. cloth. 16s.

Green.—Observations of the Pathology of Croup; with Remarks on its Treatment by Topical Medications, by Horace Green, A.M., M.D., &c., &c. 12mo. New York. cloth. 4s.

Green.—Surgical Treatment of Polypi of the Larynx and Œdema of the Glottis, by Horace Green, M.D. 8vo. New York, 1850. cloth. 6s. 6d.

Green.—Practical Compendium of Diseases of the Skin; including a particular consideration of the more frequent and intractable forms of these Affections, with Cases, by J. Green. 8vo. Philadelphia, 1841. 8s.

Griffiths.—A Universal Formulary; containing the Methods of Preparing and Administering Officinal and other Medicines; the whole adapted to Physicians and Pharmaceutists, by R. Eglesfield Griffiths, M.D. A New Edition, carefully revised and much extended, by Robert P. Thomas, M.D. with Illustrations. 8vo, pp. 652. Philadelphia, 1856. cloth. 16s.

Gross.—Experimental and Critical Inquiry into the Nature and Treatment of Wounds in the Intestines, by S. D. Gross. Illustrated by Engravings. 8vo. Philadelphia, 1845. 12s.

Gross.—A Practical Treatise on Foreign Bodies in the Air-Passages, by S. D. Gross, M.D., Professor of Surgery in the University of Louisville. With Illustrations. 8vo, pp. 468. Philadelphia, 1855. cloth. 16s.

Gross.—A Practical Treatise on the Diseases, Injuries, and Malformations of the Urinary Bladder, the Prostate Gland, and the Urethra, by S. D. Gross, M.D. 2nd edition, revised and much enlarged; with 184 Illustrations. 8vo, pp. 925. Philadelphia, 1855. cloth. £1 4s.

Gross.—Elements of Pathological Anatomy, by Samuel D. Gross, M.D. 3rd edition, modified and thoroughly revised. Illustrated with 342 Engravings on Wood. 8vo, pp. xxv. and 771. Philadelphia, 1857. £1 8s.

Handy.—A Text-Book of Anatomy and Guide in Dissections, for the Use of Students in Medicine and Dental Surgery, by Washington R. Handy, M.D., Professor of Physiology and Anatomy in the Baltimore College of Dental Surgery, late Professor of Anatomy and Operative Surgery in Washington University, Baltimore: with 264 Illustrations. royal 8vo. Philadelphia, 1854. sheep. £1 4s.

Harlan.—Medical and Physical Researches, by R. Harlan, M.D., F.L.S. 8vo. Philadelphia, 1835.

Harris.—A Dictionary of Medical Terminology, Dental Surgery, and the Collateral Sciences, by Chapin A. Harris, M.D., D.D.S. 2nd edition, carefully revised and enlarged. 8vo, pp. 800. Philadelphia, 1854. cloth. £1 4s.

Harris.—Principles and Practice of Dental Surgery, by C. A. Harris, M.D., F.R.S. 6th edition. 8vo, pp. xxiv. and 828. Philadelphia, 1856. cloth. £1 4s.

Harrison.—Elements of Materia Medica and Therapeutics, by J. P. Harrison. 2 vols. 8vo. Cincinnati, Ohio. £1 16s.

Harrison.—Essay towards a Correct Theory of the Nervous System, by John Harrison. 8vo. Philadelphia, 1844. 10s. 6d.

Hartley.—An Historical, Scientifical, and Practical Essay on Milk, as an Article of Human Sustenance, by R. M. Hartley. 8vo. New York, 1842.

Hasting.—Minor Surgery, the Application of Dressings, &c. with 143 Illustrations, by J. Hasting. crown 8vo. Philadelphia, 1850. 9s.

Hayward.—Outlines of Human Physiology, by George Hayward. 12mo. Boston. 4s. 6d.

Hayward.—Surgical Reports, and Miscellaneous Papers on Medical Subjects, by George Hayward, M.D., President Mass. Medical Society, &c. &c. crown 8vo, pp. 452. Boston, 1855. cloth. 8s.

Hayward.—Some Account of the first Use of Sulphuric Ether by Inhalation in Surgical Practice, by Jer. Hayward. 8vo. Boston, 1847. 1s.

Henderson.—Hints on the Medical Examination of Recruits for the Army, and on the Discharge of Soldiers from the Service on Surgeon's Certificate;

adapted to the Service of the United States, by Thomas Henderson, M.D. A new edition, revised, by Richard H. Coolidge, M.D. crown 8vo, pp. 212. Philadelphia, 1856. cloth. 6s.

Henle.—A Treatise on General Pathology, by Dr. J. Henle, Professor of Anatomy and Physiology in Heidelberg. Translated by Henry C. Preston, A.M., M.D. 8vo. Philadelphia, 1853. calf. 10s. 6d.

Heustis.—Physical Observations and Medical Tracts and Researches on the Topography and Diseases of Louisiana, by Jabez W. Heustis, M.D. 8vo, pp. 162. New York, 1817. 7s. 6d.

Holmes.—Boylston Prize Dissertations for 1836-37: on Indigenous Intermittent Fever, in New England; Nature and Treatment of Neuralgia, and Utility and Importance of Direct Exploration in Medical Practice, by O. W. Holmes. 8vo. Boston, 1836.

Holmes.—Puerperal Fever, as a Private Pestilence, by Oliver Wendell Holmes, M.D. 8vo, pp. 60. Boston, 1855. sewed.

Hooker.—Lessons from the History of Medical Delusions, by Washington Hooker, M.D. 8vo. New York, 1850.

Hooker.—Physician and Patient; or, a Practical View of the Mutual Duties, Relations, and Interests of the Medical Profession and the Community, by W. Hooker, M.D. 12mo, pp. 456. New York. cloth. 7s. 6d.

Horner.—Medical and Topographical Observations upon the Mediterranean, and upon Portugal, Spain, &c., by G. R. B. Horner. 8vo. Philadelphia, 1839. sheep. 6s.

Horner.—Medical Topography of Brazil and Uruguay; with Incidental Remarks, by G. R. B. Horner, M.D., U.S.N. 8vo. Philadelphia, 1845.

Horner.—Catalogue of the Wistar, or Anatomical Museum of the University of Pennsylvania, by W. E. Horner, M.D. 8vo. Philadelphia, 1846.

Horner.—Diseases and Injuries of Seamen: with Remarks on their Enlistment, Naval Hygiene, and the Duties of Medical Officers, by G. R. B. Horner, M.D., Surgeon U.S.N., &c. crown 8vo, pp. 254. Philadelphia, 1854. sheep.

Horner.—Treatise on Pathological Anatomy, by W. E. Horner. 8vo. Philadelphia.

Horner.—Lessons in Practical Anatomy, for the Use of Dissectors, by W. E. Horner. 8vo. New York. 12s.

Horner.—Special Anatomy and Histology, by W. E. Horner. 6th edition. 2 vols. 8vo. Philadelphia, 1851. £1 16s.

Horner.—The Medical Student's Guide in Extracting Teeth; with numerous Cases in the Surgical Branch of Dentistry; with Illustrations, by S. S. Horner, Practical Dentist. Philadelphia, 1851. 3s.

Hubbart.—Surgical and Mechanical Dentistry, by S. C. Hubbart. Illustrated. 12mo. cloth. 6s.

Hufeland.—Enchiridion Medicum; or, the Practice of Medicine; the Result of Fifty Years' Experience, by C. W. Hufeland, Counsellor of State, Physician in Ordinary of the late King of Prussia, Professor in the University of Berlin. From the 6th German edition. Translated by C. Bruckhausen, M.D. 3rd edition. 8vo, pp. 630. New York, 1849. bound. 15s.

Hunter.—A Treatise on the Venereal Disease, by John Hunter: with copious Additions, by Dr. Philip Ricord. Edited, with Notes, by Freeman J. Bumstead; with Plates. 8vo. Philadelphia, 1853. bound. 15s.

Jackson.—Letters to a Young Physician just Entering upon Practice, by J. Jackson, M.D., LL.D. 4th edition. 12mo, pp. 348. Boston, 1856. cloth. 5s.

Jackson.—A Descriptive Catalogue of the Anatomical Museum of the Boston Society for Medical Improvement, by J. B. S. Jackson, M.D. 8vo. Boston, 1847.

Jameson.—A Treatise on Epidemic Cholera, by Horatio Gates Jameson, Sen., M.D., Member of Medical and Chirurgical Faculty of Maryland, &c. &c. 8vo, pp. 286. Philadelphia. cloth. 12s.

Jennings.—The Philosophy of Human Life; with especial design to develope the true Idea of Disease; its Nature, immediate Occasion, and general Remedy, by J. Jennings, M.D. 12mo, pp. 276. Boston, 1852. cloth.

Johns.—A Clinical Phrase-Book: in English and German, containing the usual Questions and Answers employed in Examining and Prescribing for Patients: Questions in Asking for and Buying Medicines, &c. With an English-German and German-English Pronouncing Lexicon of all the Words occurring in the Phrases, with the chief Technical Terms of Medical Writers and Apothecaries; Grammatical Appendix, Table of Idioms, &c. Designed to aid Physicians and Surgeons in Hospitals, Alms-houses, and Private Practice; also Druggists and Pharmaceutists in Dispensing their Prescriptions, by Montgomery Johns. 18mo. Philadelphia, 1853. half bound. 6s.

Jones.—The American Eclectic Practice of Medicine, by J. G. Jones, M.D., Late Professor of Theory and Practice of Medicine in the Eclectic Medical Institute, Cincinnati. New edition, extended and revised, at request of the Author, by Wm. Sherwood, M.D., Professor of Medical Practice and Pathology in the Eclectic College of Medicine, Cincinnati. Complete in 2 vols. 8vo, pp. 1650. Cincinnati, 1857. £2 2s.

Jourdain.—Treatise on the Diseases and Surgical Operations of the Mouth and Parts adjacent; with Notes of Interesting Cases, ancient and modern, by M. Jourdain. Translated from the last French edition. 8vo. Philadelphia. 12s.

Jourdan.—Historical and Critical Observations on Syphilis, by A. J. L. Jourdan, M.D. Translated from the French, by R. La Roche, M.D. 8vo. Philadelphia, 1823.

Iowa (the), Medical Journal, edited by the Faculty of the Iowa University.

King.—American Eclectic Obstetrics, by John King, M.D., Professor of Obstetrics and the Diseases of Women and Children, in the Eclectic Medical College of Cincinnati: with 70 Illustrations. royal 8vo, pp. 800. Cincinnati. £1 4s.

King.—The American Family Physician; or, Domestic Guide to Health: for the Use of Physicians, Families, Plantations, Ships, Travellers, &c., by John King, M.D., Professor of Obstetrics and Diseases of Women and Children in the Eclectic College of Medicine, &c. 8vo, pp. 800. £1 10s.

King.—Chart of Urinary Deposits: Table of Urinary Deposits, with their Microscopical and Chemical Tests, for Clinical Examinations, by John King, M.D. Cincinnati. 3s. 6d.

Kirkbride.—On the Construction, Organization, and General Arrangements of Hospitals for the Insane, by Thomas L. Kirkbride, M.D. 5 Engravings. 8vo, pp. 98. Philadelphia, 1855. cloth. 4s. 6d.

Kirkbride.—Report of the Pennsylvania Hospital for the Insane for the year 1854, by Thomas Kirkbride, M.D. Published by order of the Board of Managers. With a Plate. 8vo, pp. 60. Philadelphia, 1855. sewed. 2s. 6d.

Kölliker.—Manual of Human Microscopal Anatomy, by A. Kölliker. Translated by G. Busk, F.R.S., and Thomas Huxley, F.R.S. Edited, with Notes and Additions, by J. Da Costa, M.D. Illustrated by 313 Engravings on Wood. 8vo, pp. 794. Philadelphia, 1854.

Kost.—Elements of Materia Medica and Therapeutics; adapted to the American Eclectic or Reformed Practice; with numerous Illustrations, by J. Kost, M.D., Professor of Materia Medica, Therapeutics, and Botany in the American Medical College, Cincinnati, &c., &c. 8vo, pp. 700. Cincinnati, 1838. £1 8s.

Lambert.—Anatomy and Physiology. 3 vols. 12mo. I. Hygienic Physiology; II. Practical Anatomy, Physiology, and Pathology; Hygiene and Therapeutics; III. Human Anatomy, Physiology, and Hygiene, by S. T. Lambert. Hartford, 1854. 15s.

La Roche.—Pneumonia: its supposed Connection, Pathological and Etio-

logical, with Autumnal Fevers; including an Inquiry into the Existence and Morbid Agency of Malaria, by R. La Roche, M.D. 8vo, pp. 502. Philadelphia, 1854. cloth. 18s.

La Roche.—Yellow Fever, considered in its Historical, Pathological, Etiological, and Therapeutical Relations: including a Sketch of the Disease as it has occurred in Philadelphia, from 1699 to 1854; with an Examination of the Connexions between it and the Fevers known under the same name in other parts of Temperate as well as Tropical Regions, by R. La Roche, M.D. In 2 vols. 8vo, pp. 1500. Philadelphia, 1856. cloth. £2 2s.

Larrey.—Memoirs of Military Surgery, and Campaigns of the French Armies; from the French of D. J. Larrey, M.D. Translated by R. W. Hall, M.D. 2 vols. 8vo. Baltimore, 1814.

Lawson.—Statistical Report on the Sickness and Mortality in the Army of the United States; compiled from the Records of the Surgeon-General's and Adjutant-General's Offices; embracing a period of twenty years, from January, 1819, to January, 1839. Prepared under the direction of Thomas Lawson, M.D. with a Map. 8vo, pp. 346. Washington, 1840. cloth. 9s.

Lee and **Warren.**—The Effects of Climate on Tuberculous Disease, by Edwin Lee, M.R.C.S., London. The Influence of Pregnancy on the Development of Tubercles, by Edward Warren, M.D., of Edenton, N. C. (Fiske Fund Prize Essays). imperial 8vo, pp. 73 and 42. Philadelphia, 1857. cloth. 6s.

Le Gallois.—Experiments on the Principles of Life, and particularly on the Motions of the Heart, by M. Le Gallois. Translated by N. C. and J. G. Nanerede, M.D. 8vo. Philadelphia, 1813.

Lobstein.—A Treatise on the Structure, Functions, and Diseases of the Human Sympathetic Nerve, by John F. Lobstein. Translated by Jos. Pancoast, M.D. With Plates. 8vo. Philadelphia, 1831.

Longet.—Treatise on Physiology, by F. A. Longet. Translated from the French, with Notes and Additions, by Francis Gurney Smith, M.D. With numerous Illustrations. 2 vols. 8vo. Philadelphia.

Louis.—Researches on Fevers, by P. C. A. Louis. Translated by Dr. Henry J. Bowditch. 8vo. Boston, 1836. cloth.

Louis.—Pathological Researches on Phtisis, by P. C. A. Louis. Translated by Charles Cowan. Revised and edited by Dr. Henry J. Bowditch. 8vo. Boston, 1836. cloth. 18s.

Louis.—Yellow Fever of Gibraltar in 1818, by P. C. A. Louis. 8vo. Boston, 1839. cloth. 12s.

Loewig.—Principles of Organic and Physiological Chemistry, by Dr. Carl Loewig. Translated from the German, by Daniel Breed, M.D. 8vo. Philadelphia, 1852. 15s.

Magendie.—Elementary Treatise on Human Physiology, by F. Magendie. Translated, enlarged, and annotated, by J. Revere, M.D. With Engravings. 8vo. New York, 1844. 14s.

March.—Improved Forceps for Hare-lip Operations, by Alden March, M.D. 8vo. Philadelphia, 1855. 1s.

Markham.—Remarks on the Surgical Practice of Paris, by W. O. Markham. 8vo. Philadelphia, 1841.

Marshall.—Practical Observations on Diseases of the Head, Lungs, Stomach, Liver, &c., by J. Marshall. 8vo. Philadelphia, 1837. half sheep. 6s.

Masse.—A Pocket Anatomical Atlas of the Descriptive Anatomy of the Human Body, by J. N. Masse, M.D. Translated from the last Paris edition, and edited by G. S. Pattison, M.D. Illustrated by 442 Figures engraved on Steel, and beautifully coloured. 12mo. cloth. £2 2s.

The same Work with Plates uncoloured. New York. 18s.

Maury.—A Treatise on the Dental Art, founded on actual experience, by F. Maury, Dentist of the Royal Polytechnic School. Translated from the

French, with Notes and Additions, by J. B. Savier, Doctor of Dental Surgery. Illustrated by 241 Lithographic Figures, and 54 Woodcuts. In 1 vol. 8vo. Philadelphia, 1843. cloth. 16s.

Maygrier.—Midwifery Illustrated, by J. P. Maygrier. Translated, with Notes, by Dr. P. Sidney Doane. 4th edition. Notes and Plates. 8vo. New York. £1 11s. 6d.

Medical Communications of the Massachusetts Medical Society. Vols. I. to VIII. in 45 parts. Vol. IX. parts 1 and 2. 8vo. Boston, 1787 to 1856. The Society was incorporated in 1781.

Medical Examiner.—A Monthly Record of Medical Science; edited by Samuel L. Hollingsworth, M.D., Fellow of the College of Physicians, &c. Discontinued in December, 1856. Philadelphia.

Meigs.—The Science of the Art of Obstetrics, by C. D. Meigs, M.D. With 120 Plates. 8vo. Philadelphia. sheep. £1 1s.

Meigs.—A Treatise on Acute and Chronic Diseases of the Neck of the Uterus. Illustrated with numerous Plates, coloured and plain, by Charles D. Meigs, M.D. 22 Plates. 8vo, pp. 116. Philadelphia, 1854. cloth. £1 5s.

Meigs.—Woman; her Diseases and Remedies. A Series of Lectures to his Class, by C. D. Meigs. 3rd edition. 8vo. Philadelphia, 1854. 18s.

Meigs.—Observations on certain of the Diseases of Young Children, by C. D. Meigs. 8vo. Philadelphia, 1850. 10s. 6d.

Meigs.—On the Nature, Signs, and Treatment of Childbed Fevers; in a Series of Letters, addressed to the Students of his Class, by C. D. Meigs, M.D. 8vo, pp. 362. Philadelphia, 1854. cloth. 15s.

Meigs.—Practice of Surgery, by J. Meigs, M.D. 8vo. Philadelphia, 1853. sheep. £1 1s.

Meigs.—A Practical Treatise on the Diseases of Children, by J. F. Meigs, M.D. 2nd edition, revised and enlarged. 8vo. Philadelphia, 1853. 12s.

Memphis Medical Recorder.—Published every Two Months, by the Memphis Medical College. Memphis. Annual subscription, 6s.

Miller.—A Theoretical and Practical Treatise on Human Parturition, by H. Miller, M.D. 8vo. Louisville, Ky., 1849. sheep. 16s.

Mitchell.—Materia Medica and Therapeutics; with Ample Illustrations of Practice in all the Departments of Medical Science, and very copious Notices of Toxicology, suited to the wants of Medical Students and Practitioners, by T. D. Mitchell, A.M., M.D. 8vo. Philadelphia. bound. 18s.

Mitchell.—On the Cryptogamous Origin of Malarious and Epidemic Fevers, by J. K. Mitchell, A.M., M.D. 8vo. Philadelphia, 1849.

Moormann.—The Virginia Springs, with their Analysis, and some remarks on their Character, together with a Directory for the use of the White Sulphur Water, and an account of the Diseases to which it is applicable, by John J. Moormann, M.D.: with Maps of Routes and Distances. 12mo. Philadelphia, 1847. 5s.

Moreau.—A Practical Treatise on Midwifery; exhibiting the present Advanced State of the Science, by F. J. Moreau, Professor of Midwifery, &c. Translated from the French, by Thomas Forest Betton, M.D., and edited by Paul B. Goddard, A.M., M.D., &c.: with 80 Plates, comprising numerous separate Illustrations. 4to, pp. 236, and a page of letter-press to each Plate. Philadelphia, 1844. plain, £2 2s.; coloured, £4 4s.

Morrell.—Rheumatism, Acute and Chronic, by C. G. Morrell. 8vo. New York. 3s. 6d.

Morris.—Lectures on Scarlet Fever, by Caspar Morris, M.D., late Lecturer on Practical Medicine in the Philadelphia Medical Institute, Fellow of the College of Physicians of Philadelphia, Member of the American Philosophical Society, &c. 8vo. Philadelphia, 1851. cloth. 6s.

Morton.—Illustrations of Pulmonary Consumption, its Anatomical Characters, Causes, Symptoms, and Treatment, by S. G. Morton. 8vo. Philadelphia, 1837. sheep. 18s.

British Pharmacopœias; including also numerous Standard Formulæ, derived from American and European Authorities, designed for the Medical and Pharmaceutical Student, by J. J. Reese. 12mo. Philadelphia, 1850. 8s.

Reese.—An Analysis of Physiology; being a condensed View of its most important Facts and Doctrines: designed especially for the Use of Students, by John J. Reese, M.D., Lecturer on Materia Medica and Therapeutics in the Medical Institute of Philadelphia, &c. 2nd edition, revised and enlarged. 12mo. Philadelphia, 1852. bound. 9s.

Regulations for the Medical Department of the U.S. Army. 12mo, pp. 70. Washington, 1850. half-bound. 5s.

Renouard.—History of Medicine, from its Origin to the Nineteenth Century; with an Appendix, containing a Philosophical and Historical Review of Medicine to the Present Time, by P. V. Renouard, M.D. Translated from the French, by Cornelius G. Comegys. 8vo, pp. 719. Cincinnati, 1856. cloth. 18s.

Report of a General Plan for the Promotion of Public and Personal Health; devised, prepared, and recommended by the Commissioners appointed under a Resolve of the Legislature of Massachusetts, relating to a Sanitary Survey of the State, presented April 25th, 1850. 8vo, pp. 540. Boston. cloth.

Richardson.—Elements of Human Anatomy, General, Descriptive, and Practical, by T. G. Richardson, M.D., Demonstrator of Anatomy in the Medical Department of the University at Louisville, &c.; with nearly 300 Illustrations. royal 8vo, pp. 738. Philadelphia, 1855. sheep. 18s.

Ricord.—Illustrations of Syphilitic Diseases, by P. Ricord. Translated from the French, by T. F. Betton: with the addition of a History of Syphilis, and a complete Bibliography and Formulary of Remedies, collated and arranged by P. B. Goddard; with 50 large coloured Plates. 4to. Philadelphia, 1851. cloth. £4 10s.

Ricord.—A Practical Treatise of Venereal Diseases; or, Critical and Experimental Researches on Inoculation, applied to the Study of the Affections; with a Therapeutical Summary and Special Formulary, by P. Ricord, M.D. Translated from the French, by A. Sidney Doane, A.M., M.D. 7th edition. royal 8vo, pp. iv. and 339. Philadelphia, 1853. 10s.

Ricord.—Letters on Syphilis, by P. Ricord, M.D. Translated by W. P. Lattimore, M.D. 8vo. Philadelphia, 1854. sheep. 12s.

Rowell.—A Manual of Dental Economy; or, Practical Instruction on the Physiology and Treatment of Teeth, in order to check their Diseases, repair the Injuries, and insure their Preservation, by Dr. Chas. S. Rowell. 16mo, pp. 158. New York, 1855. 2s.

Ruter.—Reminiscences of a Virginia Physician, by P. S. Ruter. 8vo. Louisville, Kentucky, 1849. 3s.

St. Louis (the) Medical and Surgical Journal, edited by L. Linton, M.D., and William M. McPheeters, M.D.

Sargent.—On Bandaging and other Operations of Minor Surgery, by F. W. Sargent. 12mo. Philadelphia, 1848. 9s.

Sequard.—Experimental Researches applied to Physiology and Pathology, by E. Brown Sequard, M.D. 8vo. New York, 1853. 7s.

Shattuck.—The Vital Statistics of Boston; containing an Abstract of the Bill of Mortality for the last Twenty-nine Years; and a General View of the Population and Health of the City at other periods of its History, by Lemuel Shattuck. 18mo. Philadelphia, 1841.

Sherwood.—Motive Power of Organic Life, by Dr. H. H. Sherwood. 8vo. New York. cloth. 12s.

Sichel.—Spectacles, their Uses and Abuses in Long and Short-Sightedness, and the Pathological Condition resulting from their Irrational Employment, by Dr. Sichel, of Paris. 8vo. Boston, 1850. 10s.

Siebold and **Stannius.**—Comparative Anatomy, by C. Th. V. Siebold and H. Stannius. Translated from the German, and edited, with Notes and addi-

Oliver.—First Lines of Physiology, designed for the Use of Students of Medicine, by D. Oliver. 2nd edition. 8vo. Boston, 1844. 18s.

Packard.—Memorandum of a Late Visit to some of the Principal Hospitals, Prisons, &c., in France, Scotland, and England, by F. A. Packard. 8vo. Philadelphia, 1840.

Paine.—Materia Medica, by Martyn Paine. 8vo. New York, 1842. 12s.

Paine.—Essays on the Philosophy of Vitality, as contradistinguished from Chemical and Mechanical Philosophy, and on the Modus Operandi of Remedial Agents, by Martyn Paine, A.M., M.D. 8vo. New York, 1842.

Paine.—Medical and Physiological Commentaries, by Martyn Paine, M.D., A.M. 3 vols. 8vo. New York, 1844.

Paine.—The Institutes of Medicine, by Martyn Paine, M.D. 8vo. New York, 1847.

Paine.—A Discourse on the Soul and Instinct, Physiologically Distinguished from Materialism, introductory to the Course of Lectures on the Institutes of Medicine, by Martyn Paine, M.D. 8vo. New York, 1849.

Pancoast.—A Treatise on Operative Surgery; comprising a Description of the various Processes of the Art, including all the New Operations: exhibiting the State of Surgical Science in its present advanced condition, by Joseph Pancoast, M.D., &c. With 80 Plates, containing 486 separate Illustrations. 4to, pp. 380. Philadelphia, 1854. £4 4s. coloured, £5 5s.

Parrish.—An Introduction to Practical Pharmacy, designed as a Text-Book for the Student, and as a Guide to the Physician and Pharmaceutist; with many Formulas and Prescriptions, by Edward Parrish. With 243 Illustrations. 8vo, pp. 544. Philadelphia, 1856. cloth. 16s.

Parsons.—Physician for Ships, by U. Parsons. 12mo. Boston. cloth. 7s. 6d.

Peninsular (the) Journal of Medicine and the Collateral Sciences, edited by E. Andrews, A.M., M.D., &c.

Pharmacopœia of the United States of America, by authority of the National Medical Convention, held at Washington, A. D. 1850. 2nd edition. 12mo, pp. xxiii. and 317 Philadelphia, 1857. 6s.

Pierce.—Examination of Drugs, Medicines, Chemicals, &c., as to their Purity and Adulteration, by C. H. Pierce, M.D. 8vo. Philadelphia, 1853. cloth. 7s. 6d.

Piggot.—Chemistry and Metallurgy as applied to the Study and Practice of Dental Surgery, by A. Snowden Piggot, M.D., late Professor of Anatomy and Physiology in the Washington University of Baltimore. With Illustrations. 8vo, pp. 532. Philadelphia, 1854. cloth. 18s.

Piper.—Operative Surgery Illustrated: containing more than Nineteen Hundred Engravings, including Two Hundred Original, and Fifty Coloured Drawings; with Explanatory Text, by R. U. Piper, M.D. Also a Chapter on the Use of Ether in Surgery. 8vo. Boston, 1852. cloth. £1 11s. 6d.

Positive Medical Agents; being a Treatise on the New Alkaloid, Resinoid, and Concentrated Preparations of Indigenous and Foreign Medical Plants, by authority of the American Chemical Institute. 8vo, pp. 304. New York, 1853. cloth. 10s.

Publications of the Massachusetts Medical Society. Vol. I. No. 1. History and Statistics of Ovariotomy: a Prize Essay, by George H. Lyman, M.D., of Boston. 8vo, pp. 150. Boston, 1856. sewed.

Rafinesque.—Medical Flora; or, Manual of the Medical Botany of the United States of North America; containing a Selection of above 100 Figures and Descriptions of Medicinal Plants, with their Names, Qualities, Properties, History, &c.; and Notes and Remarks on nearly 500 equivalent Substitutes, by C. S. Rafinesque, A.M., Ph.D. 100 Cuts. 2 vols. 12mo. Philadelphia, 1828—1830.

Ratier.—A Practical Formulary of the Parisian Hospitals, by S. F. Ratier. Translated, with Notes, by R. D. M'Clellan. 8vo. New York, 1830. 3s.

Reese.—American Medical Formulary; based upon the United States and

Tracy.—The Mother and her Offspring; a Popular Physiological Work, by Stephen Tracy, M.D. 8vo. New York, 1853. cloth. 7s. 6d.

Transactions of the American Medical Association. Instituted 1847. Vols. I. to VII. Plates. 8vo. New York, 1847—1854. cloth.

Transactions of the Illinois State Medical Society, for the year 1854. 8vo, pp. 112. Chicago, 1855.

Transactions of the Medical Society of the State of Pennsylvania, at its Annual Session held in the City of Pottsville, May, 1854. 8vo, pp. 171. 1855.

Tucker.—Principles and Practice of Midwifery, by D. H. Tucker; with numerous Illustrations. 12mo. Philadelphia, 1848. sheep. 9s.

Turnbull.—On the Medical Properties of the Natural Order of the Ranunculaceæ, by Alexander Turnbull. 8vo. Philadelphia, 1838.

Turnbull.—An Investigation of the Remarkable Medicinal Effects resulting from the External Application of Veratria, by Alexander Turnbull. 8vo. Philadelphia, 1838.

Tyson.—Diary of a Physician in California; being the Results of Actual Experience, including Notes of the Journey, and Observations on the Climate, &c., by James L. Tyson, M.D. 8vo. New York, 1850.

Varden.—Medical Companion: 2nd Series, by J. T. Varden, M.D. 8vo. New York, 1852. cloth. 12s.

Velpeau.—Treatise on the Diseases of the Breast, by A. L. M. Velpeau. Translated by S. Parkman. 8vo. Philadelphia, 1841. 9s.

Velpeau.—New Elements of Operative Surgery, by Alfred A. L. M. Velpeau. Carefully revised, entirely remodelled, and augmented with a Treatise on Minor Surgery. Illustrated by over 200 Engravings, incorporated with the Text. 3rd American, from the last Paris edition. Translated by P. S. Townsend, M.D. Augmented by the Addition of several hundred pages of entirely new matter; comprising all the latest Improvements and Discoveries in Surgery in America and Europe up to the present time. Under the supervision of, and with Notes and Observations by, V. Mott, M.D. 3 vols. 8vo, and an Atlas in 4to of 22 Plates. New York. 1851. £4 10s.

Velpeau.—A Complete Treatise on Midwifery; or, the Theory and Practice of Tokology, including the Diseases of Pregnancy, Labour, and the Puerperal State, by Alfred A. L. M. Velpeau, M.D. Translated from the French, by Charles D. Meigs, M.D. 4th edition, by Wm. Byrd Page, M.D., Lecturer on Obstetrics in the Philadelphia Medical Institute, &c.: with numerous Illustrations. 8vo. Philadelphia, 1852. bound. £1 1s.

Vidal.—A Treatise on the Venereal Disease, by A. Vidal (de Cassis), Surgeon in the Venereal Hospital of Paris, Author of the "Traité de Pathologie externe et de Médecine Opératoire, &c., &c. with coloured Plates. Translated and edited by George C. Blackman, M.D., Fellow of the Royal Med. Chirurgical Society of London, &c. royal 8vo, pp. 500. New York, 1854. cloth. £1 5s.

Virginia (the) Medical and Surgical Journal, edited by Drs. George A. Atis and H. L. Thomas. Published monthly at Richmond. Ann. sub. £1 10s.

Warner.—Family Dentist: a Popular Treatise on the Teeth, by D. C. Warner, M.D. 12mo. New York. cloth. 4s. 6d.

Warren.—Surgical Observations on Tumours, with Cases and Operations, by John C. Warren. Plate. 8vo. Boston, 1839. 16s.

Warren.—Etherization, with Surgical Remarks, by John C. Warren, M.D. 8vo. Boston, 1848. 3s.

Warren.—On Constipation, by Professor J. C. Warren. Boston, 1855. 1s.

Warren.—Boylston Prize Dissertation for 1838, 1839, on Scrofula, Rheumatism, and Erysipelatous Inflammation, by Edward Warren. 8vo. Philadelphia, 1840.

Watson.—The Medical Profession in Ancient Times: an Anniversary Discourse delivered before the New York Academy of Medicine, November 7,

1855, by John Watson, M.D., Surgeon to the New York Hospital (published by order of the Academy). 8vo, pp. 226. New York, 1856. cloth. 12s.

Weber.—Plates of the Muscles of the Human Body, by M. T. Weber, M.D., Professor of Anatomy in the University of Bonn, Prussia. Engraved on Copper, with the name attached to each Muscle. After B. S. Albinus. Philadelphia, 1852. square folio, sewed. 12s.

Webster.—A Brief History of Epidemics and Pestilential Diseases; with the principal Phenomena of the Physical World which precede and accompany them, and Observations deduced from the Facts stated, by Noah Webster. 2 vols. 8vo. Hartford, 1799. 18s.

Western Journal (the) of Medicine and Surgery, edited by L. P. Yandell, M.D.

Western Lancet and Hospital Reporter (the), edited by L. M. Lawson, M. D. Published monthly at Cincinnati. Annual subscription, 18s.

Wharton.—A Monograph on Mental Unsoundness, by Francis Wharton. 8vo, pp. 232. Philadelphia. sewed. 7s. 6d.

Williams.—American Medical Biography, by S. W. Williams. 8vo. Greenfield, Mass. cloth. 18s.

Wilson.—An Inquiry into the Nature and Treatment of the Prevailing Epidemic, called Spotted Fever, by Job Wilson, M.B. 8vo. Boston, 1815.

Wood.—An Address on the Occasion of the Centennial Celebration of the Founding of the Pennsylvania Hospital, delivered June 10, 1851, by George B. Wood, M.D. Published by the Board of Managers. With a Plate. 8vo, pp. 144. Philadelphia, 1851. cloth.

Wood.—A Treatise on the Practice of Medicine, by George B. Wood, M.D., Professor of the Theory and Practice of Medicine in the University of Pennsylvania, President of the College of Physicians of Philadelphia, &c. &c. 4th edition. In 2 vols. 8vo, pp. 1712. Philadelphia, 1855. £1 16s.

Wood.—A Treatise on Therapeutics, and Pharmacology of Materia Medica, by George B. Wood, M.D. 2 vols. 8vo, pp. 856 and 904. Philadelphia, 1856. cloth. £2 2s.

Wood and **Bache.**—The Dispensatory of the United States, by George B. Wood and Franklin Bache. 10th edition, revised. 8vo. Philadelphia, 1854. sheep. £1 12s.

Worcester.—Synopsis of the Symptoms, Diagnosis, and Treatment of Diseases of the Skin, by N. Worcester. 8vo. Philadelphia. £1 1s.

MEDICINE AND SURGERY.

HOMŒOPATHY, HYDROPATHY, MAGNETISM, MESMERISM, PHRENOLOGY, POPULAR MEDICINE.

Alcott.—Vegetable Diet: as Sanctioned by Medical Men, and by Experience in all Ages. Including a System of Vegetable Cookery, by Dr. Alcott. 8vo. New York. 5s.

Alcott.—Lectures on Life and Health; or, the Laws and Means of Physical Culture, by William A. Alcott, M.D.: with Portrait and Illustrations. 12mo, pp. 504. Boston, 1853. cloth. 6s.

Alcott.—The House I Live In; or, the Human Body, by William A. Alcott, 12mo. New York, 1854. 4s.

American Phrenological Journal.—A Repository of Science, Literature, and General Intelligence. Devoted to Phrenology, Physiology, Education, Mechanism, Agriculture, and to all those Progressive Measures which are cal-

culated to Reform, Elevate, and Improve Mankind. Illustrated with numerous Engravings. 4to, pp. 288. Published monthly. New York. Annual subscription, 8s.

Atkin.—The British and Foreign Homœopathic Medical Directory and Record, edited by Dr. George Atkin. Issued July 1st, 1853. New York. bound. 7s. 6d.

Beach.—The American Practice Condensed; or, the Family Physician: being the Scientific System of Medicine, on Vegetable Principles, designed for all classes. This Work embraces the Character, Causes, Symptoms, and Treatment of the Diseases of Men, Women, and Children, of all Climates, by W. Beach, M.D. Complete in one volume. Illustrated with nearly 200 Engravings. 14th edition. 8vo, pp. 800. New York, 1848. £1 10s.

Becker.—Consumption, treated Homœopathically, by Dr. A. C. Becker. Translated from the German. 8vo, pp. 86. New York, 1847. 2s.

Becker.—Allopathy, Hahnemannism, and Rational Homœopathy, by Dr. A. C. Becker. 8vo. New York. 1s.

Becker.—Diseases of the Eye, treated Homœopathically, by Dr. A. C. Becker. Translated from the German. 8vo, pp. 77. New York, 1848. 2s.

Becker.—Dentition, according to some of the best and latest German Authorities; intended for Domestic Use, by Dr. A. C. Becker. Translated from the German. 8vo, pp. 82. New York, 1848. 2s.

Becker.—Diseases of the Digestive Organs and Constipation, treated Homœopathically, by Dr. A. C. Becker. Translated from the German, by W. Broackes, M.D. 2nd edition. 8vo, pp. 128. New York, 1848. 2s.

Bell.—Animal Magnetism: Past Fictions—Present Science, by John Bell, M.D. 8vo. Philadelphia, 1837.

Berkley.—Sketch of Hahnemann and his Wife; from the Portfolio of one who knew them; together with a Homœopathic Dietary, and a List of Popular Works on the Principles and Practice of Homœopathy, by Helen Berkley. 8vo, pp. 36. New York, 1850. 6d.

Bœnninghausen.—Therapeutic Pocket-Book for Homœopathic Physicians, to be used at the Bedside of the Patient, and in studying the Materia Medica Pura, by Dr. C. Von Bœnninghausen. Edited by Charles J. Hempel, M.D. 8vo, pp. 504. New York, 1847. 10s.

Bœnninghausen.—Essay on the Homœopathic Treatment of Intermittent Fevers. Translated and edited by C. J. Hempel, M.D. 8vo, pp. 56. New York, 1845. 2s.

Bœnninghausen.—The Sides of the Body and Drug-Affinities. Homœopathic Exercises, by Dr. C. Von Bœnninghausen. Translated and edited by Charles J. Hempel, M.D. 8vo, pp. 28. Philadelphia, 1854. 1s. 6d.

Bœnninghausen.—Homœopathic Exercises, by Hempel, by Dr. Bœnninghausen. 8vo. Philadelphia. 1s. 6d.

Boston Quarterly Homœopathic Journal.—Edited by Drs. Joseph Birnstill and B. de Gersdorf. Vol. I., 1849; Vol. II., 1850 Price per vol. in numbers, 15s.; bound, per vol. 18s.

Bowers.—Reason why Homœopathy should receive an Impartial Investigation from the Medical Profession and the Public, by B. F. Bowers, M.D. 8vo, pp. 24. New York, 1846. 1s.

Bryant.—The Rival Schools of Medicine; or, Homœopathy versus Allopathy. A Lecture, by Dr. J. Bryant. 8vo, pp. 24. New York, 1848. 1s.

Bryant.—A Pocket Manual, or Repertory of Homœopathic Medicine, alphabetically and nosologically arranged; which may be used as the Physician's Vade-Mecum, the Traveller's Medical Companion, or the Family Physician; containing the principal remedies for the most important diseases, symptoms, sensations, characteristics of diseases, &c.; with the principal pathogenetic effects of the medicines on the most important organs and functions of the body; together with diagnosis, explanation of technical terms, directions for the selection and exhibition of remedies, rules of diet, &c. &c. Com-

piled from the best Homœopathic Authorities, by Dr. J. Bryant. 2nd edition. 12mo, pp. 352. New York, 1854. 6s. 6d.

Bush.—Mesmer and Swedenborg; or, a Relation of the Developments of Mesmerism to the Doctrines and Disclosures of Swedenborg, by George Bush. 8vo. New York, 1847.

Caldwell.—Phrenology Vindicated, by Charles Caldwell. 8vo. New York, 1838. 1s. 6d.

Caspari.—Homœopathic Domestic Physician, by Caspari. Edited by F. Hartmann, M.D. Translated from the eighth German edition, and enriched by a Treatise on Anatomy and Physiology, by W. P. Esrey, M.D.; with Additions and a Preface, by C. Hering, M.D. 30 Illustrations. 8vo, pp. 475. Philadelphia, 1852. 7s. 6d.

Coles.—The Beauties and Deformities of Tobacco Using; or, its Ludicrous and its Solemn Realities, by L. B. Coles, M.D. 8vo. Boston, 1851.

Comfort.—The Practice of Medicine on Thomsonian Principles, adapted as well to the Use of Families as that of the Practitioner: containing a Biographical Sketch of Dr. Thomson; Proposition illustrative of the Philosophy of Thomsonianism; a Brief History of the Symptoms, Peculiarities, and General Course of Disease, in its different Forms and Varieties: with Practical Directions for Administering the Thomsonian Medicines, including the various Methods of Administering Vapour Baths, Emetics, &c., and a Materia Medica adapted to the Work, by J. W. Comfort, M.D. 4th edition. 8vo. Philadelphia, 1853. bound. 16s.

Comings.—Preservation of Health and Prevention of Disease; including Practical Suggestions on Diet, Mental Development, Exercise, Ventilation, Bathing, Use of Medicines, Management of the Sick, &c., by B. N. Comings, M.D. 12mo, pp. 208. New York, 1854. cloth. 6s.

Comings.—Class-Book of Physiology, for the Use of Schools and Families: comprising the Structure and Functions of the Organs of Man, illustrated by Comparative Reference to those of Inferior Animals, by B. N. Comings, M.D. 2nd edition, with an Appendix. with 24 Plates and Engravings. 12mo, pp. 324. New York, 1857. 6s.

Comstock.—Elements of Chemistry; in which the Recent Discoveries in the Science are included, and its Doctrines familiarly explained. Designed for the Use of Schools, by J. L. Comstock, M.D. 106 Engravings. 12mo, pp. 430. New York. 5s. 6d.

Comstock.—Outlines of Physiology, both Comparative and Human; in which are described the Mechanical, Animal, Vital, and Sensorial Organs and Functions; also, the Applications of these Principles to Muscular Exercise, and Female Fashions and Deformities; intended for the Use of Schools and Heads of Families; together with a Synopsis of Human Anatomy, by J. L. Comstock, M.D. 146 Engravings. 12mo, pp. 360. New York. bound. 4s. 6d.

Cook.—Mariner's Physician and Surgeon; or, a Guide to the Homœopathic Treatment of those Diseases to which Seamen are liable, by George W. Cook, M.D. 8vo. New York, 1848. bound. 2s.

Croserio.—Homœopathic Manual of Obstetrics; or, a Treatise on the Aid the Art of Midwifery may derive from Homœopathy, by Dr. C. Croserio. From the French, by M. Cote, M.D. 8vo, pp. 153. Cincinnati, 1853. 4s. 6d.

Curtis and Lillie.—Epitome of Homœopathic Practice: compiled chiefly from Jahr, Rückert, Beauvais, Bœnninghausen, &c., by J. T. Curtis, M.D., and J. Lillie, M.D. 2nd enlarged edition. 8vo, pp. 206. New York, 1850. 3s.

Curtis.—The Relations of Homœopathy to Chemistry: an Inaugural Address, delivered before the Hahnemann Academy of Medicine, January 14th, 1852, by J. T. Curtis, M.D. 8vo, pp. 20. New York, 1852. 1s.

Cutter.—Human and Comparative Anatomy, Physiology, and Hygiene, by Mrs. Eunice P. Cutter. With 100 Engravings. 12mo, pp. 132. New York, 1854. boards. 2s.

Cutter.—A Treatise on Anatomy, Physiology, and Hygiene: designed for Colleges, Academies, and Families, by Calvin Cutter, M.D. With 150 Engravings. crown 8vo, pp. 466. New York, 1854. cloth. 6s.

Cutter.—First Book on Anatomy, Physiology, and Hygiene, for Grammar Schools and Families, by Calvin Cutter, M.D. With 83 Engravings. crown 8vo, pp. 192. New York, 1855. half-bound. 2s. 6d.

Davis.—Manual of Magnetism; including also Electro-Magnetism, Magneto-Electricity, and Thermo-Electricity; with a Description of the Electrotype Process. 8vo. Boston, 1842. 7s. 6d.

Defence of Phrenology; containing the Nature and Value of Phrenological Evidence: a Work for Doubters. 12mo. New York. 5s.

Dods.—Philosophy of Mesmerism. Six Lectures; with an Introduction, by the Rev. John Bovee Dods. 8vo. New York. 2s. 6d.

Dods.—Lectures on Philosophy of Electrical Psychology, by J. B. Dods. 8vo. New York, 1854. 4s. 6d.

Douglas.—Homœopathic Treatment of Intermittent Fevers, by Dr. J. S. Douglas. 8vo, pp. 108. New York, 1853. 2s.

Dysentery and its Homœopathic Treatment: containing also a Repertory and numerous Cases, by F. Humphreys, M.D., Professor of Homœopathic Institutes, Pathology, and the Practice of Medicine in the Homœopathic Medical College of Pennsylvania. 8vo, pp. 87. New York, 1853. 3s.

Esrey.—Treatise on Anatomy and Physiology, by Dr. W. P. Esrey. With 30 Illustrations. 8vo, pp. 195. Philadelphia, 1851. bound. 2s. 6d.

Esrey.—Materia Medica of American Provings, by C Hering, M.D., J. Jeanes, M.D., C. B. Matthews, M.D., W. Williamson, M.D., C. Neidhard, M.D., S. Dubs, M.D., C. Bute, M.D. Collected and arranged by the American Institute of Homœopathy; with a Repertory, by W. P. Esrey, M.D. 12mo, pp. 300. Philadelphia, 1853. cloth. 6s.

Containing the Provings of Acidum benzoicum, Acidum fluoricum, Acidum oxalicum, Elaterium, Eupatorium perfoliatum, Kalmia latifolia, Lobelia inflata, Lobelia cardinalis, Podophyllum petatum, Sanguinaria canadensis, and Triosteum perfoliatum.

Familiar Lessons on Phrenology and Physiology; for Children and Youth. 2 vols. in 1. 8vo. New York. 7s. 6d.

Flourens.—Phrenology Examined, by P. Flourens. Translated by Charles de Lucena Meigs, M.D. 8vo. Philadelphia, 1846.

Fowler.—Phrenology Proved, Illustrated, and Applied; accompanied by a Chart, embracing an Analysis of the Primary Mental Powers in their Various Degrees of Development, the Phenomena produced by their combined activity, and the Location of the Phrenological Organs in the Head; together with a View of the Moral and Theological Bearing of the Science, by O. S. and L. N. Fowler. 8vo. New York, 1848. 7s. 6d.

Fowler.—The Natural Theology and Moral Bearing of Phrenology, by O. S. Fowler. 12mo. New York. cloth. 4s. 6d.

Fowler.—Self-Instructor in Phrenology and Physiology, by O. S. and L. N. Fowler. Illustrated with 100 Engravings; including a Chart for recording the various Degrees of Development. 8vo. New York.

Fowler.—Self-Culture, and Perfection of Character; including the Education and Management of Youth, by O. S. Fowler. 8vo. New York. 1s. 6d.

Fowler.—Memory and Intellectual Improvement: applied to Self-Education and Juvenile Instruction, by O. S. Fowler. Illustrated. 8vo. New York. 5s.

Fowler.—Maternity; or, the Bearing and Nursing of Children, including Female Education, by O. S. Fowler. 8vo. New York. 5s.

Fowler.—Physiology, Animal and Mental, applied to the Preservation and Restoration of Health of Body and Power of Mind, by O. S. Fowler. Illustrated. 8vo. New York. 5s.

Fowler.—Hereditary Descent: its Laws and Facts applied to Human Improvement, by O. S. Fowler. 8vo. New York. 5s.

Fowler.—Love and Parentage; applied to the Improvement of Offspring; including Important Directions to Lovers and the Married, concerning the strongest Ties, and the most sacred and momentous Relations of Life, by O. S. Fowler. 12mo. New York. 2s.

Fowler.—Marriage: its History and Philosophy; with a Phrenological and Physiological Exposition of the Functions and Qualifications necessary for Happy Marriages, by L. N. Fowler. Illustrated. 8vo. New York.

Francke.—Theory and Practice of Hydropathy: Outlines of a New Theory of Disease, applied to Hydropathy, showing that Water is the only true Remedy; with Observations on the Errors committed in the Practice of Hydropathy; Notes on the Cure of Cholera by Cold Water; and a Critique on Priessnitz's Mode of Treatment, by H. Francke. Translated by R. Baikee, M.D. 12mo. New York, 1849. cloth. 4s. 6d.

Franklin.—Animal Magnetism: Report of Dr. Franklin, and other Commissioners, on Animal Magnetism; with an Historical Outline of the "Science," an Abstract of the Report of Magnetic Experiments, made by a Committee of the Royal Academy of Medicine, in 1831, and Remarks on Colonel Stone's Pamphlet, by J. J. Smith, Jun. 8vo. Philadelphia, 1837.

Freligh.—Homœopathic Practice of Medicine: embracing the History, Diagnosis, and Treatment of Disease in general; including those peculiar to Females; and the Management of Children, by D. M. Freligh. 6th edition. 8vo, pp. 602. New York, 1856. half-bound. 7s. 6d.

Freligh.—Homœopathatic Pocket Companion; or, a Simplified Abridgment of the "Homœopathic Practice of Medicine;" designed expressly for the Use of Families and Travellers, by Dr. Freligh. 12mo. pp. 296. New York, 1856. bound. 4s.

Gall.—The Collected Works of François Jos. Gall, M.D. Translated from the French, by Winslow Lewis, Jun., M.D., M.M.S.S. 6 vols. 12mo. Boston, 1835. boards. £1 1s.

Gall.—Manual of Phrenology; being an Analytical Summary of the System of Doctor Gall. 8vo. Philadelphia, 1835.

Geib.—An Essay on Homœopathy: a Synopsis of the History and Principles of the Science, by Dr. Geib. 8vo. Philadelphia, 1842.

Gollmann.—The Homœopathic Guide in all Diseases of the Urinary and Sexual Organs; including the Derangements caused by Onanism and Sexual Excesses; with a strict regard to the present Demands of Medical Science; and accompanied by an Appendix on the Use of Electro-Magnetism in the Treatment of these Diseases, by Wm. Gollmann, M.D. Translated, with Additions, by Chas. J. Hempel, M.D. 8vo, pp. 309. Philadelphia, 1855. cloth. 8s. 6d.

Graham.—The Science of Human Life, by Sylvester Graham, M.D.; with a Portrait and Biography of the Author. 8vo. New York. 15s.

Gray.—The Duty of the State in relation to Homœopathy; an Inaugural Address, delivered before the Hahnemann Academy of Medicine, New York, Jan. 9, 1850, by J. F. Gray, M.D. 8vo, pp. 28. New York, 1850. 1s.

Griglietta.—A Brief Essay on Electro-Magnetism, with a Description of Davenport's Machines, &c., by C. Griglietta. 8vo. Philadelphia, 1838.

Grimes.—A New System of Phrenology, by J. Stanley Grimes; with numerous Portraits. 12mo, pp. 320. Buffalo, 1839. half-bound. 1s. 6d.

Grimes.—Etherology; or, the Philosophy of Mesmerism and Phrenology, by J. Stanley Grimes. 8vo. New York, 1845.

Grimes.—Phreno-Geology: the Progressive Creation of Man, by J. S. Grimes. 12mo. Boston, 1851. cloth. 7s. 6d.

Griscom.—Animal Mechanism and Physiology; being a Plain and Familiar Exposition of the Structure and Functions of the Human System; designed for Families and Schools, by J. H. Griscom. Engravings. 18mo. New York, 1839. cloth. 3s.

Gunther.—New Manual of Homœopathic Veterinary Medicine; or, the

Homœopathic Treatment of the Horse, the Ox, the Sheep, the Dog, and other Domestic Animals, by F. A. Gunther. Translated from the German. 8vo, pp. 368. Boston, 1856. cloth. 8s.

Guernsey.—The Gentleman's Hand-Book of Homœopathy; especially for Travellers and for Domestic Practice, by E. Guernsey, M.D. 8vo. New York, 1855. 1s.

Guernsey.—Homœopathic Domestic Practice; containing also Chapters on Anatomy, Physiology, Hygiene, and an abridged Materia Medica, by Egbert Guernsey, M.D. 2nd edition. 8vo, pp. 653. New York, 1857. 7s. 6d.

Haddock.—Psychology; or, the Science of the Soul, considered Physiologically and Philosophically; with an Appendix, containing Notes of Mesmeric and Psychical Experience, by Joseph Haddock, M.D. 8vo. New York. 2s. 6d.

Hall's Journal of Health. Published monthly, at New York. Ann. sub. 6s.

Hahnemann.—The Chronic Diseases, their Specific Nature and Homœopathic Treatment, by Dr. Samuel Hahnemann. Translated and edited by C. J. Hempel, M.D.; with a Preface by C. Hering, M.D., Philadelphia. 5 vols. 8vo, pp. 1632. New York, 1845. £1 15s.

Hahnemann.—Materia Medica Pura, by Dr. Samuel Hahnemann. Translated by C. J. Hempel, M.D. 4 vols. pp. 882. New York, 1846. bd. £1 10s.

Hahnemann.—Organon of Homœopathic Medicine, by Dr. Samuel Hahnemann. 3rd American edition, with Improvements and Additions from the last German edition, and Dr. C. Hering's Introductory Remarks. 8vo, pp. 230. New York, 1849. 6s.

Hahnemann.—Life of Hahnemann, by Dr. A. Gerald Hull; with an Engraving of Hahnemann. 8vo, pp 18. New York, 1841. 2s.

Hammond.—Medical Information for the Million; or, the True Guide to Health, on Eclectic and Reformed Principles; to which is added, a Practical Essay on Sexual Diseases, by Charles D. Hammond, M.D. Illustrated by nearly 100 Engravings. 2nd edition, enlarged and improved. 12mo, pp. 524. New York, 1850. cloth. 7s. 6d.

Hartmann.—Practical Observations on some of the chief Homœopathic Remedies, by Dr. F. Hartmann. Translated from the German, with Notes, by A. Howard Okie, M.D. 2nd and last series, containing Belladonna and Nux Vomica, &c. 8vo, pp. 192. New York, 1846. 6s.

Hartmann.—Acute and Chronic Diseases, and their Homœopathic Treatment, by Dr. F. Hartmann. 3rd German edition, revised and considerably enlarged by the author. Translated, with Additions, and adapted to the Use of the American Profession, by C. J. Hempel, M.D. 4 vols. 8vo, pp. 944. New York, 1847. £1 10s.

Hartmann.—Diseases of Children and their Homœopathic Treament. Translated, with Notes, and prepared for the Use of the American and English Profession, by Charles J. Hempel, M.D., Fellow and Corresponding Member of the Homœopathic College of Pennsylvania, &c. 8vo, pp. 509. New York, 1853. 10s.

Helmuth.—Surgery, and its Adaptation to Homœopathic Practice, by William T. Helmuth, M.D. Illustrated with numerous Engravings on Wood. 8vo, pp. 660. Philadelphia, 1856. sheep. 18s.

Hempel.—On Eclecticism in Medicine; or, a Critical Review of the Leading Medical Doctrines: an Inaugural Thesis, presented at the New York University, on the 1st of March, 1845, by C. J. Hempel, M.D. 8vo. pp. 45. New York, 1845. 1s. 6d.

Hempel.—A Treatise on the Use of Arnica, in Cases of Contusions, Wounds, Sprains, Lacerations of the Solids, Concussions, Paralysis, Rheumatisms, Soreness of the Nipples, &c. &c.; with a Number of Cases, illustrative of the Use of that Drug, by C. J. Hempel. 8vo, pp. 16. New York, 1845. 1s.

Hempel.—Homœopathic Domestic Physician, by C. J. Hempel. 2nd edition. 8vo, pp. 213. New York, 1850. 2s. 6d.

Hempel.—Organon of Specific Homœopathy; or, an Inductive Exposition of the Principles of the Homœopathic Healing Art, addressed to Physicians and Intelligent Laymen, by Charles J. Hempel, M.D. 8vo, pp. 216. Philadelphia, 1854. 5s.

Hering.—The Homœopathist; or, Domestic Physician, by Dr. C. Hering. Revised, with Additions, from the Author's manuscript of the 7th German edition; containing also a Tabular Index of the Medicines and the Diseases in which they are used. 5th American edition. 8vo. New York, 1851. 10s.

Hill.—Lectures on the American Eclectic System of Surgery, by Benjamin L. Hill, M.D.; with over one hundred Engravings illustrating the practice of Surgery. 8vo, pp. 672. Cincinnati, 1850. £1 1s.

Hitchcock.—Lectures on Diet, Regimen, and Employment, by Edward Hitchcock. 12mo. Northampton, Mass. boards. 5s.

Hitchcock.—Essay on Alcoholic and Narcotic Substances as Articles of Common Use, by Edward Hitchcock. 8vo. Amherst, 1830.

Hitchcock.—Dyspepsia Forestalled and Resisted, by Edward Hitchcock. 12mo. Amherst, Mass., 1831.

Hoffendahl.—On the Homœopathic Treatment of Cholera, by Dr. C. F. Hoffendahl. 8vo. New York. 1s.

Holcombe.—The Scientific Basis of Homœopathy, by W. H. Holcombe, M.D. crown 8vo. Cincinnati, Ohio. cloth. 5s. 6d.

Holcombe.—Yellow-Fever and its Homœopathic Treatment, by W. H. Holcombe, M.D. 8vo, pp. 71. New York, 1856. 2s.

Holt.—Views of Homœopathy, with Reasons for Examining and Admitting it as a Principle in Medical Science, by Dr. Daniel Holt. 8vo, pp. 48. New Haven, 1845. 1s. 6d.

Homœopathic Examiner.—Vols. I. and II., new Series, by Drs. Gray and Hempel, 1845—1847. Bound in 2 vols.; with an inoptical Index over the 2 volumes, can be used as a Manual. New York. £1 15s.
Reduced for a short time to £1 5s.

Homœopathic Examiner.—By A. Gerald Hull, M.D. A few copies of the second and third volume of this most estimated Journal are on hand. From 1841 to 1844, in 2 large volumes, royal 8vo. New York. bound. £2 10s.

Hooker.—Doctrines and Evidences of Homœopathy, by Dr. W. Hooker. 12mo. New York. 4s. 6d.

Humphreys.—The Cholera and its Homœopathic Treatment, by Prof. Dr. F. Humphreys. 8vo, pp. 72. New York, 1849. 2s.

Humphreys.—Dysentery and its Homœopathic Treatment; containing also a Repertory and numerous Cases, by Fred. Humphreys, M.D. 8vo, pp. 96. 1853. cloth. 2s. 6d.

Humphreys.—Homœopathic Treatment of Diseases of the Sexual System; being a complete Repertory of all the Symptoms occurring in the Sexual System of the Male and Female; adapted to the Use of Physician and Laymen, by Fred. Humphreys, M.D.; translated, arranged, and edited, with Additions and Improvements. 2nd thousand. 8vo, pp. 144. Philadelphia, 1854. bound. 2s. 6d.

Hydriatics.—A Manual of the Water Cure, especially as practised by Vincent Priessnitz in Græfenburg. Compiled and translated from the Writings of Dr. Charles Munde, Dr. Oertel, Dr. B. Hirschel, and other Eye-Witnesses and Practitioners, by Francis Græter. 8vo. New York. bound. 2s. 6d.

Jahr.—New Manual: originally published under the name of Symptomen-Codex (Digest of Symptoms), by Dr. G. H. G. Jahr. This work is intended to facilitate a comparison of the parallel symptoms of the various Homœopathic agents, thereby enabling the Practitioner to discover the characteristic symptoms of each drug, and to determine with ease and correctness what Remedy is most Homœopathic to the existing group of symptoms. Translated, with important and extensive additions from various sources, by Charles Julius Hempel, M.D., assisted by James M. Quin, M.D., with Re-

visions and Clinical Notes by John F. Gray, M.D.; contributions by Drs. A. Gerald Hull, George W. Cook, and Dr. B. F. Joslin, of New York; and Drs. C. Hering, J. Jeanes, C. Neidhard, W. Williamson, and J. Kitchen, of Philadelphia; with a Preface by Constantine Hering, M.D. 2 vols. 8vo, pp. 2004. £4 15s.

The third volume is issued as a separate work, under the title of Complete Repertory of the Homœopathic Materia Medica, by Charles J. Hempel, M.D. pp. 1224. New York, 1848 to 1853. Price £1 10s.; or all 3 volumes at £6 5s.

Jahr.—Clinical Guide, or Pocket-Repertory for the Treatment of Acute and Chronic Diseases, by Dr. G. H. G. Jahr. Translated from the German, by C. J. Hempel, M.D. 8vo, pp. 409. New York, 1850. 7s. 6d.

Jahr.—New Manual of Homœopathic Practice, by Dr. G. H. G. Jahr. Edited, with Annotations, by A. Gerald Hull, M.D. Complete Symptomatology and Repertory. 2 vols. 8vo, pp 1862. New York, 1850. bound. £1 10s.

Jahr.—Diseases of the Skin; or, Alphabetical Repertory of the Skin-symptoms and External Alterations of Substance, together with the Morbid Phenomena observed in the Glandular, Osseous, Mucuous, and Circulatory Systems, arranged, with Pathological Remarks on the Diseases of the Skin, Dr. G. H. G. Jahr. Edited by C. J. Hempel, M.D. 8vo, pp. 515. New York, 1850. 5s.

Jahr.—The Homœopathic Treatment of the Diseases of Females and Infants at the Breast, by Dr. G. H. G. Jahr. Translated from the French, by Charles J. Hempel, M.D. 8vo, pp. 446. New York, 1856. 10s.

Jahr and **Gruner.**—New Homœopathic Pharmacopœia and Posology, or the Mode of Preparing Homœopathic Medicine, and the Administration of Doses; compiled and translated from the German Works of Buchner, Gruner, and the French work of Jahr, by C. J. Hempel, M.D. 8vo, pp. 359. New York, 1850. 10s.

Jahr and **Possart.**—New Manual of the Homœopathic Materia Medica, arranged with Reference to well-authenticated Observations at the Sick Bed, and accompanied by an Alphabetical Repertory to facilitate and secure the selection of a suitable Remedy in any given Case. 4th edition, revised and enlarged by the Author, Symptomatology and Repertory. Translated and edited by Charles J. Hempel, M.D. 8vo, pp. 924. New York, 1853. 18s.

Jarvis.—Primary Physiology for Schools, by Edward Jarvis, M.D. with numerous Woodcuts. 12mo, pp. 168. Philadelphia, 1850. 3s. 6d.

Johnson.—The Physiology of the Senses; or, How and What we See, Hear, Taste, Feel, and Smell, by A. B. Johnson. 12mo, pp. 214. New York, 1856. cloth. 5s.

Jones.—Dry Cough, or Tussis Sicca, by Dr. Elijah U. Jones. 8vo, pp. 16. Philadelphia, 1855. 6d.

Joslin.—Law of Cure. Address before the American Institute of Homœopathy, held at Philadelphia, June 13th, 1850, by Dr. B. F. Joslin. pp. 18. Boston, 1849. 1s.

Joslin.—Principles of Homœopathia, in a Series of Lectures, by Dr. B. F. Joslin. 8vo, pp. 185. New York, 1850. 4s. 6d.

Joslin.—Homœopathic Treatment of Cholera, including Repertories for this Disease and for Summer Complaints, by Dr. B. F. Joslin. 3rd edition, with Additions. 8vo, pp. 252. New York, 1854. 5s.

Kreussler.—Pocket Therapeutics of Acute and Chronic Diseases, by E. Kreussler. 8vo. Philadelphia, 1854.

Kreussler.—The Homœopathic Treatment of Acute and Chronic Diseases, by E. Kreussler. Translated from the German, with important Additions and Revisions, by Charles J. Hempel, M.D. 12mo, pp. 202. Philadelphia, 1854. cloth. 5s.

La Borde.—An Introduction to Physiology, designed for the Use of Students and of the General Reader, by M. La Borde, M.D., Professor of Metaphysics,

Logic, and Physiology in the South Carolina College. With Illustrations. 12mo, pp. 394. New York, 1855. 7s. 6d.

Lambert.—Hygienic Physiology, by T. S. Lambert, M.D. Finely Illustrated by numerous Woodcuts and coloured Engravings. 12mo, pp. 144 and 40. Portland, Me., 1852. 3s. 6d.

Lambert.—Human Anatomy, Physiology, and Hygiene, by S. S. Lambert, M.D. 300 Engravings. 12mo. Hartford, 1854. cloth. 7s.

Lane.—Mysteries of Tobacco, by B. J. Lane. 8vo. New York, 1845. 2s. 6d.

Lane.—Responses on the Use of Tobacco, by B. J. Lane. 8vo. New York, 1845. 2s. 6d.

Lazarus.—Homœopathy, a Theoretic Demonstration, with Social Applications, by Dr. M. E. Lazarus. 8vo, pp. 69. New York, 1851. 2s.

Lazarus.—Involuntary Seminal Losses: their Causes, Effects, and Cure, by Dr. M. E. Lazarus. 8vo. New York, 1852. paper cover. 1s. 6d.

Lee.—Human Physiology, for the Use of Elementary Schools, by C. A. Lee. 12mo. New York. 4s. 6d.

Leger.—Animal Magnetism, or Psycodunamy, by Theodore Leger. 8vo. New York, 1846.

Malan.—Family Guide to the Administration of Homœopathic Remedies, by Malan. 8vo, pp. 112. New York, 1855. 1s. 6d.

Marcy.—The Homœopathic Theory and Practice of Medicine, by Dr. E. E. Marcy. 2nd edition. 3rd thousand. 8vo, pp. 631. New York, 1852. 10s.

Marcy.—Homœopathy and Allopathy: Reply to an Examination of the Doctrines and Evidences of Homœopathy, by Worthington Hooker, M.D., by Dr. E. E. Marcy. 8vo, pp. 144. New York, 1853. 2s. 6d.

Materia Medica of American Provings, by C. Hering, M.D., J. Jeanes, M.D., C. B. Matthews, M.D., W. Williamson, M.D., C. Neidhard, M.D., S. R. Dubs, M.D., C. Bute, M.D. Containing the Provings of Acidum-benzoicum, Acidum-fluoricum, Acidum-oxalicum, Elaterium, Eupatorium-perfoliatum, Kalmia-latifolia, Lobelia-inflata, Lobelia-cardinalis, Podophyllum-peltatum, Sanguinaria-canadensis, and Triosteum-perfoliatum. Collected and arranged by the American Institute of Homœopathy. With a Repertory by W. P. Esrey, M.D. 8vo, pp. 300. Philadelphia, 1853. 6s.

Matthes.—Letter to Worthington Hooker, M.D., in relation to so much of his Book, entitled "Physician and Patient," as has reference to Homœopathy, by Dr. F. Matthes. 8vo, pp. 16. Boston, 1850. 1s.

Mesmerism.—A New and Complete Library of Mesmerism and Psychology, embracing the most popular Works on the subject, with suitable Illustrations, in 2 volumes of about 900 pp. 8vo. New York. 18s.

Metcalf.—Homœopathy and its Requirements of the Physician: Address delivered before the Homœopathic Medical Society of the State of New York, at Syracuse, June 1st, by J. W. Metcalf, M.D. New York. 1s.

Metcalf.—Homœopathic Provings, containing the Vienna Provings of Colocynth and Thuja-occidentalis, and the Symptoms of Aethusa-cynapium, Alcohol-sulphuris, Amphisbæna-vermicularis, Anagallis-arvensis, Apis-mellifica, Aristolochia-milhomens, Arsenicum-metallicum, Artemesia-vulgaris, Asterias-rubens, Cinabaris, Turpethum, Coccus-cacti, by James W. Metcalf, M.D. 8vo, pp. 417. New York, 1853. 7s. 6d.

Mills.—Compendium of Hygiene, by L. Mills. Compiled for the use of the Winsted Hygienic Association. 12mo, pp. 190. West-Winsted, Conn., 1855. 5s.

Morgan.—The Homœopathic Treatment of Indigestion, Constipation, and Hæmorrhoids, by William Morgan. Edited, with Notes and Annotations, by A. E. Small, M.D. 8vo. New York, 1854. 4s.

Munde.—Hydriatic Treatment of Scarlet Fever in its different Forms; or, How to Save, through a Systematic Application of the Water Cure, many thousands of Lives and Healths, which now annually perish; being the result of Twenty-one years' Experience, and of the Treatment and Cure of

several hundred Cases of Eruptive Fevers, by Charles Munde, M.D., Ph. D. 8vo, pp. 92. New York, 1857. 3s.

Mure.—Materia Medica; or, Provings of the Principal Animal and Vegetable Poisons of the Brazilian Empire, and their Application in the Treatment of Disease, by Dr. B. Mure. Translated from the French, and arranged according to Hahnemann's Method, by Charles J. Hempel, M.D. With many Woodcuts. 8vo, pp. 220. New York, 1854. cloth. 6s.

Mussey.—An Essay on the Influence of Tobacco upon Life and Health, by R. D. Mussey, M.D. 8vo. Boston, 1836.

Neidhard.—Homœopathy in Germany and England in 1849; with a Glance at Allopathic Men and Things. Being two Preliminary Discourses, delivered in the Homœopathic Medical College of Pennsylvania, by Dr. Charles Neidhard. 8vo, pp. 45. Boston, 1850. 1s.

North American Homœopathic Journal, a Quarterly Magazine of Medicine and the Auxiliary Sciences. Conducted by C. Hering, M.D., E. E. Marcy, M.D., and J. W. Metcalf, M.D. 8vo. New York, 1851, Vol. I.; 1852, Vol. II; 1853, Vol. III. Price, per vol. of 586 pages, 18s.

Okie.—An Address, delivered before the Rhode-Island Homœopathic Society, by Dr. A. Howard Okie. 8vo, pp. 28. Providence, 1850. 1s.

Peters.—A Treatise on Apoplexy; with an Appendix on Softening of the Brain and Paralysis. Based on T. J. Ruckerts' "Clinical Experience in Homœopathy," by John C. Peters, M.D. 8vo, pp. 164. New York, 1853. 4s.

Peters.—A Treatise on Headaches, including acute, chronic, nervous, gastric, dyspeptic, or sick, Headaches; also, congestive, rheumatic, and periodical Headaches. Based on T. J. Rueckert's "Clinical Experience in Homœopathy," by John C. Peters, M.D. 8vo, pp. 135. New York, 1853. 4s.

Peters.—A Treatise on the Diseases of Females: Disorders of Menstruation; with full Descriptions of the Dose to each single Case, by Dr. John C. Peters. 8vo, pp. 165. New York, 1854. 4s.

Peters.—A Treatise on the Diseases of Married Females: Disorders of Pregnancy, Parturition, and Lactation, by J. C. Peters, M.D. 8vo, pp. 195. New York, 1854. 5s.

Peters.—A Treatise on Nervous Derangement and Mental Disorders. Based upon T. J. Rueckert's "Clinical Experience in Homœopathy," by John C. Peters, M.D. 8vo, pp. 104. New York, 1854. 5s.

Philadelphia Journal of Homœopathy, edited by William A. Gardiner, M.D., Professor of Anatomy in the Homœopathic College at Pennsylvania, assisted by the following Contributors: Drs. B. F. Joslin, A. H. Okie, H. C. Preston, J. P. Dake, P. P. Wells, W. E. Payne, C. Dunham, James Kitchen, W. S. Helmuth, A. E. Small, S. R. Dubs, W. E. Payne. Published Monthly. Annual subscription, 18s.

Pulte.—Woman's Medical Guide; containing Essays on the Physical, Moral, and Educational Development of Females, and the Homœopathic Treatment of their Diseases in all Periods of Life; together with Directions for the Remedial Use of Water and Gymnastics, by J. H. Pulte, M. D. 12mo, pp. 336. Cincinnati, 1853. 6s.

Pulte.—Homœopathic Domestic Physician, containing the Treatment of Diseases; with popular Explanations of Anatomy, Physiology, Hygiene, and Hydropathy; also, an abridged Materia Medica, by J. H. Pulte. Cincinnati, 1853. 7s. 6d.

Quarterly Homœopathic Journal; edited by Drs. J. Birnstill and J. A. Tarbell. Boston. Annual subscription, 6s.

Rapou.—A Treatise on Typhoid Fever, and its Homœopathic Treatment, by Aug. Rapou, Member of the College of Physicians at Paris. Translated from the French, by Arthur A. Granville. 8vo, pp. 96. New York, 1853. cloth. 3s.

Rau.—Organon of the Specific Healing Art of Homœopathy, by Dr. G. L.

Rau. Translated from the German, with an Essay on the present Internal Condition of the Homœopathic School, by C. J. Hempel, M.D. 8vo. pp. 200. New York, 1847. 6s. 6d.

Rausse.—Water-Cure Applied to Every Known Disease. A New Theory. A Complete Demonstration of the Advantages of the Hydropathic System of Curing Diseases; showing also the Fallacy of the Allopathic Method, and its utter Inability to effect a Permanent Cure. With an Appendix, containing Hydropathic Diet and Rules for Bathing, by J. H. Rausse. Translated from the German. 8vo. New York, 1851. 5s.

Rausse.—Errors of Physicians and others in the Application of the Water-Cure, by J. H. Rausse. 8vo. New York. 1s. 6d.

Ring.—The "Little Pills" vindicated; or, "Orthodox" Delusions versus Homœopathy, by Dr. Hamilton Ring. New York, 1853. 1s. 6d.

Rueckert.—Therapeutics; or, Outlines of Successful Homœopathic Cures, collected from the best Homœopathic Periodicals, by Dr. Ernest Ferdinard Rueckert. Translated and edited by C. J. Hempel M.D. 8vo, pp. 496. New York, 1846. 15s.

Rueckert.—Apoplexy and Palsy. Successful Homœopathic Cures, collected from the best Homœopathic Periodicals, by Dr. T. J. Rueckert. Translated and edited by J. C. Peters, M.D. With full Descriptions of the Dose to each single Case. 8vo. New York, 1853. 4s.

Rueckert.—Treatise on Headaches; including acute, chronic, nervous, gastric, dyspeptic, or sick Headaches; also congestive, rheumatic, and periodical Headaches; based on "Clinical Experience in Homœopathy," by Dr. T. J. Rueckert. With Introduction, Appendix, Synopsis, Notes, Directions for Doses, and 50 additional Cases, by J. C. Peters, M.D. 8vo. New York, 1853. 4s.

Rueckert.—Diseases of the Stomach. Successful Homœopathic Cures, collected from the best Homœopathic Periodicals, by Dr. T. J. Rueckert. Translated and edited by J. C. Peters, M.D. With full Descriptions of the Dose of each single Case. 8vo. New York, 1854. 4s.

Rueckert.—Diseases of the Eye and Ear. Successful Homœopathic Cures, collected from the best Homœopathic Periodicals, by Dr. T. J. Rueckert. Translated and edited by J. C. Peters, M.D. With full Descriptions of the Doses to each single Case. 8vo. New York, 1854. 4s.

Rueckert.—Inflammation and Dropsy of the Brain. Successful Homœopathic Cures, collected from the best Homœopathic Periodicals, by D. T. J. Rueckert. Translated and edited by J. C. Peters, M.D. With full Descriptions of the Dose to each single Case. 8vo. New York, 1854. 4s.

Rueckert.—Nervous Diseases and Mental Derangements. Successful Homœopathic Cures, collected from the best Homœopathic Periodicals, by Dr. T. J. Rueckert. Translated and edited by J. C. Peters, M.D. With full Descriptions of the Dose to each single Case. 8vo. New York, 1854. 4s.

Ruoff.—Repertory of Homœopathic Medicine, Nosologically arranged, by Ruoff. Translated from the German, by A. H. Okie, M.D, translator of Hartmann's Remedies. 2nd American edition, with Additions and Improvements, by G. Humphrey, M.D. 8vo, pp. 251. New York, 1845. 7s. 6d.

Rush.—The Handbook to Veterinary Homœopathy, or, the Homœopathic Treatment of Horses, Cattle, Sheep, Dogs, and Swine, by John Rush, Veterinary Surgeon. From the London edition; with numerous Additions from the 7th German Edition of Dr. F. E. Guenther's Homœopathic Veterinary; translated by Jacob F. Scheek, M.D. 8vo, pp. xviii. and 144. Philadelphia, 1854. cloth. 2s. 6d.

Saint-Arroman.—Coffee, Tea, and Chocolate; their Influence upon the Health, the Intellect, and the Moral Nature of Man. Translated from the French of A. Saint-Arroman. 8vo. Philadelphia, 1846.

Schæfer.—Veterinary Homœopathy, by Schæfer. Translated from the German, and edited by W. H. Smith, Veterinary Surgeon. 8vo. New York.

Scherrill.—Manual of Homœopathic Prescription, with an Improved Reper-

tory; also, an Introduction, in which the Doctrine and Nature of the Homœopathic System is explained, by H. Scherrill, M.D. 8vo, pp. 180. New York, 1845. 1s. 6d.

Scherrill.—A Treatise on Homœopathic Practice of Medicine; comprised in a Repertory for Prescribing, adapted to Domestic or Professional Use. 3rd edition, improved and enlarged, by H. Scherrill, M.D. 8vo, pp. 445. New York, 1854. 5s.

Schieferdecker.—Power of Water in Healing Diseases, by C. C. Schieferdecker. 18mo. Philadelphia, 1849.

Schieferdecker.—On the Treatment of Cholera with Water, by C. C. Schieferdecker. 8vo. Philadelphia, 1849. 1s. 6d.

Schieferdecker.—Guide for the Treatment of Children in Health and Disease by Water, by C. C. Schieferdecker. 8vo. Philadelphia, 1852. 4s. 6d.

Sexual Diseases: their Causes, Prevention, and Cure, on Physiological Principles. Embracing Home Treatment for Sexual Abuses; Chronic Diseases, especially the Nervous Diseases of Women; the Philosophy of Generation; Amativeness; Hints on the Reproductive Organs. 8vo. New York. 7s. 6d.

Sherwood.—Manual for Magnetizing, by Dr. H. H. Sherwood. 32mo. New York. 6s.

Shew.—Children; their Hydropathic Management in Health and Disease. A Descriptive and Practical Work, designed as a Guide for Families and Physicians; with numerous cases described, by Joel Shew, M.D. 12mo, pp. 432. New York. 7s. 6d.

Shew.—Consumption; its Prevention and Cure by the Water-Treatment; with Advice concerning Hemorrhage of the Lungs, Coughs, Colds, Asthma, Bronchitis, and Sore Throat, by Dr. Joel Shew. 12mo. New York. 5s.

Shew.—Hydropathic Family Physician. A Ready Prescriber and Hygienic Adviser, with Reference to the Nature, Causes, Prevention, and Treatment of Diseases, Accidents, and Casualties of every kind; with a Glossary, Table of Contents, and Index: illustrated with nearly 300 Engravings, by Joel Shew, M.D. 8vo, pp. 820. New York. 15s.

Shew.—Hydropathy; or, the Water-Cure. Its Principles, Processes, and Modes of Treatment. In part from the most Eminent Authors, Ancient and Modern. Together with an Account of the Latest Methods of Priessnitz. Numerous Cases, with full Treatment described, by Dr. Shew. 12mo. New York. 7s. 6d.

Shew.—Midwifery, and the Diseases of Women. A Descriptive and Practical Work, showing the Superiority of Water-Treatment in Menstruation and its Disorders, Chlorosis, Leucorrhœa, Fluor Albus, Prolapsus Uteri, Hysteria, Spinal Diseases, and other Weaknesses of Females in Pregnancy and its Diseases, Abortion, Uterine Hemorrhage, and the General Management of Childbirth, Nursing, &c. &c.; Illustrated with Numerous Cases of Treatment, by Joel Shew, M.D. 12mo, pp. 432. New York. 7s. 6d.

Shew.—Pregnancy and Childbirth; Illustrated with Cases, showing the remarkable Effects of Water in Mitigating the Pains and Perils of the Parturient State, by Dr. Joel Shew. 12mo. New York. 5s.

Shew.—Tobacco; its History, Nature, and Effects on the Body and Mind; with the Opinions of the Rev. Dr. Nott, L. N. Fowler, Rev. Henry Ward Beecher, Horace Greeley, Dr. Jennings, O. S. Fowler, Dr. R. T. Trall, and others, by Joel Shew, M.D. 12mo. New York. 5s.

Shew.—Water-Cure Manual. A Popular Work, embracing Descriptions of the Various Modes of Bathing, the Hygienic and Curative Effects of Air, Exercise, Clothing, Occupation, Diet, Water-Drinking, &c. Together with Descriptions of Diseases, and the Hydropathic Remedies, by Joel Shew, M.D. 12mo. New York. 5s.

Small.—Diseases of the Nervous System, by A. E. Small, A.M., M.D. To which is added, a Treatise on the Diseases of the Skin, by C. E. Toothaker, A.M., M.D. 8vo, pp. 216. Philadelphia, 1856. cloth. 6s.

Small.—Manual of Homœopathic Practice, for the Use of Families and Private Individuals, by A. E. Small, A.M., M.D. 8vo, pp. 836. Philadelphia, 1856. cloth. 12s.

Small.—The Pocket Manual of Homœopathic Practice, abridged from the Manual of Homœopathic Practice, by Jacob F. Sheek, M.D. 8vo, pp. 126. Philadelphia, 1856. 2s.

Spurzheim.—Anatomy of the Brain, by J. G. Spurzheim. 8vo. Boston. cloth. 15s.

Spurzheim.—Education: its Elementary Principles Founded on the Nature of Man, by J. G. Spurzheim, M.D : with an Appendix, containing a Description of the Temperaments, and an Analysis of the Phrenological Faculties. 12mo. New York. 5s.

Spurzheim.—On Insanity, by J. G. Spurzheim. Edited by Dr. A. Brigham. 8vo. Boston. 10s.

Spurzheim.—Phrenology, by J. G. Spurzheim.—8vo. New York. cloth. 9s.

Stapf.—Addition to the Materia Medica Pura, by Dr. E. Stapf. Translated by C. J. Hempel, M.D. 8vo, pp. 292. New York, 1846. 7s. 6d.

Swazey.—Life, Disease, and the Law of Cure. An Address delivered before the American Institute of Homœopathy, at New-Haven, by Dr. G. W. Swazey. 8vo, pp. 48. Springfield, 1852. 1s. 6d.

Sweetser.—Mental Hygiene; or, an Examination of the Intellect and Passions. Designed to show how they affect and are affected by the bodily Functions, and their Influence on Health and Longevity, by W. Sweetser, M.D. 2nd edition. 12mo New York, 1851. cloth. 7s.

Tarbell.—Sources of Health, and the Prevention of Disease; or, Mental and Physical Hygiene, by Dr. J. A. Tarbell. 8vo, pp. 170. Boston, 1850. 2s. 6d.

Tarbell.—Pocket Homœopathist, and Family Guide, by Dr. J. A. Tarbell. 3rd edition. pp. 71. Boston, 1855. 1s. 6d.

Tarbell.—Homœopathy Simplified; or, Domestic Practice made Easy. Containing explicit Directions for the Treatment of Disease, the Management of Accidents, and the Preservation of Health, by John A. Tarbell, A.M.,M.D. post 8vo, pp. 360. Boston, 1856. cloth. 6s.

Tessier.—Clinical Remarks concerning the Homœopathic Treatment of Pneumonia, preceded by a Retrospective View of the Allopathic Materia Medica, and an Explanation of the Homœopathic Law of Cure, by Dr. P. Tessier. Translated by C. J. Hempel, M.D. 8vo, pp. 131. New York, 1855. 4s. 6d.

Teste.—The Homœopathic Materia Medica, arranged Systematically and Practically, by A. Teste. Translated from the French, and edited by Charles J. Hempel. 8vo, pp. 638. Philadelphia, 1854. 12s. 6d.

Teste.—A Homœopathic Treatise on the Diseases of Children, by A. Teste, M.D. Translated from the French, by Emma H. Côte. 8vo, pp. 342. Cincinnati, 1854. 6s. 6d.

Townshend.—Facts in Mesmerism, with Reasons for a Dispassionate Inquiry into it, by the Rev. Chauncey Hare Townshend. 8vo. New York, 1841.

Trall.—Encyclopædia of Hydropathy: a System of Hydropathy and Hygiene, in Eight Parts:—

1. Outline of Anatomy;
2. Physiology of the Human Body;
3. Hygiene Agencies, and the Preservation of Health;
4. Dietetic and Hydropathic Cookery;
5. Theory and Practice of Water Treatment;
6. Special Pathology and Hydro-Therapeutics, including the Nature, Causes, Symptoms, and Treatment of all known Diseases;
7. Application to Surgical Diseases;
8. Application of Hydropathy to Midwifery and the Nursery: by R. T. Trall, M.D. New edition. 2 vols.; with numerous Illustrations. 8vo, pp. 967. New York, 1856. cloth. 14s,; or, in 1 vol. 8vo. 16s

Trall.—Fruits and Farinacea the Proper Food of Man; with Notes, by Dr. R. T. Trall. Illustrated. 8vo. New York. 6s.

Trall.—Home Treatment for Sexual Abuses, by R. D. Trall. 12mo. New York. 1s.

Trall.—New Hydropathic Cook Book, by R. T. Trall, M.D. A System of Cookery on Hydropathic Principles, containing an Exposition of the True Relations of all Alimentary Substances to Health, with Plain Receipts for preparing all Appropriate Dishes for Hydropathic Establishments, Vegetarian Boarding-Houses, Private Families, &c. &c. 8vo. New York. 6s.

Trall.—The Alcoholic Controversy: a Review of the Westminster Review on "The Physiological Errors of Teetotalism," by R. T. Trall, M.D. 24mo, pp. vi. and 114. New York, 1856. 1s. 6d.

Trall.—The Complete Gymnasium. A profusely Illustrated Work Being the application of Gymnastic, Calisthenic, Kinesipathic, and Vocal Exercises to the Development of Body and Mind, and the Cure of Disease, by R. T. Trall, M.D. 8vo. New York. 12s.

Trall.—Uterine Diseases: or, the Displacement of the Uterus. A thorough and practical Treatise on the Malpositions of the Uterus and adjacent Organs, by R. T. Trall, M.D. Illustrated. 8vo, pp. 168. New York. £1 10s.

Transactions of the American Institute of Homœopathy. Vol. I. 12mo. New York. cloth. 9s.

Transactions of the National Eclectic Medical Association, for 1852. 8vo. Rochester, N. Y., 1852. 4s.

Vanderburgh.—An Appeal for Homœopathy; or, Remarks on the Decision of the late Judge Cowan, relative to the Legal Rights of Homœopathic Physicians, by Dr. F. Vanderburgh. 8vo, pp. 29. New York, 1844. 1s.

Warren.—The Preservation of Health; with Remarks on Constipation, Old Age, &c., by John C. Warren, M.D. 18mo. Boston, 1854. 2s. 6d.

Warrington.—The Obstetric Catechism; containing 2347 Questions and Answers on Obstetrics Proper, by Jos. Warrington. 150 Illustrations. 12mo. Philadelphia, 1853. 7s.

Water-Cure Journal, and Herald of Reforms; devoted to Physiology, Hydropathy, and the Laws of Life and Health. Illustrated with numerous Engravings. 4to. Monthly. New York. Annual subscription, 8s.

Water-Cure Library, in 7 vols. 12mo; embracing the most popular Works on the subject, by American and European Authors. 8vo. New York. £2 2s.

Weaver.—Mental Science: Lectures on the Philosophy of Phrenology, by the Rev. G. S. Weaver. Illustrated. 12mo. New York. 5s.

Wesselhœft and **Grau.**—Systematic Reports of 392 Cases treated Hydropathically at Brattleboro; with a Plan of the Walks in the Vicinity; also, Causes and Hydropathic Treatment of the Cholera, by Wesselhœft and Grau. 8vo. New York. paper cover. 2s. 6d.

Williamson.—Diseases of Females and Children, and their Homœopathic Treatment, by Walter Williamson, M.D. 2nd improved and enlarged edition; containing also a full Description of the Dose of each Medicine. 8vo, over 250 pp. Philadelphia, 1854. 4s. 6d.

Youmans.—Alcohol and the Constitution of Man; the Effects of Alcohol on the Healthy Human Constitution, by E. L. Youmans. 12mo. New York, 1854. cloth. 3s.

VI.

NATURAL HISTORY.

1. GENERAL, MICROSCOPY.

Agassiz.—Introduction to the Study of Natural History, by Louis Agassiz. Illustrated with numerous Engravings 8vo. New York, 1847. 2s.

Agassiz.—Lake Superior; its Physical Character, Vegetation, and Animals, compared with those of other and similar Regions, by L. Agassiz. With a Narrative of the Tour, by J. Elliot Cabot. 1 vol., with numerous Illustrations. Boston, 1850. £1 4s.

Agassiz.—Contemplation of God in the Kosmos, by L. Agassiz. From Christian Examiner and Religious Miscellany, January, 1851. 8vo, pp. 24. Boston. 3s. 6d.

American Journal of Sciences and Arts; conducted by Professors Silliman and Dana. See under Collectanea and Publications of Learned Societies.

Annals of the Lyceum of Natural History of New York. Vol. I. (12 Nos., September, 1823, to January, 1826). 8vo, pp. iv. and 410. 29 Plates. New York, 1826. sewed.—Vol. II. (14 Nos., July, 1826, to January, 1828). 8vo, pp. vi. and 480. 6 Plates. New York, 1828. sewed.—Vol. III. 8vo, pp. viii. and 468. 6 Plates. New York, 1836. sewed.—Vol. IV. 8vo, pp. xx. and 520. 18 Plates. New York, 1848. sewed.—Vol. V. 8vo, pp. xx. and 568. 6 Plates. New York, 1852. sewed.—Vol. VI. (Nos. 1 to 5, May, 1853, to October, 1855. 8vo, pp. i. to 164. 145 Plates. New York. sewed. complete set, £7 7s.

VOL. I. PART 1.

ARTICLE

1. Synoptical view of the Lichens growing in the vicinity of the City of New York, by Abraham Halsey 3
2. On the Identity of the supposed Pumice of the Missouri, and a variety of Amygdaloid found near the Rocky Mountains, by Edwin James, M.D. . . . 21
3. Description of a New and Gigantic Species of the Genus Cephalopterus, of Dumeril, by S. L. Mitchell, M.D. 23
4. Descriptions of some New or Rare Plants from the Rocky Mountains, collected in July, 1820, by Dr. Edwin James, by John Torrey, M.D. . . . 30
5. Examination of a Mineral from Andover Furnace, Sussex County, New Jersey, by James Renwick 37
6. Examination of the Acid of the Rhus Glabrum, with Observations on the Juice of the Sambucus Canadensis, as a delicate test, by Isaachar Cozzens . 42
7. Note on the Organic Remains termed Bilobites, from the Catskill Mountains, by J. E. De Kay, M.D. 45
8. Description of a New Species of Fish, from the Hudson River, by De Witt Clinton, LL.D. 49
9. Notice of a Locality of Yenite in the United States, by John Torrey, M.D. 51

Annals of the Lyceum of Natural History of New York—*Continued.*

ARTICLE
10. Description of a New Species of Siren, with some observations on Animals of a similar nature, by Captain J. Le Conte, of the United States Army, F.L.S. 52
11. Observations on the Megatherium recently discovered in the United States, by Samuel L. Mitchell, M.D. 58
12. An Analytical Table to facilitate the determination of the hitherto observed North American Species of the Genus Carex, by the Rev. Lewis D. de Schweinitz 62
13. Observations on the North American Species of the Genus Utricularia, by Captain John Le Conte 72
14. Notice of New Localities of simple Minerals, along the north coast of Lake Superior, and in the Indian Territory, N. W. from Lake Superior to the River Winnipec, by J. Delafield, Esq., Agent of the United States for Boundaries, &c. 79
15. Description of an Extraordinary Fish, resembling the Stylephorus of Shaw, by S. L. Mitchell, M.D. 82
16. Observations and Experiments on the Seeds of the Cerbera Thevetia, by J. B. Ricord Madianna, M.D. 86
17. An Account of the Columbite of Haddam (Connecticut), with notices of several other North American Minerals, by John Torrey, M.D. . . . 89
18. An Account of the Phoca Cristata, recently taken in the vicinity of this city, by James E. De Kay, M.D. 94
19. Appearances on Dissection of the Phoca Cristata, by E. G. Ludlow, M.D., and F. G. King, M.D. 99
20. Observations on the North American Species of the Genus Gratiola, by Captain John Le Conte 103
21. Notes on some New Supports for Minerals subjected to the action of the common Blow-pipe, by Lieut.-Col. J. G. Totten 109
22. On the Remains of the Megatherium recently discovered in Georgia, by William Cooper 114
23. Remarks on certain Entozoical Fungi, by Abraham Halsey . . . 125
24. Researches and Experiments on some Species of the Genus Passiflora, by J. B. Ricord Madianna, M.D. 127
25. Notice of Several Species of Shells, by D. H. Barnes. 131
26. Observations on the North American Species of the Genus Ruellia, by Captain John Le Conte 140
27. Account of the Discovery of a Skeleton of the Mastodon Giganteum. Extracted from a Report made to the Lyceum of Natural History, by Messrs. De Kay, Van Rensselaer, and Cooper 143
28. Descriptions of some New Grasses collected by Dr. E. James, in the expedition of Major Long to the Rocky Mountains, in 1819, 1820, by John Torrey . 148
29. On the Hirundo Fulva of Veillot, with some General Remarks on the Birds of this Genus, by Dewitt Clinton 156
30. Facts and Observations connected with the Permanent Residence of Swallows in the United States, by John J. Audubon 166
31. Description of some New Species of North American Insects, by Captain John Le Conte 169
32. Observations on the Structure of Trilobites, and Description of an apparently New Genus, by J. E. De Kay. With notes on the Geology of Trenton Falls, by Professor James Renwick 174
33. Observations on the Manners of the Hystrix Dorsata, or Porcupine of North America, by Frederick S. Cozzens 190

VOL. I. PART 2.

34. Notice of Fossil Crustacea from New Jersey, by Jer. Van Rennselaer, M.D. 196
35. A Sketch of the Geology of the Island of Montreal, by J. J. Bigsby, M.D. . 198
36. Description of a New Species of Grosbeak, inhabiting the North-Western Territory of the United States, by William Cooper 219
37. Observations on the Genus Salamandra, with the Anatomy of the Salamander Gigantea (Barton), or S. Alleghaniensis (Michaux), and two new genera proposed, by R. Harlan, M.D. 222
38. Descr ption of a New Genus of Mammiferous Quadrupeds of the Order Edentata, by Richard Harlan, M.D. 235
39. Remarks on Native Silver from Michigan, by H. R. Schoolcraft . . 247
40. Supplement to a Notice of Fossil Crustacea, by Jer. Van Rennselaer, M.D. 249
41. Descriptions of New American Species of the Genera Buprestis, Trachys, and Elater, by Thomas Say 249
42. Further Observations on the Amphiuma Means, by Richard Harlan, M.D. 269
43. Note to a Paper entitled Observations on the Genus Salamandra, at page 222 of this volume 270

Annals of the Lyceum of Natural History of New York—*Continued.*

ARTICLE
44. Descriptions of some New Plants belonging to the Orders Musci and Hepaticæ, by Robert Kaye Greville, LL.D., F.R.S.E., &c. . . . 271
45. Remarks on the American Species of the Genera Hyla and Rana, by Captain John Le Conte 278
46. A Monograph of the North American Species of Carex, by the Rev. Lewis D. de Schweinitz. Edited by John Torrey 283
47. Observations on a Fossil Crustaceous Animal of the Order Brachiopoda, by J. E. De Kay 375
48. Examination of Iron Ores from the Northern Part of the State of New York, by Issachar Cozzens 378
49. Notes on Shells, by D. H. Barnes, No. II. 383

VOL. II.

50. The Genera of North American Birds, and a Synopsis of the Species found within the territory of the United States; systematically arranged in Orders and Families, by Charles L. Bonaparte 7
51. On the North American Plants of the Genus Tillandsia, with descriptions of three New Species, by Captain John Le Conte 129
52. Description of a New Species of Siren, by Captain John Le Conte . 133
53. Observations on the North American Species of the Genus Viola, by Captain John Le Conte 135
54. Further additions to the Ornithology of the United States, and Observations of the Nomenclature of certain Species, by Charles L. Bonaparte . . 154
55. Some account of a Collection of Plants made during a journey to and from the Rocky Mountains in the summer of 1820, by Edwin P. James, M.D., by John Torrey 161
56. An account of some Experiments on the Root of the Sanguinaria Canadensis, by James Freeman Dana, M.D. 245
57. Analysis of the Copper Ore of Franconia, New Hampshire, with Remarks on Pyritous Copper, by James Freeman Dana, M.D. 253
58. Account of the Dissection of a Proteus of the Lakes (Menobranchus); with remarks on the Siren Intermedia, by J. Augustine Smith 259
59. Description of an apparently New Species of Diodon, by S. L. Mitchell . 264
60. Note on the Habitat of the Schizæa Pusilla of Pursh, by William Cooper . 266
61. Further Discovery of Fossil Bones in Georgia; and remarks on their identity with those of the Megatherium of Paraguay, by William Cooper . . 267
62. Discovery of a Fossil Walrus in Virginia. Report of Messrs Mitchell, J. A. Smith, and Cooper, on a Fossil Skull sent to Dr. Mitchell, by Mr. Cooper of Accomac County, Virginia 271
63. Report on several Fossil Multilocular Shells from the State of Delaware; with Observations on a second Specimen of the New Fossil Genus Eurypterus, by J. E. De Kay 273
64. Notes on a Fossil Skull in the Cabinet of the Lyceum, of the Genus Bos, from the banks of the Mississippi; with Observations on the American Species of that Genus, by J. E. De Kay 280
65. Note on the Murex Corona of Gmelin, by D. H. Barnes . . . 291
66. The Genera of North American Birds, and a Synopsis of the Species found within the territory of the United States; systematically arranged in Orders and Families, by Charles Lucien Bonaparte 293

VOL. III.

67. Chemical Examination of some Minerals, chiefly from America, by Thomas Thompson, M.D., F.R.S. L. and E., &c., Professor of Chemistry, Glasgow; with notes by John Torrey, M.D. 9
68. Remarks on the Prunus Americana of Marshall, by William Darlington, M.D. 87
69. Description of the Species of North American Tortoises, by Major J. Le Conte 91
70. Description of a New Genus of the Order Rodentia, by Major J. Le Conte 132
71. On the Remains of Extinct Reptiles of the Genera Mososaurus and Geosaurus found in the Secondary Formation of New Jersey; and on the occurrence of the substance recently named Coprolite, by Dr. Buckland, in the same locality, by J. E. De Kay 134
72. Observations on the United States Species of the Genus Pancratium, by Major John Le Conte 142
73. Remarks on the Plants of Europe which have become naturalized in a more or less degree in the United States, by the late Lewis D. de Schweinitz . 148
74. Observations on a Fossil Jaw of a species of Gavial, from West Jersey, by J. E. De Kay 156

Annals of the Lyceum of Natural History of New York—*Continued.*

ARTICLE
75. A Report on some Fossil Bones of the Megalonyx, from Virginia; with a Notice of such parts of the skeleton of this animal as have been hitherto discovered, and remarks on the affinities which they indicate, by Wm. Cooper . . . 166
76. On a New Genus of Serpents, and two New Species of the Genus Heterodon, inhabiting Tennessee, by Dr. G. Troost 174
77. A Monograph of the North American Species of Rhynchospora, by Asa Gray 191.
78. A Notice of some New, Rare, or otherwise Interesting Plants, from the Northern and Western portions of the State of New York, by Asa Gray, M.D. . 221
79. Monograph of North American Cyperaceæ, by John Torrey . . . 239

VOL. IV.

80. A New Mineralogical Nomenclature, by James D. Dana, A.M. . . . 9
81. Fossil Fishes of Connecticut and Massachusetts, with a Notice of an Undescribed Genus, by John Howard Redfield 35
82. Remarks on the Structure and Affinities of the Order Ceratophyllaceæ, by Asa Gray, M.D. 41
83. Notice of the appearance of the Pine Grosbeak, Pyrrhula Enucleator, in the environs of New York, by James F. Ward 51
84. Descriptions of Five Species of Vespertilio that inhabit the environs of the City of New York, by Wm. Cooper 53
85. On Two Species of Molossus inhabiting the Southern U. S., by Wm. Cooper 64
86. On Two Species of Plecotus inhabiting the U. S. Territory, by Wm. Cooper 71
87. Discovery of the Vauquelinite, a rare ore of Chromium, in the United States, by J. Torrey 76
88. An Account of several New Genera and Species of North American Plants, by J. Torrey 80
89. Observations on the Genus Sarracenia, with an account of a New Species, by H. B. Croom 95
90. Melanthacearum Americæ Septentrionalis Revisio, auctore Asa Gray . 105
91. Monograph of the Species of Pasimachus inhabiting the United States, with descriptions of two New Genera, belonging to the family Carabica, by John L. Le Conte 141
92. Description of a New Species of Apus, by John L. Le Conte . . . 155
93. Description of three New Fossils from the Falls of the Ohio, by I. Cozzens 157
94. On certain Coleoptera, indigenous to the Eastern and Western Continents, by John L. Le Conte 159
95. Description of some New Species of Shells, by John H. Redfield . . 163
96. Description of New Species of Shells, by John C. Jay, M.D. . . 169
97. Description of a New Species of Anser, by Geo. N. Lawrence . . 171
98. A descriptive Catalogue of the Geodephagous Coleoptera, inhabiting the U. S. east of the Rocky Mountains, by John L. Le Conte . . . 173
99. Description of a New Species of Procellaria, by George N. Lawrence . 475
100. On the Distinctive Characters of Cyprea reticulata of Martyn, and Cyprea histrio of Menschen, by John H. Redfield 477

VOL. V.

101. Descriptions of New Species of Portula and Achatinella, by C. B. Adams.
102. Descriptions of New Species and Varieties of Shells which inhabit Jamaica, by C. B. Adams.
103. Descriptions of New Species and Varieties of Land Shells of Jamaica, with notes on some previously described Species, by C. B. Adams.
104. Descriptions of new Fresh-water Shells which inhabit Jamaica, by C. B. Adams.
105. Catal. of Land and Fresh-water Shells which inhabit Jamaica, by C. B. Adams.
106. Catalogue of Shells collected at Panama, with Notes on their Synonymy, Station, and Habitat, by C. B. Adams.
107. Remarks on the Habitats of certain Species of Land Shells, by C. B. Adams and Edward Chitty.
108. Description of a New Species of Sylvicola, by S. F. Baird.
109. Observations on the Limosa Scolopacea of Say, by John G. Bell.
110. On the Pipilo Oregonus, as distinguished from the Pipilo Arcticus of Swainson, by John G. Bell.
111. Description of a New Species of the Genus Fuligula, by John G. Bell.
112. Description of the Selene Argentea of Lacépède, a fish whose existence has been doubted, by J. Carson Brevoort.
113. Description of a New Species of Helinsi, by Jacob P. Girand, jun.
114. Observations on Mr. Bell's Paper on Limosa Scolopacea (Say), by G. N. Lawrence.
115. Description of Mimus Melanopterus, by Geo. N. Lawrence.

Annals of the Lyceum of Natural History of New York—*Continued.*

ARTICLE

116. On the Occurrence of the Caspian Fern (Tylochelidon Carpius) in North America, by Geo. N. Lawrence.
117. Description of a New Species of Tyrannus, by Geo. N. Lawrence.
118. Description of New Species of Birds of the Genera Conirostrum Embernagra and Xanthornus; with a List of other Species not heretofore noticed as being found within the limits of the United States, by Geo. N. Lawrence.
119. Additions to North American Ornithology, No. 1, by Geo. N. Lawrence.
120. Descriptions of New Species of Birds of the Genera Toxostoma Tyrannula and Plectrophanes, by Geo. N. Lawrence.
121. Additions to North American Ornithology, No. 2, by Geo. N. Lawrence.
122. Ornithological Notes, by Geo. N. Lawrence.
123. Synopsis of the Coleopterous Insects of the Group Clerida, which inhabit the United States, by John L. Le Conte.
124. Description of New Species of Coleoptera from California, by J. L. Le Conte.
125. Descriptions of two New Species of Fresh-water Shells, by Temple Prime.
126. Descriptions of two Species of Marginella, with notes on sundry Species of Marginella and Cypræa, by John H. Redfield.

VOL. VI.

127. Descriptions of New Species of Birds of the Genera Ortyx (Stephens), Sterna (Linn.), and Icteria (Vieillot), by Geo. N. Lawrence . . . 1
128. Additions to North American Ornithology, No. 3, by Geo. N. Lawrence . 4
129. Ornithological Notes, No. 2, by Geo. N. Lawrence . . . 7
130. Descriptions of New Species of Helicidæ, by John H. Redfield . . 14
131. Descriptions of New Species of Achatinella from Sandwich Islands, by Dr. W. Newcomb, of Honolulu 18
132. Note to the "Description of the Selene Argentea of Lacépède," at Vol. V. p. 68, of these Annals, by T. Carson Brevoort 30
133. Observations on the Animal of Rotella (Lam.), communicated to the late Prof. C. B. Adams, by the Rev. S. B. Fairbank, of Bombay . . . 35
134. On the Homœomorphism of Mineral Species of the Trimetric System, by James D. Dana 37
135. Descriptions of three New Species of Pisidium, by Temple Prime . 64
136. On the Identity of Cyclas Elegans (Adams) with Cyclas Rhomboidea (Say), by Temple Prime 66
137. Catalogue of the Terrestrial and Fluviatile Shells of St. Thomas, West Indies, by R. J. Shuttleworth, of Berne, Switzerland 68
138. Note on the Geographical Distribution of the Terrestrial Mollusks which inhabit the Island of St. Thomas, W. I., by T. Bland 74
139. On the Absorption of Parts of the Internal Structure of their Shells, by the Animals of Stoastoma, Lucidella, Trochatella, Helicina, and Proserpina, by T. Bland 75
140. On Proserpina Opalina (C. B. Adams) and Helix Proserpinula (Playfair), by T. Bland 77
141. Description of a New Species of Bird of the Genus Larus (Linn.), by George N. Lawrence 79
142. Descriptions of New Fluviatile Shells of the Genus Melania (Lam.), from the Western States of North America, by John G. Anthony, Esq. . . 80
143. Descriptions of New Species of Shells, by John H. Redfield . . 130
144. Observations on different points of the Natural History of the Island of Cuba, with reference to the Ichthyology of the United States, by Felipe Poey, of Havana, Cuba 133
145. Description of a New Species of Humming Bird, of the Genus Mellisuga (Brisson), with a Note on Trochilus Aquila (Bourcier), by Geo. N. Lawrence . . 137
146. Descriptions of New Species of Achatinella, by W. Newcomb, M.D. . 142
147. Notes on certain Terrestrial Mollusks which inhabit the West Indies, by T. Bland 147
148. Descriptions of two New Species of Cylindrella from Jamaica, West Indies, by the Hon. E. Chitty, of Jamaica 155
149. Descriptions of four New Species of Terrestrial Shells from Siam, by W. A. Haines 157
150. Descriptions of New Species of Ancylus and Anculosa, from the Western States of North America, by John G. Anthony, Esq. 158
151. Description of a New Species of Bird, of the Genus Sylvicola (Swainson), by Jno. Gundlach, M.D., of Havana, Cuba 160
152. Remarks on the Quantity of Rain at different Heights, by Prof. O. W. Morris, New York 161

Bailey.—Microscopical Examination of Soundings made by the United Coast Survey, off the Atlantic coast of the United States, by Professor J. W. Bailey. 1 Plate. 4to, pp. 16. Washington, 1851. 1s. 6d.

Bailey.—Microscopical Observations made in South Carolina, Georgia, and Florida, by Pro. J. W. Bailey. 3 Plates. 4to, pp. 48. Washington, 1851. 3s. 6d.

Bailey.—Notes on New Species and Localities of Microscopical Organisms, by Professor J. W. Bailey. 1 Plate. 4to, pp. 16. Washington, 1854. 1s. 6d.

Barton.—Fragments of the Natural History of Pennsylvania, by Benjamin Smith Barton. Part 1. Philadelphia, 1799. folio.

Barton.—A Discourse on some of the Principal Desiderata in Natural History, and on the Means of Promoting the Study of this Science in the United States, by B. S. Barton. 8vo. Philadelphia, 1807.

Boston Journal of Natural History; containing Papers and Communications read to the Boston Society of Natural History. Published by the Directors. Vol. I. to Vol. VI. Part 3. 1834, to April, 1852. 8vo Boston. Four Numbers form a Volume. Price of each Volume £2 2s.

VOL. I. 1837.

Address delivered before the Society, at the opening of their Hall, in Fremont Street, by the Rev. P. W. F. Greenwood 7

ARTICLE

1. Remarks in Defence of the Author of the "Birds of America," by the Rev. John Bachman 15
2. Description of a Gibbon, by Winslow Lewis, junior. . . . 32
3. Cecindelæ of Massachusetts, by Aug. A. Gould . . . 41
4. Chiastolite, or Macle, of Lancaster, by Charles T. Jackson . . 55
5. Observations on a Shell in the Cabinet of the Boston Society of Natural History, supposed to be identical with the Murex Amanus of Linnæus, and the Fusus Probocideferus of Lamarck, by A. Binney 63
6. On certain Causes of Geological Changes now in operation in Massachusetts, by Edward Hitchcock 69
7. Enumeration of Plants growing spontaneously around Wilmington, North Carolina, with remarks on some New and Obscure Species, by Moses A. Curtis . 82
8. Upon the Economy of some American Species of Hispa, by T. W. Harris . 141
9. Descriptions of New North American Coleopterous Insects, and Observations on some already described, by Thomas Say 151
10. Description of a New Animal belonging to the Arachnides of Latreille, discovered in the Sea along the Shores of the New South Shetland Islands, by James Eights 203
11. Chemical Analysis of Chrysocolla from the Holquin Copper Mines, near Gibara, Cuba, by C. T. Jackson 206
12. Description of New Species of North American Hymenoptera, and Observations on some already described, by Thomas Say 209
13. Sketch of the Geology of Portland and its Vicinity, by Edward Hitchcock . 306
14. An Examination of the "Catalogue of the Marine and Fresh-water Fishes of Massachusetts," by J. V. C. Smith, M.D.; contained in Professor Hitchcock's "Report on the Geology, Mineralogy, &c., of Massachusetts" . . . 347
15. Chemical Analysis of three Varieties of Bituminous Coal, and one of Anthracite, by C. T. Jackson 357
16. Descriptions of New Species of North American Hymenoptera, and Observations on some already described, concluded, by Thomas Say 361
17. Description of a New Species of the Genus Hydrargyra; with some additions to the Catalogue of the Fishes of Massachusetts in Professor Hitchcock's "Report." by Humphreys D. Storer 416
18. Remarks on the Positions assumed by George Ord, Esq., in relation to the Cow Black-Bird (Icterus Agripennis), in Loudon's Magazine for February, 1836, by Thomas M. Brewer 418
19. Some Additions to the Catalogue of the Birds of Massachusetts in Professor Hitchcock's "Report," by Thomas M. Brewer 435
20. Description of a New Species of the Genus Marginella (Lam.), with some Observations upon the same, by Captain Joseph P. Couthony 440
21. An Anatomical Description of the Galapagos Tortoise, by J. B. S. Jackson, M.D. 443
22. Description of a New Species of the Genus Gasterosteus, by D. Humphreys Storer, M.D. 461
23. Description of a New Species of Marginella, by D. Humphreys Storer, M.D. 465
24. A Monograph of the Helices inhabiting the United States, by A. Binney, M.D. 466

CONTENTS.

Introduction.

Description of Six New Species of the Genus Firola, observed by Messrs. Le Sueur and Péron, in the Mediterranean Sea, in the months of March and April, 1809, by C. A. Le Sueur.

Account of an American Quadruped supposed to belong to the Genus Ovis, by G. Ord.

Description of Seven Species of American Fresh-water and Land Shells, not noticed in the Systems, by Thomas Say.

The same, concluded.

Description of several New Species of North-American Insects, by Thomas Say.

Observations on the Genus Eriogonum and the natural Order Polygoneæ of Jussieu, by Thomas Nuttall.

Notice of the late Doctor Waterhouse.

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

Observations on the Genus Eriogonum, &c., concluded.
Character of a New Genus, and Descriptions of three New Species upon which it is formed; discovered in the Atlantic Ocean, in the months of March and April, 1816, lat. 22° 9′, by C. A. Le Sueur.
Description of three New Species of the Genus Raja, by C. A. Le Sueur.
Some Account of the Insect known by the name of Hessian Fly, and of a parasitic Insect that feeds on it, by Thomas Say.
On a New Genus of the Crustacea, and the Species in which it is established, by Thomas Say.
An Account of an American Species of the Genus Tantalus, or Ibis, by George Ord.
An Account of the Crustacea of the United States, by Thomas Say.
An Account of the Crustacea of the United States, continued.
A short Description of five (supposed) New Species of the Genus Muræna, discovered by Mr. Le Sueur, in the year 1816, by C. A. Le Sueur.
Description of two New Species of the Genus Gadus, by the same.
Description of a New Species of the Genus Cyprinus, by the same.
An Account of an American Species of Tortoise, not noticed in the Systems, by the same.
A New Genus of Fishes, of the Order Abdominales, proposed under the name Catostomus, and the characters of this Genus, with those of its Species, indicated, by the same.
An Account of the Crustacea of the United States (continued).
Catostomus, a New Genus of Fishes (concluded).
An Account of two New Genera of Plants, and of a Species of Tillæa, and another of Limosella, recently discovered on the banks of the Delaware, in the vicinity of Philadelphia, by Thos. Nuttall.
Descriptions of New Species of Land and Fresh-water Shells of the United States, by Thomas Say.
Descriptions of four New Species, and two Varieties, of the Genus Hydrargira, by C. A. Le Sueur.
Observations on the Geology of the West India Islands, from Barbadoes to Santa Cruz, inclusive, by William Maclure.
Observations on several Species of the Genus Actinia; illustrated by Figures, by C. A. Le Sueur.
An Account of the Crustacea of the United States (continued).
Observations on several Species of the Genus Actinia (continued.)
Description of Collinsia, a New Genus of Plants, by Thomas Nuttall.
Act of Incorporation.
Constitution.
Catalogue of the Library.
List of Donors to the Library.
List of Donations to the Museum.
List of Donations to the Apparatus.

Vol. I. Part II. 11 Plates. 8vo, pp. 221 to 503. Philadelphia, 1818.

CONTENTS.

Officers of the Academy of Natural Sciences for the year 1818.
Descriptions of several New Species of North American Fishes, by C. A. Le Sueur.
An Account of the Crustacea of the United States, by Thomas Say (continued).
Observations on two Species of the Genus Gracula of Latham, by George Ord.
Report of a Committee on a New Hydrostatic Balance, invented by Isaiah Lukens, and submitted to the Academy.
Essay on the Formation of Rocks; or, an Inquiry into the Probable Origin of their present Form and Structure, by William Maclure (continued).
Account of two New Genera and several New Species of Fresh-water and Land Shells, by Thomas Say.
Essay on the Formation of Rocks; or, an Inquiry into the Probable Origin of their present Form and Structure, by William Maclure (continued).
Observations of a New Genus of Fossil Shells, by C. A. Le Sueur.
An Account of the Crustacea of the United States, by Thomas Say (continued).
Observations on the Genus Glicine and some of its kindred Genera, by S. Elliott.
Essay on the Formation of Rocks; or, an Inquiry into the Probable Origin of their present Form and Structure, by William Maclure (concluded).
An Account of the Florida Jay of Bartram, by George Ord.
Description of several Species of North American Amphibia, accompanied with Observations, by Jacob Green.
Description of several New Species of North American Fishes, by C. A. Le Sueur (continued).

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

Description of a Hydrostatic Balance, by which the Specific Gravity of Minerals may be ascertained without calculation, by Benjamin H. Coates, M.D.
Observations on the Genus Glycine, and some of its kindred Genera, by Stephen Elliott (concluded).
An Account of the Crustacea of the United States, by Thomas Say (continued).
A Case of an unusual Arrangement in the ascending Cava and in the external Jugular Veins of the Human Subject, by William E. Horner, M.D.
Notes on Professor Green's Paper on the Amphibia, published in the September number of this Journal, by Thomas Say.
Description of three Species of Fish, by Samuel L. Mitchill, M.D.
Description of several New Species of the Genus Esox of North America, by C. A. Le Sueur.
Description of three New Genera of Fluviatile Fish, Pomoxis, Sarchirus, and Exoglossum, by C. S. Rafinesque.
An Account of the Crustacea of the United States, by Thomas Say (concluded).
Observations on some of the Animals described in the Account of the Crustacea of the United States, by the same.
Appendix to the Account of the Crustacea of the U. S., by the same.
Description of a New Genus of Fresh-water Bivalve Shells, by the same.
Description of New Species of Linnæan Lacerta, by Jacob Gilliams.
An Account of Minerals at present known to exist in the vicinity of Philadelphia, by Isaac Lea.
Description of three Species of the Genus Næsa, by Thomas Say.
Remarks of the Publishing Committee.
Alphabetical Index, Zoological and Botanical.
Catalogue of the Library (continued).
List of Donors to the Library.
List of Donations to the Museum.
List of Donations to the Apparatus.
Reference to the Plates of vol. i.

Vol. II. Part I. 14 Plates. 8vo, pp. iv., 192, and xv. Philadelphia, 1821.

CONTENTS.

Officers of the Academy of Natural Sciences, for the year 1821.
Description of a New Genus and several New Species of Fresh-water Fish, indigenous to the United States, by C. A. Le Sueur.
Description of two New Species of Exocetus, by C. A. Le Sueur.
Descriptions of the Thysanourœ of the United States, by Thomas Say.
Observations on the Geological Structure of the Valley of Mississippi, by Thomas Nuttall.
Notice concerning a New Species of American Spider, whose web is used in Medicine, by N. M. Hentz.
Description of some New Crystalline Forms of Phosphate of Lime and Zircon, by Dr. G. Troost.
Descriptions of the Arachnides of the United States, by Thomas Say.
Analysis of the Blue Iron Earth of New Jersey, by Lardner Vanuxem.
Descriptions of several New Species of Cuttle-fish, by C. A. Le Sueur.
Descriptions of the Myriapodæ of the United States, by Thomas Say.
Descriptions of some New Species of Plants recently introduced into the Gardens of Philadelphia, from the Arkansa Territory, by Thomas Nuttall.
Observations on several Genera and Species of Fish belonging to the Natural Family of the Esoces, by C. A. Le Sueur.
Analysis of some American Minerals, by Henry Seybert.
On two Veins of Pyroxene or Augite in Granite, by Lardner Vanuxem.
Description of Univalve Shells of the United States, by Thomas Say.
Description of rare Plants recently introduced into the Gardens of Philadelphia, by Thomas Nuttall.
Description and Analysis of the Table-Spar, from the vicinity of Willsborough, Lake Champlain, by Lardner Vanuxem.
Geological and Mineralogical Notice of a portion of the North-Eastern part of the State of New York, by Augustus E. Jessup.
Note by Publishing Committee.

Vol. II. Part II. pp. 193 to 408. 5 Plates, 1 Map. Philadelphia, 1822.

CONTENTS.

Officers of the Academy of Natural Sciences for the year 1822.
Description and Analysis of the Jeffersonite, a new Mineral, by W. H. Keating.

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

Descriptions of New Hemipterous Insects, collected in the Expedition to the Rocky Mountains, performed by order of Mr. Calhoun, Secretary of War, under command of Major Long, by Thomas Say.
A New Genus of Mammalia proposed, and a Description of a Species upon which it is founded, by T. Say and G. Ord.
Description of a New Species of South American Fringilla, by Charles Bonaparte.
Description of a New Species of Mammalia, whereon a Genus is proposed to be founded, by T. Say and G. Ord.
Remarks on the Floating Apparatus, and other peculiarities, of the Genus Ianthina, by Reynell Coates, M.D.
Description of two New Species of the Linnæan Genus Blennius, by C. A. Le Sueur.
Description of a New Species of Trilobite, by J. J. Bigsby, M.D.
On a New Species of Modiola, by Thomas Say.
Descriptions of ten Species of South American Birds, by Charles Bonaparte.
Description of two New Species of Mexican Birds, by Charles Bonaparte.
Catalogue of the Library (continued).
List of Donors to the Library.
List of Donations to the Museum, with Donors' names.
Alphabetical Index.
Plates of Volume IV.
Addenda and Corrigenda.

Vol. V. Part I. 8 Plates. 8vo, pp. iv. and 204. Philadelphia, 1825.

CONTENTS.

Officers of the Academy of Natural Sciences of Philadelphia, for the year 1825.
Description of a number of New American Species of Shapæriæ, by Lewis D. de Schweinitz.
Experiments on Anthracite, Plumbago, &c., by Lardner Vanuxem.
Additions to the Ornithology of the United States, by Charles Bonaparte.
Description of New Species of Hister and Hololepta, inhabiting the United States, by Thomas Say.
Description of a New Fish of the Genus Almo, by C. A. Le Sueur.
Description of a New Crystalline form of Apophyllite, Laumonite, and Amphibole, and of a variety of Pearlstone, by Gerard Troost, M.D.
Observations on the Nomenclature of Wilson's Ornithology, by Charles Bonaparte (continued).
Description of a New Species of Murænophis, by C. A. Le Sueur.
Note of the Genus Condylura of Illiger, by J. D. Godman, M.D.
Description of a New Species of Salamander, by Jacob Green.
Description of a New Species of the Genus Saurus (Cuvier,) by C. A. Le Sueur.
Descriptions of some New Species of Fresh-water and Land Shells of the United States, by Thomas Say.
Description of two Genera of the natural Order Cruciferæ, by Thomas Nuttall. Note, by J. D. Godman, M.D.
Description of a New Species of Salamandra, by R. Harlan, M.D.
Notes to the Paper entitled "Descriptions of ten Species of South American Birds," by Charles Bonaparte.
On the Species of the Linnæan Genus Asterias, inhabiting the Coast of the United States, by Thomas Say.
Description of a variety of the Coluber Fulvius (Linn.), a new Species of Scincus, and two New Species of Salamandra, by R. Harlan, M.D.
Observations on a Species of Anemone, of the Section Pulsatilla, indigenous to the United States, by Thomas Nuttall.
Descriptions of New Species of Coleopterous Insects inhabiting the United States, by Thomas Say.

Vol. V. Part II. 5 Plates. 8vo, pp. 205 to 410. Philadelphia, 1827.

CONTENTS.

Officers of the Academy of Natural Sciences of Philadelphia, for the year 1827.
Descriptions of Marine Shells recently discovered on the Coast of the United States, by Thomas Say.
Note on a Species of Scincus, by R. Harlan, M.D.
On the Distinction of two Species of Icterus, hitherto confounded under the specific name of Icterocephalus, by Charles Bonaparte.
On the Species of the Linnæan Genus Echinus, inhabiting the Coast of the United States, by T. Say.
Description of an Hermaphrodite Orang Outang, lately living in Philadelphia, by R. Harlan, M.D.

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

Analysis of an Ore of Copper from New Jersey, by George T. Bowen.
Description of Coleopterous Insects, by Thomas Say (continued).
On a Fossil Genus of the Order Enalio Sauri (Conybeare), by R. Harlan, M.D.
On a New Extinct Fossil Species of the Genus Ichthyosaurus, by R. Harlan, M.D.
Observations on the Nomenclature of Wilson's Ornithology, by C. Bonaparte.
Account of an Examination of Fused Charcoal, by Lardner Vanuxem.
Descriptions and Analysis of the Sillimanite, a New Mineral, by George T. Bowen.
On a New Species of Duck, described by Wilson as the same with the Anas Fuligula of Europe, by Charles Bonaparte.
On a Species of Lamantin resembling the Menatus Senegalensis (Cuvier), inhabiting the Coast of East Florida, by R. Harlan, M.D.
Descriptions of two New Species of the Genus Batrachoid of Lacepede, by C. A. Le Sueur.
Descriptions of Coleopterous Insects, by Thomas Say (continued.)
Catalogue of the Library (continued).
List of Donors to the Library.
List of Donations to the Museum with the Donors' names.
Alphabetical Index to Volume III.
List of Plates.
Addenda et Corrigenda.

Vol. IV. Part I. 13 Plates. 8vo, pp. iv. and 200. Philadelphia, 1824.

CONTENTS.

List of Officers.
Observations upon some of the Minerals discovered at Franklin, Sussex County, N. J., by Lardner Vanuxem and W. H. Keating.
Nova Generis Capromys, Desm. Species, auctore Edwardo Pœppig, M.D. Lips. Sax.
On an extinct Species of Crocodile not before described; and some Observations on the Geology of West Jersey, by R. Harlan, M.D.
Observations on the Nomenclature of Wilson's Ornithology, by Charles Bonaparte (continued).
Description of the Os Hyoides of Mastodon, by John D. Godman, M.D.
Description of a Testaceous Formation at Anastasia Island, extracted from Notes made on a Journey to the Southern Parts of the United States, during the Winter of 1822 and 1823, by R. Dietz.
Description of a New Species of Fish, of the Linnæan Genus Perca, by J. Gilliams.
Descriptions of Colepterous Insects collected in the late Expedition to the Rocky Mountains, by Thomas Say.
Description of several Species of the Linnæan Genus Raia, of North America, by C. A. Le Sueur.
Description of a New Crystalline Form of the Andalusite, by G. Troost, M.D.
An Account of some of the Fossil Shells of Maryland, by Thomas Say.
Description of several New Species of Holothuria by C. A. Le Sueur.
Observations on the Nomenclature of Wilson's Ornithology, by Charles Bonaparte (continued).

Vol. IV. Part II. 10 Plates. 8vo, pp. iv. 203 to 411. Philadelphia, 1825.

CONTENTS.

Officers of the Academy of Natural Sciences of Philadelphia, for the year 1825.
On the Fresh-water and Land Tortoises of the United States, by Thomas Say.
Observations on the Zinc Ores of Franklin and Sterling, Sussex County, New Jersey, by G. Troost, M.D.
Notice of the Plesiosaurus, and other Fossil Reliquiæ, from the State of New Jersey, by R. Harlan, M.D.
Description of three New Species of Coluber, inhabiting the United States, by T. Say.
Description of two Species of Linnæan Lacerta, not before described, and Construction of the New Genus Cyclura, by R. Harlan, M.D.
Observations on the Nomenclature of Wilson's Ornithology, by Charles Bonaparte (continued.)
Description of four New Species of Linnæan Genus Blennius and a New Exocetus, by William W. Wood.
Description of a New Species of Biped Seps, by R. Harlan, M.D.
Description of a New Species of Scincus, by R. Harlan, M.D.
On two Genera and several Species of Crinoidea, by Thomas Say.
Description of two New Species of Agama, by R. Harlan, M.D.
An Account of a New Species of the Genus Arvicola, by George Ord.
Description of a New Species of Salamander, by William W. Wood.

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

Observations on the Electrical Properties of Caoutchouc, or Gum Elastic, &c., by W. R. Johnson.
Description of two New Species of Salamander, by Jacob Green, M.D.
Description of fifteen New Species of recent, and three of Fossil Shells, chiefly from the Coast of the U.S., by Timothy A. Conrad.
Description of the Fossil Bones of the Megalonyx, discovered in White Cave, Kentucky, by R. Harlan, M.D.
Description of an extinct Species of Fossil Vegetable, of the Family of Fucoides, by R. Harlan, M.D.
Notice of some Parasitic Worms, by S. G. Morton, M.D.
Description of new North American Hemipterous Insects, by Th. Say (continued).
Donations to the Cabinet of the Academy, during the years, 1827, 1828, 1829, and 1830.
Index to the Sixth Volume.

Vol. VII. Part I. 13 Plates. 8vo, pp. 182. Philadelphia, 1834.

CONTENTS.

List of Officers for the year 1834.
Catalogue of Plants collected chiefly in the Valley of the Rocky Mountains, near the Sources of the Columbia River, by Mr. N. B. Wyeth. Described by T. Nuttall.
Description of some of the rarer or little-known Plants indigenous to the United States, by T. Nuttall.
Observations on the Tertiary and more recent Formations of a portion of the Southern States, by T. A. Conrad.
Descriptions of New Tertiary Fossils from the Southern States, by T. A. Conrad.
Analysis of some of the Coals at Pennsylvania, by H. D. Rogers and A. D. Bache.
Description of a New Genus of Fresh-Water Shells, by T. A. Conrad.
Description of a New Species of Hinnita, by T. A. Conrad.

Vol. VII. Part II. 10 Plates. 8vo, pp. 183 to 414. Philadelphia, 1837.

CONTENTS.

List of Officers for the year 1837.
Description of twelve New Species of Birds, chiefly from the vicinity of the Columbia River, by John Kirk Townsend.
Description of a New Species of Hare found in South Carolina, by J. Bachman.
On the Fusing Point of Zinc, and a reference to the Relation between the Tenacity and the Fusibility of the Metals in general, by Walter R. Johnson, A.M., &c.
Description of Two New Species of Trilobites, by Jacob Green, M.D.
Description of New Marine Shells from Upper California. Collected by T. Nuttall, Esq., by T. A. Conrad.
Observations on the Effects of a remarkable Atmospheric Current of Storm, as witnessed on the day following its occurrence, by Walter R. Johnson, A.M., M.A. N.S.P.
Observations on the Different Species of Hares (Genus Lepus) inhabiting the U.S. and Canada, by J. Bachman, D.D., President of the Literary and Philosophical Society, Charleston, S. C.
Some Remarks on the Genus Sorex, with a Monograph of the North American Species, by John Bachman.
Additional Note on the Genus Lepus.
Description of a New Species of Wood-pecker, by James Trudeau, M.D.

Vol. VIII. Part I. 9 Plates. 8vo, pp. 171. Philadelphia, 1839.

CONTENTS.

Officers of the Academy of Natural Sciences of Philadelphia, for the year 1839.
Description of New North American Neuropterous Insects, and Observations on some already described, by (the late) Thomas Say.
Summary of Meteorological Observations for 1836; made in Fayette County, Tennessee, by M. Rhea.
Description of Five New Fossils, of the older Pliocene Formation of Maryland and North Carolina, by Wm. Wagner.
A few Facts in relation to the Identity of the Red and Mottled Owls, by Ezra Michener, M.D.
Description of several New Species of American Quadrupeds, by the Rev. J. Bachman, of Charleston, S. C.
List of Quadrupeds procured by Mr. Townsend, and sent to the Academy of Natural Sciences.
Additional remarks on the Genus Lepus, with corrections of a former Paper, and descriptions of other Species of Quadrupeds found in North America, by John Bachman.

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

Additional Species to the List of Mr. Townsend's Quadrupeds.
Catalogue of the Crustacea brought by Thomas Nuttall and J. K. Townsend from the West Coast of North America and the Sandwich Islands, &c., by J. W. Randall.
Description of a New Species of Cypcelus, from the Columbia River, by J. K. Townsend.
Description of a New Species of Sylvia, from the Columbia River, by the same.
An Analysis of Marl from New Jersey, by S. S. Haldeman.
List of Birds inhabiting the region of the Rocky Mountains, the Territory of Oregon, and the North-West Coast of America, by J. K. Townsend.
Note of Sylvia Tolmœi, by the same.
Description of the White-winged Tanager (Pyranga leucoptera), by J. Trudeau.
Description of a Species of Land-Tortoise, from Africa, by Edward Hllaowell, M.D.

Vol. VIII. Part II. 10 Plates. 8vo, pp. 172 to 354. Philadelphia, 1842.

CONTENTS.

Officers of the Academy of Natural Sciences of Philadelphia, for the year 1842.
Some Observations on the Mechanical Structure of Coal, with evidences of the contemporaneous origin of its various kinds, by Walter R. Johnson, A.M.
Description of three New Species of Unio from the Rivers of the United States, by T. A. Conrad.
Examination and Analysis of Coal found in the Province of Arauco, Coast of Chili, thirty miles south of Bio Bio River, by Walter R. Johnson, A.M.
Description of a New American Species of the Genus Helix, by John S. Phillips.
Description of twenty-four New Species of Fossil Shells, chiefly from the Tertiary deposits of Calvert Cliffs, Maryland, by T. A. Conrad.
Some Remarks on the Ancient Peruvians, by S. G. Morton, M.D.
On the relation between the Coal of South Wales and that of some Pennsylvania Anthracides, by W. R. Johnson, A.M.
Description of five New Species of American Fresh-water Shells, by S. S. Haldeman.
Description of the Nest and Eggs of the Fulica Americana and Anas discors, by George C. Leib, M.D.
Remarks on the so-called Pigmy Race of the Valley of the Mississippi, by S. G. Morton, M.D.
Description of some New Species of Organic Remains of the Cretaceous group of the U. S., with a Tabular View of the Fossils hitherto discovered in this Formation, by the same.
Observations on the Silurian and Devonian Systems of the U. S., with Descriptions of new Organic Remains, by T. A Conrad.
Descriptions of New Species of Organic Remains belonging to the Silurian, Devonian, and Carboniferous Systems of the U. S., by the same.
Descriptions of New Species of Quadrupeds inhabiting North America, by J. J. Audubon, Esq., and the Rev. John Bachman, D.D.
Description of a New Species of Chameleon from Western Africa, by E. Hallowell, M.D.
Description of two New Species of the Genus Perca, from the Susquehanna River, by S. S. Haldeman.
Description of a New Species of Cyclops and two Species of Tubifex, by S. S. Haldeman.
Description of two New Species of Fossil Scutellæ, from South Carolina, by Edmund Ravenel, M.D.
Description of a New Genus of Serpents from Western Africa, by E. Hallowell, M.D.
Meteorological Observations made at Philadelphia, during the year 1841, by William S. Zantzinger, M.D.

Journal of the Academy of Natural Sciences of Philadelphia. 4to. New Series.

VOL. I. (1847—1850.) PART I. DECEMBER, 1847.

ARTICLE

1. On the Fossil Genus Basilosaurus, Harlan (Zeuglodon, Owen), with a Notice of Specimens from the Eocene Green Sand of South Carolina, by Robert W. Gibbes, M.D., of South Carolina.
2. Notice of the Discovery of a Cranium of the Zeuglodon (Basilosaurus), by M. Tuomey, State Geologist of South Carolina.
3. Observations on certain Fossil Bones from the Collection of the Academy of Natural Sciences of Philadelphia, by Richard Owen, Esq., F.R.S., Professor of Comparative Anatomy in the Royal College of Surgeons, London, &c. &c.
4. Description of a New Rapacious Bird in the Museum of the Academy of Natural Sciences of Philadelphia, by John Cassin.

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

ARTICLE

5. Remarks on the Birds observed in Upper California, with Descriptions of New Species, by William Gambel.
6. I. History and Anatomy of the Hemipterous Genus Belostoma, by Joseph Leidy, M.D. II. Miscellanea Zoologica, by Joseph Leidy, M.D.
7. Fragmenta Entomologica, auctore J. L. Le Conte, M.D.

PART II. AUGUST, 1848.

8. Descriptions of North American Coleoptera, chiefly in the Cabinet of J. L. Le Conte, M.D., with reference to described Species, by S. S. Haldeman.
9. Observations on the Eocene Formation, and Descriptions of one hundred and five New Fossils of that Period, from the vicinity of Vicksburg, Mississippi; with an Appendix, by T. A. Conrad.
10. Description of a New Buceros, and a Notice of the Buceros Elatus (Temm.), both of which are in the Collection of the Academy of Natural Sciences of Philadelphia, by John Cassin.
11. Descriptions of three New Species of the Genus Icterus (Briss.,) Specimens of which are in the Museum of the Academy of Natural Sciences of Philadelphia, by John Cassin.
12. Monograph of the Fossil Squalidæ of the U. S., by R. W. Gibbes, M.D.
13. Descriptions of Plants collected by William Gambel, M.D., in the Rocky Mountains and Upper California, by Thomas Nuttall.

PART III. AUGUST, 1849.

14. Monograph of Fossil Squalidæ of the United States, by R. W. Gibbes, M.D., of South Carolina.
15. Descriptions of New Fossil and Recent Shells of the U. S., by T. A. Conrad.
16. Notes on Shells, with Descriptions of New Genera and Species, by T. A. Conrad.
17. Remarks on the Birds of Upper California, with Descriptions of New Species, by William Gambel, M.D.
18. Additional Observations on a New Living Species of Hippopotamus, by Samuel G. Morton, M.D., Penn. and Edinburgh.
19. Descriptions of New Species of Birds of the Genera Vidua (Cuvier), Euplectes (Swainson), and Pyrenestes (Swainson), Specimens of which are in the Academy of Natural Sciences of Philadelphia, by John Cassin.
20. Cryptocephalinarum Boreali-Americæ Diagnoses cum Speciebus novis Musei Iecontiani Auctore S. S. Haldeman.
21. Observations on the Reproductive Organs and on the Fœtus of the Delphinus Mesarnak, by C. D. Meigs, M.D.

PART IV. JANUARY, 1850.

22. Descriptions of New Fresh-water and Marine Shells, by T. A. Conrad.
23. Revision of the North American Tailed Batrachia, with Descriptions of New Genera and Species, by S. F. Baird, Carlisle, Pennsylvania.
24. Descriptions of New Species of the Genera Micrastur (G. R. Gray), Tanagra (Linn.), and Sycobius, (Vieill.), by John Cassin.
25. New Species of Myliobates from the Eocene of S. Carolina, with other Genera not heretofore observed in the U. S., by Robert W. Gibbes, M.D.
26. Descriptions of two Species of Distoma, with the partial History of one of them, by Joseph Leidy, M.D.
27. An attempt to classify the Longicorn Coleoptera of the part of America north of Mexico, by John L. Le Conte, M.D.

VOL. II. (1850—1854.) PART I. NOVEMBER, 1850.

1. An attempt to classify the Longicorn Coleoptera, of the part of America north of Mexico, by John L. Le Conte, M.D.
2. Descriptions of one New Cretaceous and seven New Eocene Fossils, by T. A. Conrad.
3. Descriptions of some American Annelida Ambranchia, by J. Leidy, M.D.
4. Descriptions of Owls presumed to be New Species, in the Collection of the Academy of Natural Sciences of Philadelphia, by John Cassin.
5. Description of a New Species of Mergulus Ray, from the Coast of California, by William Gambel, M.D.
6. Description of fifteen New Species of Crinoidea from the Sub-carboniferous Limestone of Iowa, collected during the U. S. Geological Survey of Iowa, Wisconsin, and Minnesota, in the years 1848, 1849, by David D. Owen, M.D., and B. F. Shumard, M.D.
7. Fossil Footprints of Connecticut River, by James Deane, M.D.
8. On the Giant Wolf of North America, Lupus Gigas, by John K. Townsend, M.D.

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

PART II. JANUARY, 1852.

ARTICLE

9. Substance of Notes made during a Geological Reconnaissance in the Auriferous Porphyry Region next the Carribbean Sea, in the province of Veraguas, and Isthmus of Panama, by Richard C. Taylor.
10. The North-American Jackal-Canis Frustror, by S. W. Woodhouse, M.D.
11. Descriptions of seven New Species of Crinoidea from the Sub-carboniferous Limestone of Iowa and Illinois, by David D. Owen, M.D., and B. F. Shumard, M.D.
12. Descriptions of Owls presumed to be new Species, in the Collection of the Academy of Natural Sciences of Philadelphia, by J. Cassin.
13. An attempt to classify the Longicorn Coleoptera of the part of America north of Mexico, by John L. Le Conte, M.D.
14. Monograph of the Birds composing the Genera Hydropsalis (Wagler), and Antrostomus (Nuttall), by John Cassin.
15. On the Genus Acostæa of D'Orbigny, a Fresh-water Lamellibranchia, by I. Lee.
16. Description of a New Species of the Genus Paradisea, Linn., in the Collection of the Academy of Natural Sciences of Philadelphia.
17. Description of a New Species of Crocodile from the Miocene of Virginia, by Joseph Leidy, M.D.
18. An attempt to classify the Longicorn Coleoptera of the part of America north of Mexico, by John L. Le Conte, M.D.
19. Description of two New Minerals and a New Earth, by D. D. Owen, M.D.

PART III. JANUARY, 1853.

20. Description of a Fossil Saurian of the New Red Sandstone Formation of Pennsylvania, with some Account of that Formation, by Isaac Lee.
21. On some New Fossil Molluscs in the Carboniferous Slates of the Anthracite Seams of the Wilkesbarre Coal Formation, by Isaac Lee.
22. On the Osteology of the Head of Hippopotamus, and a Description of the Osteological Characters of a New Genus of Hippopotamidæ, by Joseph Leidy, M.D.
23. Synopsis of the Species of Pterostichus, Bon., and allied Genera inhabiting Temperate North America, by J. L. Le Conte, M.D.
24. Descriptions of New Species of Birds of the Genera Melanerpes (Swainson), and Lanius (Linnæus), by John Cassin.
25. Notes on the Birds of California, observed during a residence of three years in that country, by A. L. Heermann, M.D.
26. Descriptions of New Fossil Shells of the U. S., by T. A. Conrad.

PART IV. FEBRUARY, 1854.

27. Exotic Fungi from the Schweinctzian Herbarium, principally from Surinam. Revised by the Rev. M. J. Berkeley, M.A., F.L.S., and Rev. M. A. Curtis, D.D.
28. Descriptions of New Species of Unio, by T. A. Conrad.
29. On some New Reptiles from Oregon and the Western Coast of Africa, by Edward Hallowell, M.D.
30. Embryonic Development of Planocera Elliptics, by C. Girard.
31. On Bathygnathus Borealis, an extinct Saurian of the New Red Sandstone of Prince Edward's Island.
32. Monograph of the Genus Argonauta, Linn., with Descriptions of five New Species, by T. A. Conrad.
33. Synopsis of the Genera Parapholas and Penicilla, by T. A. Conrad.

VOL. III. PART I. MAY, 1855.

1. Notice of Producti found in the Western States and Territories, with Descriptions of twelve New Species, by J. C. Norwood and Henry Pratten, of the Illinois Geological Survey.
2. Notice of the Genus Chonetes, as found in the Western States and Territories, with Descriptions of eleven New Species, by Joseph G. Norwood and Henry Pratten.
3. Contributions to South American Herpetology, by E. Hallowell, M.D.
4. Plantæ Heermannianæ. Descriptions of New Plants collected in South California, by Dr. A. L. Heermann; with Remarks on other Plants heretofore described, and belonging to the same Collection.
5. An Account of several Species of Fish observed in Florida, Georgia, &c., by John Edward Holbrook, M.D.
6. Researches on the Cryptogamic Flora of the State of Georgia.
7. Descriptions of New Species of Birds of the Genus Spermestes, Swainson, in the Museum of the Academy of Natural Sciences of Philadelphia, by John Cassin.

PART II. DECEMBER, 1855.

8. Notice of Fossils from the Carboniferous Series of the Western States, belonging to

Journal of the Academy of Natural Sciences of Philadelphia—*Continued.*

ARTICLE

the Genera Spirifer, Bellerophon, Pleurotomariæ, Macrocheilus, Natica, and Loxonema, with Descriptions of eight New Characteristic Species, by Joseph G. Norwood and H. Pratten.

9. Plantæ Prattenianæ Californicæ. An Enumeration of a Collection of California Plants made in the vicinity of Nevada, by Henry Pratten, Esq., of New Harmony; with critical Notices and Descriptions of such of them as are new or yet unpublished in America.
10. Relation of Atomic Heat to Crystalline Form, by S. S. Meigs, M.D.
11. Contributions towards a Knowledge of the Marine Invertebrate Fauna of the Coasts of Rhode Island and New Jersey, by Joseph Leidy, M.D.
12. Descriptions of New Species of Psittacidæ in the Collection of the Academy of Natural Sciences of Philadelphia, by John Cassin.

PART III. MAY, 1856.

13. Descriptions of some Remains of Fishes from the Carboniferous and Devonian Formations of the United States, by Joseph Leidy, M.D.
14. Descriptions of some Remains of extinct Mammalia, by Joseph Leidy, M.D.
15. On the Sandstone Fossil of Connecticut River, by James Deane, M.D.
16. Plantæ Kaneanæ Grœnlandicæ. Enumeration of Plants collected by Dr. E. K. Kane, U.S.N., in his first and second Expeditions to the Polar Regions: with Descriptions and Remarks, by Elias Durand.
17. A Commentary on the Synopsis Fungorum in Americâ Boreali mediâ degentium, by L. D. de Schweinitz, by the Rev. M. S. Berkeley, M.A., F.L.S., and the Rev. M. A. Curtis, F.A.A.A.S.
18. Synopsis of the Melolonthidæ of the United States, by John L. Le Conte.

Leidy.—Flora and Fauna within Living Animals, by Joseph Leidy, M.D. 10 Plates. 4to, pp. 68. Washington, 1853. sewed. 7s. 6d.

M'Murtrie.—Lexicon Sententiarum; a Dictionary of Terms used in the Various Branches of the Natural Sciences, by Henry M'Murtrie. 12mo. Philadelphia. sheep. 4s. 6d.

Memoirs of the American Academy of Arts and Sciences. See under Collections and Publications of Learned Societies.

Natural History of New York State. 19 vols. 4to. Coloured. Albany.

CONTENTS.

Part 1. ZOOLOGY. Mammalia, by James E. de Kay. 33 coloured Plates. 4to. cloth.—Ornithology, by James E. de Kay. 141 coloured Plates. 4to. cloth. —Reptiles and Amphibia, by James E. de Kay. 79 coloured Plates. 2 vols. 4to. cloth.—Mollusca, by James E. de Kay. 53 coloured Plates. 4to. cloth. 1842 to 1844.

Part 2. BOTANY. Flora, by John Torrey, M.D., F.L.S. 158 coloured Plates. 2 vols. 4to. cloth. 1843.

Part 3. MINERALOGY, by Lewis C. Beck. Above 500 Figures and 10 Plates. 4to. cloth. 1842.

Part 4. GEOLOGY, by W. W. Mather. Comprising the Geology of the First Geological District. 146 Plates, some coloured. 4to. cloth.—Comprising the Survey of the Second Geological District, by Ebenezer Emmons, M.D. 15 Plates. 4to. cloth.—Comprising the Survey of the Third Geological District, by Lardner Vanuxem. Woodcuts. 4to. cloth.—Comprising a Survey of the Fourth Geological District, by James Hall. Nearly 200 Illustrations, Maps, Views, Sections, &c. 4to. cloth. 1842 to 1843.

Part 5. AGRICULTURE, by Ebenezer Emmons. 24 Plates, Maps, and Views. 5 vols. 4to. cloth. 1846 to 1849.

Part 6. PALÆONTOLOGY, by James Hall. Vols. I. and II. Upwards of 100 Plates. 4to. cloth. 1849 to 1852.

To be completed in about twenty volumes, with numerous Plates and Woodcuts, and a General Introduction, by his Excellency William H. Seward.

"The preparation of this splendid work by the ablest scientific men of the country has cost the State (of New York) more than 200,000 dollars, and is a brilliant example of enlightened legislative liberality. As a work embracing every department of Natural History, it must find a place in the library of all scientific men, as well as of all persons of taste and refinement. The work embraces the following departments:—

"1st. Zoology, in five volumes, by James E. de Kay: contains figures and full descriptions of all the Mammalia, Birds, Reptiles, Shells, and many of the Insects which inhabit the State and its waters. Besides these, under the head of "Extra-Limital," are short descriptions of all species known to inhabit North America. Thus the student has not only the Zoology of one State, but in fact of the whole continent. The great range of the State of New York, from the northern lakes

Natural History of New York State—*Continued.*

to the sea-board, renders this department peculiarly interesting and valuable, from the large number of species which it embraces within its limits.

"2nd. Botany, in two volumes, by John Torrey. This part embraces full descriptions of all the plants of the State, with remarks upon their habits, modes of growth, the means of cultivating and improving valuable plants, and of destroying the noxious or troublesome. The work is illustrated by figures of about 100 of the most important and interesting species.

"3rd. Mineralogy and Chemical Analysis, by Lewis C. Beck. The Mineralogical Department gives a full account of the Minerals and Ores of the State, their analysis, important uses, &c.; together with an interesting account of the Saline and other Mineral Springs of the State, many of which have obtained so much celebrity. The work contains a large amount of practical information on every part of the subject.

"4th. Geology and Palæontology, by W. W. Mather, Ebenezer Emmons, Lardner Vanuxem, and James Hall. The Geological department, 6 vols., embraces a full account of the Primary and New York Systems, or of those from the oldest known rocks to the carboniferous or coal-bearing period, together with the new red sand-stone and tertiary. The work is illustrated by numerous interesting sections, views of scenery, &c., with woodcuts of more than 300 species of fossils characteristic of the strata. The rocks here described, together with their fossils, being little known in this country, and far more complete than the same formations in Europe, will render these volumes exceedingly interesting and important. This is the first work in the country where any systematic description of the older stratified rocks is given; and from the circumstance that these are better developed, and the series more complete, in New York than in any part of the known world, it forms the most interesting work yet published upon the popular science of Geology. The volumes on Palæontology contain full descriptions, with engraved figures, of more than 500 species of fossils, principally those found in the rocks intervening between the Primary and the Coal formation. The fossils of each particular rock or group are figured collectively, in the order of the series which they illustrate. The importance and interest in this portion of the Geological department is, if possible, superior to all the others; giving a large number of entirely new forms of these ancient denizens of our globe, with their geographical distribution and geological range.

"5th. Agriculture, by Ebenezer Emmons. 5 vols.

Vol. I. Contains a general account of the soils of the State, their composition and distribution, and their relations to the underlying formations. with 15 plain and 7 coloured Plates, and an Agricultural Map of the State of New York. Vol. II. is devoted mainly to the composition of the inorganic parts of vegetables, with 26 plain and 14 coloured Plates. Vol. III is devoted partly to the description and illustration of the fruits of the State, and partly to the principles of Practical Agriculture. Vol. IV. contains 99 beautifully coloured Plates of the fruits of the state of New York. Vol. V. forms the Entomological portion of the work, together with descriptions of the more common and injurious species of insects, with 45 coloured and 3 plain Plates.

Agassiz.—The Diversity of Origin of Human Races, by L. Agassiz (from Christian Examiner and Religious Miscellany, No. 160, July, 1850). 8vo, pp. 36. Boston. 3s. 6d.

Bachman.—The Doctrine of the Origin of the Human Race, examined on the principle of Science, by John Bachman, D.D. 8vo. Charleston, S. C., 1850.

Bachman.—Two Letters on Hybridity, by J. Bachman. 8vo. Charleston, 1850.

Bachman.—A Notice of the "Types of Mankind," with an Examination of the Charges contained in the Biography of Dr. Morton, published by Nott and Gliddon, by John Bachman, D.D. 8vo. Charleston, 1854.

Bachman.—An Examination of Prof. Agassiz's Sketch of the Natural Provinces of the Animal World, and their Relation to the different Types of Men, by the Rev. John Bachman, D.D. 8vo. Charleston, S. C., 1855.

Bartlett.—The Progress of Ethnology; an Account of recent Archæological, Philological, and Geographical Researches in various parts of the Globe, tending to elucidate the Physical History of Man, by John Russell Bartlett. 8vo. New York, 1847. 6s.

Burmeister.—The Black Man; the Comparative Anatomy and Psychology of the African Negro, by Hermann Burmeister, Professor of Zoology at the University of Halle. Translated by J. Friedlander, Dr. Phil. of Berlin, and Rob. Tomes, M.D., of New York. 8vo, pp. 24. New York, 1853. sewed. 1s.

Caldwell.—Thoughts on the Original Unity of the Human Race, by Charles Caldwell, M.D. Philadelphia, 1831. 2nd edition. 8vo. Cincinnati, 1852.

Campbell.—Negro-Mania; being an Examination of the falsely-assumed Equality of the various Races of Men; demonstrated by the Investigations of Champollion, Wilkinson, Rosellini, Van-Amringe, Gliddon, Young, Morton, Knox, Lawrence, Gen. J. H. Hamond, Murray, Smith, W. Gilmore Simms, English, Conrad, Elder, Prichard, Blumenbach, Cuvier, Brown, Le Vaillant, Carlyle, Cardinal Wiseman, Burckhardt, and Jefferson; together with a concluding Chapter, presenting a Comparative Statement of the Condition of the Negroes in the West Indies before and since Emancipation, by John Campbell. 8vo. pp. 552. Philadelphia, 1851. cloth. 9s.

De Gobineau.—The Moral and Intellectual Diversity of Races; with particular Reference to their respective Influence in the Civil and Political History of Mankind. From the French of Count A. de Gobineau; with an Analytical Introduction and Copious Historical Notes, by H. Hotz. To which is added, an Appendix containing a Summary of the latest Scientific Facts bearing upon the Question of Unity or Plurality of Species, by J. C. Nott, M.D., of Mobile. crown 8vo, pp. 516. Philadelphia, 1856. cloth. 8s.

Garnett.—The Ammi (My People) Sought and Identified with the Chinese, by D. J. Garnett. 8vo. New York, 1850.

Guyot.—The Earth and Man: Lectures on Comparative Physical Geography in its Relations to the History of Mankind, by Arnold Guyot. Translated from the French, by C. C. Felton. 8vo. Boston, 1849. 7s. 6d.

Jones.—A Candid Examination into the Origin of the Difference of Colour in the Human Family, by Charles Jones. 8vo. Philadelphia, 1822.

Kinmont.—Twelve Lectures on the Natural History of Man, and the Rise and Progress of Philosophy, by Alex. Kinmont. 8vo. Cincinnati, 1839. 12s.

Meigs.—Catalogue of Human Crania in the Collection of the Academy of Natural Sciences of Philadelphia: based upon the Third Edition of Dr. Morton's "Catalogue of Skulls," &c., by Aitken Meigs, M.D. 8vo, pp. 112. Philadelphia, 1857. 3s. 6d.

Morton.—Crania Americana; or, a Comparative View of the Skulls of various Aboriginal Nations of North and South America: to which is prefixed an Essay on the Varieties of the Human Species, by Samuel G. Morton, M.D. Illustrated by 78 Plates and a coloured Map. folio, pp. vi. and 298. Philadelphia, 1839. £8 8s.

Morton.—Crania Ægyptiaca; or, Observations on Egyptian Ethnography, derived from Anatomy, History, and the Monuments (from the Transactions of the American Philosophical Society, Vol. IX.), by Samuel George Morton, M.D. 14 litho. Plates. 4to, pp. 68. Philadelphia, 1844.

"Les richesses craniologiques que vous avez été assez heureux de réunir, ont trouvé en vous un digne interprète. Votre Ouvrage, Monsieur, est également remarquable par la profondeur des vues anatomiques, par le détail numérique des rapports de conformation organique, par l'absence des rêveries poétiques, qui sont les mythes de la physiologie moderne, par les généralités dont votre 'Introductory Essay' abonde. Rédigeant, dans ce moment, le plus important de mes Ouvrages, qui sera publié sous le titre imprudent de Kosmos, je saurai profiter de tant d'excellents apperçus sur la distribution des races humaines, qui se trouvent épars dans votre beau Volume.—Que de sacrifices pécuniaires n'avez-vous pas dû faire, pour atteindre une si grande perfection artistique, et produire un Ouvrage qui rivalise avec tout ce qu'on a fait de plus beau en Angleterre et en France."—Extract from a Letter addressed by Mr. A. de Humboldt to Dr. Morton, Jan., 1844.

"The magnificent publication of Dr. Morton, which far exceeds in its comprehensiveness, and in the number and beauty of its engravings, any European work that has yet appeared on National Varieties of the Skull, comprises nearly the sum of our information on the distinctive characters of the head and skeleton in the several tribes of the New World."—Prichard, Nat. Hist. of Man, 4th ed. ii. 502.

Morton.—Remarks on the Diversities of the Human Species; an Introductory Lecture, by Samuel G. Morton, M.D. 8vo. Philadelphia, 1842.

Morton.—Hybridity in Men and Animals; in reference to the Unity of the Human Species, by S. G. Morton, M.D. 8vo. New Haven, 1847.

Morton.—Catalogue of Skulls of Man and the Inferior Animals, in the Collection of Samuel George Morton, M.D. 3rd edition. 8vo. Philadelphia, 1849.

Morton.—Letter to the Rev. John Bachman, on the question of Hybridity in Animals, considered in reference to the Unity of the Human Species, by S. G. Morton, M.D. 8vo. Charleston, 1850.

Morton.—Additional Observations on Hybridity in Animals, and on some Collected Subjects; being a Reply to the Objections of the Rev. John Bachman, D.D.; with an Appendix and a Second Letter, by S. G. Morton, M.D. 8vo. Charleston, 1850.

Newman.—Natural History of Man, by J. B. Newman. 12mo. New York. sewed. 2s. 6d.

Nott.—Chronology, Ancient and Scriptural; being a Reply to an Article in the Southern Presbyterian Review, reviewing his Lectures on the Connection between the Biblical and Physical History of Man, by J. C. Nott. 8vo. Charleston, 1850. 2s.

Nott.—Two Lectures on the Connection between the Biblical and Physical History of Man, by J. C. Nott. Curious Map. 8vo. New York, 1849. 5s.

Nott.—The Physical History of the Jewish Race, by Josiah C. Nott, M.D. 8vo. Charleston, 1850.

Nott and Gliddon.—Types of Mankind; or, Ethnological Researches based upon the Ancient Monuments, Paintings, Sculptures, and Crania of Races, and upon their Natural, Geographical, Philological, and Biblical History, by J. C. Nott, M.D., Mobile, Alabama; and Geo. R. Gliddon, formerly U. S. Consul at Cairo. Plates. royal 8vo, pp. 738. Philadelphia, 1854, cloth. £1 5s.

The same, in 4to. £1 16s.

Nott and Gliddon.—Indigenous Races of the Earth; or, New Chapters of Ethnological Inquiry: including Monographs on Special Departments of Philology, Iconography, Cranioscopy, Palæontology, Pathology, Archæology, Comparative Geography, and Natural History, contributed by Alfred Maury, Francis Pulszky, and J. Aitken Meigs, M.D.; presenting Fresh Investigations, Documents, and Materials, by J. C. Nott, M.D., and Geo. R. Gliddon. Plates and Maps. 4to, pp. 656. London and Philadelphia, 1857. sewed. £1 16s.

The same, royal 8vo. £1 5s.

Pickering.—The Races of Men, and their Geographical Distribution, by Charles Pickering, M.D. Coloured Plates. 4to, pp. vii., 447, and 12. Philadelphia, 1848.

Pickering.—The Geographical Distribution of Animals and Man, by Charles Pickering, M.D. pp. 214. Boston, 1854. cloth. £1 4s.

Redfield.—Outlines of Comparative Physiognomy; or, Resemblances between Men and Animals, by F. W. Redfield, M.D. With numerous Illustrations. 8vo. New York, 1853. 12s.

Remarks upon a Recent Work, entitled "The Vestiges of the Natural History of Creation." 8vo. Philadelphia, 1846.

Smith.—An Essay on the Causes of the Variety of the Complexion and Figure in the Human Species; with Animadversions on certain Remarks made on the 1st edition of this Essay, by Mr. Charles White; also, Strictures on Lord Kames' Discourse on the Original Diversity of Mankind, and an Appendix, by S. S. Smith, D.D. 8vo. New Brunswick (N. J.), 1810.

Smyth.—The Unity of the Human Race proved to be the Doctrine of Scripture, Reason, and Science; with a Review of the present Position and Theory of Prof. Agassiz, by the Rev. Thomas Smyth, D.D. 8vo. New York, 1850.

CONTENTS OF VOL. I.

ARTICLE
1. Notes on the Semi-civilized Nations of Mexico, Yucatan, and Central America, by Albert Gallatin.
2. An Account of Ancient Remains in Tennessee, by Gerard Troost, M.D., Professor of Chemistry, Geology, &c., in the University of Tennessee.
3. Observations respecting the Grave Creek Mound in Western Virginia, by Henry R. Schoolcraft.
4. On the Recent Discoveries of Himyaritic Inscriptions, and the Attempts made to Decipher them, by William W. Turner.
5. Account of the Punico-Libyan Monument at Dugga, and the Remains of an Ancient Structure at Bless, near the site of Ancient Carthage, by Frederick Catherwood.

CONTENTS OF VOL. II.

1. Hale's Indians of North-west America, and Vocabularies of North America ; with an Introduction, by Albert Gallatin.
2. Observations on the Aboriginal Monuments of the Mississippi Valley ; with Maps and Illustrations, by E. G. Squier.
3. View of the Ancient Geography of the Arctic Regions of America, from accounts contained in old Northern MSS., by Professor Charles C. Rafn, of Copenhagen.
4. Account of a Craniological Collection; with Remarks on the Classification of some Families of the Human Race, by Samuel G. Morton, M.D.
5. Sketch of the Polynesian Language, drawn up from Hale's Ethnology and Philology, by Theodore Dwight.
6. Grammatical Sketch of the Language spoken by the Indians of the Mosquito Shore, by Alexander I. Cotheal.
7. Present Position of the Chinese Empire, in respect to the Extension of Trade and Intercourse with other Nations, by S. Wells Williams.
8. Sketch of the Mpongwes, and their Language; from information furnished by the Rev. John Leighton Wilson, Missionary of the American Board, by T. Dwight.

CONTENTS OF VOL. III.—PART 1.

1. The Creek and Cherokee Indians, by W. Bartram.
2. Archæology and Ethnology of Nicaragua, by E. G. Squier.
3. Rio Wanks and the Mosco Indians, by Juan Francisco Jrias.
4. A Choctaw Tradition, by J. G. Copeland.
5. The Aborigines of the Isthmus of Panama, by Berthold Seemann.
6. Antiquities of Cuba, by Andrès Poey.

Van Amringe.—An Investigation of the Theories of the Natural History of Man, by Lawrence, Pritchard, and others, founded upon Animal Analogies; and an Outline of a new History of Man, founded upon History, Anatomy, Physiology, and Human Analogies, by William F. Van Amringe. 8vo New York, 1848. £1 1s.

Virey.—Natural History of the Negro Race, by Jul. Jos. Virey. Extracted by J. H. Guenebault, with an Index. 8vo. Charleston, 1837.

Wilson.—Our Israelitish Origin. Lectures on Ancient Israel, and the Israelitish Origin of the Modern Nations of Europe, by J. Wilson. 8vo. Philadelphia, 1850.

---

3. MAMMALS, BIRDS, REPTILES, FISHES, MOLLUSCA, INSECTS, CRABS, WORMS, ETC.

Adams.—Contributions to Conchology. 8vo. New York, 1849-52. 12s. 6d.

Agassiz and **Gould.**—Principles of Zoology; touching the Structure, Development, Distribution, and Natural Arrangement of the Races of Animals, Living and Extinct; with numerous Illustrations. For the use of Schools

II. pp. x. and 96, and 14 coloured Plates. 1828. Volume III. pp. iv. and 60, and 9 coloured Plates, 1828. Volume IV. 1833. Philadelphia.

Brewer.—North American Oology; or, Descriptions and Figures of the Eggs of North American Birds, with notices of their Geographical Distribution during the breeding season, by Thomas M. Brewer, M.D. Part I. Raptores et Fissirostres. 4to, pp. viii. and 142. Washington, 1857.

Brinclé.—Remarks on Entomology, chiefly in reference to an Agricultural Benefit, by W. D. Brincklé, M.D. 8vo. Philadelphia, 1852.

Browne.—Trichologia Mammalium: or, a Treatise on the Organization, Properties, and Uses of Hair and Wool; together with an Essay upon the Raising and Breeding of Sheep, by Peter A. Browne, LL.D., of Philadelphia. Published under the patronage of the Commonwealth of Pennsylvania. With Illustrations. 4to, pp. 188. Philadelphia, 1852. £1 5s.

Cassin.—Illustrations of the Birds of California, Texas, Oregon, British and Russian America; forming a Supplement to Audubon's "Birds of America," by John Cassin. 1 vol. royal 8vo, containing 50 coloured Plates and the explanatory letter-press. Philadelphia, 1856. half morocco. £3 3s.

Conrad.—Monography of the Family Unionidæ, or Naiades of Lamarck (Fresh-water Bivalve Shells), of North America; illustrated by Figures drawn on stone, from nature, and finely coloured, by T. A. Conrad, Curator of the Academy of Natural Sciences of Philadelphia, &c. Nos. 1 to 12, each number containing 5 coloured Plates. Philadelphia, 1828—1836. £3 12s.

Conrad.—New Fresh-water Shells of the United States, with coloured Illustrations and a Monograph of the Genus Anculotus of Say; also a Synopsis of the American Naiades, by T. A. Conrad. With 8 coloured Plates. 12mo. Philadelphia, 1834. 9s. 6d.

Dana.—Zoophytes of the United States' Exploring Expedition, by James D. Dana. The letter-press in 1 Volume. 4to, pp. 740. Philadelphia, 1846. £5 5s.

The Atlas; consisting of 61 Plates. folio Philadelphia, 1849. £10 10s.

Dana.—The Crustacea of the United States' Exploring Expedition during the years 1838, 1839, 1840, and 1841, under the command of Charles Wilkes, U.S.N. Described and figured by James D. Dana, A.M. The letter-press in 2 parts, 4to, pp. 1620. Philadelphia, 1852, 1853. £8 8s.

The Atlas, complete in 96 engraved and partly-coloured Plates and 28 pages of letter-press, large folio, half-bound morocco, gilt top. Philadelphia, 1855. £10 10s.

Dana.—On the Classification and Geographical Distribution of Crustacea: from the Report on Crustacea of the United States' Exploring Expedition, under Capt. Chas. Wilkes, U.S.N., during the years 1838—1842, by James D. Dana, A.M., Member of the Geological Society of London, &c. &c. 4to, pp. 198. Philadelphia, 1853. sewed. 18s.

James Dwight Dana, Doctor of Law, Professor of Geology and Natural History in Yale College, Connecticut, United States of America, Corr. Member of the Royal Academy of Sciences in Prussia, of the Royal Academy of Sciences in Bavaria, of the Imperial Society of Naturalists at Moscow, of the Helvetic Society of Natural Sciences, of the Philomathic Society at Paris, of the Academy of Sciences at Liége, of the Geological Society at London, of the Linnæan Society at London, of the American Academy of Arts and Sciences at Boston, of the Academy of Natural Sciences at Philadelphia, of the Lyceum of Natural History at New York, &c.

Professor James D. Dana was born February 12, 1813, in Utica, Oneida County, State of New York, where he passed his early years.

In the autumn of 1830 he entered Yale College, in New Haven, Connecticut, attracted by the reputation of Professor Benjamin Silliman, sen., the distinguished Pioneer in American Science, whose lectures on Chemistry and Geology during more than half a century have added lustre to that ancient and celebrated institution of learning. During the regular course of study at New Haven, Mr. Dana evinced an especial love for the natural sciences, without neglecting philological and mathematical pursuits, in the latter of which he was distinguished. He was graduated with honour, Bachelor of Arts, in 1833, and about the same time received the appointment of Teacher of Mathematics to Midshipmen in the Navy of the United States. In that capacity he sailed to the Mediterranean, in the U. S. ship of the line "Delaware," returning in 1835. During the two years following he acted at Yale College as Assistant to the distinguished Professor whose successor in office he afterwards became.

In December, 1836, he was appointed Mineralogist and Geologist of the Exploring Expedition then about to be sent by the Government of the United States to the Southern and Pacific Oceans.

The five vessels of the squadron, under the command of Commodore Wilkes, sailed in August, 1838, on a voyage around the world. After extensive explorations, and suffering shipwreck moreover at the mouth of the Columbia River in Oregon, Mr. Dana returned home in June, 1842. The rare opportunities which this voyage afforded for scientific observation had been well improved. During the thirteen years after its termination, he was engaged in preparing for publication the various reports of this Expedition committed to his charge, and in pursuing other scientific labours.

He resided at Washington from 1842 to 1844, and then returned to New Haven, Connecticut, where he soon after married Henrietta Frances, third daughter of Professor Benjamin Silliman, and where he has since resided.

Before going to the Pacific he published, in 1837, the first edition of his Mineralogy, a work of high repute in Europe and America, of which the fourth and last edition appeared in 1854.

His first publication connected with his observations in the Exploring Expedition was a Report on Zoophytes, which appeared in 1846, a 4to volume of 740 pages, with an Atlas of 61 folio plates. In this work, Mr. Dana reviewed the whole department of Polyps, combining his own observations with those of earlier authors, and proposed a new classification, bringing, for the first time, the Actiniæ and the Alcyonoid Polyps into their true relations to the Astræoid Polyps. The number of new species which he describes is two hundred and thirty.

The second work in the same series was a Report on the Geology of the Pacific, published in 1849, a 4to vol of 756 pages, with an Atlas of 21 Plates. This work presents a view not only of the geology of parts of Australia, Western America, and the islands of the Pacific, but also treats at length, and with original views, of Volcanic phenomena, Coral Reefs and Islands, and the General Features of the Globe.

The third work, pertaining to this Government Exploring Expedition, was a Report on Crustacea, which appeared in 1852-1854, the text 1620 pages 4to, the Atlas 96 Plates in folio. Six hundred and eighty species are described in this work, of which six hundred and fifty-eight are new. The subjects of Classification and Geographical Distribution receive in it special attention. These Reports were published by the Government of the United States, and only 200 copies of each have thus far been issued. With few exceptions, the drawings in these atlases were made by Mr. Dana himself.

While engaged in preparing the last two of these reports, Mr. Dana has been the active Editor of the American Journal of Science and Arts, founded in 1819, by Professor Silliman, sen., and well known as the great repository of the scientific labours of their countrymen. To this Journal which reached its seventy-third volume in 1857, as well as to the Proceedings of the American Academy of Arts and Sciences in Boston, the Lyceum of Natural History of New York, and the Academy of Natural Sciences of Philadelphia, Mr. Dana has contributed various important memoirs.

Soon after the resignation by Professor Silliman of the Chair of Chemistry and Geology in Yale College, Mr. Dana entered, in 1855, on the duties of the office of Silliman Professor of Natural History and Geology in that Institution, to which place he had been elected in 1850, his brother-in-law, Professor Benjamin Silliman, jun., having been appointed to the Chair of Chemistry. In discharging the duties of his professorship and in editing the American Journal of Science, Professor Dana is now engaged.

In 1854 he was elected President of the American Association for the Advancement of Science, having been for many years one of the Standing Committee of that body, and in August, 1855, he delivered the Annual Address before that Association at its meeting in Providence.

Professor Dana's contributions to science evince uncommon skill in observation and great industry, united to a high order of genius. They are probably unsurpassed in extent and value by those of any American philosopher.

The principal publications of Professor Dana are as follows :—

Treatise on Mineralogy, 1st edition, 8vo, pp. 572. New Haven, 1837. 2nd edition, 8vo, pp. 634, 1844. 3rd edition, 8vo, pp 712, 1850. 4th edition, 2 vols. 8vo, pp. 320 and 554, 1854.
Manual of Mineralogy, 12mo, pp. 432. New Haven, 1851. 2nd edition, 1857.
Reports of the U. S. Exploring Expedition under Commander Wilkes—(published by the Government of the United States) :—
  On Zoophytes. 4to, text pp. 740, Atlas, 61 plates folio. Washington and Philadelphia, 1846.
  On Geology. 4to, text pp. 756, Atlas, 21 plates folio. 1849.
  On Crustacea. 2 vols. 4to, pp. 1620. 1852-3. Atlas 96 plates folio. 1853.
On Coral Reefs and Islands. 8vo, pp. 144. New York, 1853.
American Journal of Science and Arts (Mr. Dana's more important papers).
  First Series.—Vol. xxx. 275, On the Formation of Twin Crystals.
    xxxiv. 225, Anatomy of the Caligus Americanus.
    xlv. 131, 310, Areas of subsidence in the Pacific indicated by the distribution of coral reefs and islands.
    xlix. 49, Origin of the constituent and adventitious Minerals of Trap Rocks.
  Second Series.—Vol. ii. 335, On the Volcanoes of the Moon.
    iii. 94, 176, 381, iv. 88, On the Geological effects of the Earth's contraction and origin of Continents.
    iv. 364, v. 100, On Cohesive Attraction.
    ix. 220, 407, On Isomorphism and Atomic Volume in some minerals.
    xvi. 153, 314, Isothermal Chart of the Ocean.
    xvii. 35, 210, 430, Homœomorphism among Minerals.
    xviii. 85, 131, Homœomorphism of Minerals of the Trimetric System.
    xviii. 314, xix. 6, xx. 168, 349, Geographical Distribution of Crustacea.
    xxii. 305, 335, Plan of Development in American Geological History.

De Kay.—Zoology of New York; or, the New York Fauna; comprising detailed descriptions of all the Animals hitherto observed within the State of New York, with brief notices of those occasionally found near its borders, and accompanied by appropriate Illustrations, by James E. De Kay. Published by Authority. In six Parts, 4to. Albany, 1842—1844.

PART I. Mammalia, preceded by an Introduction. pp. 178 and 146, with 33 coloured Plates.
PART II. Birds. pp. xii. and 380. 141 Plates.
PART III. Reptiles and Amphibia. pp. vi. and 98. 23 Plates.
PART IV. Fishes. pp. ix. and 415. 79 Plates.
PART V. Mollusca. pp. iv. and 271. 40 Plates.
PART VI. Crustacea. pp. 70. 13 Plates.
Bound in 5 vols. cloth.

De Witt Clinton.—Remarks on the Fishes of the Western Waters of the State of New York, by Hon. De Witt Clinton. 8vo. New York, 1815.

Emmons.—Report on the Insects of the State of New York, by Dr. E. Emmons. 1 vol. 4to, pp. viii. and 272. with 3 coloured and 47 uncoloured Plates. New York, 1855. cloth. £3 3s.

Girard.—Contributions to the Natural History of the Fresh-water Fishes of North America, by Charles Girard. I. A Monograph of the Cottoids. 4to, pp. 80, and 3 Plates. Washington, 1851. 5s.

Girard.—Researches upon Nemerteans and Planarians, by Charles Girard. I. Embryonic Development of Planocera Elliptica. 4to. with Plates, pp. 28. Philadelphia, 1854. sewed. 10s.

Girard. — Contributions to the Fauna of Chili (Reptiles, Fishes, and Crustacea), by Charles Girard. 12 Plates. 4to, pp. 60. Washington, 1856. 10s. 6d.

Giraud.—Birds of Long Island: their Habits, Plumage, Mode of Catching, &c., by J. P. Giraud. 8vo. New York, 1844. cloth. 12s. 6d.

Gould.—Report on the Invertebrate Animals of Massachusetts, by A. A. Gould, M.D. 8vo, pp. 373. Cambridge, Mass., 1841.

Gould.—Mollusca and Shells, by Augustus A. Gould, M.D.: forming Vol. XII. of the "United States' Exploring Expedition." imp. 4to. Boston, 1853. cloth. £1 10s.

The Atlas is not published yet.

Haldeman.—Haldeman's (S. S.) Zoological Contributions. Nos. 1, 2, 3, with coloured Plates. 8vo. New York, 1843, 1844. each, 2s. 6d.

Haldeman.—A Monograph of the Limniades, or Fresh-water Univalve Shells of North America, by S. S. Haldeman, Member of the Academy of Natural Sciences. 8 Nos., each containing 5 coloured Plates. Philadelphia, 1842. Price £2 8s.

Harlan.—Observations on the Genus Salamandra, and Description of a New Genus of Quadrupeds of the order Edentata (Chlamyphorus), from the Annals of the New York Lyceum of Natural History, Vol. I., by Richard Harlan. 8vo. New York, 1824.

Harlan.—Fauna Americana: being a Description of the Mammiferous Animals inhabiting North America, by Richard Harlan, M.D. 8vo, pp. 320. Philadelphia, 1825. 10s. 6d.

Harlan.—American Herpetology; or, Genera of the North American Reptilia, with a Synopsis of the Species, by Rich. Harlan. 8vo. Philadelphia, 1827.

Harris.—A Treatise on some of the Insects of New England which are injurious to vegetation, by Thaddeus William Harris, M.D. 2nd edition. 8vo, pp. 522. Boston, 1852. cloth. 16s.

Holbrook.—North American Herpetology; or, a Description of the Reptiles inhabiting the United States, by John Edwards Holbrook, M.D., &c. with very numerous and splendidly coloured plates. 5 vols. royal 4to. Philadelphia, 1843. £16 16s.

Holbrook.—Ichthyology of South Carolina, by John Edwards Holbrook, M.D. Publishing in 4to parts, each containing 3 coloured lithographic Plates and descriptive letter-press. Charleston, S. C., 1855. Price per part £1 1s.

Parts 1 to 10 are now published.

Holbrook.—Scientific Tracts: edited by J. Holbrook, &c. 3 vols. 12mo. Boston, 1831—1833. 18s.

Jaeger.—Class Book of Zoology: designed to afford to Pupils in Common Schools and Academies a Knowledge of the Animal Kingdom: with a List of the different Species found in the State of New York: the whole scientifically and systematically arranged, by Prof. B. Jaeger. 12mo, pp. 180. New York, 1849. 2s. 6d.

Jaeger.—The Life of North American Insects; Illustrated by numerous coloured Engravings and Narratives, by Professor B. Jaeger, assisted by H. C. Preston, M.D. With Illustrations. 8vo, pp. 208. New York, 1855. cloth. 16s.

Jay.—Catalogue of Shells, in the Collection of John C. Jay, New York; with Figures. 2nd edition. 4to. New York, 1839. plain 18s.; col. £1 4s.

Jones.—Researches, Chemical and Physiological, concerning certain North American Vertebrata, by Joseph Jones, M.D. 4to, pp. 150, and 27 Woodcuts. Washington, 1856. 9s.

Lea.—Description of Six Species of the Genus Unio, read before the American Philosophical Society, November 2nd, 1827, by Isaac Lea. (From the Transactions of the American Philosophical Soc.) 8vo. Philadelphia, 1827.

Lea.—Observations on the Genus Unio; together with Descriptions of 18 New Species of the Genus Symphynota, now separated from the Family of Naiades, containing 9 Species, by Isaac Lea. (From the Transactions of the American Philosophical Society, Vol. III. N. S.) 4to. Philadelphia, 1829.

Lea.—Observations on the Genus Unio; together with Descriptions of New Genera and Species in the Families Naiades, Conchæ, Colimacea, Lymneana, Melaniana, and Peristomeana, by Isaac Lea. (Extracted from the Transactions of the American Philosophical Society, Vols. III. IV.) 2 vols. 4to. Philadelphia, 1834—1838.

Lea.—Observations on the Genus Unio; together with Descriptions of New Species in the Families Naiades, Colimacea, Lymnæana, Melaniana, and Peristomiana. Read before the American Philosophical Society, and originally published in its Transactions, by Isaac Lea. Vols. IV. V. With numerous Plates. 8vo. Philadelphia, 1846.

Lea.—Description of a New Genus of the Family Melaniana, and of many New Species of the Genus Melania, chiefly collected by Hugh Cuming, Esq., and now first described by Isaac Lea and Henry C. Lea. Also Descriptions of Five New Species of Anodontæ, collected by H. Cuming, by Isaac Lea. 8vo. London, 1851.

Lea.—A Synopsis of the Family of Naiades, by Isaac Lea, Member of the American Philosophical Society, &c. 3rd edition, greatly enlarged and improved. 4to, pp. 92. Philadelphia, 1852. boards. 18s.

Le Conte.—Synopsis of the Coleopterous Insects of the Group Æridæ, which inhabit the United States, by John L. Le Conte, M.D. 8vo, pp. 30. New York. sewed. 2s. 6d.

Le Conte.—Descriptions of some New and Interesting Insects inhabiting the United States, by John L. Le Conte. Plate. 8vo. New York, 1844. 1s.

Le Conte.—On the Pselaphidæ of the United States, by John L. Le Conte. 8vo. New York, 1848. 2s.

Le Conte.—On Platygonus Compressus: a New Fossil Pachyderm, by John L. Le Conte, M.D. 4 Plates. 4to, pp. 16. Boston, 1848. sewed. 6s.

Le Conte.—Fragmenta Entomologica, auctore J. L. Le Conte, M.D. 4to, pp. 24. Boston, 1848. 3s. 6d.

Le Conte.—An Attempt to Classify the Longicorn Coleoptera of the part of America North of Mexico, by John L. Le Conte, M.D. 2 Plates. 4to. Philadelphia, 1850. sewed. 6s. 6d.

Le Conte.—Descriptions of New Species of Coleoptera from California, by John L. Le Conte. 8vo. New York, 1851. 3s. 6d.

Le Conte.—General Remarks upon the Coleoptera of Lake Superior, by John L. Le Conte. 8vo. New York, 1852. 2s.

Le Conte.—Synopsis of the Species of Donacia (Fabr.) inhabiting the United States, by John L. Le Conte. 8vo. New York, 1852. 2s.

Leidy.—A Flora and Fauna within Living Animals, by Joseph Leidy, M.D. 10 Plates. 4to, pp. 68. Washington, 1853. 7s. 6d.

Marsh.—The Camel: his Organization, Habits, and Uses, considered with reference to his Introduction into the United States, by George P. Marsh. crown 8vo, pp. 224. Boston, 1856. cloth. 5s.

Mayo.—Conchology for Schools, by C. Mayo. 18mo. New York. 4s. 6d.

Melsheimer, Haldeman, and **Le Conte.**—Catalogue of the described Coleoptera of the United States, by Frederick Ernst Melsheimer, M.D. Revised by S. S. Haldeman and J. L. Le Conte. 8vo, pp. 174. Washington, 1853. 6s.

Monograph of the Fluvial Shells of the River Ohio. 18mo. Philadelphia, 1832. cloth.

Nuttall.—Manual of the Ornithology of the United States and of Canada: Land Birds and Water Birds, by Thomas Nuttall. 2 vols. 12mo, pp. 683. Cambridge, Mass. 1832.

Observations on Different Points of the Natural History of the Island of Cuba, with reference to the Ichthyology of the United States, by Felipe Poey. (From Annals of the Lyceum of Natural History of New York, Oct. 1855.) 5 Plates. 8vo. New York, 1855. sewed.

Ord.—Supplement to the American Ornithology of Alexander Wilson; containing a Sketch of the Author's Life, with a Selection from his Letters; some remarks upon his Writings; and a History of those Birds which were intended to compose part of his Ninth Volume: illustrated with Plates engraved from Wilson's original Drawings, by George Ord. royal 4to, pp. 298. Philadelphia, 1825.

Peale.—Mammalia and Ornithology of the United States' Exploring Expedition (Vol. VIII. of the whole Work), by Titian R. Peale, one of the Naturalists of the Expedition. 20 Wood-cuts, 15 plates of Mammalia, 84 of Birds. 4to, pp. xxv. and 338. Philadelphia, 1848. (suppressed).

Poe.—Conchologist's First Book, by E. A. Poe. 18mo. Philadelphia. 12s.

Rafinesque.—Ichtyologia Ohiensis; or, Natural History of the Fishes inhabiting the river Ohio and its tributary Streams: preceded by a physical description of the Ohio and its Branches, by C. R. Rafinesque. 8vo. Lexington, Ky., 1820.

Report on the Fishes, Reptiles, and Birds of Massachusetts. Published, agreeably to an order of the Legislature, by the Commissioners on the Zoological and Botanical Survey of the State. 4 Plates. 8vo, pp. 442. Boston, 1839. 18s.

Report of the Commissioners on the Zoological Survey of the State (Massachusetts). 8vo, pp. 107. Boston, 1838.

Savage.—A Description of the Character and Habits of Troglodytes Gorilla, by Thomas S. Savage, M.D.; and of the Osteology of the same, by J. Wyman, M.D. 4to. Boston, 1847.

Say.—On a New Genus of the Crustacea, and the Species on which it is established, by Thomas Say (Journal of the Academy of Natural Science of Philadelphia, 1817). 8vo. Philadelphia, 1817.

Say.—Descriptions d'Insectes de l'Amérique du Nord, par Thomas Say. (Ext. du Journal de l'Acad. des Sciences Naturelles de Philadelphia, Vol. I. et II.). 8vo. Philadelphia, 1817.

Say.—Description of New Species of Coleopterous Insects of the United States, by Thomas Say. (From the Journal of the Acad. of Natur. Sciences of Philadelphia, Vols. V. and VI.) 8vo. Philadelphia, 1817.

Say.—Hémiptères et Orthoptères recueillies dans la dernière Expédition aux Montagnes Rocheuses, par Thomas Say. (Ext. du Journal de l'Acad. des Sciences Naturelles de Philad., Vol. IV. Part 2.) 8vo. Philadelphia, 1817.

Say.—Descriptions des Insectes Coléoptères recueillies dans la dernière Expédition aux Montagnes Rocheuses, par Thomas Say. (Ext. du Journal de l'Acad. des Sciences Natur. de Philad., Vol. III et IV.) 8vo. Philadephia.

Say.—Appendix to the Crustacea of the United States, by Thomas Say. 8vo. Philadelphia, 1818.

Say.—Observations on some of the Animals described in the Account of the Crustacea of the United States, by Thomas Say (*ibid.*). 8vo. Philadelphia, 1818.

Say.—A Monograph of North American Insects of the Genus Cicindela, by Th. Say. (Transactions of the American Philosophical Society at Philadelphia, Vol. I. New Series, 1818). 4to. Philadelphia, 1818.

Say.—Descriptions of Insects of the Families of Carabici and Hydrocanthari of Latreille, inhabiting North America, by Th. Say. (Transactions of the American Philosophical Society at Philadelphia, Vol. II. New Series.) 4to. Philadelphia, 1823.

Say.—Description of New Species (American) of the Genera Buprestis, Trachys, et Elater, by Th. Say. (Annals of the Lyceum of Natural History of New York I.) 8vo. New York, 1824.

Say.—A Glossary to Say's Entomology, or Explanation of Terms used in Entomology. Glossaire de l'Entomologie de Say, ou Explication des Termes usités en Entomologie, par M. Say. 8vo. Philadelphia, 1825.

Say.—American Entomology, or Description of Insects of North America: illustrated by coloured Figures from original Drawings executed from Nature, by Thomas Say. 3 vols., with 18 coloured Plates. 8vo. Philadelphia, 1824—1828.

Say.—Note sur un Mémoire du Capitaine Leconte, intitulé, "Nouvelles Espèces de Coléoptères de l'Amérique du Nord," by Thomas Say. (Contrib. of the Maclurian Lyceum, I.) 8vo. New York, 1827.

Say.—Description of New Species of Hymenoptera inhabiting the United States, by Thomas Say. (Contrib. of the Maclurian Lyceum, I.) 8vo. New York, 1829.

Say.—Description of New Species of North American Insects, by Thomas Say. 8vo. New Harmony, 1829—1833.

Say.—American Conchology, by Thomas Say: illustrated by coloured Figures, by Mrs. Say, from Drawings from Nature. 7 Nos. 8vo. New Harmony, Ia., 1830.

Say.—Curculionites of North America; with Observations on some Species already known, by Thomas Say. 8vo. New Harmony, 1831.

Say.—Descriptions of New Species of Heteropterous Hemiptera of North America, by Thomas Say. 8vo. New Harmony, 1831.

Say.—Descriptions of New North American Coleopterous Insects, and Observations on some already described, by Thomas Say. (Boston Journal.) 8vo. Boston, 1834.

Say.—Description of New North American Insects, and Observations on some Species already described, by Thomas Say. (Transactions of the Amer. Philos. Soc. at Philad., Vol. IV.) 4to. Philadelphia, 1834.

Siebold and Stannius.—Comparative Anatomy, by C. Thomas v. Siebold and H. Stannius. Translated from the German, and edited, with Notes and Additions, recording the recent Progress of the Science, by Waldo J. Burnett, M.D. Volume I., containing Anatomy of the Invertebrata. royal 8vo, pp. 470. Boston, 1852. cloth. 16s.

Smith.—Natural History of the Fishes of Massachusetts, by J. V. C. Smith, M.D. 12mo, pp. 400. Boston, 1833.

Stimpson.—Shells of New England. A Revision of the Testaceous Mollusks of New England, with Notes on their Structure and their Geographical and Bathymetrical Distribution, by W. Stimpson. 2 Plates. 8vo. Boston, 1851. 3s. 6d.

Stimpson.—Synopsis of the Marine Invertebrata of Grand Manan, or the

Region about the Mouth of the Bay of Fundy, New Brunswick, by W. Stimpson. 3 Plates. 4to, pp. 68. Washington, 1853. 5s.

Strong.—The Illustrated Natural History; containing Scientific and Popular Descriptions of Quadrupeds, Birds, Fishes, Reptiles, Insects, &c., by A. B. Strong. 144 Plates. 3 vols. 8vo. New York. £1 8s.

Warren.—The Conchologist, by John Warren. With 16 Plates. square 8vo, pp. 208. Boston, 1834. 10s. 6d.

Wheatley.—Catalogue of the Shells of the United States, with their Localities, by C. M. Wheatley. 8vo. New York, 1842.

Wilson.—American Ornithology; or, the Natural History of the Birds of the United States, by Alex. Wilson. Illustrated with 76 Plates, engraved and coloured from Originals taken from Nature. 9 Vols. 4to. Philadelphia, 1808—1814.

Contains 320 Figures of 278 Genera, 56 of which are new.
The Figures are drawn and coloured by the Author, and engraved by A. Lawson and G. Murray.
The Vols. VIII. and IX. are edited by M. George Ord, and contain the Life of Wilson, a List of Water-birds of the U. S., and a general Index.

Wilson.—American Ornithology; or, Natural History of the Birds of the United States, by Alexander Wilson. 2nd edition. 3 vols. small 4to. Plates in folio. New York, 1828.

The Plates in this edition are the same as in the 1st, which was commenced in 1808, and finished, after the death of the Author, in 1825. An edition, in 4 vols. 12mo, was printed at Edinburgh (without Plates), in 1831; and another, with Additions by Sir Wm. Jardine, in 3 vols. 8vo, in 1832.

Wilson.—American Ornithology, by Wilson; with Notes, by Jardine: to which is added, a Synopsis of American Birds; including those described by Bonaparte, Audubon, Nuttall, and Richardson, by J. M. Brewer. With 29 pages of Steel Plates of nearly 400 Birds. 8vo. New York, 1852. 15s.

Wyatt.—Manual of Conchology, according to the System laid down by Lamarck; with the late improvements by De Blainville, by Thomas Wyatt. With numerous Plates. 8vo. New York, 1841. 12s.

Wyman.—Anatomy of the Nervous System of Rana Pipiens, L., by Jeffries Wyman, M.D. 2 Plates. 4to, pp. 52. Washington, 1853. 3s. 6d.

---

4. BOTANY.

Allen.—Victoria Regia; or, the Great Water Lily of America; with a Brief Account of its Discovery and Introduction into Cultivation: with Illustrations, by William Sharp, from Specimens grown at Salem, Massachusetts, U. S. A. By John Fisk Allen. 6 coloured Plates. large folio, pp. 18. Boston, 1854. boards. £2 2s.

Barton.—Compendium Floræ Philadelphicæ: containing a Description of the Indigenous and Naturalized Plants found within a circuit of ten miles around Philadelphia, by William P. C. Barton, M.D. 2 vols. 12mo. Philadelphia, 1818.

Bartram and **Marshall.**—Memorials of John Bartram and Humphrey Marshall, with notices of their Botanical Contemporaries, by William Darlington, M.D. &c. 8vo. Philadelphia, 1849.

Beck.—Botany of the United States of America, arranged according to the Natural System, by Lewis C. Beck, M.D. 12mo. New York, 1848. bound. 7s. 6d.

Beck.—Botany of the United States, North of Virginia; comprising a Description of Plants hitherto found in those States, by Lewis C. Beck. 12mo. New York, 1848. cloth. 7s. 6d.

Bigelow.—American Medical Botany; being a Collection of the Native Me-

dicinal Plants of the United States, containing their History and Chemical Analysis and Properties, and Uses in Medicine, Diet, and the Arts, by Jacob Bigelow, M.D. With coloured Engravings. 60 Plates. royal 8vo. Vol. I., 1817, pp. xi. and 197; Vol. II., 1818, pp. xvi. and 199; Vol. III., 1820, pp x. and 197. Boston.

Bigelow.—Florula Bostoniensis, by Jacob Bigelow, M.D. 2nd edition, greatly enlarged; to which is added, a Glossary of the Botanical Terms employed in the Work. 8vo. Boston, 1824.

Bigelow.—Florula Bostoniensis. A Collection of Plants of Boston and its Vicinity, with their Generic and Specific Characters, Principal Synonyms, Descriptions, Places of Growth, and Time of Flowering, and Occasional Remarks, by Jacob Bigelow, M.D., &c. 3rd edition, enlarged. 12mo, pp. 468. Boston, 1840.

Breckenridge.—Botany of the United States' Exploring Expedition: Cryptogamia, Filices including Lycopodiaceæ, and Hydropterides, by William D. Breckenridge. Vol. XVI. of the whole Work. 4to, pp. 366. Atlas of 46 Plates, folio. Philadelphia, 1855. £8 8s.

Browne.—Sylva Americana; or, a Description of the Forest Trees indigenous to the United States; Practically and Botanically considered, by Daniel J. Browne. Illustrated by more than 100 Engravings. 8vo, pp. 408. Boston, 1832.

Browne.—The Trees of America, Native and Foreign, Pictorially and Botanically delineated, and Scientifically and Popularly described, by D. J. Browne. 8vo. New York. £1 8s.

Carson.—Illustrations of Medical Botany, consisting of Coloured Figures of the Plants affording the important Articles of Materia Medica, and descriptive letter-press, by Joseph Carson, M.D. 100 coloured Plates. 2 vols. 4to. Philadelphia, 1847.

Comstock.—An Introduction to the Study of Botany, including a Treatise on Vegetable Physiology, and Descriptions of the most common Plants in the Middle and Northern States, by J. L. Comstock, M.D. 248 Engravings. 12mo, pp. 490. New York. 6s. 6d.

Coultas.—The Principles of Botany, as Exemplified in the Cryptogamia; for the Use of Schools and Colleges, by Harland Coultas. 8vo. Philadelphia, 1852. cloth. 3s.

Darby.—Manual of Botany, by William Darby. 12mo. Macon, Ga. 1841.

Darby.—Botany of the Southern States. In two Parts. Part I. Structural and Physiological Botany, and Vegetable Products. Part II. Descriptions of Southern Plants; arranged on the Natural System; preceded by a Linnæan and a Dictrotomous Analysis, by Professor John Darby, A.M. With Illustrations. 8vo, pp. 612. New York, 1855. cloth. 9s.

Darlington.—Agricultural Botany; an Enumeration and Description of Useful Plants and Weeds, which merit the notice, or require the attention, of American Agriculturists, by W. Darlington, M.D. 8vo. Philadelphia, 1847.

Darlington.—Flora Cestrica; an Herborizing Companion for the Young Botanists of Chester County, State of Pennsylvania, by William Darlington, M.D., LL.D., &c. 3rd edition. crown 8vo. Philadelphia, 1853. calf. 14s.

Dickerson.—Report on the Cypress Timber of Mississippi and Louisiana, by M. W. Dickerson and Andrew Brown. 8vo. Philadelphia, 1848.

Downing.—The Fruits and Fruit Trees of America; or, the Culture, Propagation, and Management, in the Garden and Orchard, of Fruit Trees generally; with Descriptions of the Finest Varieties of Fruits, Native and Foreign, cultivated in this Country, by A. J. Downing. New edition, revised and corrected by Charles Downing. 12mo, pp. xx. and 760. New York, 1857. cloth. 9s.

Draper.—A Treatise on the Forces which produce the Organization of Plants, with an Appendix containing several Memoirs on Capillary Attraction, Electricity, and the Chemical Action of Light, by John William Draper, M.D. 4to, pp. xi. and 216. New York, 1844. 18s.

Eaton.—Manual of Botany of North America, by Amos Eaton. 12mo. Albany, 1833.

Elliott.—Sketch of the Botany of South Carolina and Georgia, by Stephen Elliott. 2 vols. 8vo. Charleston, S. C., 1821.

Emerson.—Report on the Trees and Shrubs growing naturally in the Forests of Massachusetts, by George B. Emerson. 8vo. Boston, 1850. cloth. 12s.

Flint.—A Practical Treatise on Grasses and Forage Plants: comprising their Natural History, comparative Nutritive Value, Methods of Cultivating, Cutting, and Curing, and the Management of Grass Lands, by Charles L. Flint, A.M. With 1 Plate and 109 Woodcuts. 8vo, pp. iv. and 236. New York, 1857. cloth. 7s. 6d.

Florist and Horticultural Journal, and Monthly Magazine of Horticulture, Agriculture, Botany, Agricultural Chemistry, Entomology, &c. Edited by H. C. Hanson. With Plates. Philadelphia. Annual subscription, 12s.

Gray.—The Genera of the Plants of the United States, Illustrated by Figures and Analyses from Nature, by Isaac Sprague; with Descriptions by Asa Gray, M.D. 8vo. Vols. I. and II. New York, 1850. each, £1 11s. 6d.

Gray.—The Botanical Text-Book, for Colleges, Schools, and Private Students, comprising: Part I. An Introduction to Structural and Physiological Botany. Part II. The Principles of Systematic Botany; with an Account of the Chief Natural Families of the Vegetable Kingdom, and Notices of the principal Useful Plants, by Asa Gray, M.D., Professor of Natural History in Harvard University. 2nd edition, enlarged and improved, and Illustrated by more than 1000 Engravings on wood. 1 vol. 12mo. New York, 1850. cloth. 10s.

Gray.—Plantæ Wrightianæ Texano Neo-Mexicanæ, by Asa Gray, M.D. Part I. 10 Plates. 4to, pp. 146. Washington, 1852. 16s.

Gray.—Plantæ Wrightianæ Texano Neo-Mexicanæ. Part II An Account of a Collection of Plants made by Charles Wright in Western Texas, New Mexico, and Sonora, in the years 1851 and 1852, by Asa Gray, M.D. 4 Plates. 4to, pp. 120. Washington, 1853. 8s.

Gray.—Botany, Phanerogamia, by Asa Gray, M.D. With a folio Atlas of 100 Plates. Vol. I., being Vol. XIV. of United States' Exploring Expedition. 4to. New York, 1854. cloth. £3 3s.
Atlas in folio. New York, 1857. £10 10s.

Gray.—Manual of the Botany of the Northern United States; including Virginia, Kentucky, and all East of the Mississippi; arranged according to the natural system, by Asa Gray; the Mosses and Liverworts by William S. Sullivant. 2nd edition. With 14 Plates, illustrating the Genera of the Cryptogamia. 8vo, pp. 768. New York, 1856. cloth. 14s.

Gray.—First Lessons in Botany and Vegetable Physiology; Illustrated by over 360 Wood Engravings from Original Drawings by Isaac Sprague; to which is added, a copious Glossary, or Dictionary of Botanical Terms, by Asa Gray. 8vo, pp. xii. and 236. New York, 1857. half-bound. 6s.

Green and **Congdon.**—Analytical Class-Book of Botany, designed for Academies and Private Students. In 2 Parts. Part I. Elements of Vegetable Structure and Physiology, by Francis H. Green. Part II. Systematic Botany, Illustrated by a Compendious Flora of the Northern States, by Joseph W. Congdon. With numerous Illustrations. 4to, pp. 234. New York. cloth. 9s.

Harvey.—Nereis Boreali-Americana; or, Contributions to a History of the Marine Algæ of North America. Part I. Melanospermeæ. By William Henry Harvey, M.D., M.R.I.A. 12 coloured Plates. 4to, pp. 152. Washington, 1852. £1

Harvey.—Nereis Boreali-Americana; or, Contributions to a History of the Marine Algæ of North America. Part II. Rhodospermeæ. By W. H. Harvey, M.D., M.R.I.A. 24 coloured Plates. 4to, pp. 262. Washington, 1853. £1 16s.

Hovey.—The Fruits of America, containing richly-coloured Figures, and full Descriptions of all the Choicest Varieties cultivated in the United States, by C. M. Hovey. With 48 coloured Plates and Portrait of Author. royal 8vo. Boston, 1847. £3 3s.

Hyde.—The Chinese Sugar-Cane; its History, Mode of Culture, Manufacture of the Sugar, &c.; with Reports of its Success in different Portions of the United States, and Letters from Distinguished Men. Written and compiled by James F. C. Hyde, of Walnut Grove Nursery, Neuton Centre, Mass. pp. 106. Boston, 1857. paper. 1s. 6d.

Japanese Botany: being a Facsimile of a Japanese Book: with Introductory Notes and Translations. 4to. Philadelphia, 1855. boards. 9s.

Kimber.—Familiar Botany; to which is added, a Complete Botanical Dictionary, by Abby Kimber. 12mo. Philadelphia. 6s.

Lea.—Catalogue of Plants, Native and Naturalized, collected in the Vicinity of Cincinnati, Ohio, during 1834—1844, by Thomas G. Lea. 8vo. Philadelphia, 1849.

Lincoln.—Familiar Letters on Botany, explaining the Structure, Classification, and Uses of Plants, illustrated upon the Linnæan and Natural Methods; with a Flora for Practical Botanists, by Mrs. A. H. Lincoln. 8vo, pp. 506. New York, 1854. 7s. 6d.

Michaux.—The North American Sylva; or, a Description of the Forest Trees of the United States, Canada, and Nova Scotia. Illustrated by 156 finely-coloured copper-plate Engravings, by Redouté, &c. In 3 vols. Translated from the French of F. Andrew Michaux, Member of the American Philosophical Society, &c. With Notes by J. Jay Smith, Member of the Academy of Natural Sciences. 3 vols. imp. 8vo. Philadelphia, 1854. £7 7s.

Michaux.—North American Sylva; or, a Description of the Forest Trees of the United States, Canada, and Nova Scotia, not described in the Work of F. Andrew Michaux; containing all the Forest Trees discovered in the Rocky Mountains, the Territory of Oregon, down to the Shores of the Pacific, and into the confines of California, as well as in various parts of the United States, by Thomas Nuttall, F.L.S. Illustrated by 121 finely-coloured Plates. In 3 vols. royal 8vo. Philadelphia, 1854. £6 6s.

The whole Work complete, in 6 vols. royal 8vo, with 277 Plates, gilt edges, and gold stamped cloth. £13 13s.

Muhlenberg.—Descriptio uberior Graminum et Plantarum Calamiarum Americæ Septemtrionalis indigenarum et cicurum, auctore D. H. Muhlenberg. 8vo. Philadelphia, 1817.

Nuttall.—The Genera of North American Plants, and a Catalogue of the Species to the year 1817, by Thomas Nuttall, F.L.S., &c. 2 vols. 12mo, pp. 584. 1818.

Parsons.—On the Rose; its History, Poetry, and Culture, by S. B. Parsons. 8vo. New York. cloth. 9s.

Rafinesque.—Florula Ludoviciana; or, Flora of the State of Louisiana, by C. S. Rafinesque. 12mo. New York, 1817.

Rafinesque.—Medical Flora; or, Manual of the Medical Botany of the United States of North America: containing a Selection of above 100 Figures and Descriptions of Medicinal Plants, with their Name, Qualities, Properties, History, &c., and Notes or Remarks on nearly 500 Equivalent Substitutes, by C. S. Rafinesque, A.M., Ph.D. 100 Cuts. 12mo. Philadelphia, 1828 to 1830.

Ravenel.—Fungi Caroliniani Exsiccati. Fungi of Carolina, illustrated by Natural Specimens of the Species, by H. W. Ravenel, Member of Amer. Assoc. for the Advancement of Science. Fasc. I., II., and III., each containing a century of Species, one-half of which is peculiarly American. 4to. Charleston, 1852 to 1855. Price, each fasc., £1 10s.

Strong.—The American Flora; or, History of Plants and Wild Flowers: containing the Botanical Description, History, Propagation, and Culture, Medical

Properties, and Uses of each Plant and Flower, by A. B. Strong. 182 Plates. 4 vols. 4to. New York. cloth. £4 4s.

Sprague.—The Genera of the Plants of the United States, illustrated by Figures and Analyses from Nature, by Isaac Sprague, Member of the Boston Natural History Society. Superintended, and with Descriptions, &c., by Asa Gray, M.D., Fisher Professor of Natural History in Harvard University, Corresponding Member of the Royal Bavarian Academy, Member of the Imperial Academy Naturæ Curiosorum, of the Botanical Society of Ratisbon, &c. 2 vols. 8vo. New York. sewed. £1 11s. 6d.

Torrey.—Flora of the Northern and Middle States, by John Torrey. 8vo. New York, 1824. 15s.

Torrey.—A Compendium of the Flora of the Northern and Middle States, containing Generic and Specific Descriptions of all the Plants, exclusive of Cryptogamia, hitherto found in the United States, north of the Potomac, by John Torrey, LL.D. New York, 1826.

Torrey.—A Flora of the State of New York, comprising full Descriptions of all the Indigenous and Naturalized Plants hitherto discovered in the State; with remarks on their Economical and Medicinal Properties, by John Torrey, M.D., F.L.S. Published by Authority. Albany, 1843. Vol. I. pp. xii. and 484, with 72 coloured Plates; Vol. II. pp. 572, with 90 coloured Plates. 4to. cloth.

Torrey.—Observations on the Batis Maritima of Linnæus, by John Torrey, F.L.S. 1 Plate. 4to, pp. 8. Washington, 1852. 1s.

Torrey.—On the Darlingtonia Californica; a new Pitcher Plant from Northern California, by John Torrey, F.L.S. 1 Plate. 4to, pp. 8. Washington, 1853. 1s.

Torrey.—Plantæ Fremontianæ; or, Description of Plants collected by Col. J. C. Fremont, in California, by John Torrey, F.L.S. 10 Plates. 4to, pp. 24. Washington, 1853. 3s. 6d.

Torrey and Gray.—Flora of North America; comprising an Account of all the Indigenous and Naturalized Plants growing North of Mexico, by John Torrey and Asa Gray. In 3 vols. 8vo. Vol. I. is now ready, comprising Parts I. to IV., £1 10s. Also, Parts V. and VI., 7s. 6d. each. Part VII., 5s. New York, 1838—1842.

This is the only authentic and complete American Flora. The object of the work is to give a scientific account of all the Indigenous and Naturalized Plants of North America, at present known. It is, we believe, the most extensive local Flora that has ever been undertaken. The latest Flora of this country, that of Pursh, was published forty years ago, at which period extensive regions, even within the United States proper, had never been visited by the Botanist. Since that time, the number of known plants has vastly increased; and the science itself has made such rapid advancement, that this work will present the Botany of this country in an entirely new aspect.

Tuckerman.—A Synopsis of the Lichenes of New England, the other Northern States, and British America, by Dr. E. Tuckerman. 8vo. Cambridge, Mass., 1849. cloth. 5s.

Wood.—A Class-Book of Botany, in Two Parts. Part I. The Elements of Botanical Science. Part II. The Natural Orders; Illustrated by a Flora of the Northern, Middle, and Western States, particularly of the United States, North of the Capital, latitude 38½°, by Alphonso Wood. 41st edition, revised and enlarged. post 8vo, pp. 650. Boston, 1855. 9s.

---

5. GEOLOGY, MINERALOGY, PALÆONTOLOGY.

Agassiz.—The Primitive Diversity and Number of Animals in Geological Times, by L. Agassiz. (From the American Journal of Science and Arts, 2nd ser. vol. xvii., May, 1854.) 8vo, pp. 16. Newhaven, 1854. sewed. 1s.

Albany.—A Geological Survey of the County of Albany, taken under the direction of the Agricultural Society of the County. 8vo. Albany, 1820.

Barton.—Archæologiæ Americanæ Telluris Collectanea et Specimina; or, Collections with Specimens for a Series of Memoirs on certain Extinct Animals and Vegetables of North America; together with Facts and Conjectures relative to the Ancient Condition of the Lands and Waters on the Continent, by B. S. Barton. Part I., with Plates. 8vo. Philadelphia, 1814.

Beck.—Mineralogy of New York; comprising detailed Descriptions of the Minerals hitherto found in the State of New York, and notices of their use in the Arts and Agriculture, by Lewis C. Beck, M.D. Published by Authority. 7 Plates. 4to, pp. xxiv. and 536. Albany, 1842.

Blake.—Description of the Fossils and Shells collected in California, by William P. Blake. 8vo, pp. 34. Washington, 1855. sewed.

Canada.—Geological Survey of Canada. Reports of Progress for the years 1849 to 1853. Printed by order of the Legislative Assembly. 8vo. Toronto and Quebec.

Comstock.—Elements of Geology; including Fossil Botany and Palæontology. A popular Treatise on the most interesting parts of the Science, by J. L. Comstock, M.D. 126 Engravings. 12mo, pp. 438. New York, 1849. 6s. 6d.

Comstock.—An Introduction to Mineralogy; adapted to the Use of Schools and Private Students, by John L. Comstock, M.D. 186 Woodcuts. 12mo, pp. 384. New York. 4s. 6d.

Cozzens.—A Geological History of Manhattan, or New York Island. Map, coloured Plates. 8vo. New York, 1843. 5s.

Dana.—Outlines of the Mineralogy and Geology of Boston and its Vicinity, with a Geological Map, by J. Freeman Dana, M.D., and Samuel L. Dana, M.D., F.L.S., of New England. 8vo, pp. 108. Boston, 1818.

Dana.—Origin of the Grand Outline Features of the Earth, by James D. Dana. (Extracted from the American Journal of Science and Arts, Vol. III., 2nd Series, 1847.) 8vo. Newhaven, 1847. 1s.

Dana.—On the Origin of Continents, by James D. Dana. (Extracted from the American Journal of Science, Vol. III., 2nd Series.) 8vo. Newhaven, 1848. 1s.

Dana.—Geology of the United States' Exploring Expedition, by James D. Dana, Geologist of the Expedition. 1 vol. of letterpress, 4to, pp. xii. and 756, with a Map; and a folio volume containing 21 Plates and 4 pp. of text (forms the 10th Vol. of the whole Work.) Philadelphia, 1849.

Dana.—On Coral Reefs and Islands, by James D. Dana. With a Map and numerous Woodcuts. 8vo, pp. 144. Philadelphia, 1853. cloth. 6s. 6d.

Dana.—A System of Mineralogy, comprising the most recent Discoveries; including full Descriptions of Species and their Localities, Chemical Analyses and Formulas, Tables for the Determination of Minerals, with a Treatise on Mathematical Crystallography and the Drawing of Figures of Crystals, by James D. Dana, A.M., Member of the Soc. Cæs. Nat. Cur. of Moscow, the Soc. Philomatique of Paris, &c. 4th edition, re-written, re-arranged, and enlarged. 2 vols. in 1. Illustrated by 600 Woodcuts. 8vo, pp. 860. New York, 1854. cloth. £1 4s.

Dana.—Supplements to James D. Dana's System of Mineralogy. (Re-printed from the American Journal of Science and Arts.) I. II. and III. 8vo. Newhaven, 1855, 1856. each, 1s. 6d.

Dana.—Manual of Mineralogy; including Observations on Mines, Rocks, Reduction of Ores, and the Applications of the Science to the Arts: designed for the Use of Schools and Colleges, by James D. Dana, A.M. New edition, revised and enlarged; with 260 Illustrations. 12mo, pp. xii. and 456. New Haven, 1857. 7s. 6d.

Eaton.—An Index to the Geology of the Northern States, with transverse Sections, extending from Susquehana River to the Atlantic, crossing Cat-

skill Mountains; to which is prefixed a Geological Grammar, by Amos Eaton, A.M. 8vo. Troy, N. Y. 1820.

Eaton.—A Geological and Agricultural Survey of the District adjoining the Erie Canal, by A. Eaton. 8vo. Albany, 1824.

Eaton.—Geological Text-Book, by A. Eaton. 2nd edition, with 68 Figures of Organic Remains. 8vo, pp. 140. New York, 1833.

Emmons.—Agriculture of New York: comprising an Account of the Classification, Composition, and Distribution of the Soils and Rocks, and the Natural Waters of the different Geological Formations; together with a condensed view of the Climate, and the Agricultural Productions of the State, by E. Emmons, M.D. Published by Authority. 5 vols. 4to. Albany.

Vol. I. 1846, pp. xi. and 371, with 19 coloured Plates.
Vol. II. 1849, pp. viii., 341, and 50, with 42 Plates.
Vol. III. 1851, Part 1, Text pp. vi. and 340.
Part 2, Plates 81.
Vol. V. 1854, pp. viii. and 272, and 50 Plates.

Emmons.—American Geology; containing a Statement of the Principles of the Science, with full Illustrations of the Characteristic American Fossils, by Ebenezer Emmons; with an Atlas and a Geological Map of the United States. Vol. I. (Parts 1 and 2). 130 Illustrations and 19 4to Plates. 8vo, pp. 268. Albany, 1855. cloth. £1 1s.

Emmons.—American Geology, containing a Statement of the Principles of the Science, with full Illustrations of the Characteristic American Fossils, by Ebenezer Emmons; with an Atlas and a Geological Map of the United States. Part 6. 8vo, pp. x. and 152. Albany, 1857. 10s.

Parts 3, 4, and 5 are not yet published, Dr. Emmons having been forced to issue Part 6 first, to secure his recent discoveries.

Emmons.—Geological Report of the Midland Counties of North Carolina, by Ebenezer Emmons. Illustrated with Engravings and Map. 8vo, pp. 348. New York, 1856.

Featherstonehaugh.—Geological Report of an Examination made in 1834 of the Elevated Country between the Missouri and Red Rivers, by G. W. Featherstonehaugh, U. S. Geologist. Published by order of both Houses of Congress. Large Map. 8vo, pp. 97. Washington, 1835. 7s.

Forster and **Whitney.**—Report on the Geology and Topography of a portion of the Lake Superior Land District, in the State of Michigan, by J. W. Forster and J. D. Whitney, U. S. Geologists. In 2 Parts, with Illustrations and Maps. Part I. Copper Lands. Part II. The Iron Region, together with General Geology. 8vo, pp. 646. Washington, 1850, 1851. cloth. £1 10s.

Fossils of South Carolina, by M. Tuomey and F. S. Holmes. Publishing in 4to parts, each containing 2 lithographic Plates and descriptive letterpress. Parts 1 to 10 are now published. Charleston, S.C., 1855 to 1857. ea. 18s.

Gesner.—Remarks on the Geology and Mineralogy of Nova Scotia, by Abraham Gesner, Esq., Surgeon. 8vo, pp. 272. Halifax, N. S., 1837.

Gibbes.—A Memoir on Mososaurus, and the three allied new Genera, Holcodus, Conosaurus, and Amphorosteus, by Robert W. Gibbes, M.D. With 3 Plates. 4to, pp. 14. Washington, 1850. 2s.

Gray.—Elements of Geology, by Alonzo Gray, A.M., and C. B. Adams, A.M. 8vo. New York, 1852. 6s.

Green.—A Supplement to the Monography of Trilobites of North America, with coloured Models of the Species, by Jacob Green. 8vo. Philadelphia, 1835.

Hall.—Palæontology of New York, containing Descriptions of the Organic Remains of the Lower Division of the New York System. Published by Authority, by J .Hall. 2 vols. 4to. Albany. Vol. I. 1847, pp. xxiii. and 338; with 87 Plates. Vol. II. 1852, pp. viii. and 362; with 85 Plates. £8 8s.

Harper.—Preliminary Report of the Geology and Agriculture of the State of Mississippi, by L. Harper, LL.D., Correspondent of the Imperial Museum

for Natural Science of France, &c., State Geologist of Mississippi. By order of the Legislature of Mississippi. Plans, Maps, &c. 8vo, pp. 357. Jackson, Miss., 1857. cloth. 14s.

Hayden.—Geological Essays; or, an Inquiry into some of the Geological Phenomena to be found in various parts of America and elsewhere, by Horace Hayden, Esq. 8vo, pp. 412. Baltimore, 1820.

Hitchcock.—Report of the Geology, Mineralogy, Botany, and Zoology of Massachusetts, made and published by order of the Government of the State: in 4 Parts. Part I. Economical Geology. Part II. Topographical Geology. Part III. Scientific Geology. Part IV. Catalogue of Animals and Plants, with a descriptive list of Specimens of Rocks and Minerals, collected for the Government, by Edward Hitchcock, Professor of Chemistry and Natural History of Amherst College. Illustrated by numerous Woodcuts, and an Atlas of 18 Plates. royal 8vo, pp. 700. Amherst, Mass., 1833.

Hitchcock.—Report on the Geology of Massachusetts, by E. Hitchcock, A.M. 2nd edition, corrected and enlarged. 8vo, pp. 702. Amherst, 1835.

Hitchcock.—Report on a Re-examination of the Economical Geology of Massachusetts, by Edward Hitchcock, Professor of Chemistry in Amherst College. 8vo, pp. 139. Boston, 1838.

Hitchcock.—Final Report on the Geology of Massachusetts, by order of the State. Containing—I. Economical Geology; II. Scenographical Geology; III. Scientific Geology; IV. Elementary Geology: with a Catalogue of Specimens in the State Collection, by Edward Hitchcock, LL.D., Geologist to the State, &c. In 2 vols. with a Map, and numerous Illustrations. royal 4to. Northampton, Massachusetts, 1841. £3 3s.

Hitchcock.—Religious Lectures on the Peculiar Phenomena of the Four Seasons, by Rev. E. Hitchcock. 12mo. Boston, 1853. sewed. 1s.

Hitchcock.—Outline of the Geology of the Globe, and of the United States in particular; with two Geological Maps, and Sketches of characteristic American Fossils, by Edward Hitchcock, D.D. 1 vol. 8vo. Boston, 1853. cloth. 7s. 6d.

Hitchcock.—Religion of Geology and its connected Sciences, by Edward Hitchcock. 12mo. Boston, 1854. cloth. 7s. 6d.

Hitchcock.—Elementary Geology, by Edward Hitchcock, D.D., LL.D. Illustrated. crown 8vo, pp. 424. New York, 1856. 8s.

Hitchcock.—Illustrations of Surface Geology, by Edward Hitchcock, LL.D. (Smithsonian Contributions to Knowledge.) 12 Plates. 4to, pp. v. and 155. Washington, 1857. 12s.

Jackson.—First Report on the Geology of the Public Lands in the State of Maine, by C. T. Jackson, M.D., &c. Published by order of the Legislature of Massachusetts. 8vo, pp. 47. Boston, 1837.

Jackson.—Second Report on the Geology of the State of Maine, by Charles T. Jackson, M.D., &c. 8vo, pp. 168. Augusta, Me., 1838.

Jackson.—Third Report on the Geology of Maine, by C. T. Jackson. 8vo. Augusta, Me., 1839.

Jackson.—Report on the Geological and Agricultural Survey of the State of Rhode Island, by C. T. Jackson. 8vo. Boston, 1840.

Jackson.—First Annual Report on the Geology of New Hampshire, by C. T. Jackson, M.D., State Geologist. 8vo. Concord, 1841. 2s.

Jackson and Alger.—Mineralogy and Geology of Nova Scotia, by Charles T. Jackson and Francis Alger. 8vo, pp. 116. Cambridge, Mass., 1832.

Lea.—Contributions to Geology: containing Memoirs on the Tertiary Formation of Alabama; New Tertiary Shells from Maryland and New Jersey; Tufaceous Lacustrine Formation of Syracuse, N. Y., by Isaac Lea. 228 coloured Figures. 1 vol. 8vo, pp. 227. Philadelphia, 1833.

Lea.—Catalogue of the Tertiary Testacea of the United States, by Henry C. Lea. 8vo. Philadelphia, 1848.

Lea.—On a Fossil Saurian of the New Red Sandstone Formation of Penn-

sylvania, with some account of that Formation. Also, on some new Fossil Molluscs, by Isaac Lea. 8vo. Philadelphia, 1852.

Lea.—Fossil Foot-marks in the Red Sandstone of Pottsville, Pennsylvania, by Isaac Lea, LL.D. 1 double Plate, and 16 pages letter-press. largest folio. Philadelphia, 1855. sewed. £1 4s.

Leidy.—Memoir upon the Extinct Species of Fossil Ox, by Joseph Leidy, M.D. 5 Plates. 4to, pp. 20. Washington, 1852. 2s.

Leidy.—The Ancient Fauna of Nebraska; or, a Description of Remains of Extinct Mammalia and Chelonia from the Mauvaises Terres of Nebraska, by Joseph Leidy, M.D. 25 Plates. 4to, pp. 124. Washington, 1853. 12s.

Leidy.—A Memoir on the Extinct Sloth Tribe of North America, by Joseph Leidy, M.D., Professor of Anatomy in the University of Pennsylvania, &c. 16 Lithographic Plates. 4to, pp. 70. Washington, 1855. sewed. 12s. 6d.

Lieber.—Report on the Survey of South Carolina: being the first Annual Report to the General Assembly of South Carolina; embracing the Progress of the Survey during the year 1856, by Oscar M. Lieber, Mineralogical, Geological, and Agricultural Surveyor of South Carolina. 9 Plates and Maps. 8vo, pp. viii. and 136. Columbia, S. C., 1857.

Loomis.—The Elements of Geology; adapted to Schools and Colleges; with numerous Illustrations, by J. R. Loomis. 12mo. Boston, 1852. cloth. 5s.

Lord.—Geognosy; or, the Facts and Principles of Geology against Theories, by David N. Lord. 12mo, pp. 412. New York, 1855. cloth. 7s. 6d.

Maclure.—Observations on the Geology of the United States, by William Maclure. 8vo. Philadelphia, 1817. 12s.

Maclure.—Catalogue of Mineralogical and Geological Specimens at New Harmony, Ind., collected in various parts of Europe and America, by William Maclure. Arranged by D. D. Owens. 8vo. New Harmony, 1840.

Marcou.—A Geological Map of the United States, and the British Provinces of North America; with an Explanatory Text, Geological Sections, and Plates of the Fossils which characterize the Formations, by Jules Marcou, United States' Geologist, Member of the Geological Society of France, &c. 8vo. Boston, 1853. cloth. 18s.

Marcou.—Geology of North America, by Jules Marcou. Containing: History of the Progress and Discovery of Geology in America; Description of the Geology of North America; Two Geological Reports made for the U. S. Government, on Arkansas, Texas, New Mexico, and California; giving the result of the first Geological Exploration made in the Rocky Mountains, the Sierra Madre, and the Sierra de San Francisco; Report of the Gold Formation in the Sierra Nevada; a Geological Map of the United States and the British Provinces. 1 vol. 8 Plates of Fossils. 4to. in press.

Mather.—Elements of Geology, by W. W. Mather. 8vo. New York. 3s.

Mather.—Report of the Geological Survey of Ohio, by W. W. Mather and others. 8vo. Columbus, O., 1838.

Moore.—American Mineralogy, by N. F. Moore. 12mo. New York. cloth. 4s.

New Jersey.—Second Annual Report on the Geological Survey of the State of New Jersey, for the year 1355. With many Engravings and 2 Maps. 8vo, pp. 250. Trenton, 1856. cloth. 14s.

New York.—Geology of the State of New York. Published by Authority. 4 vols. 4to. Albany, 1842, 1843. Part I. Comprising the Survey of the First Geological District, by William M. Mather. With 46 coloured Plates. pp. xxxvii. and 653. Part II. Comprising the Survey of the Second Geological District, by Ebenezer Emmons, M.D. With 17 Plates. pp. x. and 437. Part III. Comprising the Survey of the Third Geological District, by Lardner Vanuxem. pp. 306. Part IV. Comprising the Survey of the Fourth Geological District, by James Hall. Maps, Plans, Illustrations, and 19 Plates. pp. xxii. and 525.

Owen.—Key to the Geology of the Globe: an Essay designed to show that

the present Geographical, Hydrographical, and Geological Structures, observed on the Earth's Crust, were the Result of Forces acting according to Fixed Demonstrable Laws, Analogous to those governing the Development of Organic Bodies, by Richard Owen, D.D., Professor of Geology and Chemistry in the University of Nashville. Illustrated with Maps and Diagrams. 8vo, pp. 262. Nashville, 1857. cloth. 12s.

Owen.—Report of a Geological Exploration of Part of Iowa, Wisconsin, and Illinois, made under Instructions from the Secretary of the Treasury of the United States, in the Autumn of the year 1839, by David Dale Owen, M.D. With Charts and Illustrations. 8vo. Washington, 1849. sewed. 5s.

Owen.—Report of a Geological Survey of Wisconsin, Iowa, Minnesota, and incidentally of the Nebraska Territory; made under instructions from the United States' Treasury Department, by Robert Dale Owen, United States' Geologist. With 45 Woodcuts, 3 Geological Maps, 20 steel Plates of Organic Remains, and numerous Plates of Sections. 1 vol. royal 4to. Philadelphia, 1852. £3

Phelps.—Geology, by Mrs. A. H. L. Phelps. 8vo. New York. 1s. 6d.

Rambles in the Mammoth Cave, during the year 1844, by a Visitor. With Plan and Plates. 8vo. Louisville, 1846. 6s.

Reports of the First, Second, and Third Meetings of the Association of American Geologists and Naturalists at Philadelphia, in 1840 and 1841, and at Boston in 1842, embracing its Proceedings and Transactions. With 21 Plates. royal 8vo, pp. viii. and 544. Boston, 1843. £1 4s.

Roberts and Strong.—Geological Report on the Dauphin and Susquehanna Coal Company's Mineral Lands in Dauphin and Lebanon Counties, Pennsylvania, by W. F. Roberts and Henry K. Strong. 8vo. New York, 1851.

Robinson.—A Catalogue of American Minerals, with their Localities, including all which are known to exist in the United States and British Provinces, &c. &c., with an Appendix containing additional Localities and a Tabular View, by Samuel Robinson, M.D. 8vo, pp. 316. Boston, 1825.

Rogers.—First Annual Report of the (Pennsylvania) State Geologist, by Henry D. Rogers. 8vo. Harrisburg, 1836.

Rogers.—Second Annual Report on the Geological Exploration of Pennsylvania, by H. D. Rogers. 8vo. Harrisburg, 1838.

Rogers.—Third Annual Report of the Geological Survey of the State of Pennsylvania, by H. D. Rogers, State Geologist. 8vo. Harrisburg, 1839.

Rogers.—Fourth Annual Report on the Geological Survey of the State of Pennsylvania, by H. D. Rogers, State Geologist. 8vo. Harrisburg, 1840.

Rogers.—Fifth Annual Report of the Geological Survey of Pennsylvania, by H. D. Rogers. 8vo. Harrisburg, 1841.

Rogers.—Report on the Geological Survey of the State of New Jersey, by Henry D. Rogers. 8vo. Philadelphia, 1836.

Rogers.—Final Report on the Geology of New Jersey, by Henry D. Rogers. 8vo. Philadelphia, 1840.

Rogers.—Report on the Geological Survey of Virginia, for 1838, by W. B. Rogers. 4to. Richmond, 1839.

Rogers.—Report on the Geological Survey of Virginia, for 1839, 1840, by W. B. Rogers. 8vo. Richmond, 1841.

Safford.—A Geological Reconnoissance of the State of Tennessee; being the Author's first Biennial Report. Presented to the thirty-first General Assembly of Tennessee, December, 1855, by James M. Safford, A.M. With Map. 8vo, pp. 164. Nashville, Tenn., 1856. cloth. 12s.

St. John.—Elements of Geology, for the Use of Students, by Samuel St. John. 8vo. New York, 1851.

Shepard.—Report on the Geological Survey of Connecticut, by C. U. Shepard. 8vo. New Haven, 1837.

Shepard.—A Treatise on Mineralogy, by Charles Upham Shepard, M.D. 3rd edition, with 725 Illustrations. 8vo, pp. x. and 452. New Haven, 1857.

Sullivant.—Musci and Hepaticæ of the United States, East of the Mississippi River. Contributed to the 2nd edition of "Gray's Manual of Botany," by William Sullivant. With 8 Copperplates, illustrating the Genera, and Index. royal 8vo, pp. 113. New York, 1856. cloth. 16s.

Swallow.—The First and Second Annual Reports of the Geological Survey of Missouri, by G. C. Swallow, State Geologist. Illustrated with Maps, Charts, and Engravings. 8vo, pp. 448. Jefferson City, 1855. cloth. £1 1s.

Thompson.—Outlines of Mineralogy, Geology, and Mineral Analysis, by Thomas Thompson. 2 vols. 8vo. Philadelphia, 1839.

Transactions of the Geological Society of Pennsylvania; with Illustrations. Vol. I., parts 1 and 2; no more published. 8vo. Phil. 1834, 1835. £1 10s.

Transactions of the American Geologists' and Naturalists' Association, 1840—1842. royal 8vo. New York. £1 5s.

Trimmer.—Practical Geology and Mineralogy, by Joshua Trimmer. 8vo. Philadelphia, 1842.

Tuomey.—Report on the Geology of South Carolina, by M. Tuomey, Member of the American Association of Geologists and Naturalists, &c. &c. &c. With Maps and Plates. 4to, pp. lx. and 294. Columbia, S. C., 1848. cloth. 12s.

Tuomey.—First Biennial Report on the Geology of Alabama, by M. Tuomey. 8vo. Tuscaloosa, 1850.

Tyson.—Geology and Industrial Resources of California, by Philip T. Tyson. Maps. 8vo. Baltimore, 1850. 7s. 6d.

Van Rensselaer.—Lectures on Geology, by Jeremiah Van Rensselaer. 8vo. New York, 1825. 9s.

Vermont—Geological Report on, in 1845. 8vo. Burlington, Vt. 1s. 6d.

Vermont—Geological Report on, in 1846. 8vo. Burlington, Vt. 3s.

Wailes.—Report on the Agriculture and Geology of Mississippi, by B. L. C. Wailes, of Washington, Mississippi. With Plates. 8vo. Published by E. Barksdale, Jackson, Miss., 1855. boards.

Warren.—Description of a Skeleton of the Mastodon Giganteus of North America, by John C. Warren, M.D., &c., &c. With 30 Plates. 4to, pp. 270. Boston, 1855. cloth. £2 2s.

Webster.—A Description of the Island of St. Michael, comprising an account of its Geological Structure; with remarks on the other Azores or Western Islands. Originally communicated to the Linnæan Society of New England, by John W. Webster, M.D., Cor. Sec. L.S.N.E. Maps and Plates. 8vo, pp. 244. Boston, 1821. boards. 5s.

VII.

CHEMISTRY AND PHARMACY.

Averill.—Facts regarding the Disinfecting Powers of Chlorine; with an Explanation of the Mode in which it operates, by C. Averill, A.M. 8vo Schenectady, 1832.

Bache.—A System of Chemistry, for the Use of Students of Medicine, by Franklin Bache, M.D. 8vo. Philadelphia, 1819.

Bache.—Introductory Lecture on Chemistry, by Franklin Bache, M.D. 8vo. Philadelphia, 1841.

Berzelius.—The Use of the Blowpipe in Chemistry and Mineralogy, by J. J. Berzelius. Translated from the 4th enlarged and corrected edition, by J. D. Whitney. 4 Plates. 12mo, pp. 254. Boston, 1845. cloth. 9s.

Booth.—Encyclopædia of Chemistry, Practical and Theoretical; embracing its Application to the Arts, Metallurgy, Mineralogy, Geology, Medicine, and Pharmacy, by James C. Booth, A.M., Melter and Refiner in the United States Mint; assisted by Campbell Morfit. 2nd edition. 8vo. Philadelphia, 1850. cloth. £1 1s.

Booth and **Morfit.**—On Recent Improvements in the Chemical Art, by Professor James C. Booth and Campbell Morfit. 8vo, pp. 216. Washington, 1852. 5s.

Comstock.—Elements of Chemistry; in which the recent Discoveries in the Science are included, and its Doctrines familiarly explained; designed for the Use of Schools and Academies, by J. L. Comstock, M.D. Engravings. 12mo, pp. 430. New York, 1850. bound. 5s. 6d.

Cooper.—Identities of Light and Heat, and Caloric and Electricity, by C. Campbell Cooper. 8vo. Philadelphia, 1848.

Darlington.—Agricultural Chemistry, by Wm. Darlington. 12mo. Philadelphia, 1847. cloth. 6s.

Draper.—Text-Book of Chemistry, by J. W. Draper. 12mo. New York. 5s.

Elderhorst.—Manual of Blowpipe-Analysis, for the Use of Students, by William Elderhorst. 12mo, pp. 104. New York, 1857. 4s. 6d.

Foster.—First Principles of Chemistry; illustrated by a Series of the most recently discovered and brilliant Experiments known to the Science; adapted especially for Classes, by W. R. Foster. 12mo, pp. 136. New York, 1855. 4s.

Gardner.—Medical Chemistry for the Use of Students; being a Manual of the Science, with its applications to Toxicology, Physiology, Therapeutics, Hygiene, &c., by D. P. Gardner. 12mo. Philadelphia, 1849. 9s.

Gibbs and **Genth.**—Researches on the Ammonia-Cobalt Bases, by Wolcott Gibbs and F. Aug. Genth. 4to, pp. iv. and 68. Washington, 1856. sewed.

Hare.—Memoir on the Explosiveness of Nitre, with a view to elucidate its Agency in the tremendous Explosion of July, 1845, in New York, by Robert Hare, M.D. 4to, pp. 20. Washington, 1850. 1s.

Labarraque.—Instructions and Observations concerning the Use of the Chlorides of Soda and Lime, by A. G. Labarraque. Translated by Jacob Porter. 2nd edition. 8vo. New Haven, 1831.

Lehmann.—Physiological Chemistry, by Professor C. G. Lehmann. Translated from the 2nd edition, by George E. Day, M.D., F.R.S., Fellow of the Royal College of Physicians, and Professor of Medicine in the University of St. Andrew's, edited by R. E. Rogers, M.D., Professor of Chemistry in the Medical Department of the University of Pennsylvania. With Illustrations, selected from "Funke's Atlas of Physiological Chemistry," and an

Appendix of Plates. Complete in 2 volumes, 8vo, pp. 648 and 546. Philadelphia, 1855. cloth. £1 12s.

Lehmann.—Manual of Chemical Physiology, from the German of Professor C. G. Lehmann, M.D. Translated, with Notes and Additions, by J. Cheston Morris, M.D.; with an Introductory Essay on Vital Force, by Samuel Jackson, M.D. Illustrated with 40 Woodcuts. 8vo, pp. 332. Philadelphia, 1856. cloth. 14s.

Loewig.—Principles of Organic and Physiological Chemistry, by Dr. Carl Loewig. Translated by D. Breed, M.D. 1 vol. 8vo. Philadelphia, 1852. cloth. 15s.

Morfit.—A Treatise on Chemistry applied to the Manufacture of Soap and Candles; being a thorough Exposition, in all the Minutiæ, of the Principles and Practice of the Trade, based upon the most recent Discoveries in Science and Art, by Campbell Morfit, Professor of Analytic and Applied Chemistry in the University of Maryland. A new and improved edition. Illustrated with 260 Engravings on Wood. 8vo, pp. 600. Phil., 1856. cloth. £1 10s.

Morfit.—Chemical and Pharmaceutical Manipulations: a Manual of the Mechanical and Chemico-Mechanical Operations of the Laboratory, for the Use of Chemists, Druggists, Manufacturers, Teachers, and Students. 2nd and enlarged edition, by Campbell and Clarence Morfit. With 537 Illustrations. royal 8vo, pp. 626. Philadelphia, 1856. cloth. £1 1s.

Murphy.—Review of Chemistry, for Students, adapted to the principal Medical Schools in the United States, by J. G. Murphy. 12mo. Philadelphia, 1855. 6s.

Nash.—Scientific Treatise on Agricultural Chemistry, by T. A. Nash. post 8vo. New York, 1853. 4s.

Otto.—A Manual of the Detections of Poisons by Medico-Chemical Analysis, by Dr. Fr. Jul. Otto, Professor of Chemistry in Caroline College, Brunswick. Translated from the German, with Notes and Additions, by William Elderhorst, M.D., Professor of Chemistry in the Rensselaer Polytechnic Institution, Troy, N. York. 12mo, pp. 182. cloth. 7s.

Parrish.—An Introduction to Practical Pharmacy, designed as a Text-Book for the Student, and as Guide to the Physician and Pharmaceutist; with many Formulas and Prescriptions, by Edward Parrish. With 243 Illustrations. 8vo, pp. 544. Philadelphia, 1856. cloth. 16s.

Peirce.—Examination of Drugs, Medicines, Chemicals, &c., as to their Purity and Adulteration, by C. H. Peirce, M.D. crown 8vo. Philadelphia, 1853. cloth. 7s. 6d.

Pelouze and **Fremy.**—General Notions of Chemistry, by J. Pelouze and E. Fremy. Translated from the French, by Edmund C. Evans, M.D. crown 8vo, pp. 446. Philadelphia, 1854. cloth. 10s.

Pharmacopœia of the United States of America, by Authority of the National Medical Convention held at Washington, A. D. 1850. 12mo, pp. xxiv. and 318. Philadelphia, 1855. 6s.

Phelps.—Chemistry for Schools, Families, and Private Students, by A. H. Lincoln Phelps. With Woodcuts. crown 8vo, pp. 346. New York, 1850. bound. 5s.

Porter.—First Book of Chemistry and allied Sciences, including an Outline of Agricultural Chemistry, by John A. Porter, M.A., M.D. 12mo, pp. 202. New York, 1857. half-bound. 3s. 6d.

Regnault.—Elements of Chemistry, for the Use of Colleges, Academies, and Schools, by M. V. Regnault. Illustrated by nearly 700 Woodcuts. Translated from the French, by Thomas R. Betton, M.D.; and edited, with Notes, by James C. Booth and William L. Faber, Metallurgist and Mining Engineer. 2 vols. 8vo, pp. 1480. Philadelphia, 1852. bound. £1 16s.

Remarks upon Alchemy and the Alchemists; indicating a Method of discovering the true Nature of Hermetic Philosophy; and showing that the search after the Philosopher's Stone had not for its object the discovery of an agent

for the Transmutation of Metals, &c. &c., (by E. A. Hitchcock, U.S.A.). 12mo, pp. xv. and 304. Boston, 1857. 7s.

Rose.—The Chemical Tables for the Calculation of Quantitative Analyses of H. Rose. Re-calculated for the more recent Determinations of Atomic Weights, and with other Alterations and Additions, by William P. Dexter. 8vo, pp. 70. Boston, 1850. cloth. 5s.

Silliman.—First Principles of Chemistry, for the Use of Colleges and Schools, by Benjamin Silliman, M.D. 25th edition. With 423 Engravings. 12mo, pp. 556. Philadelphia, 1853. 7s. 6d.

Stöckhardt.—The Principles of Chemistry illustrated by simple Experiments, by Dr. Julius Stöckhardt, Professor, &c. Translated by C. H. Peirce, M.D. 8vo, pp. 682. Cambridge, 1850. 10s. 6d.

Stöckhardt.—Chemical Field Lectures for Agriculturists, by Dr. Julius Adolphus Stöckhardt, Professor in the Royal Academy of Agriculture at Tharand. Translated from the German. Edited, with Notes, by James E. Teschemacher. 12mo. Cambridge, 1852. cloth. 4s. 6d.

Webster.—Manual of Chemistry, by J. Webster. 8vo. Boston, 1826. 18s.

Will.—Outlines of Chemical Analysis, prepared for the Chemical Laboratory at Giessen, by Dr. Heinrich Will, Professor of Experimental Chemistry in the University at Giessen. Translated from the third German edition, by Daniel Breed, M.D., of the U. S. Patent Office, and Lewis H. Steiner, M.A.,M.D. 8vo, pp. 336. Boston, 1852. cloth. 12s.

Woehler.—The Analytical Chemist's Assistant; a Manual of Chemical Analysis, both Quantitative and Qualitative, or Natural and Artificial Inorganic Compounds, to which are appended the Rules for Detecting Arsenic in a Case of Poisoning, by Friedrich Woehler, Professor of Chemistry in the University of Goettingen. Translated from the German, with an Introduction, Illustrative and Copious Additions, by Oscar M. Lieber. 12mo. Philadelphia, 1852. cloth. 6s. 6d.

Youmans.—A Class-book of Chemistry, in which the Principles of the Sciences are familiarly explained, and applied to the Arts, Agriculture, Physiology, Dietetics, Ventilation, and the most important Phenomena of Nature, by E. L. Youmans. 12mo, pp. 344. New York, 1857. cloth. 4s. 6d.

Youmans.—Chemical Atlas; or, the Chemistry of Familiar Objects: exhibiting the General Principles of the Science in a Series of beautifully coloured Diagrams, and accompanied by Explanatory Essays, embracing the latest Views of the Subject; Illustrated; designed for the Use of Students and Pupils in all Schools where Chemistry is taught, by Edward L. Youmans. 4to, pp. 106. New York. cloth 10s. 6d.

VIII.

NATURAL PHILOSOPHY.

CLIMATOLOGY, ELECTRICITY, METEOROLOGY, OPTICS, &c. &c.

Bancroft.—Experimental Researches concerning the Philosophy of Permanent Colours, by Edward Bancroft. 2 vols. 8vo. Philadelphia, 1814.

Bache.—Observations at the Magnetic and Meteorological Observatory at the Girard College, Philadelphia, made under the direction of A. D. Bache, LL.D., 1840 to 1845. 3 vols. Plates. Washington, 1847.

Bassnett.—Outlines of a Mechanical Theory of Storms, containing the true Law of Lunar Influence, Practical Instructions to the Navigator, &c. &c., by T. Bassnett. crown 8vo. New York. cloth. 6s.

Blodget.—Climatology of the United States, and of the Temperate Latitudes of the North-American Continent. Embracing a full comparison of these with the Climatology of the Temperate Latitudes of Europe and Asia; and especially in regard to Agriculture, Sanitary Investigations, and Engineering, with Isothermal and Rain Charts for each season, the extreme months, and the year, including a Summary of the Statistics of the Meteorological Observations in the United States, condensed from recent Scientific and Official Publications, by Lorin Blodget. imperial 8vo, pp. xvi. and 536. Philadelphia, 1857. £1 8s.

Boyé.—A Treatise on Pneumatics; being the Physics of Gases, including Vapours; containing a full Description of the different Air-Pumps, and the Experiments which may be performed with them; also the different Barometers, Pressure Gauges, &c., by Martin H. Boyé, M.D., A.M. With many Wood Engravings. 8vo, pp. 128. Philadelphia, 1855. cloth. 5s.

Brocklesby.—Elements of Meteorology, by John Brocklesby. 12mo. New York. cloth. 5s.

Browne.—An Essay on Solid Meteors and Aërolites, by Peter A. Browne, LL.D. 8vo. Philadelphia, 1844.

Butler.—The Philosophy of the Weather, and a Guide to its Changes, by T. B. Butler. crown 8vo, pp. 432. New York, 1856. cloth. 6s.

Chappelsmith.—Account of a Tornado near New Harmony, Indiana, April 30, 1852, with a Map of the Track, Diagrams, and Illustrative Sketches, by John Chappelsmith. 1 Map and 1 Plate. 4to, pp. 12. Washington, 1855. 2s.

Coffin.—On the Winds of the Northern Hemisphere, by Professor J. H. Coffin. 13 Plates. 4to, pp. 200. Washington, 1853. 14s.

Coffin.—Psychrometrical Table for Determining the Force of Aqueous Vapour, and the relative Humidity of the Atmosphere, from indications of the Wet and the Dry Bulb Thermometer, Fahrenheit, by James H. Coffin, A.M 8vo, pp. 20. Washington, 1856. 1s.

Comstock.—Primary Lessons in Natural Philosophy, designed for Common Schools, and as an Introduction to the Author's System of Natural Philosophy, by J. L. Comstock, M.D. 18mo, pp. 224. New York, 1856.

Davis.—The Law of Deposit of the Flood Tide, by Charles H. Davis, U.S.N. 8vo. Washington, 1852.

Davis.—The Law of Deposit of the Flood-tide; its Dynamical Action and Office, by Charles Henry Davis, Lieut. U.S. Navy. 4to, pp. 14. Washington, 1852. 1s.

Draper.—Text-Book on Natural Philosophy, by J. W. Draper. 12mo. New York. sheep. 4s. 6d.

Espy.—The Philosophy of Storms, by James P. Espy. 1 vol. 8vo, pp. 600. With Maps, Engravings, &c. Boston, 1841. 16s.

Forry.—Meteorology: comprising a Description of the Atmosphere and its Phenomena, the Laws of Climate in general, and especially the Climatic Features peculiar to the Region of the United States; with some Remarks upon the Climates of the Ancient World, as based on Fossil Geology, by Samuel Forry, M.D. With 13 Illustrations. small folio, pp. 48. New York, 1843.

Guyot.—Directions for Meteorological Observations, intended for the First Class of Observers, by Arnold Guyot. 8vo, pp. 40. Washington, 1850. 2s.6d.

Guyot.—A Collection of Meteorological Tables, with other Tables useful in Practical Meteorology. Prepared by order of the Smithsonian Institution, by A. Guyot. 8vo, pp. 212. (A new edition in press.) Washington, 1852. 8s.

Jackson.—An Elementary Treatise on Optics, by J. W. Jackson. 2nd edition. 11 Tables. 8vo, pp. 261. Schenectady, 1852. cloth. 9s.

Lawson.—Meteorological Register for the years 1826, 1827, 1828, 1829, and 1830; from Observations made by the Surgeons of the Army, and others, at the Military Posts of the United States. Prepared under the direction of Thomas Lawson, M.D., Surgeon-General. To which is appended the

Meteorogical Register for 1822, 1823, 1824, and 1825, compiled by James Lowell, M.D., late Surgeon-General. With a Map. 8vo. Philadelphia, 1840.

Lawson.—Meteorological Register for Twelve Years, from 1831 to 1842, inclusive: compiled from Observations made by the Officers of the Medical Department of the Army, and the Military Posts of the United States. Prepared by General T. Lawson. 8vo. Washington, 1851.

Locke.—Observations on Terrestrial Magnetism, by John Locke, M.D., M.A.P.S. 4to, pp. 30. Washington, 1852. 2s.

Maury.—On the Probable Relation between Magnetism and the Circulation of the Atmosphere, by M. F. Maury. 8vo. Washington, 1851.

Meech.—On the Relative Intensity of the Heat and Light of the Sun upon different Latitudes of the Earth, by L. W. Meech. 6 Plates. 4to, pp. 58. Washington, 1856. 5s.

Newton.—The Mathematical Principles of Natural Philosophy, by Sir Isaac Newton. Translated into English by Andrew Motte. To which is added, Newton's "System of the World;" with a Portrait taken from the Bust, Observatory at Greenwich. 1st American edition, carefully revised and corrected, with a Life of the Author, by N. W. Chittenden, M.A., &c. 8vo. New York, 1848. sheep. £1 1s.

Olmsted.—Introduction to Natural Philosophy, by Denison Olmsted. 8vo. New York. cloth. 18s.

Olmsted.—Outlines of Lectures on the Atmosphere and its Phenomena, by Denison Olmsted. 8vo. New York, 1839.

Peirce.—Physical and Celestial Mechanics, by Benjamin Peirce, Perkins Professor of Astronomy and Mathematics in the Harvard University. Developed in Four Systems, of Analytic Mechanics, Celestial Mechanics, Potential Physics, and Analytic Morphology. Vol. I. A System of Analytic Mechanics. (In press.) Boston.

Peirce.—An Elementary Treatise on Sound; being the Second Volume of a Course of Natural Philosophy; designed for the Use of High Schools and Colleges, by Benjamin Peirce, A.M. 8vo. Boston, 1846. cloth. 10s.

Stilling.—Theory of Pneumatology, by J. H. Jung Stilling. 8vo. New York, 1851.

Webster.—The Principles of Hydrostatics, by Thomas Webster, M.A 8vo. Cambridge, 1835.

Webster.—The Theory of the Equilibrium and Motion of Fluids, by Thomas Webster, M.A. 8vo. Cambridge, 1836.

Wells.—Familiar Science; or, the Scientific Explanation of the Principles of Natural and Physical Science, and their Practical and Familiar Applications to the Employments and Necessities of Common Life, by D. A. Wells. Illustrated with 160 Engravings. 8vo, pp. 566. Philadelphia, 1856. bound. 9s.

Wilkes.—Meteorology of the United States' Exploring Expedition. (Vol. XI. of the whole Work.) Journal of Meteorological Observations, by C. Wilkes, U.S.N., Member of the American Philosophical Society, &c. With 25 Illustrations, Map, and 24 Plates. 4to, pp. lviii. and 726. Philadelphia, 1851.

Youmans.—The Hand Book of Household Science. A Popular Account of Heat, Light, Air, Aliment, and Cleansing, in their Scientific Principles and Domestic Applications; with numerous Illustrative Diagrams; adapted for Academies, Seminaries, and Schools, by Edward L. Youmans. 12mo, pp. 468. New York, 1857. 7s. 6d.

IX.

MATHEMATICS AND ASTRONOMY.

Alvord.—The Tangencies of Circles and of Spheres, by Benjamin Alvord, Major U. S. Army. 9 Plates. 4to, pp. 16. Washington, 1856. 3s. 6d.

American Ephemeris (the) and Nautical Almanac for the Years 1855 to 1859. Published by Authority of the Secretary of the Navy. imperial 8vo. Washington, 1853 to 1857. sewed. each, 9s.

Astronomical Journal (the). Edited by Benjamin Apthorp Gould, Jun., Ph. D., Fellow of the American Academy of Arts and Sciences, of the American Philosophical Society at Philadelphia, &c. Published in Numbers, at irregular intervals, generally varying from two to three weeks. 24 Numbers make a Volume in 4to. Subscription, per volume, £1 5s., including American postage. Vol. IV. was completed in October, 1856. Vols. I. to IV., Nos. 1 to 96.

Astronomical Observations made under the direction of M. T. Maury, Lieut. U.S.N., during the year 1848, at the U.S.N. Observatory, Washington. Published by Authority of the Secretary of the Navy. Vols. I. to IV. 4to. Washington, 1849 to 1856.

Bouvier.—Familiar Astronomy; or, an Introduction to the Study of the Heavens; illustrated by Celestial Maps, and upwards of 200 finely executed Engravings: to which is added, a Treatise on the Globes, and a Comprehensive Astronomical Dictionary; for the Use of Schools, Families, and Private Students, by Hannah M. Bouvier. 8vo, pp. 500. Philadelphia, 1856. cloth. 14s.

Bowditch.—See La Place.

Burritt.—The Geography of the Heavens, and Class Book of Astronomy; accompanied by a Celestial Atlas, by Elijah H. Burritt, A.M.; with an Introduction by T. Dick, LL.D. 12mo, pp. 332. New York, 1849. 8s.

Chauvenet.—Treatise on Plane and Spherical Trigonometry, by William Chauvenet, A.M. 3rd edition. With numerous Woodcuts. 8vo, pp. 256. Philadelphia, 1850. cloth. 8s.

Chauvenet.—New Method of Correcting Lunar Distances, and Improved Method of Finding the Error and Rate of a Chronometer by equal Altitudes, by William Chauvenet, A.M., Professor of Mathematics in the U.S. Naval Academy, &c. 8vo, pp. 86. Philadelphia, 1850. 3s. 6d.

Chauvenet.—The Great Circle Protractor, by Professor W. Chauvenet, of U.S. Naval Academy, Annapolis, Md. The Great Circle Protractor is based upon the stereographic projection of the Sphere, and by its use we discover —by mere inspection—not only the Latitudes and Longitudes of all the points on the globe, through which the Great Circle route passes, but also the course to steer, and distance to be sailed. It consists of two Charts—a fixed and a revolving one, in a portfolio. Annapolis, 1855. sq. folio. £1 4s.

Church.—Elements of Analytical Geometry, by Albert E. Church, A.M. 8vo, pp. 298. New York, 1851. 6s.

Coffin.—Elements of Conic Sections, and Analytical Geometry, by Professor I. H. Coffin. 8vo. New York, 1855. 6s.

Comte.—The Philosophy of Mathematics. Translated from the "Cours de Philosophie Positive" of Auguste Comte, by W. M. Gillespie. 8vo. New York, 1850. cloth. 7s.

Davies.—Elements of Algebra, on the Basis of M. Bourdon; embracing Sturm's and Horner's Theorems, and Practical Examples, by Charles Davies, LL.D. 8vo, pp. 400. New York. 3s 6d.

Davies.—A Key, containing the Statements and Solutions of Questions in Davies's Elementary Algebra; for the Use of Teachers only. crown 8vo, pp. 100. New York. 3s.

Davies.—The Logic and Utility of Mathematics; with the best Method of Instruction, explained and illustrated, by Charles Davies, LL.D. 8vo. New York, 1850. cloth. 8s.

Davies and Peck.—Mathematical Dictionary and Cyclopædia of Mathematical Science; comprising Definitions of all Terms employed in Mathematics; an Analysis of each Branch of the whole, as forming a single Science, by Charles Davies and William G. Peck. royal 8vo, pp. 592. New York, 1855. sheep. 18s.

Day.—A Course of Mathematics; containing the Principles of Plane Trigonometry, Mensuration, Navigation, and Surveying; adapted to the Method of Instruction in the American Colleges, by Jeremiah Day, D.D., LL.D., President of Yale College. 8vo, pp. 384. New York (1831), 1851. sheep.

Dodd.—Elements of Geometry and Mensuration, by J. B. Dodd. 12mo, pp. 237. New York, 1855. 6s.

Downes.—Occultations Visible in the United States during the year 1848; computed under the direction of the Smithsonian Institution, by John Downes. 4to, pp. 12 Washington, 1848. 1s.

Downes.—Occultations Visible in the United States during the year 1849; computed under the direction and at the expense of the Smithsonian Institution, by John Downes. 4to, pp. 24. Washington, 1848. 2s. 6d.

Downes.—Occultations Visible in the United States during the year 1850; computed by John Downes, at the expense of the Fund appropriated by Congress for a Nautical Almanac, and published by the Smithsonian Institution. 4to, pp. 26. Washington, 1849. 2s. 6d.

Downes.—Occultations Visible in the United States during the year 1851; computed by John Downes, at the expense of the Fund appropriated by Congress for the establishment of a Nautical Almanac, and published by the Smithsonian Institution. 4to, pp. 26. Washington, 1850. 3s. 6d.

Downes.—Occultations Visible in the United States during the year 1852; computed by John Downes, at the expense of the Fund appropriated by Congress for the establishment of a Nautical Almanac, and published by the Smithsonian Institution. 4to, pp. 34. Washington, 1852. 1s. 6d.

Downes.—Occultations of Planets and Stars by the Moon, during the year 1853; computed by John Downes, at the expense of the Fund appropriated by Congress for the establishment of a Nautical Almanac, and published by the Smithsonian Institution. 4to, pp. 36. Washington, 1853. 5s.

Force.—Record of Auroral Phenomena observed in the Higher Northern Latitudes; compiled by Peter Force. 4to, pp. 122. Washington, 1856. 5s.

Appendix to the above Record of Auroral Phenomena observed in the Higher Northern Latitudes, compiled by Peter Force. 4to, pp. iv. and 120. Washington, D.C., 1856. sewed. 5s.

Gilliss.—Astronomical Observations made at the Naval Observatory, Washington, under orders of the Honourable Secretary of the Navy, dated August 13th, 1838, by Lieutenant J. M. Gilliss, U.S.N. Printed by order of the Senate of the United States. 8vo, pp. xxvi. and 672. Washington, 1846. sewed. 14s.

Godman.—Astronomical Investigations, by J. D. Godman. 8vo. Philadelphia, 1821.

Gould.—On the History of the Discovery of the Planet Neptune, by B. A. Gould, Jun. 8vo, pp. 56. Washington, 1850. 2s.

Gummere.—An Elementary Treatise on Astronomy, by John Gummere. 8vo. Philadelphia. 18s.

Hackley.—A Treatise on Algebra; containing the latest Improvements; adapted to the Use of Schools and Colleges, by Charles W. Hackley, S.T.D., Professor of Mathematics and Astronomy in Columbia College, N. Y. 8vo, pp. 520. New York, 1854. sheep. 9s.

Jackson.—Elements of Conic Sections, by Isaac W. Jackson. 8vo. Schenectady, New York, 1854. 5s.

La Place.—The Mécanique Céleste of Peter Simon Marquis de La Place, Peer of France. Translated, with a Commentary, by Nathaniel Bowditch, LL.D., F.R.S. With a Memoir of the Translator, by his Son, Nathaniel I. Bowditch. 4 vols. imp. 4to, pp. 4052. Boston, 1829—1839. £12 12s.

Vol. III. contains a fine Portrait of P. S. La Place, and Vol. IV. contains a Portrait of the Translator, Nathaniel Bowditch, and one of Mary Bowditch, his wife; and also the Memoir, which occupies 168 pages.

Only 300 copies of this work were printed at the Author's expense, and a very few copies now remain for sale.

Lee.—A Collection of Tables and Formulæ useful in Surveying, Geodesy, and Practical Astronomy; including Elements for the Projection of Maps, by Captain T. J. Lee. 8vo, pp. 262. Washington, 1853. cloth. 16s.

Loomis.—Table of Logarithms of Numbers and of Sines and Tangents for every Ten Seconds of the Quadrant, &c., by Elias Loomis, A.M. 8vo. New York, 1852. 5s. 6d.

Loomis.—Elements of Plain and Spherical Trigonometry; with their Applications to Mensuration, Surveying, and Navigation, by Elias Loomis, A.M. 8vo, pp. 344. New York, 1852. 6s.

Loomis.—Elements of Geometry and Conic Sections, by Elias Loomis. 12mo. 5s. 6d.

Loomis.—Elements of Analytical Geometry, and of the Differential and Integral Calculus, by Elias Loomis, A.M. 8vo, pp. 278. New York, 1852. 7s.

Loomis.—A Treatise on Algebra, by E. Loomis. 12mo. New York, 1855. 7s.

Loomis.—An Introduction to Practical Astronomy; with a Collection of Astronomical Tables, by Elias Loomis, LL.D., Professor of Mathematics and Natural Philosophy in the University of the City of New York, &c. 8vo, pp. 498. New York, 1855. sheep. 8s.

Loomis.—The Recent Progress of Astronomy, especially in the United States, by E. Loomis, LL.D. 3rd edition, revised and enlarged. pp. 396. New York, 1856. 7s. 6d.

Lyon.—Tables, with the Method of the Application to Finding the Mean Heights of Cross Sections and Cubic Contents of Excavations and Embankments, by P. Lyon. 12mo. Philadelphia, 1853. cloth. 9s.

Mathematical Miscellany (the), conducted by C. Gill, Professor of Mathematics in the Institute of Flushing, Long Island. Published at the Institute. Nos. 1 to 8 (March, 1836, to November, 1839), forming 2 vols. 8vo Vol. I. pp. 414. Vol. II. pp. 142. New York, 1836—1839. sewed.

Mitchel.—Planetary and Stellar Worlds; a Popular Exposition of the great Discoveries and Theories of Modern Astronomy; in a Series of Ten Lectures, by O. M. Mitchel, A.M. 12mo. New York. cloth. 8s.

Morris.—Martin Behaim, the German Astronomer and Cosmographer of the Times of Columbus: being the Tenth Annual Discourse before the Maryland Historical Society, on January 25th, 1855, by John G. Morris, D.D. 8vo, pp. 48. Baltimore, 1855. sewed. 4s.

Norton.—An Elementary Treatise on Astronomy; in 4 Parts; containing a Systematic and Comprehensive Exposition of the Theory, and the more important Practical Problems, with Solar, Lunar, and other Astronomical Tables; designed for Use as a Text-Book in Colleges and the Higher Academies, by Wm. A. Norton, A.M. 3rd edition, corrected, improved, and enlarged. 8vo. New York, 1839. 12s.

Olmsted.—Compendium of Astronomy for Students in Academies, by D. Olmsted. 12mo. New York. 4s. 6d.

Olmsted.—Letters on Astronomy, addressed to a Lady: in which the Elements of the Science are familiarly explained, in connection with Literary History, by D. Olmsted, A.M. crown 8vo. New York. cloth. 6s.

Olmsted.—On the Recent Secular Period of the Aurora Borealis, by Denison

Olmsted, LL.D., Professor of Natural Philosophy and Astronomy in Yale College. 4to, pp. 52. Washington, 1856. 3s. 6d.

Parke.—Lectures on the Philosophy of Arithmetic and the Adaptation of that Science to the Business Purposes of Life, by Uriah Parke. 5th edition, revised and improved by the Author. crown 8vo, pp. 396. Philadelphia. half-bound. 6s.

Peirce.—Integral Calculus and Analytical Mechanics, by Benjamin Peirce. 12mo. Boston. sheep. 7s. 6d.

Peirce.—On Curves, Functions, and Motion, by Benjamin Peirce. 12mo. Boston, 1846. sheep. 7s. 6d.

Peirce.—Physical and Celestial Mechanics, by Benjamin Peirce, Perkins Professor of Astronomy and Mathematics in the Harvard University. Developed in Four Systems of Analytic Mechanics, Celestial Mechanics, Potential Physics, and Analytic Morphology. Vol. I. A System of Analytic Mechanics. 4to. Boston. In press.

Perkins.—Plane and Solid Geometry; to which is added, Plane and Spherical Trigonometry; with Tables, by George R. Perkins. 8vo. New York, 1855. 9s.

Robinson.—Concise Mathematical Operations, by H. N. Robinson. 8vo. Cincinnati, 1854. 12s.

Runkle.—New Tables for Determining the Values of the Coëfficients in the Perturbative Functions of Planetary Motion, which depend upon the Ratio of the Mean Distances, by John D. Runkle, Assistant in the Office of the American Ephemeris and Nautical Almanac. 4to, pp. 64. Washington, 1856. 3s. 6d.

Schooler.—Elements of Descriptive Geometry, by S. Schooler. 4to. Richmond, Va., 1854. 12s.

Secchi.—Researches on Electrical Rheometry, by A. Secchi. 3 Plates. 4to, pp. 60. Washington, 1852. 4s.

Smith.—The Mutations of the Earth, by J. Aug. Smith, M.D. 8vo. New York, 1846.

Smith.—New Elements of Geometry, by Seba Smith. 8vo, pp 200. New York, 1850. cloth. 5s.

Stanley.—An Elementary Treatise of Spherical Geometry and Trigonometry, by Anthony D. Stanley, A.M. With Engravings. 12mo, pp. 122. New Haven, 1848. 3s.

Stanley.—Tables of Logarithms of Numbers, and of Logarithmic Sines, Tangents, and Secants, to Seven Places of Decimals; together with other Tables of frequent use in the study of Mathematics and in Practical Calculations, by Anthony D. Stanley, A.M. 8vo, pp. 340. New Haven, 1850. bound. 12s.

Tables of the Moon; constructed from Plana's Theory, with Airy's and Longstreth's Corrections, Hansen's two Inequalities of Long Period arising from the action of Venus, and Hansen's Values of the Secular Variations of the Mean Motion and of the Motion of the Perigee. Arranged in a Form designed by Professor Benjamin Peirce, Consulting Astronomer, for the Use of the Nautical Almanac. Under the Superintendence of Charles Henry Davis, Lieut. U.S. Navy; and published under the Authority of the Hon. John P. Kennedy, Secretary of the Navy. 4to, pp. 326. Washington, 1853. sewed. £1 1s.

Tables of the Moon's Parallax: constructed from Walker's and Adam's Formulæ; arranged as a Supplement to the 1st edition of Peirce's Tables of the Moon, under the superintendence of Charles Henry Davis, Lieut. U.S.N., and published under the authority of the Hon. James C. Dobbin, Secretary of the Navy. 4to, pp. 30. Washington, 1856. sewed. 5s.

Townsend.—Mechanical Zodiac; designed to illustrate the Motion of the Earth, the Apparent Movement of the Sun among the Constellations of the Zodiac and other Heavenly Bodies, by Charles E. Townsend. 4to. New York. 6s.

Walker.—Ephemeris of Neptune for the Opposition of 1848, by Sears C. Walker, Esq. 4to, pp. 8. Washington, 1849. 1s.

Walker.—Ephemeris of the Planet Neptune for the date of the Lalande Observations of May 8 and 10, 1795, and for the Oppositions of 1846, 1847, 1848, and 1849, by Sears C. Walker, Esq. 4to, pp. 32. Washington, 1849. 1s. 6d.

Walker.—Researches relative to the Planet Neptune, by Sears C. Walker, Esq 4to, pp. 60. Washington, 1850. 1s. 6d.

Walker.—Ephemeris of the Planet Neptune for the year 1850, by Sears C. Walker, Esq. 4to, pp. 10. Washington, 1850. 1s.

Walker.—Ephemeris of the Planet Neptune for the year 1851, by Sears C. Walker, Esq. 4to, pp. 10. Washington, 1850. 1s.

Walker.—Ephemeris of the Planet Neptune for the year 1852, by Sears C. Walker, Esq. 4to, pp. 10. Washington, 1853. 1s.

Ward.—New Lunar Tables, for Correcting the Apparent Distance of the Moon from the Sun, Fixed Star, or Planet, for the effects of Reflection, Refraction, and Parallax: illustrated by appropriate Rules and Examples; with Plan, and easy Directions for taking a Lunar Observation, and some useful Remarks on the Sextant, by E. C. Ward, Professor of Mathematics, &c., U.S.N.S., Brooklyn, N.Y. royal 8vo. New York, 1855. boards. 9s.

Wilcocks.—An Essay on the Tides; Theory of the Two Forces, by Alexander Wilcocks, M.D. 8vo. Philadelphia, 1855. 3s. 6d.

X.

PHILOSOPHY.

Alexander.—Outlines of Moral Science, by Archibald Alexander, D.D., late Professor in the Theological College at Princeton, N. J. 12mo. New York, 1852. cloth. 5s. 6d.

Ancient Fragments.—Namely: The Morals of Confucius, the Chinese Philosopher; the Oracles of Zoroaster, the founder of the Persian ...gi; Sanchoniatho's Theology of the Phœnicians; the Periplus of Hanno, the Carthaginian Navigator and Discoverer; King Hiempsal's History of the African Settlements; the Choice Sayings of Publius Syrus; the Egyptian Fragments of Manetho; the Similitudes of Demophilus, or Directions for the Proper Regulation of Life; and the Excellent Sayings of the Seven Wise Men of Greece. Translated into English by various authors. 12mo, pp. 298. New York, 1835. 7s. 6d.

Bancroft.—The Necessity, the Reality, and the Promise of the Progress of the Human Race. Oration delivered before the New York Historical Society, November 20, 1854, by George Bancroft, a Member of the Society. 8vo, pp. 96. New York, 1854. sewed.

Banvard.—Wisdom, Wit, and Whims of Distinguished Ancient Philosophers, by Joseph Banvard, A.M. 12mo, pp. 408. New York, 1855. cloth.

Bowen.—Essays on Speculative Philosophy, by Francis Bowen. 12mo. Boston, 1842. cloth. 7s. 6d.

Boyd.—Eclectic Moral Philosophy: prepared for Literary Institutions and General Uses, by Rev. J. R. Boyd, A.M. 12mo, pp. 440. New York, 1846. cloth. 7s. 6d.

Brewster.—The Philosophy of Human Nature, by Francis E. Brewster. 12mo, pp. 472. Philadelphia, 1851. cloth. 5s. 6d.

Brown.—Philosophy of Physics; or, Process of Creative Development, by Andrew Brown. 8vo. New York, 1854. cloth. 14s.

Bucke.—On the Beauties, Harmonies, and Sublimities of Nature, by Charles Bucke. Selected and Revised by the Rev. W. P. Page. 8vo. New York, 1841.

Carleton.—Liberty and Necessity; in which are considered the Laws of Association of Ideas, the Meaning of the word Will, and the true Intent of Punishment, by Henry Carleton. 12mo, pp. xii. and 165. Philadelphia, 1857. cloth. 4s. 6d.

Chandler.—Elements of Character, by Mary G. Chandler. 16mo. Boston, 1854. cloth. 4s.

Cousin.—The Philosophy of the Beautiful; from the French of Victor Cousin. Translated, with Notes and an Introduction, by Jesse Cato Daniel. 8vo. New York, 1849.

Cousin.—Course of the History of Modern Philosophy, by M. Victor Cousin. Translated by D. W. Wight. 2 vols. 8vo. New York, 1852. cloth. 16s.

Cousin.—Lectures on the True, the Beautiful, and the Good, by M. V. Cousin. Increased by an Appendix on French Art. Translated by O. W. Wight. 8vo. New York, 1854.

Cousin.—Elements of Psychology: included in a Critical Examination of Locke's Essay on the Human Understanding, and in Additional Pieces, by Victor Cousin. Translated from the French, with an Introduction and Notes, by Caleb S. Henry, D.D. 4th improved edition, revised according to the Author's last corrections. crown 8vo, pp. 568. New York, 1856. cloth. 7s.

De la Rochefoucauld, Duc.—Moral Reflections, Sentences, and Maxims; newly translated from the French; with an Introduction and copious Notes, and a Life of the Author. With an Elegant Steel Portrait. To which is added, the Moral Sentences and Maxims of the good Stanislaus, King of Poland. Also a Catalogue of all the Books written on Proverbs, Maxims, Sayings, Sentences, Apophthegms, Similitudes, &c. &c. 12mo, pp. 237. New York, 1851. 7s. 6d.

De Wette.—Theodore; or, the Sceptic's Conversion. History of the Culture of a Protestant Clergyman. Translated from the German of De Wette, by J. F. Clarke. 2 vols. post 8vo. Boston, 1841. 16s.

De Wette.—Human Life; or, Practical Ethics. From the German, by Samuel Osgood. 2 vols. post 8vo. Boston, 1842. 16s.

Edwards.—An Inquiry into the Modern Prevailing Notions respecting that Freedom of Will, which is supposed to be essential to Moral Agency, Virtue and Vice, Rewards and Punishment, Praise and Blame, by Jonathan Edwards, A.M. With an Index. 12mo, pp. 432. Andover, 1840. cloth. 5s.

The same in 8vo, pp. vi. and 190. New York, 1851. 9s.

Feuchtersleben.—The Dietetics of the Soul, by Ernest von Feuchtersleben. 18mo. New York. cloth. 4s.

Fishbough.—The Macrocosm and Microcosm; or, the Universe Without and the Universe Within, by William Fishbough. In 2 Parts. Part I. The Macrocosm; or, the Universe Without. 12mo, pp. x. and 259. New York, 1856. 4s. 6d.

Fisher.—Observations on Mental Phenomena, as connected with the Philosophy of Divine Revelation, by William L. Fisher. 8vo. Philadelphia, 1851.

Gaskell.—Sense and Sound, as they reciprocally form any Sign of Mind, by John Gaskell. 8vo. Philadelphia, 1854.

Haven.—Mental Philosophy; including the Intellect, Sensibilities, and Will, by Joseph Haven, Professor of Intellectual and Moral Philosophy in Amherst College. 8vo. Boston, 1857.

Henry.—Epitome of the History of Philosophy: being the Work adopted by the University of France for Instruction in the Colleges and High Schools. Translated from the French, with Additions, and a Continuation of the History, by C. S. Henry, D.D. 2 vols. 18mo. New York, 1848. 8s.

Hickok.—Rational Psychology; or, the Subjective Idea and the Objective Law of all Intelligence, by Laurens P. Hickok, D.D., Union College. 8vo. Auburn, 1849. cloth. 16s.

Hickok.—System of Moral Science, by L. P. Hickok. royal 8vo, pp. 432. Schenectady, 1853. 10s. 6d.

Hickok.—Empirical Psychology; or, the Human Mind as given in Consciousness, by L. P. Hickok. 8vo, pp. 412. Schenectady, 1854. cloth. 7s. 6d.

Jarves.—Why and What Am I? The Confessions of an Inquirer. In 3 Parts. Part I. Heart-Experience; or, the Education of the Emotions, by James Jackson Jarves. 12mo, pp. 328. Boston, 1857. cloth. 6s.

Jouffroy.—Introduction to Ethics, including a Critical Survey of Moral Systems; translated from the French of Jouffroy, by William H. Channing. 2 vols. 12mo. Boston, 1840. cloth. 14s.

Macpherson.—Lectures on Moral Philosophy, by John Macpherson. 8vo. Philadelphia, 1791.

Magoon.—Westward Empire; or, the Great Drama of Human Progress, by E. L. Magoon. 1 vol. post 8vo. New York, 1856. 7s. 6d.

Mahan.—A System of Intellectual Philosophy, by the Rev. Asa Mahan, First President of Cleveland University. Revised and enlarged from the 2nd edition. crown 8vo, pp. 496. New York, 1856. cloth. 6s. 6d.

Mahan.—The Science of Logic; or, an Analysis of the Laws of Thought, by the Rev. Asa Mahan. 8vo, pp. 388. New York, 1857. cloth. 9s.

Moffat.—An Introduction to the Study of Æsthetics, by James Moffat. crown 8vo, pp. 284. Cincinnati, 1856. 7s.

Murdock.—Sketches of Modern Philosophy, especially among the Germans, by James Murdock, D.D. 8vo. Hartford, 1842.

Park.—Pantology; or, a Systematic Survey of Human Knowledge, by Roswell Park, A.M. 8vo. Philadelphia, 1841. 18s.

Patterson.—Early History of the American Philosophical Society; a Discourse at the Celebration of its Hundredth Anniversary, by Robert M. Patterson, M.D. With the Introductory Address of the President, and the Prayer of the Rev. Dr. Ludlow. 8vo. Philadelphia, 1843.

Philosophical Miscellanies, from the French of Cousin, Jouffroy, and Benjamin Constant. 2 vols. 8vo. Boston, 1838. 16s.

Plato.—Plato contra Atheos. Plato against the Atheists, or the Tenth Book of the Dialogues on Laws; accompanied with notes by Taylor Lewis, LL.D. 8vo. New York, 1845. 7s. 6d.

Plato's Phædon; or, a Dialogue concerning the Immortality of the Soul. Translated from the Original Greek by M. Dacier, with Notes and Emendations. To which is prefixed a Life of Plato, by Bishop Fenelon. A new edition, to which is added, by way of an Appendix, the Opinions of Ancient, Intermediate, and Modern Philosophers and Divines on the Soul's Immortality; also, Catalogue of Books, by various authors, treating on the Immortality of the Soul. 12mo, pp. 238. New York, 1849. 7s. 6d.

Rauch.—Psychology; or, a View of the Human Soul; including Anthropology; adapted for the Use of Colleges, by the Rev. Frederick A. Rauch, D.P., late President of Marshall College, Pennsylvania. 4th edition, revised and improved. 12mo, pp. 402. New York, 1853. cloth. 7s. 6d.

Richards.—Lectures on Mental Philosophy and Theology, by James Richards, D.D., late Professor of Christian Theology in the Theological Seminary at Auburn, New York. With a Sketch of his Life, by S. H. Gridley, Pastor of the Presbyterian Congregation, Waterloo, N. Y. 8vo. New York. cloth.

Robinson.—Religion of Manhood; or, Age of Thought, by J. H. Robinson. post 8vo. New York, 1854. 5s.

Sawyer.—Mental Philosophy; or, a Practical Exposition of the Phenomena and Powers of the Human Mind; designed for the Use of Colleges and High Schools, by L. A. Sawyer. 12mo, pp. 432. Boston, 1854. cloth. 5s.

Schiller.—The Æsthetic Letters, Essays, and the Philosophical Letters of

Schiller. Translated by J. Weiss, with an Introduction. 8vo. Boston, 1845.

Schlegel.—The Philosophy of Life, and the Philosophy of Languages, by Frederic von Schlegel. 8vo. New York, 1848.

Schmucker.—Psychology; or, Elements of a New System of Mental Philosophy, on the Basis of Consciousness and Common Sense; designed for Colleges and Academies, by S. S. Schmucker, D.D. 2nd edition. 12mo, pp. 330. New York, 1847. 7s.

Schwegler.—A History of Philosophy in Epitome, by Dr. Albert Schwegler. Translated from the Original German, by Julius H. Seelye. crown 8vo, pp. 366. New York, 1856. cloth. 7s. 6d.

Shedd.—Lectures upon the Philosophy of History, by William G. T. Shedd, Brown Professor in Andover Theological Seminary. crown 8vo, pp. 128. Andover, 1856. cloth. 4s.

Silver.—The Philosophy of Evil, showing its Uses and unavoidable Necessity, by Joseph S. Silver. 8vo. Philadelphia, 1845.

Smith.—Prelections on some of the more Important Subjects connected with Moral and Physical Science, in opposition to Phrenology, Materialism, Atheism, and the Principles advanced by the author of the Vestiges of Creation; and deducing the true Criterion of Moral Propriety from the Instinctive Ruling of the Moral Sense, by John Augustine Smith, M.D. With Portrait. 12mo, pp. 410. New York, 1853. cloth.

Stallo.—General Principles of the Philosophy of Nature: with an Outline of some of its recent Developments among the Germans; embracing the Philosophical System of Schelling and Hegel, and Oken's System of Nature, by J. B. Stallo, A.M. crown 8vo, pp. xxii. and 520. Boston, 1848. 7s. 6d.

Stewart.—Elements of the Philosophy of the Human Mind, by Dugald Stewart. Revised and abridged, with Critical and Explanatory Notes, for the Use of Colleges and Schools, by Francis Bowen. crown 8vo, pp. 502. Boston, 1854. cloth. 8s.

Tappan.—A Review of Edwards's "Inquiry into the Freedom of the Will," by H. P. Tappan. 3 vols. 12mo. New York. 18s.

Tappan.—Elements of Logic; together with an Introductory View of Philosophy in general, and a Preliminary View of the Reason, by Henry P. Tappan. royal 8vo, pp. 468. New York, 1856. cloth. 7s.

Theophrastus.—The Moral Characters of Theophrastus in the Græca Majora, literally translated into English, with Notes, by Charles C. Cleveland. 8vo. Andover, 1826.

Universe (the) no Desert, the Earth no Monopoly; preceded by a Scientific Exposition of the Unity of Plan in Creation. 2 vols. in 1. crown 8vo, pp. 384. Boston, 1854. cloth. 6s.

Upham.—Elements of Mental Philosophy, embracing the two Departments of Intellect and the Sensibilities, by Thomas C. Upham. 3rd edition. 2 vols. 8vo. Portland, 1839.

Upham.—A Philosophical and Practical Treatise on the Will; forming the Third Volume of a System of Mental Philosophy, by Thomas C. Upham, Professor of Moral and Mental Philosophy in Bowdoin College. 12mo. New York. sheep. 7s.

Upham.—Outlines of Imperfect and Disordered Mental Action, by Thomas C. Upham. 18mo. New York, 1840. 4s.

Upham.—Elements of Mental Philosophy abridged, and designed as a Text-Book for Academies and High Schools, by T. C. Upham. 12mo, pp. 518. New York, 1852. bound. 7s. 6d.

Upham.—Letters, Æsthetic, Social, and Moral, written from Europe, Egypt, and Palestine, by Thomas C. Upham, Professor of Mental and Moral Philosophy in Bowdoin College. Portrait. crown 8vo, pp. 586. Brunswick, Maine, 1855. cloth.

Verplanck.—Right Moral Influence and Use of Liberal Studies, by Gulian C. Verplanck. 12mo. New York. cloth. 1s. 6d.

Waterston.—Thoughts on Moral and Spiritual Culture, by R. C. Waterston 2nd edition, revised. 12mo, pp. 314. cloth.

Wayland.—The Elements of Intellectual Philosophy, by Francis Wayland. 12mo, pp. 432. Boston. cloth. 8s. 6d.

Wayland.—Elements of Moral Science, by Francis Wayland, D.D., President of Brown University, and Professor of Moral Philosophy. 12mo. Boston. cloth. 7s. 6d.

Wayland.—The same, abridged by the Author, and adapted to the Use of Schools and Academies. 18mo. Boston. half cloth. 3s. 6d.

Weaver.—Lectures on Mental Science, according to Philosophy of Phrenology, by G. S. Weaver. post 8vo. New York. 3s. 6d.

Wilson.—An Elementary Treatise on Logic; including—Part I. Analysis of Formulæ.—Part II. Method. With an Appendix of Examples for Analysis and Criticism; and a Copious Index of Terms and Subjects Designed for the Use of Schools and Colleges, as well as for Private Study and Use, by W. D. Wilson, D.D., Trinity Professor of Christian Ethics, and Professor of Logic, &c., in Hobart Free College at Geneva, N. Y. crown 8vo, pp. 446. New York, 1856. cloth. 7s. 6d.

Winslow.—Cosmography; or, Philosophical Views of the Universe, by Charles F. Winslow, M.D. 18mo. Boston, 1853. 3s. 6d.

XI.

EDUCATION.

1. THEORY OF EDUCATION.

Abbott.—The Teacher; or, Moral Influences employed in the Instruction and Government of the Young, by Jacob Abbott. With Engravings. 8vo, pp. 353. New York, 1856. 6s.

Aimé-Martin.—The Education of Mothers; or, the Civilisation of Mankind by Woman, by L. Aimé-Martin. Translated from the French, by Edwin Lee, Esq. 8vo. Philadelphia, 1843.

Alcott.—Confessions of a Schoolmaster, by Dr. William A. Alcott. 8vo. New York. 3s.

American Annals of the Deaf and Dumb. Samuel Porter, Editor. Published quarterly, at Hartford.

American Annals of Education. 1831—1839. 9 vols. 8vo.

American Institute.—The Introductory Discourse and the Lectures delivered before the American Institute of Instruction, in Boston, August, 1831. To which is added, an Essay on the Construction of School-Houses; with Plans. Published under the direction of the Board of Censors. royal 8vo, pp. xx. and 298. Boston, 1832. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, in Boston, August, 1836; including the Journal of Proceedings, and a List of the Officers. Published under the direction of the Board of Censors. royal 8vo, pp. xxiv. and 184. Boston, 1837. cloth.

American Institute.—The Introductory Discourse and the Lectures delivered before the American Institute of Instruction, at Worcester, Mass., August, 1837; including the Journal of Proceedings, and a List of the Officers. Published under the direction of the Board of Censors. royal 8vo, pp. xxiv. and 262. Boston, 1838. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Lowell, Massachusetts, August, 1838; including the Journal of Proceedings, and a List of the Officers. Published under the direction of the Board of Censors. royal 8vo, pp. xxiv. and 187. Boston, 1839. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Providence, R. I., August, 1840; including the Journal of Proceedings, and a List of the Officers. Published under the direction of the Board of Censors. 8vo, pp. xv. and 153. Boston, 1841. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Boston, August, 1841; including the Journal of Proceedings, and a List of the Officers. 8vo, pp. xv. and 194. Boston, 1842. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at New Bedford, August, 1842; including the Journal of Proceedings, and a List of the Officers. 8vo, pp. xiv. and 166. Boston, 1843. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Portland, August, 1844; including the Journal of Proceedings, and a List of the Officers. 8vo, pp. xii. and 309. Boston, 1845. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Plymouth, August, 1846; including the Journal of Proceedings, and a List of the Officers. 8vo, pp. xii. and 203. Boston, 1847. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Bangor, Me., August, 1848; including the Journal of Proceedings, and a List of Officers. 8vo, pp. xxii. and 140. Boston, 1848. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Montpelier, Vt., August, 1849; including the Journal of Proceedings, and a List of the Officers. 8vo, pp. xi. and 232. Boston, 1850. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Northampton, Mass., August, 1850; including the Journal of Proceedings, and a List of the Officers. 8vo, pp. xvi. and 159. Boston, 1851. cloth.

American Institute.—The Lectures delivered before the American Institute of Instruction, at Keene, N. H., August, 1851; including the Journal of Proceedings, and a List of the Officers. 8vo, pp. xxvi. and 228. Boston, 1851. cloth.

Cherokee.—Cherokee Primer. Park Hill, Ark., Mission Press, John Candy, printer, 1840. 18mo, pp. 24. Reprinted, ibid. 1846. 18mo, pp. 24.

Chinook.—A Complete Dictionary of the Chinook Jargon (English-Chinook and Chinook-English); to which are added numerous Conversations, thereby enabling any person to speak the Chinook correctly. 3rd edition, published by S. J. M'Cornick. 24mo, pp. 24. Portland, O. T., 1856.

Choctaw.—The Books of Joshua, Judges, and Ruth, translated into the Choctaw Language. 8vo. New York, 1852. sheep. 4s.

Choctaw.—The New Testament of our Lord and Saviour. Translated into the Choctaw Language. 12mo. New York. sheep. 4s.

Clinton.—Memoir on the Antiquities of the Western Parts of the State of New York, by De Witt Clinton. 8vo. Albany, 1818.

Copway.—The Ojibway Conquest; a Tale of the North-west (in verse), by Kah-ge-ga-gah-bowh, or G. Copway, Chief of the Ojibway Nation. 8vo. New York, 1850.

Copway.—The Traditional History and Characteristic Sketches of the Ojibway Nation, by G. Copway, Chief of the Ojibway Nation. Illustrated by Darley. 12mo. Boston, 1851. cloth. 6s.

Cotton.—Vocabulary of the Massachusetts (or Natick) Indian Language, by

and 312. Greenfield, Massachusetts, Ansel Phelps, 1824. N.A.R. xxi. pp. 234—237.

Hunter.—Manners and Customs of several Indian Tribes located West of the Mississippi, including some account of the Soil, Climate, and Vegetable Productions; and the Indian Materia Medica; to which is prefixed the History of the Author's Life during a Residence of several years among them, by John D. Hunter. 8vo, pp. 402. Philadelphia, 1823. 12s.

Indian (the) of New England and the North-eastern Provinces: A Sketch of the Life of an Indian Hunter.—Ancient Traditions relating to the Etchemin Tribe, their Modes of Life, Fishing, Hunting, &c.; with Vocabularies in the Indian and English, giving the names of the Animals, Birds, and Fish, the most complete that has been given for New England in the Languages of the Etchemins and Micmacs. These are now the only Indian tribes to the north-east, the former inhabitants of New England, that have preserved their language entire, being the oldest and purest Indian spoken in the Eastern States. This book is the only work of its kind to be had. It contains the elements of the Indian tongue, and much that is new to the reading public, especially the names by which the red men of the forest designated the natural objects before them. 12mo, pp. 24. Middletown, Connecticut, Charles H. Pelton, printer, 1851.

The first edition had on the title-page the words—"Derived from Nicola Tenesles, by a Citizen of Middletown." Afterwards this was covered by a slip of paper, bearing the words—"By Joseph Barratt, M.D., Member of several Learned Societies." The preface is signed J. B. The book is written by the said Nicola Tenesles.

Indian History (Events in). With an Appendix, and containing an Indian Vocabulary. 8vo. Philadelphia, 1842.

Iroquois.—A Prayer-Book in the Language of the Six Nations of the Indians; containing some of the Prayers of the Protestant Episcopal Church, by the Rev. Salomon Davis. 12mo. New York, 1837. cloth. 2s. 6d.

S. Rafinesque, A.M., Ph.D., &c. 8vo, pp. 212. Philadelphia, 1832.

Rafinesque.—The American Nations; or, Outlines of a National History of the Ancient and Modern Nations of North and South America. 1st number or volume—Generalities and Annals, by Professor C. J. Rafinesque. 12mo, pp. 260. Philadelphia, 1836.

Mr. Rafinesque was a laborious student in almost every conceivable department of knowledge and only wanted the faculty of judicious discrimination to secure him a distinguished name among men of science. He was of foreign birth, and had been a resident in Sicily, and first travelled in the United States in 1802, 1803, and 1804. Before 1815, he had published a very considerable number of treatises, chiefly upon Natural History, from observations in this country and in Sicily, with others of a more general character. In 1815, he returned to America, and had the misfortune to be shipwrecked on the coast; losing, according to his own statement, all his "books, manuscripts, plates, drawings, maps, herbarium, collections, minerals, &c., the fruit of twenty years' labours, exertions, and travels." Some of his lost MSS., on Botany, Zoology, Mineralogy, &c., he undertook to re-write, and endeavoured to obtain subscriptions for their publication here. In 1838, he printed an essay introductory to a proposed work, to be entitled "Researches on the Antiquities and Monuments of North and South America." He died at Philadelphia, in 1840.

Rafn.—America Discovered in the Tenth Century, by Charles C. Rafn. 8vo. New York, 1836. 7s. 6d.

Rasles.—A Dictionary of the Abenaki Language in North America, by Father Sebastian Rasles. Published from the Original Manuscript of the Author; with an Introductory Memoir and Notes, by John Pickering. (Memoirs of the American Academy of Arts and Sciences. New Series. Vol. I. Cambridge, 1833.) 4to. Cambridge, 1833.

Riggs.—Wowapi Mitawa, Tamakece Kagu. My Own Book (in Dakota), by S. R. Riggs. 18mo, pp. 64. Boston, 1842.

Riggs.—Dakota Tawoonspe, or Dakota Lessons; a book designed for Schools, by S. R. Riggs. 12mo, pp. 96. Louisville, Ky, 1850.

Riggs.—Dakota Vocabulary, by S. R. Riggs, Member of the Dakota Mission. 8vo, pp. 120. New York, 1852.

Riggs.—A Grammar and Dictionary of the Dakota Language; collected by the Members of the Dakota Mission, edited by the Rev. S. R. Riggs, A.M., Missionary of the Amer. Board Com. for Foreign Missions. 4to, pp. 414. Washington, 1852. £1 16s.

Riggs and Pond.—The Dakota First Reading-Book, by Stephen Riggs and Gideon H. Pond. 18mo, pp. 50. Cincinnati, 1839.

Rivero and Tschudi.—Peruvian Antiquities, by Mariano Edward Rivero, Director of the Museum of Lima, and John James von Tschudi, Doctor in Philosophy, Medicine, &c. &c. Translated into English, from the original Spanish, by F. L. Hawks, D.D., LL.D. 8vo. New York, 1854. cloth. 6s.

Robertson and Winslett.—Muskokee; or, Creek First Reader, by W. S. Robertson and David Winslett. 12mo, pp. 48. New York, 1856.

Ruz.—A Yucatecan Grammar. Translated from the Spanish into Maya, and abridged, for the Instruction of the Native Indians, by the Rev. J. Ruz, of Merida. Translated from the Maya into English, by John Kingdon, Baptist Missionary, Belize, Honduras. 8vo, pp. 68. Belize, 1848.

Sandford.—A History of the United States before the Revolution, with some Account of the Aborigines, by Ezekiel Sandford. 8vo, pp. 532. Philadelphia, 1819.

Say.—Astronomical and Meteorological Records and Vocabularies of Indian Languages, taken on the Expedition for Exploring the Mississippi and its Western Waters, under the command of Major S. H. Long, by T. Say. 8vo. Philadelphia, 1822.

Schoolcraft.—The Indian in his Wigwam; or, Characteristics of the Red Race of America; from original Notes and Manuscripts, by Henry R. Schoolcraft. With Engravings. 8vo, pp. 416. New York. cloth. 6s.

Schoolcraft.—Travels in the Central Portions of the Mississippi Valley; comprising Observations on its Mineral Geography, Internal Resources, and Aboriginal Population. Performed under the Sanction of the Government, in the year 1821, by Henry Rowe Schoolcraft. Plates. 8vo, pp. iv. and 459. New York: Collins and Hannay, 1825.

Schoolcraft.—Algic Researches; comprising Inquiries respecting the Mental Characteristics of the North American Indians. 1st Series: Indian Tales and Legends. By Henry Rowe Schoolcraft. In 2 vols. 12mo, pp. 244 and 248. New York, 1839. cloth. 18s.

Schoolcraft.—Oneota; or, the Red Race of America: their History, Traditions, Customs, Poetry, Picture-Writing, &c. In Extracts, Journals, and other unpublished Writings, by H. R. Schoolcraft. 8vo. New York, 1844.

Schoolcraft.—Personal Memoirs of a Residence of Thirty Years with the Indian Tribes on the American Frontiers; with brief Notices of Passing Events, Facts, and Opinions, A. D. 1812 to 1842, by Henry R. Schoolcraft. 8vo. Philadelphia, 1853. cloth. £1 1s.

Schoolcraft.—American Indians: their History, Condition, and Prospects, from Original Notes and Manuscripts, by H. R. Schoolcraft. 1 vol. 8vo. Auburn, 1850. 14s.

Schoolcraft.—Historical and Statistical Information respecting the History, Condition, and Prospects of the Indian Tribes of the United States; collected and prepared under the Direction of the Bureau of Indian Affairs, per Act of Congress of March 3rd, 1847, by Henry R. Schoolcraft, LL.D. Illustrated by S. Eastman, Capt. U.S.A. Published by Authority of Congress. Parts 1 to 5. 4to. Philadelphia: Lippincott, Grambo, and Company (Successors to Grigg, Elliot, and Co.). each part, £4 4s.

CONTENTS.

Part I. 1851. pp. 568 and 76 Plates.

1. General History. Synopsis.
   - A. History, National and Tribal.
   - B. Origin.
   - C. Traditions of the Anti-Columbian Epoch.
2. The Mental Type of the Indian Race.
   - A. Generic Views.
3. Antiquities.
   - A. General Archæology.
   - B. Antique Skill in Fortification.
   - C. Erection of Tumuli, or Altars of Sacrifice.
   - D. Evidences of a Fixed Cultivation at an Antique Period.
   - E. The State of Arts and Miscellaneous Fabrics.
   - F. Attempts in Mining and Metallurgy.
   - G. Ossuaries.
   - H. Archæological Evidences of the Continent having been visited by a people having Letters, prior to the Era of Columbus.
4. Physical Geography.
   - A. Geographical Memoranda respecting the Discovery of the Mississippi River; with a Map of its Source.
   - B. Gold Deposits in California.
   - C. Mineralogical and Geographical Notices, denoting the Value of Aboriginal Territory.
   - D. Existing Geological Action of the American Lakes.
   - E. Antique Osteology of the Monster Period.

Schoolcraft.—On the Indian Tribes of the United States—*Continued.*

F. An Aboriginal Palladium ; with a Plate.
G. Minnesota.
5. Tribal Organization, History, and Government.
6. Intellectual Capacity and Character of the Indian Race.
A. Mythology and Oral Traditions.
B. Indian Pictography.
7. Population and Statistics,
A. General Remarks on the Indian Population of the Union.
B. Census Returns of the Indian Tribes of the United States; with their Vital and Industrial Statistics.
C. Tables of the Tribes within the newly-acquired States and Territories.
Appendix.
Inquiries respecting the History, Present Condition, and Future Prospects of the Indian Tribes of the United States.

Part II. 1852. pp. 608 and 80 Plates.

1. General History. Synopsis.
A. Track of Migration.
B. Distribution of Tribes.
C. Physical Traits.
2. Manners and Customs.
A. Generic View.
B. The Constitution of the Indian Family.
C. Forest Teachings.
D. Art of Hunting.
E. Sugar-Making.
F. War and its Incidents.
G. The Wigwam and its Mates.
H. Birth and its Incidents.
I. Death and its Incidents.
K. Games of Chance.
L. The Indian on his Hunting-Ground.
M. Miscellaneous Traits.
3. Antiquities.
4. Physical Geography.
5. Tribal Organization, History, and Government.
6. Intellectual Capacity and Character.
A. Numeration.
B. Art of Recording Ideas.
C. Oral Imaginative Legends.
7. Topical History.
8. Physical Types of the American Indians.
9. Language.
I. Indian Languages of the United States, by H. R. Schoolcraft.
II. Plan of Thought of the American Languages, by Dr. Francis Lieber.

New Jersey.—Collections of the New Jersey Historical Society. 4 vols. 1846 to 1852. 8vo. New York, 1852.

CONTENTS.

Vol. I. East Jersey under the Proprietary Governments, by William A. Whitehead; with "The Model of the Government of East New Jersey, in North America, by George Scott." From the original edition of 1685. New Jersey Historical Society, 1846. pp. 341.
Vol. II. The Life of Lord Stirling. 1847. pp. 341.
Vol. III. The Provincial Courts of New Jersey; with Sketches of the Bench and Bar, by Richard S. Field. 1849. pp. 311.
Vol. IV. The Papers of Lewis Morris, Governor of the Province of New Jersey, from 1738 to 1746. pp. 336.

New Jersey Historical Society, Proceedings of, from 1845 to 1850. 4 vols. in 1. 8vo. New York.

New York.—Collections of the New York Historical Society. First Series, 5 vols. 1809 to 1830. Second Series, Vol. I. to III. Part 1. 1841 to 1857. 8vo. New York. price per vol., 12s.

New York.—Proceedings of the New York Historical Society, 1843—1849. 7 vols. 8vo. New York. price per vol., 12s.

New York.—Historical Sketch of the Rise and Progress of the Metropolitan City of America, by a New-Yorker. 12mo. New York, 1853.

Newell.—History of the Revolution in Texas, particularly of the War of 1835-36; with Geographical and Statistical Accounts, by the Rev. Chester Newell. 12mo, pp. xii. and 215. New York, Wiley and Putnam, 1838.

Nicaragua.—The Destiny of Nicaragua: Central America as it Was, Is, and May Be, by an Officer in the Service of General Walker. 8vo, pp. 70. Boston, 1856. sewed. 1s. 6d.

Niles.—Principles and Acts of the Revolution in America; or, an Attempt to Collect and Preserve some of the Speeches, Orations, and Proceedings; with Sketches and Remarks on Men and Things, and other Fugitive or Neglected Pieces belonging to the Revolutionary Period in the United States, which happily terminated in the establishment of their liberties; with a view to represent the feelings that prevailed in the "times that tried men's souls," to excite a love of freedom, and lead the people to vigilance, as the condition on which it is granted: dedicated to the Young Men of the United States, by H. Niles. 8vo, pp. 504. Baltimore, 1822. cloth.

Niles.—History of South America and Mexico, by John M. Niles. 8vo. Hartford. 12s.

Norman.—New Orleans and Environs; containing a Brief Historical Sketch of the Territory and State of Louisiana and the City of New Orleans, from the earliest period to the present time, presenting a complete Guide to the . . . Southern Metropolis. Plan, Engravings. 18mo. New Orleans, 1845.

North Carolina.—Indexes to Documents relative to North Carolina during the Colonial Existence of the said State: now on file in the Offices of the Board of Trade and State Paper Offices in London. Transmitted in 1827, by Mr. Gallatin, then the American Minister in London, and now published by Resolution of the Legislature of 1842-43, under the direction of the Public Treasury. 12mo, pp. 120. Raleigh, T. Loring, 1843.

O'Callaghan.—Commissary Wilson's Orderly-Book. In Amherst's Expedition against Ticonderoga and Crown Point, 1759. Accompanied by an

Introduction, Notes, and Index, by E. B. O'Callaghan, M.D.,LL.D. 4to, pp. 220, old style type. Albany, 1857. 18s.

It was in these Expeditions, it will be recollected, that many of the American Officers of the Revolutionary War were trained for the positions in which they so signally distinguished themselves in that great event; a consideration which adds to the interest and historical value of these neglected episodes of American History.

O'Callaghan.—History of New Netherlands; or, New York under the Dutch, by E. B. O'Callagan. 2 vols. 8vo. New York, 1846.

O'Callaghan.—The Documentary History of the State of New York; arranged under the direction of the Hon. Charles Morgan, by E. B. O'Callaghan, M.D. With Plates and Maps. 4 vols. 8vo. Albany, 1849. cloth.

Ohio.—Transactions of the Historical and Philosophical Society of Ohio. Vol. I. Portrait. 8vo, pp. 334. Cincinnati, 1839.

Oliver.—The Puritan Commonwealth: an Historical Review of the Puritan Government in Massachusetts, in its Civil and Ecclesiastical Relations, from its Rise to the Abrogation of the First Charter; together with some general Reflections on the English Colonial Policy, and on the Character of Puritanism, by the late Peter Oliver. 8vo, pp. 502. Boston. cloth. 16s.

Onderdonk. — Revolutionary Incidents of Suffolk, Queen's, and King's Counties, Long Island, and the British Prisons and Prison-Ships at New York, by H. Onderdonk, Jun. 8vo. New York, 1849. 4s. 6d.

Onis and Watkins.—Memoir upon the Negociations between Spain and the United States of America, which led to the Treaty of 1819, by D. Luis de Onis. Translated from the Spanish, with Notes, by Tob. Watkins. 8vo, pp. 152. Baltimore, 1821.

Orton.—Camp-Fires of the Red Men; or, a Hundred Years Ago, by J. R. Orton. Illustrated by Walcutt. crown 8vo, pp. 401. New York. cloth. 7s. 6d.

Wallis.—Glimpses of Spain; or, Notes of an Unfinished Tour, by S. T. Wallis. post 8vo. New York, 1849. cloth. 7s.

Walsh.—Notices of Brazil in 1828 and 1829, by the Rev. R. Walsh. 2 vols. 12mo, pp. 290 and 299. Boston, 1831.

Ward.—India and the Hindoos: a View of the Geography, History, Customs, Religion, &c. &c., of India and the Hindoos, by the Rev. F. De W. Ward. 12mo. New York, 1850. cloth. 7s. 6d.

Ward.—English Items; or, Microscopic Views of England and Englishmen, by Matthew T. Ward. 8vo. New York, 1853.

Warden.—A Chorographical and Statistical Description of the District of

Columbia, by David Bailie Warden. 8vo. Paris, Smith, Barbois, and Delaunay, 1816.

Ware.—Sketches of European Capitals, by William Ware. 12mo, pp. 326. Boston, 1851. cloth.

Warren.—Explorations in the Dacota Country in the Year 1855, by Lieut. G. K. Warren, Topographical Engineer of the Sioux Expedition. Maps, &c. 8vo, pp. 82. Washington, 1856. sewed. 12s.

Warren.—Vagamundo; or, the Attaché in Spain; including a Brief Excursion into the Empire of Morocco, by John Esajas Warren. 8vo. New York, 1851.

Warren.—Para; or, Scenes and Adventures on the Banks of the Amazon, by John Esajas Warren. 12mo. New York, 1851. 6s.

Warringer.—Journal of a Cruise in the United States Frigate "Potomac" round the World, in 1831—1834, by Francis Warringer. 12mo. New York, 1835.

Webb.—Altowan; or, Incidents of Life and Adventure in the Rocky Mountains, by an Amateur Traveller. Edited by J. Watson Webb. 2 vols. 8vo. New York, 1846.

Webber.—Old Hicks the Guide; or, Adventures in the Camanche Country in Search of a Gold Mine, by C. W. Webber. 12mo. New York. cloth. 6s.

Webster.—Description of the Island of St. Michael's; with Remarks on the other Azores, by John W. Webster. 8vo. Boston. 1819. 9s.

Wells. — Walker's Expedition to Nicaragua: a History of the Central American War, and the Sonora and Kinney Expeditions; including all the recent Diplomatic Correspondence, together with a new and accurate Map of Central America, and a Memoir and Portrait of General William Walker, by William V. Wells. 12mo, pp. 316. New York, 1856. cloth. 3s. 6d.

Wells.—Explorations and Adventures in Honduras; comprising Sketches of Travel in the Gold Regions of Olancho, and a Review of the History and General Resources of Central America, by William V. Wells. With original Maps and numerous Illustrations. royal 8vo, pp. xxiv. and 588. New York, 1857. 14s.

West Indies.—A Winter in the West Indies and Florida; containing general Observations upon Modes of Travelling, Manners and Customs, Climate and Productions, with a particular Description of St. Croix, Trinidad de Cuba, Havana, Key West, and St. Augustine, as Places of Resort for Northern Invalids, by an Invalid. 12mo, pp. 199. New York, 1839.

Wetmore.—Gazetteer of the State of Missouri .... with an Appendix, containing Frontier Sketches and Illustrations of Indian Character, by Alphonso Wetmore. Map. Plate. 8vo, pp. 382. St. Louis, 1837.

Wheeler.—Extracts from the Letters and Journals of Daniel Wheeler, in the Islands of the Pacific, Van Diemen's Land, New South Wales, and New Zealand. 8vo. Philadelphia, 1840.

Whittier.—Stranger in Lowell, by J. G. Whittier. 12mo. Boston. 1s. 6d.

Wilkes.—Europe in a Hurry, by George Wilkes. 8vo. New York, 1852.

Wilkes.—Western America, including California and Oregon; with Maps of those Regions and of the Sacramento Valley, by Charles Wilkes, U.S.N. 8vo. Philadelphia, 1849.

Wilkes.—Narrative of the United States Exploring Expedition around the World, by Charles Wilkes, U.S.N. New edition. In 5 vols. imperial 8vo. New York, 1856. £5 5s.

This great and truly national American work is published in a style of superior beauty, containing 64 large and finished Line Engravings, embracing Scenery, Portraits, Manners, Customs, &c., &c.; 47 exquisite Steel Vignettes; about 250 finely-executed Woodcut Illustrations; 14 large and small Maps and Charts; and nearly 2600 pages of Letter-Press.

Williams.—A Description of the U. S. Lands in Iowa . . . with an Appendix on Iowa Territory, by Jesse Williams. Map. 16mo, pp. 180. New York, Colton, 1840.

Williams.—The Isthmus of Tehuantepec; being the Result of a Survey for a Railway to connect the Atlantic and Pacific Oceans, made by the Scientific Commission, under the direction of Major J. G. Barnard, U. S. Engineer, with a Résumé of the Geology, Climate, Local Geography, Production, Industry, Fauna and Flora of that Region, by J. J. Williams, Principal Assistant Engineer. Illustrated with numerous Maps and Engravings. 2 vols. 8vo. New York, 1852. cloth. £1 1s.

Williams.—A View of West Florida; embracing its Geography, Topography, &c.; with an Appendix, treating of its Antiquities, Land Titles, and Canals; and containing a Map, exhibiting a Chart of the Coast, a Plan of Pensacola, and the Entrance of the Harbour, by John Lee Williams. Map by Tanner. 8vo, pp. 178. Philadelphia, 1827.

Williams.—The Middle Kingdom: a Survey of the Geography, Government, Education, Social Life, Arts, Religion, &c., of the Chinese Empire and its Inhabitants; with a new Map of the Empire, and numerous Illustrations, by S. Wells Williams. 3rd edition. In 2 vols. With a Map of the Chinese Empire and Plates. 8vo, pp. xviii. and 590, and viii. and 614. New York, 1857. cloth. £1 1s.

Willis.—Summer Cruise in the Mediterranean, on Board an American Frigate, by N. Parker Willis. 12mo. New York, 1853. cloth. 6s.

Willis.—Famous Persons and Places, by N. P. Willis. 12mo. New York, 1854. cloth. 7s. 6d.

Willis.—A Health Trip to the Tropics, by N. P. Willis. 1 vol. post 8vo. New York, 1855. 10s. 6d.

Wilson.—Western Africa; its History, Condition, and Prospects, by the Rev. J. Leighton Wilson. With numerous Engravings. post 8vo, pp. 526. London, 1856. cloth. 8s. 6d.

Wilson.—Mexico and its Religion; or, Incidents of Travel in that Country during parts of the years 1851—1854; with Historical Notices of Events connected with Places visited, by Robert A. Wilson. With Illustrations. 12mo. New York. cloth. 6s.

Wines.—Two Years and a Half in the Navy; or, a Cruise in the Mediterranean, by E. C. Wines. 2 vols. 12mo. Philadelphia, 1832. 7s. 6d.

Wines.—A Trip to Boston, by E. C. Wines. 12mo. Boston, 1838.

Wines.—A Peep at China in M. Dunn's Chinese Collection, by E. C. Wines. 8vo. Philadelphia, 1839.

Wise.—Los Gringos; or, an Inside View of Mexico and California; with Wanderings in Peru, Chili, and Polynesia, by Lieut. Wise, U.S.N. 12mo, pp. 453. New York, 1857 7s. 6d.

Wise.—Scampavias from Gibel Tarek to Stamboul, by Harry Gringo (Lieut. Wise, U.S.N.) 12mo, pp. 862. New York, 1857. 7s. 6d.

Wislizenus.—Ein Ausflug nach den Felsengebirgen, im Jahre 1839, von F. A. Wislizenus, M.D. Map. 12mo. Saint Louis, Mo., W. Weber, 1840.

Wislizenus.—Memoir of a Tour to Northern Mexico, connected with Colonel Doniphan's Expedition, in 1846 and 1847, by A. Wislizenus, M.D. With 3 Maps. 8vo. Washington, 1848. 7s.

Wood.—Wandering Sketches of People and Things in South America, Polynesia, California, and other Places visited during a Cruise in the U.S. Ships "Levant, Portsmouth, and Savanna," by W. M. Wood, M.D. 8vo. Philadelphia, 1849.

Wuderman.—Notes on Cuba, by a Physician (Dr. Wuderman). 8vo. Boston, 1844.

Wyeth.—Oregon; or, a Short History of a Long Journey from the Atlantic Ocean to the Rocky Mountains, by J. B. Wyeth. 18mo, pp. 87. Cambridge, 1833.

XVII.

USEFUL ARTS.

ARCHITECTURE, CANALS, ENGINEERING, MACHINES, MANUFACTURES, MECHANICS, RAILWAYS, TRADES, &c.

Adams.—Typographia; or, the Printer's Instructor, by Thomas F. Adams. 12mo. Philadelphia, 1845. cloth. 7s. 6d.

Allen.—Rural Architecture; being a complete Description of Farm Houses, Cottages, and Out-buildings; together with Lawns, Pleasure Grounds, and Parks; also, Useful and Ornamental Domestic Animals for the Country Resident, by Lewis F. Allen. Illustrated. 12mo. New York, 1852. half-bound. 6s.

Allen.—Philosophy of the Mechanics of Nature and the Source and Modes of Action of Natural Motive Power, by Z. Allen. Illustrated by numerous Woodcuts. 1 vol. large 8vo. New York, 1852. cloth. £1 1s.

Alsop.—A Treatise on Surveying; in which the Theory and Practice are fully explained; preceded by a Short Treatise on Logarithms; and also by a Compendious System of Plane Trigonometry; the whole illustrated by numerous Examples, with Appendix and Mathematical Tables, by Samuel Alsop. 8vo, pp. 328. Philadelphia, 1857. cloth. 12s.

American Machinery.—A Collection of Drawings in detail of the most approved construction of American Machinery; with Descriptions, Calculations, and Specifications, by the American Engineering Society of New York. royal folio. New York, 1852. cloth. £3 3s.

American Polytechnical Journal, devoted to Science, Mechanics, Arts, and Agriculture. Conducted by Prof. Charles G. Page, J. J. Greenough, M. E., Charles L. Fleischman, C. E. Nos. 1 to 13, being Vols. I. and II., in 6 Nos. each. Vol. III. No. 1. January, 1853, to January, 1854 (all that is published). 8vo. New York. sewed. £1 12s. 6d.

American Railroad Journal (the), and Advocate of Internal Improvements. First Series, commenced Jan. 2, 1831, and continued to June, 1838. 7 vols. 4to. New York, 1831—1838.

American Railroad Journal (the), 2nd Series, and Mechanics Magazine. Jan. 1839, to Dec. 1842. 9 vols. 8vo, being Vols. VIII. to XV. of the whole Series. New York, 1839—1842.

American Railroad Journal (the), 3rd Series. Jan. 1843, to Dec. 1844. 4 vols. 8vo, being Vols. X. to XIII. of the 8vo Series, and Vols. XVI. to XIX. of the whole Series. New York, 1843, 1844.

American Railroad Journal (the), 2nd 4to Series, and General Advertiser for Railroads, Canals, Steamboats, Machinery, and Mines. Jan. 1845, to Dec. 1856, being Vols. VIII. to XVIII. of the 4to Series, and Vols. XX. to XXX. of the whole Series. New York, 1845—1856.

And continued weekly. Edited by Henry V. Poor. Subscription, £1 10s. per annum.

Anderson.—American Villa Architecture, by C. F. Anderson. oblong folio. New York, 1853.

Annual of Scientific Discovery; or, Year-Book of Facts in Science and Art; exhibiting the most important Discoveries and Improvements in Mechanics, Useful Arts, Natural Philosophy, Chemistry, Astronomy, Meteorology, Zoology, Botany, Mineralogy, Geology, Geography, Antiquities, &c.; together with a List of Recent Scientific Publications, a Classified List of Patents, Obituaries of eminent Scientific Men, an Index of important Papers in Scientific Journals, Reports, &c. Edited by David A. Wells, A.M. Vols. I. to IX. 12mo. Boston, 1850—1858. cloth. per annual vol., 7s. 6d.

Annual Report of the State Engineer and Surveyor on the Railroads of the State of New York. 8vo, pp. 424. New York, 1854. sewed. 5s.

Antisell.—Handbook of the Useful Arts; including Agriculture, Architecture, Domestic Economy, Engineering, Machinery, Manufactures, Mining, Photogenic and Telegraphic Art, by T. Antisell, M.D. 8vo. New York, 1852. 12s.

Appleton.—Appleton's Dictionary of Machines, Mechanics, Engine-work, and Engineering; designed for Men of Science, practical Working-men, and those intended for the Engineering Profession. Containing over 4000 Engravings on Wood. 2 vols. royal 8vo. New York, 1851. £3 12s.

Appleton's Mechanic's Magazine and Engineer's Journal. January to December, 1851. Edited by Julius W. Adams, C. E. Illustrated with nearly 600 Woodcuts. 8vo, pp. viii. and 768. New York. cloth.

Appleton's Mechanic's Magazine and Engineer's Journal. Edited by Julius W. Adams, Architect and Civil Engineer. Vol. II. January to December, 1852. With numerous Plates. 4to, pp. 294. New York, 1853. cloth.

Armengaud.—The Practical Draughtsman's Book of Industrial Design, and Machinist's and Engineer's Drawing Companion, &c. Translated from the French of Armengaud the Elder, Armengaud the Younger, and Amourond, Civil Engineers, by Wm. Johnson. 4to. New York, 1854. cloth. £1 11s. 6d.

Arnot.—Gothic Architecture applied to Modern Residences; containing Designs for Entrances, Halls, Stairs, and Parlours, Window Frames, and Door Panellings; the Jamb and Label Mouldings to a large scale; the Decorations of Chimney Brests and Mantels; Panelling and Groining of Ceilings, with the appropriate Furniture; the whole illustrated with Working and Perspective Drawings, and forming all the necessary parts of a Modern Dwelling, by D. B. Arnot. Illustrated with 40 Plates. 4to. New York. cloth. £1 1s.

Bache.—Report of Experiments to Navigate the Chesapeake and Delaware Canal by Steam, by A. D. Bache. 8vo. Philadelphia, 1834.

Baird.—The American Cotton-Spinner and Managers' and Carders' Guide: a Practical Treatise on Cotton Spinning, by Robert H. Baird. 12mo. Philadelphia, 1851. 6s.

Baker.—Elements of Mechanism, and the Practical Construction of Machines, by T. Baker. 16mo. Philadelphia, 1855 cloth. 6s.

Barnard.—School Architecture; or, Contributions to the Improvements of School-houses in the United States, by Henry Barnard, LL.D., Superintendent of Common Schools in Connecticut. 8vo, pp. 468. New York, 1854. cloth. 12s.

Barnard.—Practical Illustrations of the Principles of School Architecture, by H. Barnard, Superintendent of Common Schools in Connecticut. With 163 Woodcuts. 2nd edition. 8vo, pp. 176. New York, 1854. sewed. 3s. 6d.

Bartlett.—Elements of Analytical Mechanics, by W. H. C. Bartlett, LL.D. 8vo. New York. half-bound. 16s.

Bartol.—A Treatise on the Marine Boilers of the United States, by B. H. Bartol, Engineer. Plates. 8vo, pp. 144. Philadelphia, 1851. cloth. 10s.

Beans.—A Manual for Practical Surveyors; containing Methods indispensably necessary for Actual Field Operations, by E. W. Beans. 12mo, pp. 108. Philadelphia, 1854. cloth. 4s. 6d.

Bigelow.—The Useful Arts, considered in Connexion with the Applications of Science, by Jacob Bigelow, M.D. With numerous Engravings. 2 vols. 12mo. New York, 1855. cloth. 9s.

Borden.—A System of Useful Formulæ, adapted to the Practical Operations of Locating and Constructing Railroads: a Paper read before the Boston Society of Civil Engineers, by Simeon Borden, Civil Engineer. With Plates. 8vo, pp. 188. Boston, 1850. cloth. 14s

Boucharlat.—Elementary Treatise on Mechanics. Translated from the French, with additions, by E. H. Courtenay. 8vo. New York. 12s.

Bowen.—The Coal Regions of Pennsylvania, with Statistical Tables, by Eli Bowen. 8vo. Pottsville, 1848.

Bowler.—Chapel and Church Architecture, with Designs for Parsonages, by the Rev. George Bowler. 41 Plates, some coloured. folio. Boston, 1856. £2 12s. 6d.

Bullock.—The American Cottage Builder; a Series of Designs, Plans, and Specifications, from 200 dollars to 20,000 dollars, for Homes for the People, by John Bullock. 22 Plates and Woodcuts. 12mo, pp. 326. New York, 1854. cloth. 10s. 6d.

Burgess.—The Ambrotype Manual; a Practical Treatise on the Art of taking Positive Photographs on Glass, commonly known as Ambrotypes; containing all the various Recipes for making Collodions; Preparation and Use of the Nitrate Bath; Developing Solutions, Varnishes, &c. &c., as practised by the most successful Operators in the United States; to which is added, the Practice of the Negative Process and Positive Photographs on Paper, by N. G. Burgess. 3rd edition. 12mo, pp. 184. New York, 1857. cloth. 5s.

Byrn.—The Complete Practical Distiller; comprising the most perfect and exact Theoretical and Practical Description of the Art of Distillation and Rectification, &c., by M. Lafayette Byrn, M.D. With Engravings. 12mo. Philadelphia. cloth. 6s.

Byrn.—Artist and Tradesman's Companion, by M. L. Byrn. 12mo. New York, 1853. cloth. 6s.

Byrne.—The Calculator's Constant Companion for Practical Men, Machinists, Mechanics, and Engineers, by Oliver Byrne. 16mo. Philadelphia, 1852. cloth. 5s.

Byrne.—The Practical Model Calculator, for the Engineer, Mechanic, Machinist, Manufacturer of Engine-Work, Naval Architect, Miner, and Millwright, by O. Byrne, C. E. 8vo, pp. 593. Philadelphia, 1852. cloth. 14s.

Byrne.—The American Engineer, Draughtsman, and Machinist's Assistant: designed for Practical and Working Men, Apprentices, and those intended for the Engineering Profession, by Oliver Byrne. Illustrated with 200 Engravings on Wood, and 14 large Engraved Lithographed Plates of recently-constructed American Machinery and Engine Work. small folio. Philadelphia, 1854. cloth. £1 8s.

Byrne.—Pocket-Book for Railroad and Civil Engineers: containing new, exact, and concise Methods for Laying-out Railroad Curves, Switches, Frog Angles, and Crossings; the Staking-out of Work; Levelling; the Calculation of Cuttings and Embankments, Earthworks, &c., by Oliver Byrne. 12mo, pp. 163. New York, 1856. roan tuck. 7s. 6d.

Canals.—Public Documents relating to the New York Canals, which are to connect the Western and Northern Lakes with the Atlantic Ocean; with an Introduction. Printed under the Direction of the New York Corresponding Association, for the Promotion of Internal Improvements. 8vo, pp. 536. New York, 1821.

Canals.—Laws of the State of New York in relation to the Erie and Champlain Canals; together with the Annual Reports of the Canal Commissioners. Maps and Plates. 2 vols. 8vo. Albany, 1825. £1 10s.

Canals.—Report of the Select Committee of the Assembly of 1846, upon the Investigation of Frauds in the Expenditures of the Public Moneys upon the Canals of the State of New York. 8vo. Albany, 1847. 10s.

Carey.—Connected View of the whole Internal Navigation of the United States, Natural and Artificial, Present and Prospective, &c., by a Citizen of the United States (M. Carey). With a Map and Statistical Details. 2nd edition. 8vo. Philadelphia, 1830.

Carstensen and Gildemeister.—New York Crystal Palace. Illustrated Description of the Building, by Geo. Carstensen and Chas. Gildemeister, Architects of the Building. With an Oil-colour Exterior View, and 6 large Plates, containing Plans, Elevations, &c., from the Working Drawings of the Architects. royal 8vo, pp. 76. New York, 1854. cloth. 12s.

Cleaveland.—The Requirements of American Village Homes Considered

and Suggested; with Designs for such Houses of moderate cost, by Henry W. Cleaveland, Wm. Backus, and Samuel D. Backus. With 100 Engravings. 8vo, pp. 200. New York, 1856. cloth. 12s.

Colburn.—The Locomotive Engine; including a Description of its Structure, Rules for Estimating its Capabilities, and Practical Observations on its Construction and Management, by Zerah Colburn. New edition. 12mo. Boston, 1851. cloth. 4s. 6d.

Colden.—Memoir, containing the History and the Description of the great Canals of the State of New York, by Cadwallader D. Colden. 47 Maps and Plates. 4to, pp. 408. New York, 1825.

Cole and Vernam.—The Contractor's Book of Drawings of Tools and Machines used in Constructing Canals, Railroads, and other Works; with Bills of Timber and Iron Works; also, Tables and Data for calculating the Cost of Earth and other kinds of Work, by Cole and Vernam, C. E. folio, pp. 60. Buffalo, N. Y., 1855. £3 3s.

Comparative Views of the most important Anthracite Collieries in Pennsylvania; exhibiting their Avenues to Tide Waters; with an Appendix, Map, and Draught of Comparative Heights and Distances. 8vo. Pottsville, P., 1835.

Comstock.—A History of the Precious Metals, from the Earliest Periods to the Present Time; with Directions for Testing their Purity, by J. L. Comstock, M.D. 8vo. Hartford, 1849.

Coues.—Outlines of a System of Mechanical Philosophy; being a Research into the Laws of Force, by Samuel Elliott Coues. 12mo, pp. 336. Boston, 1851. cloth. 6s.

Cupper.—The Universal Stair Builder; being a New Treatise on the Construction of Staircases and Handrails, showing Plans of the various form of Stairs, Method of Placing the Risers in the Cylinders; general Method of describing the Face Moulds for a Hand-rail, and an expeditious Method of Squaring the Rail; useful to Stonemasons, constructing Stone Stairs and Hand-rails; with a New Method of Sawing the twist part of any Hand-rail square from the face of the Plank, and to a parallel width; also, a new Method of Forming the Easings of the Rail by a Gauge; preceded by some necessary Problems in Practical Geometry, with the Sections of Prismatic Solids, by R. A. Cupper. Illustrated by 29 Plates. 4to, pp. 30. New York, 1851. half-bound. £2 2s.

Curtis.—The Inventor's Manual of Legal Principles, and Guide to the Patent Office, by George T. Curtis. 12mo. Boston, 1857. 7s.

Cutbush.—System of Pyrotechny; comprehending the Theory and Practice, with the Application to Chemistry, by Jas. Cutbush. 8vo. Philadelphia, 1825.

Daguerreotype.—Plain Directions for obtaining Photographic Pictures by the Calotype and Energiatype; also, upon Albumenized Paper and Glass, by Collodion and Albumen, &c. &c. Including a Practical Treatise on Photography; with a Supplement, containing the Heliochrome Process. Also, Practical Hints on the Daguerreotype; being simple Directions for obtaining Portraits, Views, Copies of Engravings, Drawings, Sketches of Machinery, &c., by the Daguerreotype Process; including the latest Improvements in Fixing, Colouring, and Engraving the Pictures; with a Description of the Apparatus. Illustrated with Engravings. 12mo, pp. 224. New York, 1855. cloth. 5s.

D'Aubuisson.—A Treatise on Hydraulics, for the Use of Engineers, by J. F. D'Aubuisson De Voisins. Translated from the French, and adapted to the English Units of Measure, by Joseph Bennett, Civil Engineer. New edition. 8vo, pp. 556. New York, 1858. cloth. 18s.

Davis.—Book of the Telegraph; with numerous Illustrations, by Daniel Davis. 12mo. New York. sewed. 1s. 6d

Downing.—The Architecture of Country Houses, including Designs for Cottages, Farm Houses, and Villas; with Remarks on Interiors, Furniture,

and best Modes of Warming and Ventilating, by A. J. Downing. With 320 Illustrations. 8vo. New York, 1850. £1 4s.

Downing.—Cottage Residences; or, a Series of Designs for Rural Cottages and Cottage Villas, and their Gardens and Grounds, adapted to North America, by A. J. Downing. 8vo. New York, 1850. cloth. 14s.

Duncan.—The Practical Surveyor's Guide; containing the necessary Information to make any Person of common capacity a finished Land Surveyor without the Aid of a Teacher, by Andrew Duncan. fscap 8vo. Philadelphia, 1854. cloth. 4s. 6d.

Dyer and Colour Maker's Companion (the); containing upwards of 200 Receipts for making Colours on the most Approved Principles, for all the various Styles and Fabrics now in Existence; together with the Scouring Process, and Plain Directions for Preparing, Washing off, and Finishing the Goods. 12mo. Philadelphia, 1850. cloth. 5s.

Dyeing and Calico Printing; Including the latest Inventions and Improvements; with an Appendix, comprising Definitions of Chemical Terms, with Tables of Weights, Measures, Thermometers, Hydrometers, &c., by an Experienced Dyer, and assisted by several Scientific Gentlemen. Illustrated. 8vo. New York, 1846. cloth. 18s.

Earle.—A Treatise on Railroads and Internal Communication; compiled from the best Authorities, with Original Suggestions and Remarks, by Thomas Earle. 8vo. Philadelphia, 1830.

Eastman.—Treatise on Topographical Drawing, by Lieut. Eastman, U. S. Army. Plates. 8vo. New York, 1839. cloth. 9s.

Eaton.—Engineering and Surveying, by Amos Eaton. 4to. New York. 10s.

Elliott.—Cottages and Cottage Life; containing Plans for Country Houses, adapted to the Means and Wants of the People of the United States, by C. W. Elliott. 8vo. Cincinnati, 1848.

Ellet.—The Mississippi and Ohio Rivers; containing Plan for the Protection of the Delta from Inundation, and Investigations of the Practicability and Cost of Improving the Navigation of the Ohio and other Rivers by means of Reservoirs; with an Appendix on the Bars at the Mouths of the Mississippi, by Chas. Ellet, jun., C. E. royal 8vo. Philadelphia, 1853. cloth. 16s.

Evans.—The Young Millwright, and Miller's Guide, by Oliver Evans. With Additions and Corrections, by Thomas P. Jones. With a Description of an Improved Merchant Flour-Mill, with Engravings, by C. and O. Evans, Engineers. Illustrated by 28 descriptive Plates. 14th edition. 8vo, pp. 410. Philadelphia, 1853. sheep. 16s.

Ewbank.—A Descriptive and Historical Account of Hydraulic and other Machines for Raising Water, Ancient and Modern: with Observations on Various Subjects connected with the Mechanic Arts: including the Progressive Development of Steam Engines, &c. &c., by Thomas Ewbank. In 5 Books, illustrated by nearly 300 Engravings. 14th edition, revised and corrected; to which is added, a Supplement. 8vo, pp. xvi. and 608. New York, 1856. cloth. 18s.

Feuchtwanger.—A Treatise on Gems, in Reference to their Practical and Scientific Value; a Useful Guide for the Jeweller, Amateur, Artist, Lapidary, Mineralogist, and Chemist; accompanied by a Description of the most Interesting American Gems, and Ornamental and Architectural Materials, by Dr. Lewis Feuchtwanger, Chemist and Mineralogist; Member of N. Y. Lyceum of Natural History, &c. &c. 8vo, pp. 162. New York, 1838. cloth. 9s.

Field.—City Architecture; or, Designs for Dwelling-Houses, Stores, Hotels, &c., in 20 Plates; with Descriptions, and an Essay on the Principles of Design, by M. Field. 8vo, pp. 76. New York, 1854. cloth. 10s. 6d.

Foucaud.—The Book of Illustrious Mechanics of Europe and America. Translated from the French of Edward Foucaud. Edited by John Frost, LL.D. With Engravings. 12mo, pp. 344. New York. cloth. 5s.

Fowler.—A Home for All; or, a New, Cheap, Convenient, and Superior Mode of Building, by O. S. Fowler. 8vo. New York, 1853. sewed. 2s.

Fowler.—A Home for All; or, the Gravel Wall and Octagon Mode of Building, by O. S. Fowler. post 8vo. New York, 1853. 5s.

Francis.—Lowell Hydraulic Experiments; being a Selection from Experiments on Hydraulic Motors, on the Flow of Water over Weirs, and in Canals of Uniform Rectangular Section and of Short Length, made at Lowell, Massachusetts, by James B. Francis. With 15 large two-page Engravings. 4to, pp. 168. Boston, 1855. cloth. £2 8s.

Genet.—Memorial on the Upward Forces of Fluids, and their Applicability to several Arts, Sciences, and Public Improvements, by Edmond C. Genet. 8vo. Albany, 1825.

Gillespie.—A Manual of the Principles and Practice of Road-making; comprising the Location, Construction, and Improvement of Roads (Common, Macadam, Paved, Plank, &c.) and Railroads, by W. M. Gillespie, A.M., C.E., Professor of Civil Engineering in Union College. 8th edition, with additions. post 8vo, pp. 372. New York. cloth. 9s.

Gillespie.—A Treatise on Land-Surveying: comprising the Theory developed from Five Elementary Principles; and the Practice with the Chain alone, the Compass, the Transit, the Theodolite, the Plane Table, &c., by W. M. Gillespie, A.M., C.E., Professor of Civil Engineering in Union College, &c. Illustrated by 400 Engravings and a Magnetic Chart. 8vo, pp. 464. New York. half-bound. 10s. 6d.

Goodrich.—Science and Mechanism: Illustrated by Examples in the New York Exhibition, 1853-4; including extended Descriptions of the most Important Contributions in the various Departments, with Annotations and Notes relative to the Progress and Present State of Applied Science and the Useful Arts. Edited by C. R. Goodrich, Esq., aided by Professors Hall, Silliman, and other Scientific and Practical Men. royal 4to, pp. 266 New York, 1855. cloth. £1 5s.

Greeley.—Art and Industry, as represented in the Exhibition at the Crystal Palace, New York, 1853-4; showing the Progress and State of the various Useful and Æsthetic Pursuits. From the "New York Tribune." Revised and edited by H. Greeley. post 8vo, pp. 386. New York, 1854. cloth. 7s.

Griffiths.—A Treatise on Marine and Naval Architecture; or, Theory and Practice blended in Ship-Building, by J. W. Griffiths. Illustrated with more than 50 Engravings. 3rd edition. With lines of the Yacht "America." 4to. New York. cloth. £1 11s. 6d.

Griffiths.—The Ship-Builder's Manual and Nautical Referee, by John W. Griffiths, Marine Architect and Practical Ship-Builder. Illustrated with Tables and Engravings. New edition. 2 vols. in one. 4to, pp. 386. New York. cloth. £1 5s.

Griscom.—The Uses and Abuses of Air; showing its Influence in Sustaining Life and Producing Disease; with Remarks on the Ventilation of Houses, &c., by John H. Griscom, M.D. 2nd edition. With Illustrations. 8vo. New York, 1850. cloth. 7s. 6d.

Griswold.—Railroad Engineer's Pocket Companion for the Field; comprising Rules for Calculating Deflexion and Angles, Tangential Distances and Angles, and all necessary Tables for Engineers; also the Art of Levelling, from Preliminary Survey to the Construction of Railroads; intended expressly for the young Engineer; together with numerous valuable Rules and Examples, by W. Griswold. 18mo. Auburn, 1855. roan tuck. 6s. 6d.

Guide to Workers in Metal and Stone. Four Numbers. 4to. Philadelphia. half-bound. £3

Haines.—Collection of Documents relating to the New York Canals, by C. G. Haines. 8vo. New York, 1821.

Haley.—The Daguerreotype Operator; a Practical Work, containing the most approved Methods for producing Daguerreotypes; together with all the late

with Practical Observations on Construction, with all the important Details, on a Scale sufficiently large and definite to enable the Builder to execute with accuracy: and farther, Designs of Churches, Monuments, and Public Buildings; together with a Glossary of Architectural Terms: the whole being the result of more than Thirty Years' Professional Experience, by Minard Lafever. 4to, pp. 526. New York, 1856. half-morocco. £5

Larkin.—The Practical Brass and Iron Founder's Guide: a Concise Treatise on the Art of Brass-founding, Moulding, &c.; with numerous Practical Rules, Tables, and Receipts for Gold, Silver, Tin, and Copper Founding; Plumbers, Bronze and Bell-Founders, Jewellers, &c. &c., by James Larkin. 12mo. Philadelphia. 4s. 6d.

Leather-Work, Complete Ornamental Guide to. 18mo. Boston, 1854. cloth. 3s.

Leonard.—The Mechanical Principia; containing all the various Calculations on Water and Steam Power, and on the Different Kinds of Machinery used in Manufacturing; with Tables showing the Cost of Manufacturing Different Styles of Cotton Goods, by Charles Elbredge Leonard. 12mo, pp. 198. New York, 1848. cloth. 8s.

Lesley.—Manual of Coal and its Topography; illustrated by Original Drawings, chiefly of Facts in the Geology of the Appalachian Region of the United States of North America, by J. P. Lesley. 8vo, pp. 224. Philadelphia, 1856. cloth. 6s.

Lieber.—The Assayer's Guide; or, Practical Instructions to Assayers, Refiners, and Smelters, &c., by Oscar M. Lieber. 1 vol. 12mo. Philadelphia, 1852. cloth. 4s. 6d.

Lloyd's Steamboat Directory, and Disasters on the Western Waters; containing the History of the First Application of Steam as a Motive Power; the Lives of John Fitch and Robt. Fulton, and Engravings of their First Steamboats, &c.; a List of Plantations on the Mississippi River, &c. &c., by James T. Lloyd. 100 Engravings and 46 Maps. 8vo, pp. 326. Cleaveland, Ohio, 1856. cloth. 9s.

Long.—The Ancient Architecture in America; its Historical Value and Parallelism of Development with the Architectures of the Old World, by H. Cary Long. 11 Plates. 8vo. New York, 1849. 3s. 6d.

Lord.—A Historical Review of the New York and Erie Railroad, by Eleazer Lord. 8vo, pp. 223. New York, 1855. paper. 4s. 6d.

Lyon.—Treatise on Lightning Conductors, compiled from Standard Authors, by L. Lyon. 12mo. New York, 1853. cloth. 6s.

Macfarlane.—History of Propellers and Steam Navigation; with Biographical Sketches of the Early Inventors, by Robert Macfarlane, C.E. 83 Engravings. 12mo, pp. 144. New York, 1851. cloth. 4s. 6d.

Mahan.—Industrial Drawing: comprising the Description and Uses of Drawing Instruments, the Construction of Plane Figures, the Projection and Sections of Geometrical Solids; Architectural Elements, Mechanism, and Topographical Drawing; with Remarks on the Method of Teaching the Subject. For the Use of Academies and Common Schools. By D. H. Mahan, LL.D. 20 Plates. 8vo. New York, 1854. cloth. 14s.

Mahan.—An Elementary Course of Civil Engineering, for the Use of Cadets of the United States Military Academy, by D. H. Mahan, M.A., Professor of Military and Civil Engineering in the Military Academy. 6th edition, with large additions, and many new Cuts. 8vo, pp. 402. New York, 1856. cloth. 18s.

Mapes.—American Repository of Arts, Sciences, and Manufactures, by James J. Mapes. 4 vols. 8vo. New York, 1840.

Marble-Worker's (the) Manual. Designed for the Use of Marble-Workers, Builders, and Owners of Houses. Translated from the French by M. L. Booth; with an Appendix concerning American Marbles. 12mo, pp. 256. New York, 1856. cloth. 6s.

Mason.—The Application of Art to Manufactures, by George C. Mason. With 150 Illustrations. 8vo, pp. 344. New York, 1858. cloth. 10s. 6d.

Mifflin.—Methods of Location; or, Modes of Describing and Adjusting Railway Curves and Tangents, as practised by the Engineers of Pennsylvania, by Samuel W. Mifflin, Civil Engineer. 2nd edition. 18mo. Philadelphia, 1850. sewed. 3s.

Millington.—Elements of Civil Engineering; being an attempt to Consolidate the Principles of Various Operations of the Civil Engineer into one Point of View, for the Use of Students, by John Millington. With 273 Illustrations. 8vo. Philadelphia, 1838. £1 1s.

Minifie.—A Text-book of Geometrical Drawing, for the Use of Mechanics and Schools; with Illustrations for Drawing Plans, Sections, and Elevations of Buildings and Machinery; an Introduction to Isometrical Drawing; and an Essay on Linear Perspective and Shadows, by William Minifie. The whole Illustrated with 56 Steel Plates, containing over 200 Diagrams. 3rd edition. imperial 8vo. Baltimore. cloth. 16s.

Minifie.—The same, abridged for the Use of Schools. With 48 Steel Plates. 12mo. Baltimore. bound. 7s. 6d.

Minifie.—An Essay on the Theory of Colour and its Application to Architectural and Mechanical Drawings, by William Minifie. 8vo, pp. 34. Baltimore, 1854. sewed. 1s.

Mining Magazine. Edited by William J. Tenney, aided by August Partz, Mineralogical Chemist and Geologist. Commenced in July, 1853, and continued in monthly parts. 8vo. New York. per part, 2s. 6d.

Mone.—Treatise on American Engineering, by F. Mone, C.E. Illustrated by large and detailed Engravings. New York, 1855.

Division A. River boat Engines,	9 parts,	£2 14s.
" B. Marine Engines,	6 "	£1 16s.
" C. Locomotives,	6 "	£1 16s.
" D. Stationary Engines,	6 "	£1 16s.

Or bound in 1 vol. folio, with 4to vol. of Text. £8 8s.

Moore.—Patent Office and Patent Laws; or, a Guide to Inventors, and a Book of Reference for Judges, Lawyers, Magistrates, and others, by J. G. Moore. With Appendices. post 8vo, pp. 342. Philadelphia, 1855. cloth. 6s.

Moore.—A Treatise on American Engineering; illustrated by large and detailed Engravings, by F. Moore, Civil Engineer. With folio Atlas. 4to, pp. 44. New York, 1855. £6 16s.

Morfit.—The Arts of Tanning, Currying, and Leather-Dressing Theoretically and Practically Considered in all their Details. Edited from the French of J. D. Fontenelle and F. Mallopeyre, with numerous emendations and additions, by Campbell Morfit, Practical and Analytical Chemist. Illustrated by 200 Wood Engravings. 8vo, pp. 558. Philadelphia, 1852. £1 8s.

Morfit.—Perfumery, its Manufacture and Use; with Instructions in every Branch of the Art, by Campbell Morfit. Illustrated by numerous Woodcuts; from the French of Celnart and other late Authorities. 2nd edition. crown 8vo. Philadelphia, 1855. 9s.

Morfit.—A Treatise on Chemistry applied to the Manufacture of Soap and Candles, being a thorough Exposition in all their Minutiæ of the Principles and Practice of the Trade, based upon the most Recent Discoveries in Science and Art, by C. Morfit, Professor of Analytic and Applied Chemistry in the University of Maryland. A new and improved edition, illustrated with 260 Wood Engravings. 8vo, pp. 600. Philadelphia, 1856. £1 10s.

Morfit.—Chemical and Pharmaceutical Manipulations: a Manual of the Mechanical and Chemico-Mechanical Operations of the Laboratory, for the use of Chemists, Druggists, Manufacturers, Teachers, and Students, by Campbell and Clarence Morfit. 2nd and enlarged edition. With 537 Illustrations. royal 8vo, pp. 626. Philadelphia, 1856. cloth. £1 1s.

Nicholson.—A Manual of the Art of Bookbinding; containing full Instruc-

tions in the different Branches of Forwarding, Gilding, and Finishing; also, the Art of Marbling Book-Edges and Paper; the whole designed for the Practical Workman, the Amateur, and the Book-Collector, by J. B. Nicholson. 12mo, pp. 318. Philadelphia, 1857. 9s.

Norris.—Handbook for Locomotive Engineers and Machinists, by Septimus Norris. 1 vol. 8vo. Philadelphia. cloth. 8s. 6d.

Nystrom.—A Treatise on Screw Propellers and their Steam Engines; with Practical Rules and Examples how to Calculate and Construct the same for any Description of Vessels; accompanied with a Treatise on Bodies in Motion in Fluid, exemplified for Propellers and Vessels; also, a full Description of the Calculating Machine, by T. W. Nystrom. With Plates. 8vo. Philadelphia, 1852. cloth. £1 1s.

Nystrom.—Pocket-Book of Mechanics and Engineering; containing a Memorandum of Facts and Connection of Practice and Theory, by John W. Nystrom, C.E. 3rd edition, revised, with additional matter. With Plates. 12mo, pp. 284. Philadelphia, 1856. roan tuck. 7s. 6d.

Ormsby.—A Description of the Present System of Bank-Note Engraving; showing its tendency to facilitate Counterfeiting; to which is added, a New Method of Constructing Bank Notes to prevent Forgery, by W. L. Ormsby. With Plates. imperial 4to. New York. cloth. £1 4s.

Overman.—Mechanics for the Millwright, Machinist, Engineer, Civil Engineer, Architect, and Student; containing a clear Elementary Exposition of the Principles and Practice of Building Machines, by Frederick Overman. Illustrated by 154 Wood Engravings, by William Gihon. crown 8vo, pp. 420. Philadelphia, 1851. cloth. 7s.

Overman.—Practical Mineralogy, Mining, and Assaying: Instructions for Assaying and Mining, Description of Useful Minerals, &c., by F. Overman. 12mo. Philadelphia, 1851. 4s. 6d.

Overman.—The Moulders' and Founders' Pocket Guide: a Treatise on Moulding and Founding in Green Sand, Dry Sand, Loam, and Cement, &c., by F. Overman. With 42 Wood Engravings. 12mo. Philadelphia, 1851. 4s. 6d.

Overman.—A Treatise on Metallurgy; comprising Mining, and General and Particular Metallurgical Operations; with a Description of Charcoal, Coke, and Anthracite Furnaces, Blast Machines, Hot Blast, Forge Hammers, Rolling Mills, &c. &c., by Frederick Overman. 2nd edition. With 377 Wood Engravings. 8vo. New York, 1852. cloth. £1 8s.

Overman.—The Manufacture of Steel; containing the Practice and Principles of Working and Making Steel: a Handbook for Blacksmiths and Workers in Steel and Iron, &c., and for men of Science and Art, by F. Overman. 12mo. Philadelphia, 1851. 4s. 6d.

Overman.—The Manufacture of Iron, in all its various Branches, including a Description of Wood-cutting, Coal-digging, the Burning of Charcoal and Coke, &c. &c.; also, a Description of Forge Hammers, Rolling Mills, Blast Machines, Hot Blast, &c.; to which is added, an Essay on the Manufacture of Steel, by Frederick Overman, Mining Engineer. With 150 Wood Engravings. 3rd edition, revised. 8vo, pp. 492. Philadelphia, 1854. cloth. £1 1s.

Owen.—Hints on Public Architecture, by Robert Dale Owen. 4to. New York, 1849. cloth. £1 10s.

Palmer.—Memoir on the Reconnaissance of Rivers. Translated from the French, by Lieut. W. R. Palmer. 8vo. Philadelphia, 1843.

Patent-Office Reports. 8vo. Washington.

VOLUME

I. Patent Office Report (to the House of Representatives), from the Commissioner of Patents, Henry L. Ellsworth, transmitting Information in relation to the Duties of his Office, for the year 1837. Dated January 1, 1838.

II. For 1838; by Henry L. Ellsworth, Commissioner. Dated Jan. 1, 1839.

III. For 1839; by Henry L. Ellsworth, Commissioner. Dated Jan. 1, 1840.

IV. For 1840; by Henry L. Ellsworth, Commissioner. Dated Jan. 1841.

VOLUME

V. For 1841; by Henry L. Ellsworth, Commissioner. Dated Jan. 1842.
VI. For 1842; by Henry L. Ellsworth, Commissioner. Dated Jan. 1843.
VII. For 1843; by Henry L. Ellsworth, Commissioner. Dated Jan. 31, 1844.
VIII. For 1844; by Henry L. Ellsworth, Commissioner. Dated Jan. 28, 1845.
IX. For 1845; by Edmund Burke, Commissioner. Dated Jan. 1846.
X. For 1846; by Edmund Burke, Commissioner. Dated Jan. 1847.
XI. For 1847; by Edmund Burke, Commissioner. Dated Jan. 1848.
XII. For 1848; by Edmund Burke, Commissioner. Dated Jan. 1849.
XIII. For 1849: Part I. Arts and Manufactures, by Thomas Ewbank, Commissioner. Dated July 15, 1850.
XIV. For 1849: Part II. Agriculture, by Thomas Ewbank, Commissioner. Dated April 20, 1850.
XV. For 1850: Part I. Arts and Manufactures, by Thomas Ewbank, Commissioner. Dated Jan. 1851.
XVI. For 1850: Part II. Agriculture, by Thomas Ewbank, Commissioner.
XVII. For 1851: Part I. Arts and Manufactures, by Thomas Ewbank, Commissioner. Dated March 13, 1852.
XVIII. For 1851: Part II. Agriculture, by Thomas Ewbank, Commissioner. Dated April 23, 1852.
XIX. For 1852: Part I. Arts and Manufactures, by Silas H. Hodges, Commissioner. Dated Feb. 28, 1853.
XX. For 1852: Part II. Agriculture, by Silas H. Hodges, Commissioner. Dated Feb. 28, 1853.
XXI. For 1853: Part I. Arts and Manufactures, by Charles Mason, Commissioner. Dated Jan. 1854.
XXII. For 1853: Part II. Agriculture, by Silas H. Hodges, Commissioner. Dated Feb. 28, 1854.
XXIII. For 1854: Arts and Manufactures (Part I. Text), by Charles Mason, Commissioner. Dated January 31, 1855.
XXIV. For 1854: Arts and Manufactures (Part II. Illustrations).
XXV. For 1854: Agriculture, by Charles Mason, Commissioner. Dated Feb. 6, 1855.
XXVI. For 1855: Arts and Manufactures. Part I. Vol. I., by Charles Mason, Commissioner. Dated Jan. 11, 1856.
XXVII. For 1855: Arts and Manufactures. Part I. Vol. II. (Illustrations).
XXVIII. For 1855: Agriculture, by Charles Mason, Commissioner. Dated March 31, 1856.
XXIX. For 1856: Arts and Manufactures. Part. I. Vol. I., by Charles Mason, Commissioner. Dated Feb. 5, 1857.
XXX. For 1856: Arts and Manufactures. Part I. Vol. II.
XXXI. For 1856: Arts and Manufactures. Part I. Vol. III. Illustrations.
XXXII. For 1856: Agriculture, by Charles Mason, Commissioner. Dated Feb. 17, 1857.

Perkins.—A Practical Treatise on Gas and Ventilation, with special relation to Illuminating, Heating, and Cooking by Gas, &c. &c., by E. E. Perkins. With Illustrated Diagrams. 12mo, pp. 178. Philadelphia, 1857. cloth. 4s. 6d.

Pollak.—Treatise on the Elements of Machines, by Anthony Pollak, Civil Engineer. In parts. Plates. 4to. each, 3s. 6d.

Poncelet and Woodbury.—Sustaining Walls: Geometrical Constructions to determine their thickness under various circumstances; derived chiefly from a Memoir of M. Poncelet, Chef de Bataillon du Génie; with Modifications and Extensions, by Captain D. P. Woodbury, under the direction of Bt. Brig.-Gen. J. G. Totten. 2nd edition. With 8 Plates. 8vo. Washington, 1854. sewed. 8s. 6d.

Potter.—The Principles of Science, applied to the Domestic and Mechanic Arts, and to Manufactures and Agriculture; with Reflections on the Progress of the Arts, and their Influence on National Welfare, by Alonzo Potter, D.D. 12mo. New York, 1841. 6s.

Present Situation and Future Prospects of American Railroads. 8vo, pp. 8. Philadelphia, 1855. sewed.

Rankin.—The Economic Value of the Semi-Bituminous Coal of the Cumberland Coal Basin, embracing the present and future relations of the Coal Trade;—a Description of the Basin—the Origin of the Coal Measure—the Quantity of Coal by Acre—Analysis of the Coal—its Combustion—its Use

—Mode and Cost of Mining—Facilities for Transportation to Market—and Sundry Tables for Reference, by Robert G. Rankin. With Engravings and Maps. 8vo, pp. 72. New York, 1855. sewed. 5s.

Ranlett.—The Architect; a Series of Original Designs for Domestic and Ornamental Cottages and Villas, connected with Landscape Gardening, adapted to the United States, by William H. Ranlett. 2 vols. 8vo. New York, 1847. £3 3s.

Renwick.—Applications of the Science of Mechanics to Practical Purposes, by James Renwick. 8vo. New York, 1840.

Report of the Committee of the Franklin Institute of the State of Pennsylvania, for the Promotion of the Mechanic Arts on the Explosions of Steam Boilers, of Experiments made at the request of the Treasury Department of the United States; containing the Report of the Sub-Committee to whom was referred the Examination of the Strength of Materials employed in the Construction of Steam Boilers. 8vo, pp. 256. Philadelphia, 1837. sewed. 10s. 6d.

Reports of Experiments on the Strength and Properties of Metals for Cannon; with a Description of the Machines for Testing Metals, and of the Classification of Cannon in Service, by Officers of the Ordnance Department, U. S. Army, by Authority of the Secretary at War. With 25 Plates. 4to, pp. 440. Philadelphia, 1856. cloth. £2 10s.

Richards.—A Day in the New York Crystal Palace, and How to Make the Most of It, by W. C. Richards. Illustrations. 12mo. New York, 1853. cl. 5s.

Riddell.—Handrailing Simplified: being an entirely New and Original System of Lines, containing the Grand Problem, which enables the workman to exhibit at once the Surface of Plank on its Pitching Planes through the Cylinder; the Wreath made to rest on any point that may be desired; the Face-Mould struck by the Elliptic Trammel, and its exact width determined by a well-known simple Law; the Plank cut square through, and the joints made at right angles to its surface; the Constructive Principle for the Formation of a Wreath, illustrated in a manner heretofore unknown to either Author or Workman, by Robert Riddell. With 12 Plates and descriptive letter-press. large folio. Philadelphia, 1856. cloth. £1

Riddell.—The Scientific Stair-Builder, upon entirely new Principles, by R. Riddell, Architect. The whole Art of Staircases and Handrailing. Illustrated and simplified by 22 large folio Plates and 52 pages of descriptive letter-press. In 4 Parts. Philadelphia, 1856. £2 2s.

Ritch.—The American Architect; comprising original Designs of Cheap Country and Village Residences, with Details, Specifications, Plans, and Directions, and an Estimate of the Cost of each Design, by John N. Ritch, Architect. First and Second Series. 4to, bound in 1 vol. New York, 1857. £1 16s.

Robinson.—A Treatise on Surveying and Navigation; uniting the Theoretical, the Practical, and the Educational Features of these Subjects, by Horatio N. Robinson, A.M. 8vo. Cincinnati, 1851. sheep. 8s.

Rogers.—The Shipwright's Own Book; being a Key to most of the different kinds of Lines made use of by Shipbuilders, by G. W. Rogers. Illustrated by 17 Copper-plate Engravings of Drafts and Models. 2 vols. 8vo. 18s.

Schoolcraft.—A View of the Lead Mines in Missouri, including some Observations on the Mineralogy, Geology, Geography, Antiquities, Soil, Climate, Population, and Productions of Missouri and Arkansas, by Henry Rowe Schoolcraft. Plates. 8vo, pp. 299. New York, 1819.

Schramke.—Description of the New York Croton Aqueduct, in English, German, and French, by T. Schramke. 8vo. New York, 1846.

Scientific American.—The Advocate of Industry, and Journal of Scientific and other Improvements. Published monthly at New York. annual subscription, 12s.

Scott.—The Practical Cotton-Spinner and Manufacturer: the Manager's, Overlooker's, and Mechanic's Companion; a comprehensive System of Cal-

culations of Mill Gearing and Machinery, from the primary Moving Power, through the different processes of Carding, Drawing, Slubbing, Roving, Spinning, and Weaving, with the recent Improvements in Machinery; to which are added, compendious Tables of Yarns and Reeds for Silks, Linen, Worsted, and Wool, by R. Scott. Corrected and enlarged, with Plates of American Machines, by Oliver Byrne. 8vo, pp. 432. Philadelphia. cloth. £1 1s.

Sellers.—Improvements in Locomotive Engines and Railways, by George Eskoll Sellers. 8vo. Cincinnati, 1849.

Sganzin.—Civil Engineering, by M. J. Sganzin. 8vo. Boston. 9s.

Shaffner.—Telegraph Companion: devoted to the Science and Art of the Morse American Telegraph, by Tal. P. Shaffner, Esq., Secretary of the American Telegraph Confederation, New York City. Volume I. 5 Nos. Vol. II. Nos. 1, 2, 3, Jan., April, and July, 1855. 8 Numbers, all published, forming 2 vols. New York. each part, 2s. 6d.

Shunk.—A Practical Treatise on Railway Curves and Location for Young Engineers, by William F. Shunk, Civil Engineer. 12mo, pp. 106. Philadelphia, 1854. roan tuck. 5s. 6d.

Sidney.—American Cottage and Villa Architecture: a Series of Views and Plans of Residences actually built, by J. F. Sidney, Architect and Civil Engineer. Parts 1 to 5. demy 4to. New York, 1852. each, 3s. 6d.

Silk.—Culturist's Manual (the). 12mo. Philadelphia, 1839. cloth. 7s. 6d.

Singer.—Sewing by Machinery: an Exposition of the Rights of Patentees of various Sewing Machines, and of the Rights of the Public, by J. M. Singer and Co. 8vo. New York. sewed. 1s.

Sloan.—The Model Architect. A Series of Original Designs for Cottages, Villas, Suburban Residences, &c.; accompanied by Explanations, Specifications, Estimates, and elaborate Details. Prepared expressly for the Use of Projectors and Artisans throughout the United States, by Samuel Sloan, Architect. 2 vols. 4to. Philadelphia, 1853. half-bound. each, £2 2s.

Smeaton.—The Builder's Pocket Companion; containing the Elements of Building, Surveying, and Architecture; with Practical Rules and Instructions connected with the subject, by A. C. Smeaton. 8vo. Philadelphia, 1850.

Smillie.—The Rural Cemeteries of America; Illustrated in a Series of Views from Drawings, by James Smillie. 8vo. New York, 1847.

Smith.—Designs for Monuments and Mural Tablets, adapted to Rural Cemeteries, Churchyards, Churches, and Chapels; with a Preliminary Essay on the Laying Out, Planting, and Managing of Cemeteries, and on the Improvement of Churchyards; on the Basis of Loudon's Work, by J. Jay Smith. New York, 1846.

Smith.—Manual of Topographical Drawing, by Lieut. R. S. Smith, U. S. Army, Assistant Professor of Drawing in the U. S. Military Academy, West Point, N. Y. Plans, Plates, &c. 2nd edition. 8vo, pp. 72. New York, 1857. cloth. 9s.

Smith.—Manual of Linear Perspective: Perspective of Form, Shade, and Shadow, and Reflection, by R. S. Smith, Professor of Mathematics and Civil Engineering in the Brooklyn Collegiate and Polytechnic Institute. Plans. 8vo, pp. 86. New York, 1857. cloth. 9s.

Snelling.—The Photographic Art Journal. Edited by H. H. Snelling. Commenced January, 1851, and continued to Dec. 1853. Engravings and Photographs. 30 parts, forming 6 volumes. royal 8vo. New York, 1851—1853.

Snelling.—The same. New Series. Commenced Jan. 1854, and continued. 4to; with Photographs. Published monthly. New York. per part, 2s. 6d.

Snelling.—A Dictionary of the Photographic Art; forming a Complete Encyclopædia of all the Terms, Receipts, Processes, Apparatus, and Materials in the Art; together with a List of Articles of every-day description employed in its Practice, by H. H. Snelling. With Illustrations. 8vo, pp. 310. New York, 1853. cloth. 12s.

Snelling.—The History and Practice of the Art of Photography; or, the Production of Pictures through the Agency of Light; containing all the Instructions necessary for the complete Practice of the Daguerreian and Photogenic Art, both on Metallic Plates and on Paper, by Henry H. Snelling. 4th edition. New York, 1849. 6s.

Stokes.—The Cabinet-Maker and Upholsterer's Companion; with Instructions in Drawing, and a number of Receipts, &c., by J. Stokes. 8vo. Philadelphia, 1850.

Storrow.—Treatise on Water-Works, by C. Storrow. 12mo. Boston, 1855. 6s.

Strickland.—Public Works of the United States of America; with Reports, Specifications, and Estimates of the Public Works, by W. Strickland. 40 Plates. 2 parts, folio. 1841. each, £2
Also,,1 vol 8vo, explanatory of the Plates, 6s.

Stuart.—The Naval Dry Docks of the United States, by C. B. Stuart, U. S. N. With Engravings and Plans. imperial 4to. New York, 1852. cloth. £2 2s.

Stuart.—The Naval and Mail Steamers of the United States, by Charles B. Stuart, U. S. N. Illustrated by 30 Engravings on Steel, Copper, Stone, and Wood. imperial 4to. New York, 1854. half-morocco, £2 10s.

Tanner.—A Description of the Canals and Railroads of the United States; comprehending Notices of all the Works of Internal Improvement, by H. S. Tanner. With an accurate Map. 8vo, pp. 272. New York, 1840. 12s.

Taylor.—Two Reports on the Coal Lands, and Mines, and Improvements of the Dauphin and Susquehanna Coal Companies, and of the Geological Examinations, Present Condition, and Prospects of the Stony Creak Estate, in Pennsylvania; with an Appendix, by Richard C. Taylor. 8vo, pp. 74 and 113. Philadelphia, 1840.

Taylor.—Reports of the Washington Silver Mine in Davidson Co., North Carolina, by Richard C. Taylor. 8vo. Philadelphia, 1845.

Taylor.—Report to the Dauphin and Susquehanna Coal Company, by R. C. Taylor. With a Map illustrative of the Statistics of the Coal Trade of Pennsylvania. 8vo. Philadelphia, 1848.

Taylor.—Statistics of Coal; including Mineral Bituminous Substances employed in Arts and Manufactures, with their Geographical, Geological, and Commercial Distribution, and Amount of Production and Consumption on the American Continent; with incidental Statistics of the Iron Manufacture, by R. C. Taylor, Fellow of the Geological Society of London, &c. &c. 2nd edition, revised and brought down to 1854, by S. S. Haldemann, Professor of Natural Science and Agriculture in Delaware College, &c. &c. With numerous Illustrations. royal 8vo, pp. 642. Philadelphia, 1853. cloth. £1 5s.

Thomas.—The Working Man's Cottage Architecture; containing Plans, Elevations, and Details for the Erection of Cheap, Comfortable, and Neat Cottages, by T. Thomas, jun. 8vo. New York, 1848.

S. Army. By Authority of the Secretary of War. With 25 Plates. 4to, pp. 440. Philadelphia, 1856. cloth. £2 10s.

Reports of Experiments with Small Arms for the Military Service, by Officers of the Ordnance Department of the U. S. Army. Published by Authority of the Secretary of War. gr. 8vo, pp. 117, and an Appendix, pp. 35. Washington, 1856. 8s.

Review of the General Staff Organizations of the European and American Armies. 8vo. 1855.

Ripley.—The War with Mexico, by R. S. Ripley, Brevet Major in the United States Army, &c. 2 vols. 8vo, pp. 1174. New York, 1849. cloth. £1 4s.

Robinson.—An Account of the Organization of the Army of the United States; with Biographies of Distinguished Officers of all Grades, by Fayette Robinson, late an Officer of the United States Army. 2 vols. 12mo. Philadelphia, 1848. 15s.

Rules and Regulations for the Field Exercises and Manœuvres of Infantry. Compiled and adapted to the Organization of the Army of the United States. 1 vol. 8vo. New York, 1815. 14s.

Rules and Regulations for the Field Exercise and Manœuvres of Infantry. Compiled and adapted to the Organization of the Army of the United States, &c. 12mo. Philadelphia, 1824. 9s.

Scheel (de).—A Treatise of Artillery; containing a New System, on the alteration made in the French Artillery since 1765. Translated from the French. 8vo, and atlas folio. Philadelphia, 1800. 8s.

School of the Gunner, or Field Piece; being an Extract from a French work on the service of Field Artillery. Translated by Henry Arcularius. With 10 Plates. 18mo, pp. 112. New York, 1838. cloth. 5s.

Scott.—Infantry Tactics; or, Rules for the Exercise and Manœuvres of the United States Infantry, by Major-General Scott, United States Army. New edition, with Plates. 3 vols. 18mo. New York, 1854. 18s.

Scott.—General Regulations for the Army or Military Institutes, by Major-General Scott. 8vo. Philadelphia, 1821. 14s.

Ditto ditto. 8vo. Washington, 1825. 15s.

Shaw.—Documents, Official and Unofficial, relating to the Claim of Joshua Shaw, the Inventor of the Percussion Caps and Locks for Small Arms, and Percussion Locks and Wafer Primers for Cannon now in use. 8vo. Washington, 1847. 3s. 6d.

Simcoe.—Simcoe's Military Journal: a History of the Operations of a Partisan Corps, called the "Queen's Rangers," commanded by Lieutenant T. Simcoe, during the War of the American Revolution; now first published, with a Memoir of the Author. 8vo. New York, 1844.

Simes.—The Military Guide for Young Officers, by Thomas Simes. Vol. II. 8vo. Philadelphia, 1776.

Small Arms and Field Artillery Exercises, as arranged for the Naval Service, under an Order of the Bureau of Ordnance and Hydrography of the Navy Department. 8vo. Philadelphia, 1852.

Smith.—A Manual of Topographical Drawing, by Lieut. R. S. Smith, U. S. Army. With 8 Plates. 8vo, pp. 76. New York. cloth. 8s.

Smyth.—Regulations for the Infantry of the United States, by General Alexander Smyth. Illustrated. 8vo. Philadelphia, 1812. 18s.

St. Clair.—A Narrative of the Manner in which the Campaign against the Indians, in the year 1791, was conducted, under the Command of Major-General St. Clair, &c. 8vo. Philadelphia, 1812. 5s.

Stephens.— A New System of Broad and Small Sword Exercise; comprising the Broadsword Exercise for Cavalry, and the Small Sword Cut and Thrust Practice for Infantry; to which are added, Instructions in Horsemanship. by Thomas Stephens. Illustrated by 45 handsome and effective Engravings. 12mo. Philadelphia, 1843. 7s. 6d.

Stevens.—A System for the Discipline of the Artillery of the United States of America; or, the Young Artillerist's Pocket Companion, &c., by William Stevens, an Officer in the American Artillery, through the whole of the late Revolution, &c. 18mo. New York, 1797. 7s. 6d.

Tactics of the Infantry of the United States Army, abridged for the use of the Militia of the United States; to which is added "Compliments by Troops under Review," and the "Form and Course of Inspection," abridged from the "General Regulations for the Army." 6th edition, revised and improved. With 26 Plates. 12mo, pp. 252. Poughkeepsie, 1826. bound. 3s.

Tactics for Light Infantry and Riflemen. 12mo. Charleston, S. C., 1854. cloth. 3s.

Thacher.—Military Journal during the American Revolutionary War from 1775 to 1783; describing Interesting Events and Transactions of this Period; with numerous Historical Facts and Anecdotes, from the Original Manuscript; to which is added an Appendix, containing Biographical Sketches of several Officers. 8vo. Boston, 1823. 15s.

Thorpe.—Our Army on the Rio Grande, being a Short Account of the Important Events, &c.; with Descriptions of the Battles of Palo Alto and Resaca de la Palma, the Bombardment of Fort Brown, &c., by T. B. Thorpe. 12mo. Philadelphia, 1846. 6s.

Thorpe.—Our Army at Monterey, by T B. Thorpe. 12mo. Philadelphia, 1847. 4s.

Tonsard.—American Artillerist's Companion; treating of all kinds of Fire-arms in detail, and of the Formation, Object, and Service of the Flying or Horse Artillery, by Louis de Tonsard. Plates. 2 vols. 8vo. Philadelphia, 1809. 12s.

Totten.—Report on the subject of the National Defences, by Jos. G. Totten. Colonel of Engineers, Br. Brigadier-General. 8vo. Washington, 1851. 15s.

Treadwell.—On the Practicability of Constructing Cannon of Great Calibre, capable of enduring long-continued use under full Charges, by Daniel Treadwell. Vice-President of the American Academy, &c. &c. 8vo, pp. 36. Cambridge, Mass., 1856. sewed. 2s.

Uniform and Dress of the Army of the United States. Coloured Plates. 4to. Philadelphia, 1851. £1 11s. 6d.

United States Military Magazine, and Record of all the Volunteers; together with the Army and Navy. 3 vols. 4to. Philadelphia, 1839—1842.

Ward.—An Elementary Course of Instruction on Ordnance and Gunnery, prepared for the Use of the Midshipmen at the Naval School, Philadelphia; together with a Concise Treatise on Steam, adapted especially to the use of those engaged in Steam Navigation, by James H. Ward. 8vo. Philadelphia, 1851. boards. 16s.

Washington.—Revolutionary Orders issued during the Years 1778, 1780, 1781, and 1782; selected from the Manuscripts of John Whiting, and edited by his Son, Henry Whiting, Lieutenant-Colonel, United States Army. 8vo. New York, 1844. 10s. 6d.

Wayne.—The Sword Exercise, arranged for Military Instruction, by Brevet Major Henry C. Wayne, United States Army. Published by Authority of the War Department. With 24 Plates. 12mo, pp. 62. Washington, 1850. cloth. 7s. 6d.

Wells.—An Essay on War, by J. L. Wells. 8vo. Hartford, 1808.

Whitman.—The History of the Ancient and Honourable Artillery Company (revised and enlarged), from its formation in 1637, and Charter in 1638, to the present time; comprising the Biographies of the distinguished Civil, Literary, Religious, and Military Men of the Colony, Province, and Commonwealth, by the late Zach. G. Whitman, A. M. 8vo, pp. 463. Boston, 1842.

Woodbury.—Sustaining Walls; Geometrical Constructions to determine their Thickness under various circumstances; derived chiefly from a Memoir of M. Poncelet, Chef-de-Bataillon du Génie; with Modifications and Extensions, by Captains D. P. Woodbury, United States Corps of Engineers, &c. 2nd edition. 8 Plates. 8vo. Washington, 1854. 8s. 6d.

The above forms the third part of "Papers on Practical Engineering," published by direction of the Colonel of United States Engineers.

XIX.

NAVAL SCIENCE.

American Ephemeris and Nautical Almanac, for the Years 1855 to 1860. Published by Authority of the Secretary of the Navy. imperial 8vo. Washington, 1853—1858. each, 9s.

Barton.—Hints to Naval Officers cruising in the West Indies, by William P. C. Barton. 8vo. Philadelphia, 1830.

Bassnett.—Outlines of a Mechanical Theory of Storms; containing the true Law of Lunar Influence, Practical Instructions to the Navigator, &c. &c., by T. Bassnett. crown 8vo. New York. cloth. 6s.

Blunt.—The Shipmaster's Assistant and Commercial Digest; containing Information necessary for Merchants, Owners, and Masters of Ships, on Thirty-nine Subjects, by Joseph Blunt. 8vo. New York, 1848. sheep. £1 10s.

Blunt.—The American Coast Pilot, by Edmund M. Blunt. 18th edition. 8vo, pp. 740. New York, 1857.

Bowditch.—The New American Practical Navigator; being an Epitome of Navigation: containing all the Tables necessary to be used with the Nautical Almanack, in determining the Latitude and the Longitude by Lunar Observations, and keeping a complete Reckoning at Sea; illustrated by proper Rules and Examples; the whole exemplified in a Journal, kept from Boston to Madeira, in which all the Rules of Navigation are introduced; also, the Demonstration of the usual Rules of Trigonometry, Problems in Mensuration, Surveying, and Gauging; Dictionary of Sea Terms, &c.; with an Appendix, by Nathaniel Bowditch, LL.D., and continued by his Son, J. Ingersoll Bowditch. 25th edition. 8vo. New York, 1855. bound. £1 8s.

Brady.—The Kedge-Anchor; or, Young Sailor's Assistant, appertaining to the Practical Evolutions of Modern Seamanship, Rigging, Knotting, &c. &c.; also, Tables of Rigging, Spars, Sails, &c. &c., relative to every class of

Vessels, by William Brady, Sailing Master, U.S.N. Illustrated with 70 Engravings. 9th edition, improved and enlarged. 8vo, pp. 400. New York, 1857. cloth. 16s.

Butts.—The Rights of Seamen, by J. R. Butts. 8vo. Boston, 1848.

Chauvenet.—New Method of Correcting Lunar Distances, and Improved Method of Finding the Error and Rate of a Chronometer by equal Altitudes, by William Chauvenet, A.M., Professor of Mathematics in the U.S. Naval Academy, &c. 8vo, pp. 86. Philadelphia, 1850. 3s. 6d.

Chauvenet.—The Great Circle Protractor, by Professor W. Chauvenet, of U.S. Naval Academy, Annapolis, Md. The Great Circle Protractor is based upon the stereographic projection of the sphere, and by its use we discover—by mere inspection—not only the latitudes and longitudes of all the points on the Globe, through which the Great Circle route passes, but also the course to steer, and the distance to be sailed. It consists of Two Charts—a fixed and a revolving one, in a portfolio. square folio. Annapolis, 1855. £1 4s.

Coffin.—On the Winds of the Northern Hemisphere, by Professor J. H. Coffin. 13 Plates. 4to, pp. 200. Washington, 1853. 14s.

Coggeshall.—A History of American Privateers and Letters of Marque; interspersed with several Naval Battles between American and British Ships of War, by George Coggeshall. Illustrated. 8vo, pp. 438. New York, 1856. cloth. 16s.

Cooper.—History of the Navy of the United States of America, by J. Fenimore Cooper. Continued to 1856. From the Author's Manuscripts, and other Authentic Sources. 3 vols. in one. With Portrait. 8vo, pp. 630. New York, 1856. cloth. 14s.

Cummings.—The Western Pilot; containing Charts of the Ohio River and of the Mississippi, from the Mouth of the Missouri to the Gulf of Mexico; accompanied with Directions for Navigating the same, and a Gazetteer, by S. Cummings. 4 Plates. 8vo, pp. 151. Cincinnati, 1832. boards. 5s.

Dahlgren.—Naval Percussion Locks and Primers, particularly those of the United States, by Lieut. J. A. Dahlgren, Assistant Inspector of Ordnance. With Plates. pp. 124. Philadelphia, 1853. 5s.

Dahlgren.—Boat Armament of the U. S. Navy; designed by and executed under the direction of J. A. Dahlgren, Commander, U.S.N., in charge of the Ordnance Department, U. S. Navy Yard, Washington, D. C. 2nd edition. With many Plates. crown 8vo, pp. 216. Philadelphia, 1856. half-bound. 12s.

Dahlgren.—Shells and Shell-Guns, by J. A. Dahlgren, Commander in charge of Experimental Ordnance Department, Navy-Yard, Washington. With 8 Plates. royal 8vo, pp. xvi. and 436. Philadelphia, 1857. half-morocco. £1 11s. 6d.

CONTENTS.

Chapters on Dimensions and Range of U.S. Cannon.—Mode of Obtaining Ranges.—Dimensions, Weights, &c., of Shells.—Fuses, their Functions, Defects, &c.—Penetration of Shells and Shot into Oak, &c.—Shot and Shells compared.—Composition of Batteries.—Incidents of the Russian War, with Remarks thereon.—And Notes relating to each chapter.

Dana.—The Seaman's Manual; containing a Treatise on Practical Seamanship, Dictionary of Sea Terms, &c., by R. H. Dana. Plates. 12mo. Boston, 1841. 4s. 6d.

Davis.—The American Mariners; or, the Atlantic Voyage. A Moral Poem. To which are added, Naval Annals; or, an Impartial Summary of the Actions Fought during the late War at Sea, and on the Lakes, between the Ships of Great Britain and those of the United States of America. With Notes and Illustrations. 8vo, pp. 384. Salisbury, (apparently in) 1822.

Day.—Navigation and Surveying, by Jeremiah Day. 8vo. New Haven. cloth. 4s. 6d.

Espy.—The Philosophy of Storms, by James P. Espy. With Maps, Engravings, &c. 1 vol. 8vo, pp. 600. Boston, 1841. 16s.

Frost.—The Book of the Navy; comprising a General History of the American Marine, and particular Accounts of all the most celebrated Naval Battles, from the Declaration of Independence to the Present Time; compiled from the best Authorities, by John Frost, A.M., &c. With an Appendix. Engravings and Portraits. 8vo, pp. 344. New York, 1842.

Frost.—American Naval Biography; comprising Lives of the Commodores and other Commanders distinguished in the History of the American Navy; compiled from the best Authorities, by John Frost, LL.D. With Portraits, Views of Remarkable Engagements, and other Illustrative Engravings from Original Drawings, &c. 8vo, pp. 450. Philadelphia, 1844.

Goldsborough.—The United States Naval Chronicle, by Charles W. Goldsborough. Vol. I. 8vo, pp. 420. Washington, 1824. boards. 6s.

Griffiths.—Treatise on Marine and Naval Architecture; or, Theory and Practice blended in Ship-Building, by John W. Griffiths, Marine and Naval Architect. Illustrated with more than 50 Engravings. 3rd edition. 4to, pp. 422. New York. cloth. £1 11s. 6d.

Griffiths.—The Ship-Builder's Manual, and Nautical Referee, by John W. Griffiths, Marine Architect and Practical Ship-Builder, Author of "Theory and Practice blended in Ship-Building." Illustrated with Tables and Engravings. New edition. 2 vols. in one. 4to, pp. 386. New York. cloth. £1 5s.

Hassler.—Papers on various Subjects connected with the Survey of the Coast of the United States, by F. R. Hassler. 4to. Philadelphia, 1824.

Hassler.—Principal Documents relating to the Survey of the Coast of the United States, since 1816. Published by F. R. Hassler, Superintendent of the Survey. New York, 1834.

Jeffers.—A Concise Treatise on the Theory and Practice of Naval Gunnery, by William N. Jeffers, jun. 8vo. New York, 1850. cloth. 18s.

Johnson.—A Report to the Navy Department of the United States on American Coals, applicable to Steam Navigation and other purposes, by Walter R. Johnson. 8vo. Washington, 1844.

Joinville.—Remarks on the Naval Forces of France, by the Prince de Joinville. 8vo. Boston, 1844.

Leavitt.—A New Method of Finding the Longitude at Sunrise, Sunset, and at Noon, by William Leavitt, Teacher of Navigation. 2nd edition. New York. 1s.

Lee.—Report and Charts of the Cruise of the U. S. Brig Dolphin, made under direction of the Navy Department, by Lieut. S. P. Lee, U.S.N. (Deep-sea soundings, &c.) The Map in a separate vol. Washington, 1854.

Levy.—Manual of Rules for Men-of-War, by Captain U. P. Levy, U. S. Navy. 12mo, pp. 24. New York. sewed.

Light-Houses.—List of Light-Houses, Lighted Beacons, and Floating Lights of the United States. Prepared by the Light-House Board. Corrected to July 1, 1854. 8vo, pp. 58. Washington, 1854. sewed. 1s. 6d.

Light-Houses.—Report from the Secretary of the Treasury, in compliance with a Resolution of the Senate of the 25th instant, transmitting copies of the Representations made to him relative to the Light-Houses of the United States, by the Messrs. Blunt of New York, &c. With Tables. 8vo. Washington, 1838. cloth. 18s.

Light-Houses.—Report of the Officers constituting the Light-House Board, convened under Instructions from the Secretary of the Treasury, to inquire into the condition of the Light-House Establishment of the United States, under Act of March 3, 1851. With Plates and Engravings. 8vo, pp. 760. Washington, 1852. cloth. 18s.

Lorrain.—The Square-rigged Cruiser; or, Lorrain's Sea Sermons, dedicated to the United States Navy, Officers, and Seamen of American Merchantmen, and all True Blues of every Nation under Heaven, by Alfred M. Lorrain, of the Ohio Conference. 12mo New York. cloth. 4s. 6d.

Macfarlane.—History of Propellers and Steam Navigation; with Biographical

Sketches of the Early Inventors, by Robert Macfarlane, C.E. 83 Engravings. 12mo, pp. 144. New York, 1854. cloth. 4s. 6d.

Mason.—A General Register of the Navy and Marine Corps of the United States, alphabetically arranged, containing the names of all Officers of the Navy and Marine Corps, military and civil, commissioned and warrant, who have entered the Service since the establishment of the Navy Department in 1798; showing the dates of their original Rank and Entry, the dates of their promotions to higher grades, and in what manner and when they left the Service, if not still in it. To which is appended, the Constitution of the United States, and a revised edition of all the Laws in relation to the Navy and Marine Corps, with reference to the "Statutes at Large." With an Index compiled from the Official Records of the Navy Department, by authority of the Hon. John Y. Mason, Secretary of the Navy, by Mechlin and Winder, Attorneys and Agents. 8vo, pp. 550. Washington, 1848. £1 1s.

Mathiot.—On the Electrotyping Operations of the United States Coast Survey, by George Mathiot. 8vo. Philadelphia, 1852.

Maury.—Paper on the Gulf-Stream and Currents of the Sea, by Lieutenant M. F. Maury. 8vo. Richmond, Va., 1844. 1s.

Maury.—A New Theoretical and Practical Treatise on Navigation, in which the auxiliary branches of Mathematics and Astronomy, comprised of Algebra, Geometry, Logarithms, Plane and Spherical Trigonometry, the Motion of the Heavenly Bodies, Tides, Variation of the Compass, &c., are treated of; also, the Theory and most simple Methods of finding Time, Latitude, and Longitude by Chronometers, Lunar Observations, Single and Double Altitudes, are taught; together with a New and Easy Plan for finding Difference, Latitude, Departure, Course, and Distance, by M. F. Maury, U.S.N. 8vo. Philadelphia. bound. 10s. 6d.

Maury.—Explanations and Sailing Directions to accompany the Wind and Current Charts, approved by Com. Charles Morris, Chief of the Bureau of Ordnance and Hydrography, by Lieut. Maury. Numerous Engravings. 7th edition, enlarged and improved. 4to, pp. 905. Philadelphia, 1855.

Maury.—Letter concerning Lanes for the Steamers crossing the Atlantic, by Lieut. M. F. Maury, LL.D., U.S.N., Superintendent of National Observatory, Washington. With 2 Charts. 4to, pp. 12. New York. sewed. 1s. 6d.

Maury.—The Physical Geography of the Sea, by M. F. Maury, LL.D., Lieut. U.S. Navy. With Maps. An entirely new edition, with Addenda. royal 8vo, pp. 360. New York, 1857. cloth. 10s.

Mills.—The American Pharos; or, Light-House Guide; founded on Reports received at the Treasury Department, from the Superintendents of the Light-Houses of the United States; with a General View of the Coast from the St. Croix River to the Mouth of the Sabine, by Robert Mills, Engineer and Architect. 8vo. Washington, 1832.

Murphy and **Jeffers.**—Nautical Routine and Stowage, with short Rules in Navigation, by J. McLeod Murphy and W. N. Jeffers. 8vo. New York, 1849. cloth. 18s.

Naval Monument.—Containing Official and other Accounts of all the Battles fought between the Navies of the United States and Great Britain during the late War; and an Account of the War with Algiers. With 25 Engravings; to which is annexed a Naval Register of the United States. 8vo, pp. 338. Boston. 5s. 6d.

New York Marine Register: a Standard of Classification of American Vessels, and of such other Vessels as visit American Ports. oblong 8vo, pp. 335. New York, 1857. roan. £5 5s.

Nicollet.—Report intended to Illustrate a Map of the Hydrographical Basin of the Upper Mississippi River, made by J. N. Nicollet, while in employ under the Bureau of the Corps of Topographical Engineers. Map. 8vo. Washington, 1843.

Perry.—Sailing Directions, and Regulations, made under the Direction of

Commodore M. C. Perry, U.S.N.; printed for distribution with the American Nautical Almanac, by authority of the Hon. James C. Dobbin, 8vo, pp. 40. sewed.

Redfield.—Observations on the Hurricanes and Storms of the West Indies and the Coast of the United States; to which are added, Summary Statements of some of the Leading Facts in Meteorology, by W. C. Redfield. 8vo, pp. 24. New York, 1833. sewed. 1s.

Redfield.—On the Gales and Hurricanes of the Western Atlantic, by W. C. Redfield. With a Map. 8vo, pp. 12. New York, 1836. sewed. 1s.

Redfield.—On Whirlwind Storms: with Replies to the Objections and Strictures of Dr. Hare, by W. C. Redfield. With Engravings. 8vo, pp. 78. New York, 1842. cloth.

Redfield.—On Three several Hurricanes of the Atlantic, and their Relations to the Northers of Mexico and Central America; with Notices of other Storms, by W. C. Redfield. With 11 Charts. 8vo, pp. 118. New Haven, 1846. sewed. 6s.

Redfield.—Cape Verde and Hatteras Hurricane, of August and September, 1853, with a Hurricane Chart; and Notices of various Storms in the Atlantic and Pacific Oceans, north of the Equator, by W. C. Redfield. 8vo, pp. 32. New Haven, 1854. sewed.

Register of the Navy and Marine Corps of the United States, alphabetically arranged; containing the names of all Officers since the establishment of the Navy Department in 1798, and a revised edition of all the Laws in relation to the Navy and Marine Corps. By Authority. Washington, 1848.

Register of the Commissioned and Warrant Officers of the Navy of the United States, including Officers of the Marine Corps, and others, for the year 1855. 8vo, pp. 136. Washington, 1855. sewed. 5s.

Regulations for the Uniform and Dress of the Navy and Marine Corps of the United States; from the Original Text and Drawings in the Navy Department. 15 Coloured Plates. 4to. Philadelphia. cloth. £1 16s.

Ringgold.—A Series of Charts, with Sailing Directions; embracing Surveys of the Farallones, Entrance to the Bay of San Francisco, Bays of San Francisco and San Pablo, Straits of Casquines and Suisun Bay, Confluence and Deltic Branches of the Sacramento and San Joaquin Rivers, and the Sacramento River (with the middle fork) to the American River; including the Cities of Sacramento and Boston, State of California, by Cadwaladar Ringgold, Commander, U.S. Navy. 4th edition, with additions. With 6 Maps and 8 Plates. 4to, pp. 48. Washington, 1852. cloth. 10s. 6d.

Robinson.—A Treatise on Surveying and Navigation; uniting the Theoretical, the Practical, and the Educational Features of these Subjects, by Horatio N. Robinson, A.M. 8vo. Cincinnati, 1852. sheep. 8s.

Rogers.—The Shipwright's Own Book; being a Key to most of the different kinds of Lines made use of by Shipbuilders, by G. W. Rogers. Illustrated by 17 Copper-plate Engravings of Drafts and Models. 2 vols. 8vo. New York, 1849. 18s.

Rules and Regulations of the Medical Department of the Navy of the United States. 8vo. Washington.

Ruschenberger.—Hints on the Reorganization of the Navy; including an Examination of the Claims of its Civil Officers to an Equality of Rights, by W. S. W. Ruschenberger. 8vo. New York, 1845.

Ruschenberger.—A Brief History of an Existing Controversy on Assimilated Rank in the Navy of the United States, by W. S. W. Ruschenberger, M.D. 8vo. Philadelphia, 1850.

Sandy Hook.—Sailing Directions from Sea to Sandy Hook. Published separately from Maury's Sailing Directions. With Chart. 4to, pp. 8. Philadelphia, 1855. sewed. 1s. 6d.

Skinner.—Nautical Education: Letter to a Young Gentleman on his entrance into the Navy of the United States, by J. S. Skinner. 1841.

Slidell.—Popular Essays on Naval Subjects, by A. S. Slidell. 12mo. New York, 1833.

Stansbury.—Nautical Tables, by Daniel Stansbury. 4to. New York, 1822.

Stuart.—The Naval Dry Docks of the United States, by Charles B. Stuart, U.S.N. Engravings and Plans. imperial 4to. New York, 1851. cloth. £2 2s.

Stuart.—The Naval and Mail Steamers of the United States, by Charles B. Stuart, U.S.N. Illustrated by 30 Engravings on Steel, Copper, Stone, and Wood. imperial 4to. New York, 1853. half-morocco. £2 10s.

Sumner.—A New and Accurate Method of Finding a Ship's Position at Sea, by projection on Mercator's Chart, the principles of the Method being fully explained and illustrated by Problems, Examples, and Plates, with Rules for Practice, and Examples from Actual Observation, by Captain Thomas H. Sumner. 3rd edition, revised. 8vo. Boston. cloth. 7s. 6d.

Taylor.—The Broad Pennant; or, a History of the Naval War with Mexico, by F. W. Taylor. 12mo. New York. cloth. 7s.

Totten.—Naval Text-Book: Letters to the Midshipmen of the United States Navy on Masting, Rigging, and Managing Vessels of War; also a set of Stationing Tables, a Naval Gun Exercise, and a Marine Dictionary, by B. J. Totten. 8vo, pp. 446. Boston, 1851. £1

Town.—Details of some Particular Services performed in America, during 1776—1779, from the Journal kept on board the "Rainbow," commanded by Sir George Collier. Printed for Ithiel Town. 8vo. New York, 1835.

United States' Coast Survey, founded upon a Trigonometrical Survey, under the direction of Alexander D. Bache.

13.	Thermal Charts of the North Atlantic, 8 sheets	£1 4s.
14.	Do. South Atlantic, 4 sheets	12s.
15.	Storm and Rain Chart of North Atlantic, 1 sheet	2s. 6d.
16.	Do. do. South Atlantic, 1 sheet	2s. 6d.
17.	Track Chart Indian Ocean. Series A. Nos. 4 and 5, 2 sheets ..	6s.
18.	Chart showing the Favourite Resort of the Sperm and Right Whale, 1 sheet	5s.

Explanations and Sailing Directions to accompany the Wind and Current Charts, approved by Commodore Charles Morris, Chief of the Bureau of Ordnance and Hydrography, and published by authority of the Hon J. P. Kennedy, Secretary of the Navy, by M. F. Maury, LL.D., Lieut. U.S.N., Superintendent of the National Observatory.

This volume is presented to all Naval Captains who undertake to furnish Lieut. Maury with a copy of their Log Book of each voyage. It can be imported to special order, giving the name of the Captain desiring it, at an expense of from 5s. to 7s. 6d., for freight, &c.

"Berlin, February 3, 1855.

"My Dear and Illustrious Friend: It is now a great number of years since you have been so kind as to enrich with your generous contributions the most important institutions—the Admiralty, the Academy, the Schools of Navigation, and the Libraries—of my country. Your immense labours on currents and soundings, and the direction of winds at different seasons and in different latitudes, have exercised the most beneficent influence on the commerce of nations, by shortening, in a surprising manner, the passages by sea, and augmenting the security of navigation both in the Atlantic and the South Sea. The result has been the opening of new paths to navigators, who have been penetrated by the correctness of your views, and an increase of the facilities previously derived from the application of steam and the more frequent use of chronometers and of lunar distances.

"My Sovereign, the King of Prussia, sensible of the eminent merit of your laborious undertaking, and interested in the noble efforts now making by the Government of the United States for the advancement of the Sciences which are so closely allied with the development of the common prosperity, desires to give to M. the Lieut. Maury, Superintendent of the National Observatory at Washington, a mark of his gratitude, by presenting him, through the hands of our Minister, M. De Gerolt (my excellent friend), the medal designed as a reward for distinguished works of science. Sensible, also, of the affection with which you have honoured me for so long a period, the King has deemed that he would be doing you a further pleasure by adding another medal, that which his Majesty had struck upon the publication of Cosmos.

"I pray you to accept, my dear and illustrious friend, the renewed assurance of my high and most affectionate consideration.

"Your very humble and most devoted servant,
"THE BARON AL DE HUMBOLDT."

United States Nautical Magazine, Monthly, and Naval Journal, October, 1854, to March, 1857. 30 Nos., forming 5 volumes, with numerous Plates. And continued monthly. New York. per part, 2s. 6d.

Ward.—An Elementary Course of Instruction on Ordnance and Gunnery, prepared for the Use of the Midshipmen at the Naval School, Philadelphia; together with a Concise Treatise on Steam, adapted especially to the use of those engaged in Steam Navigation, by James H. Ward. 8vo. Philadelphia, 1851. boards. 16s.

Ward.—New Lunar Tables, for Correcting the Apparent Distance of the Moon from the Sun, fixed Star, or Planet, for the effects of Reflexion, Refraction, and Parallax. Illustrated by appropriate Rules and Examples,

with Plan, and easy Directions for taking a Lunar Observation, and some useful Remarks on the Sextant, by E C. Ward, Prof. Math. &c., U.S.N.S., Brooklyn, N.E. royal 8vo. New York, 1855. boards. 9s.

Wilcocks.—An Essay on the Tides: Theory of the Two Forces, by Alexander Wilcocks, M.D. square 12mo, pp. 72. Philadelphia. half-bound 3s. 6d.

Wilkes.—Theory of the Winds, by Captain Charles Wilkes, U.S.N. Read before the American Scientific Association at Providence, August 20, 1855. Accompanied by a Map of the World, showing the Extent and Direction of the Winds; to which is added, Sailing Directions for a Voyage Round the World, by the same Author. imperial 8vo, pp. 116. New York, 1856. cloth. 8s. 6d.

XX.

RURAL AND DOMESTIC ECONOMY.

AGRICULTURE, HORSES, HORTICULTURE, HOUSEHOLD SCIENCE, SPORTS, &c.

Abell.—The Skilful Housewife; or, Complete Guide to Domestic Cookery, Taste, Comfort, and Economy; embracing 659 Recipes pertaining to Household Duties, the care of Health, Gardening, Birds, Education of Children, &c. &c., by Mrs. L. G. Abell. 8vo. New York. 3s. 6d.

Allen.—A Practical Treatise on the Culture and Treatment of the Grape-Vine, by J. Fisk Allen. 3rd edition. 8vo. New York, 1853.

Allen.—The American Herd-Book; containing Pedigrees of Short-horn Cattle; to which is prefixed a Concise History of English and American Short-horns, compiled from the best Authorities, by Lewis F. Allen. Illustrations. 8vo, pp. xi. and 195. Buffalo, 1856. £1 4s.

Allen.—Domestic Animals. History and Description of the Horse, Mule, Cattle, Sheep, Swine, Poultry, and Farm Dogs, by R. L. Allen. 8vo. New York, 1848. 4s.

Allen.—Catalogue of Agricultural and Horticultural Implements, and of Field and Garden Seeds, Fruit and Ornamental Trees, Domestic Animals, &c., by R. L. Allen. 8vo. New York, 1854. cloth. 1s.

Allen.—The American Farm Book; or, Compend of American Agriculture; being a Practical Treatise on Soils, Manures, Draining, Irrigation, Grasses, Grain, Roots, Fruits, Cotton, Tobacco, Sugar Cane, Rice, and every Staple Product of the United States; with the best Methods of Planting, Cultivating, and Preparation for Market, by R. L. Allen. Illustrated by more than 100 Engravings. crown 8vo, pp. 374. New York, 1856. cloth. 6s.

American Angler's Guide (the); or, Complete Fisher's Manual, for the United States; containing the opinions and practices of the Experienced Anglers of both Hemispheres; with the various Modes adopted in Ocean, River, Lake, and Pond Fishing; the usual Tackle and Baits required; Instructions in the Art of making Artificial Flies; Methods of making Fish-ponds, Transportation of Fish, &c. &c. &c. 4th edition, revised, corrected, and greatly improved, with the addition of a 2nd part, containing over 100 pages of useful and instructive Information. Handsomely illustrated with 20 Engravings of the principal Angle Fish of America, and embellished with numerous Engravings, on Steel, Stone, and Wood, by the best Artists. post 8vo, pp. 344. New York, 1857. cloth. 10s. 6d.

American Matron (the); or, Practical and Scientific Cookery, by a Housekeeper. 12mo. Boston, 1851. cloth. 4s. 6d.

Armstrong.—A Treatise on Agriculture; comprising a Concise History of its Origin and Progress; the present Condition of the Art, abroad and at Home; and the Theory and Practice of Husbandry, by John Armstrong. With Notes, by Jesse Buel; to which is added a Dissertation on the Kitchen and Fruit Garden. 18mo. New York. 3s.

Barry.—The Fruit Garden. A Treatise intended to explain and illustrate the Physiology of Fruit Trees, the Theory and Practice of all Operations connected with the Propagation, Transplanting, Pruning, and Training of Orchard and Garden Trees, as Standards, Dwarfs, Pyramids, Espalier, &c.; the Laying-out and Arranging different kinds of Orchards and Gardens; the Selection of suitable Varieties for different purposes and localities; Gathering and Preserving Fruits, Treatment of Diseases, Destruction of Insects, Description and Uses of Implements, &c., by P. Barry, of the Mount Hope Nurseries, Rochester, N. Y. Illustrated with upwards of 150 Figures, representing different parts of Trees, all Practical Operations, Forms of Trees, Designs for Plantations, Implements, &c. New York. 7s. 6d.

Baucher.—A Method of Horsemanship, founded upon new Principles: including the Breaking and Training of Horses; with Instructions for obtaining a good Seat, by F. Baucher. 3rd American edition, revised and corrected from 9th Paris edition. Illustrated with Engravings. crown 8vo, pp. 254. Philadelphia, 1856. cloth. 7s. 6d.

Bement.—Rabbit-Fancier. A Treatise on the Breeding, Rearing, Feeding, and General Management of Rabbits; together with Recipes for Cooking and Dressing for the Table, by C. N. Bement. 12mo, pp. 102. New York, 1855. cloth. 3s.

Bement.—The American Poulterer's Companion: a Practical Treatise on Breeding, Rearing, and General Management of various species of Domestic Poultry; illustrated with Portraits of Fowls, mostly taken from Life, Poultry-Houses, Coops, Nests, Feeding-Hoppers, &c. A new edition, enlarged and improved, by C. N. Bement. With 120 Illustrations on Wood and Stone. square 12mo, pp. 304. New York, 1857. 8s. 6d.

Bennett.—The Poultry Book. A Treatise on Breeding and General Management of Domestic Fowls; with numerous Original Descriptions, and Portraits from Life, by John C. Bennett, M.D. 12mo. Boston, 1850. 6s.

Blake.—The Farmers' Every-day Book; or, Sketches of Social Life in the Country; with the popular Elements on Practical and Theoretical Agriculture, and 1200 Laconics and Apophthegms relating to Ethics, Religion, and General Literature; also, 500 Receipts on Hygeian, Domestic, and Rural Economy, by the Rev. John L. Blake, D.D. 8vo. New York, 1852. 12s.

Blake.—The Modern Farmer; or, Home in the Country: designed for Instruction and Amusement on Rainy Days and Winter Evenings, by the Rev. John L. Blake, D.D. With Plates. 12mo, pp. 456. Auburn, 1853. cloth. 6s.

Breck.—The Flower Garden; or, Breck's Book of Flowers; in which are described all the various Hardy Herbaceous, Perennials, Annuals, Shrubby Plants, &c. &c.; with Directions for their Cultivation, by Joseph Breck. 12mo. Boston, 1851. cloth. 5s.

Bridgman.—The Young Gardener's Assistant, in three Parts; containing Catalogues of Garden and Flower Seed; with Practical Directions under each head for the Cultivation of Culinary Vegetables and Flowers; also Directions for Cultivating Fruit Trees, the Grape Vine, &c.; to which is added, a Calendar to each part, showing the work necessary to be done in the various departments each month of the year, by Thomas Bridgman. 8vo. New York. cloth. 7s. 6d.

Brincklé.—Remarks on Entomology, chiefly in reference to an Agricultural Benefit, by W. D. Brincklé, M.D. 8vo. Philadelphia, 1852.

Browne.—The American Bird-Fancier, considered with reference to the

Breeding, Rearing, Feeding, Management, and Peculiarities of Cage and House Birds, by D. Jay Browne. Illustrated with Engravings. New York, 1857.

Browne.—An Essay on Indian Corn, by Peter A. Browne, LL.D. 8vo. Philadelphia, 1837.

Browne.—The American Poultry-yard, by D. J. Browne. With an Appendix, by Samuel Allen. 8vo. New York, 1850.

Browne.—American Muck Manual: treating on the Nature, Properties, &c., of Soil, as combined with the leading Principles of Practical and Scientific Agriculture, by D. J. Browne. 12mo. New York, 1852. half-bound. 6s.

Buchanan.—The Culture of Grape and Wine-Making, by Robert Buchanan. With an Appendix, containing Directions for the Cultivation of the Strawberry, by N. Longworth. 12mo, pp 144. Cincinnati, 1852. cloth. 6s.

Buel.—The Farmer's Companion; or, Essays on the Principles and Practice of American Husbandry; with an Appendix, containing Tables and other Matter useful to the Farmer, by the late Judge Buel. To which is prefixed an Eulogy on the Life and Character of Buel, by Amos Dean. 12mo. New York. cloth. 4s. 6d.

Buel.—The Farmer's Instructor: consisting of Essays, Practical Directions, and Hints for the Management of tne Farm and the Garden, by the late Judge Buel. 2 vols. 18mo. New York. 6s.

Buist.—The Rose Manual: containing accurate Descriptions of all the finest Varieties of Roses, by Robert Buist. 8vo. Philadelphia. 1844.

Buist.—Family Kitchen Gardener: containing Plain and Accurate Descriptions of all the different Species and Varieties of Culinary Vegetables, by Robert Buist. Illustrated with 25 Engravings. 12mo. New York, 1852. half-bound. 4s.

Buist. — The American Flower-Garden Directory: containing Practical Directions for the Culture of Plants in the Flower-garden, Hot-house, Greenhouse, Rooms, or Parlour Windows, for every Month in the Year; with a Description of the Plants most desirable in each, the Nature of the Soil and Situation best adapted to their Growth, the proper Season for Transplanting, &c.; with Instructions for Erecting a Hot-house, Green-house, and Laying out a Flower-Garden; the whole adapted to either Large or Small Gardens; with Instructions for Preparing the Soil, Propagating, Planting, Pruning, Training, and Fruiting the Grape-Vine by R. Buist. New York. 7s. 6d.

Busby.—Grapes and Wine: a Visit to the principal Vineyards of Spain and France; giving an account of the different methods in the Cultivation of the Vine, and Manufacture of Wine, by James Busby. 8vo. New York, 1848.

Butler.—Dogo graphy: the Life and Adventures of the celebrated Dog "Tiger;" comprising a variety of amusing and instructive Examples, illustrative of the happy effects of the appropriate Training and Education of Dogs, by Francis Butler. 8vo, pp. 111. New York, 1856. 1s. 6d.

Butler.—Breeding, Training, Management, Diseases, &c., of Dogs; together with an easy and agreeable Method of Instructing all Breeds of Dogs in a great variety of Amusing and Useful Performances, by Francis Butler. 16mo, pp. 216. New York, 1857. 6s.

Carey.—Philosophy of Common Sense: Practical Rules for the Promotion of Domestic Happiness, by M. Carey. 8vo. Philadelphia, 1838.

Chaptal.—Chemistry applied to Agriculture, by John A. Chaptal. Translated from the French, by the Rev. William P. Page. 18mo. New York. 3s.

Chazotte.—Facts and Observations on the Culture of Vines, Olives, Capers, Almonds, &c., in the Southern States; and of Coffee, Cocoa, and Cochineal, in East Florida, by Peter S. Chazotte. 8vo. Philadelphia, 1821.

Chorlton.—The American Grape-Grower's Guide; intended especially for the American Climate: being a Practical Treatise on the Cultivation of the Grape-Vine in each department of Hot-house, Cold Grapery, Retarding House, and Out-door Culture; with Plans for the Construction of the re-

quisite Buildings, and giving the best Methods of Heating the same,—every department being fully Illustrated, by William Chorlton. crown 8vo, pp. 171. New York, 1856. cloth. 4s. 6d.

Christis.—Chemistry of Agriculture; or, the Earth and Atmosphere as related to Vegetable and Animal Life; with new and extensive Analytical Tables, by David Christis. 8vo. cloth. 4s. 6d.

Clarke.—A Treatise on the Mulberry Tree and Silk-worm, by John Clarke. 8vo. Philadelphia, 1839.

Cock.—The American Poultry Book: being a Practical Treatise on the Management of Domestic Poultry, by Micajah R. Cock. 18mo. New York. cloth. 3s.

Cole.—The American Fruit-Book: containing Directions for Raising, Propagating, and Managing Fruit Trees, Shrubs, and Plants; with a Description of the best Varieties of Fruit, including New and Valuable Kinds, by S. W. Cole. New York. 7s. 6d.

Colman.—European Agriculture and Rural Economy, from Personal Observation, by H. Colman. 2 vols. 8vo. Boston, 1849. £1 10s.

Country Gentleman.—A Journal for the Farm, the Garden, and the Fireside. A weekly Paper of 16 pp. 4to. Albany, N. Y. Annual subscription, £1 6s.

Crowen.—Lady's System of the American Cookery; comprising every variety of Information for Ordinary and Holiday Occasions, by Mrs. T. T. Crowen. 8vo. Auburn, 1854. cloth. 6s.

Dana.—Essay on Manures, by S. L. Dana. 12mo. New York, 1850. 1s. 6d.

Dana.—A Muck-Manual for Farmers, by S. L. Dana. 3rd edition. 12mo. Lowell, Mass., 1851. cloth. 6s. 6d.

Darlington.—Agricultural Botany, by William Darlington. 12mo. Philadelphia, 1847. cloth. 6s.

Darlington.—Agricultural Chemistry, by William Darlington. 12mo. Philadelphia, 1847. cloth. 6s.

De Homergue and Duponceau.—Essay on American Silk, by J. De Homergue and P. S. Duponceau. 12mo. Philadelphia, 1830. 4s. 6d.

De Homergue.—The Silk-Culturist's Manual, by J. De Homergue. 12mo. Philadelphia, 1839.

Dog and Gun (the).—A Few Loose Chapters on Shooting, among which will be found some Anecdotes and Incidents; also, Instructions for Dog-Breaking, and Interesting Letters from Sportsmen, by a Bad Shot. New York, 1857. 3s.

Downing, Barry, and Smith.—The Horticulturist, and Journal of Rural Art and Rural Taste. Edited by A. J. Downing, afterwards by P. Barry, and now by J. Jay Smith. 7 vols. Albany, Rochester, and Philadelphia, to 1847, &c.

Downing.—A Treatise on the Theory and Practice of Landscape Gardening, adapted to North America; with a view to the Improvement of Country Residences; with Remarks on Rural Architecture, by A. T. Downing. 2nd edition. 8vo, pp. xiv. and 9—498. New York, 1844. cloth. 18s.

Downing.—Rural Essays, by A. T. Downing. Edited, with a Memoir of the Author, by George William Curtis; and a Letter to his Friends, by Frederika Bremer. 8vo. New York, 1854. cloth. 15s.

Downing.—The Fruit and Fruit Trees of America; or, the Culture, Propagation, and Management, in the Garden and Orchard, of Fruit Trees generally; with Descriptions of all the Finest Varieties of Fruit, Native and Foreign, cultivated in this Country, by A. J. Downing, Corresponding Member of the Royal Botanic Society of London, and of the Horticultural Societies of Berlin, the Low Countries, Massachusetts, Pennsylvania, Indiana, Cincinnati, &c. Revised and corrected by Charles Downing. post 8vo, pp. 780. New York, 1857. cloth. 9s.

Eastwood.—A Complete Manual for the Cultivation of the Cranberry; with

a Description of the Best Varieties, by B. Eastwood, crown 8vo, pp. 121. New York, 1857. cloth. 4s. 6d.

Elliott.—Western Fruit-Book: the American Fruit-Grower's Guide in Orchard and Garden; being a Compendium of the History, Modes of Propagation, Culture, &c., of Fruit Trees and Shrubs; with Descriptions of nearly all the Varieties of Fruit cultivated in this Country, Notes of their Adaptation to Localities and Soils, and also a complete List of Fruits worthy of Cultivation, by F. R. Elliott. crown 8vo, pp. 503. New York, 1857. cloth. 7s. 6d.

Elliott.—Carolina Sports, by Land and Water; including Incidents of Devil-Fishing, by the Hon. William Elliott. 8vo. Charleston, 1846.

Emerson.—Farmer's and Planter's Cyclopedia, and Dictionary of Rural Affairs, by Emerson. royal 8vo. Philadelphia. £1 10s.

Emmons.—Agriculture of New York: comprising an Account of the Classification, Composition, and Distribution of the Soils and Rocks, and the Natural Waters of the different Geological Formations; together with a condensed View of the Climate, and the Agricultural Productions of the State, by E. Emmons, M.D. 5 vols 4to. New York, 1846—1854. £12 12s.

VOL. I.—Contains a General Account of the Soils of the State, their Composition and Distribution, and their Relations to the Underlying Formations. With 15 plain and 7 coloured Plates, and an Agricultural Map of the State of New York.

VOL. II.—Is devoted mainly to the Composition of the Inorganic Parts of Vegetables. With 26 plain and 14 coloured Plates.

VOL. III.—Is devoted partly to the Description and Illustration of the Fruits of the State, and partly to the Principles of Practical Agriculture.

VOL. IV.—Contains 99 coloured Plates of the Fruits of the State of New York.

VOL. V.—Forms the Entomological Portion of the work, and contains 45 coloured and 3 plain Plates of the Insects of New York.

Farmer's Barn Book. 12mo. Philadelphia. cloth. 7s. 6d.

Fessenden.—Complete Farmer, and Rural Economist; containing a compendious Epitome of the most important Branches of Agriculture and Rural Economy, by Thomas G. Fessenden. 10th edition. 12mo. New York, 1851. half-bound. 6s.

Field.—The Pear Garden; or, a Treatise on the Propagation and Cultivation of the Pear Tree, with Instructions for its Management from the Seedling to the Bearing Tree, by Thomas W. Field. New York. 3s. 6d.

Flanders.—Manual on Bees; or, an Easy Method of Managing Bees in the most Profitable Manner to their Owner; with an Appendix, by W. A. Flanders. 12mo, pp. 120. New York, 1855. 3s. 6d.

Flint.—The Agriculture of Massachusetts, as shown in the Returns of the Agricultural Societies, 1853, by Charles Flint. 8vo. Boston, 1854.

Flint.—Agricultural Society of Massachusetts Abstract of Returns, 1855. Edited by Charles L. Flint, Secretary of the Board of Agriculture. To which is prefixed the third Annual Report of the Board. With an Appendix. 8vo. Boston, 1856. cloth. 12s.

Flint.—A Practical Treatise on Grasses and Forage Plants: comprising their Natural History, comparative Nutritive Value, Methods of Cultivating, Cutting, and Curing, and the Management of Grass Lands, by Charles L. Flint, A.M. With Illustrations. 8vo, pp. 236. New York, 1857. cloth. 7s. 6d.

Florist (the Complete).—A Manual of Gardening; with Additions, adapted to the Climate of the United States. 8vo. Philadelphia, 1844.

Fry.—A Complete Treatise on Artificial Fish-Breeding, including the Reports on the subject made to the French Academy and the French Government; and Particulars of the Discovery as pursued in England. Sealsfield (Siegelfeld).—Life in the New World; or, Sketches of American Society, by Charles Sealsfield (Siegelfeld). Translated from the German, by Gustavus Hebbe, LL.D., and James Mackay, M.A. 8vo, pp. 349. New York, 1844.

This closely printed two-column volume was published in seven numbers. It consists of a series of Tales under the following titles: 1. The Courtship of George Howard, Esq. 2. The Courtship of Ralph Doughby, Esq. 3. The Life of a Planter. 4. Scenes in the South-West. 5. The Squatter Chief; or, the First American in Texas.

The nationality of the Author of the above Works does not seem to be sufficiently established as yet. In the German edition of his Works he signs himself "Charles Sealsfield," and the Preface would almost leave the impression of his being an American; but it does not seem to admit any longer of a doubt that he is a native of Germany, who expatriated in early life to America. Of the above Works, only "Tokeah," or the "White Rose," was published first in the English Language; all his other works have first been published in German. The distinguishing features of Sealsfield's Works are thorough knowledge of human nature, skilful delineation of character, dramatic dialogue, and a rare talent for description. Their hero is not a single person, or a group of individuals, but the whole people, in its social, public, and private life; its material, political, and religious circumstances, its past and its future. It is surprising that the Works of so powerful a writer should hitherto have completely escaped the attention of the English reading public.

Sears.—Pictures of the Olden Time, as shown in the Fortunes of a Family of Pilgrims, by Edmund H. Sears. 12mo, pp. viii. and 342. Boston, 1857. cloth. 6s. 6d.

Picture. Bargaining for a Horse, by Wm. S. Mount. American Landscape Scenery, by J. F. Cropsey. Old '76 and Young '48, by R. C. Woodville. Mount Washington, by John F. Kensett.

The American Art Union was established in 1847. In 1852 its operation was suspended by the Declaration of the Courts of the State of New York, that it was unconstitutional to distribute by lot. It is to be regretted that there is no prospect of seeing the American Art Union revived under its former plan. Although its corporate powers still exist, and it can do all it could before, except distributing Works of Art by lot, its great usefulness is no doubt destroyed by the deprivation of that feature.

Biography of Artists of America. 8vo. New York. cloth. 9s.

Carey.—National and Commercial Utility and Profit of the Arts of Design, by Wm. Carey. Philadelphia, 1838.

from January, 1820, to October, 1857, and continued quarterly. 2 parts forming a volume. Price, each part, 6s.

The North American Review, the oldest and most prosperous of the American Reviews, was established in 1815, and writing its history is almost writing the history of the Literature of the United States. Its Founder was William Tudor, who, after the lapse of two years, relinquished his proprietaryship to Wilhert Philips, or rather to the Anthologia Club, which had been reconstituted under the name of the North American Club, and the most active members of which were Sparks, Channing, and Richard H. Dana. In 1820, the chief Editorship devolved upon Mr. Edward Everett, who, in the course of about four years, alone contributed nearly fifty Articles. In 1823, when Mr. Everett was elected a Member of Congress for Massachusetts, he resigned the editorship to Jared Sparks, but still continued for nearly ten years one of the most active contributors, the articles contributed by him during this period amounting to about sixty. Mr Jared Sparks was, in 1829, followed in the editorship of the Review by Alexander Everett, the elder brother of Edward Everett. Alexander Everett continued chief editor until 1835, when Dr. Palfrey undertook the management, which he continued until 1842, when it passed into the hands of Mr. Francis Bowen, the present editor. Besides Jared Sparks and the two Everetts, almost all the prominent writers of the United States have contributed to the North American Review. Among them Joseph Story, Henry Wheaton, Daniel Webster, the Historians Prescott and Bancroft. Cullen Bryant's first Poem, Thanatopsis, appeared in its columns. Its Literary Criticisms emanated chiefly from the pens of Richard H. Dana, Longfellow, Dr. Cheeve, and Whipple. Eminent service was in its columns rendered to philosophical studies by the pens of James Marsh, Orestes Brownson, Dr. Walker, Theodore Parker, W. R. Greene, and Francis Bowen.
(See Histoire de la Presse, en Angleterre et aux Etats-Unis, par Cucheval Clarigny.)

Reid.—Ventilation in American Dwellings; with a Series of Diagrams, presenting Examples in Different Classes of Habitations, by David Boswell Reid, M.D.; to which is added an Introductory Outline of the Progress of Improvement in Ventilation, by Elisha Harris, M.D. Illustrated. 8vo, pp. 124. New York, 1858. cloth. 12s.

Reports of the First, Second, and Third Meetings of the Association of American Geologists and Naturalists, at Philadelphia, in 1840 and 1841, and at Boston in 1842. Embracing its Proceedings and Transactions. Plates. 8vo, pp. 544 and 21. Boston, 1843.

Reports of Explorations and Surveys, to ascertain the most practicable and economical Route for a Railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War, in 1853-4, according to Acts of Congress of March 3, 1853, May 31, 1854, and August 5, 1854. Vol. III. 4to. Washington, 1856. cloth £2 2s.

CONTENTS.

Extracts from the (Preliminary) Report of Lieut. A. W. Whipple, Corps of Topographical Engineers, upon the Route near the 35th Parallel: with an Explanatory Note, by Captain A. A. Humphreys, Corps of Topographical Engineers, pp. 34. Parts I. to IV. contain the Report of Lieut. A. W. Whipple, Corps of Topographical Engineers, upon the Route near the 35th Parallel.

GENERAL TABLE OF CONTENTS.

Part I. Itinerary, pp. 144, and 10 coloured Plates. Part II. Report on the Topographical Features and Character of the Country, pp. 78, and 10 Plates. Part III. Report upon the Indian Tribes, pp. 127, and 8 coloured Plates. This part contains the following Vocabularies of North American Aboriginal Languages, collected by A. W. Whipple; classified, with accompanying remarks, by William W. Turner:—1. Delaware. 2. Shawnee. 3. Choctaw. 4. Kichai. 5. Huéco. 6. Caddo. 7. Comanche. 8. Chemehuevi. 9. Cahuillo. 10. Kioway. 11. Navajo. 12. Pinal Leno. 13. Kiwomi. 14. Cochitemo. 15. Acoma. 16. Zuni. 17. Pima. 18. Cuchan. 19. Coco-Maricopa. 20. Mojave. 21. Diegeno. Part IV. Report of the Geology of the Route, pp. 164, with 3 Geological Maps.

Vol. IV. 4to, pp. 288. Washington, 1856. cloth. £2 2s.

CONTENTS.

Part V. The Botany of the Expedition, pp. 184, with 58 Plates and Chart of Explanation of Signs. Part VI. Report of the Geology of the Expedition, pp. 18. Also Appendices, A to N, pp. 288.

Vol. V. 4to. Washington, 1857. cloth. £2 2s.

CONTENTS.

Report of Lieut. R. S. Williamson, Corps of Topographical Engineers, upon the Routes in California to connect with the Routes near the 35th and 32nd Parallels.

GENERAL TABLE OF CONTENTS.

Introduction. Part I. Report, pp. 43, 12 coloured Plates, and other engravings. Part II. Geological Report, by W. P. Blake, Esq., Geologist and Mineralogist to the Expedition, pp. 370, 29 coloured and other Plates, and numerous engravings. Part III. Botanical Report, by Mr. G. Durand and T. C. Hilgard, M.D., pp. 16,

and 18 Plates. Appendices. Appendix A, Distances and Altitudes. Appendix B, Latitudes and Longitudes. Appendix C, Data for Profiles.

Vol. VI. 4to. Washington, 1857. cloth. £2 2s.

CONTENTS.

Report by Lieut. Henry E. Abbott, Corps of Topographical Engineers, upon the Routes in Oregon and California, Explored by Parties under the command of Lieut. R. S. Williamson, Corps of Topographical Engineers, in 1855.

GENERAL TABLE OF CONTENTS.

Introduction. Part I. General Report, pp. 134, 13 coloured Plates, and other engravings. Part II. Geological Report, pp. 84, 5 Plates, and numerous engravings. Part III. pp. 101, 16 Plates, and other engravings. Part IV. pp. 114, 18 coloured and other Plates, and numerous engravings. Appendices. Appendix A. Astronomical Observations with Sextant. Appendix B. Comparison of Chronometers. Appendix C. List of Camps, with Distances, Altitudes, Latitudes, and Longitudes, when Astronomically determined, &c. Appendix D. Barometrical and Thermometrical Observations, with Data for Constructing Profiles of the Travelled Routes. Appendix E. Observations for determining the Horary Oscillation of the Barometric Column. Appendix F. Data for Constructing Profiles of the Routes proposed for a Railroad.

Vol. VII. Report of Explorations for Railroad Routes from San Francisco Bay to Los Angeles, California, West of the Coast Range, and from the Pimas Villages on the Gila to the Rio Grande, near the 32nd Parallel of North Latitude, by Lieut. John G. Parke, Corps of Topographical Engineers, assisted by Albert H. Campbell, Civil Engineer. 4to. Washington, 1857. cloth. £2 2s.

CONTENTS.

Introduction, Instruction from the War Department. Part I. General Report. No. 1. Report of Explorations from San Francisco Bay to Los Angeles. No. 2. Report of Explorations from Pimas Villages to the Rio Grande, pp. 42, 8 Plates. Part II. Geological Report, by Thomas Antisell, M.D., Geologist of the Expedition, pp. 202, 2 Maps, 24 Plates. Part III. Botanical Report, by John Torrey, M.D., pp. 28, 6 Plates. Appendices. Appendix A. Remarks on Meteorology and Barometric Results, with Meteorologic Plates, by Albert H. Campbell, A.M., Civil Engineer to the Expedition. Appendix B. Report of Charles H. Poole, upon the Route from San Diego to Fort Yuma, via San Diego River, Warner's Pass, and San Felipe Canon. Appendix C. Translation of an Archive from Tucson. Appendix D. Description of Maps and Profiles, with Tables of Longitude. Appendix E. Table of Distances, and Barometric, and Meteorogical Observations and Results, prepared by Albert H. Campbell.

For volumes I. and II., see page 19.

Riggs.—Manual of the Chaldee Language: containing a Chaldee Grammar, chiefly from the German of Prof. J. B. Winer. A Chrestomathy, consisting of Selections from the Targums, and including notes on the Biblical Chaldee; and a Vocabulary adapted to the Chrestomathy, with an Appendix on the Rabbinic and Samaritan Dialects, by Elias Riggs, D.D. 2nd edition, revised. 8vo, pp. 152. New York, 1858. cloth. 7s. 6d.

Ritter.—A Medical Manual, and Medicine Chest Companion, for Popular Use in Families and on Ship-Board, for the Treatment of the Ordinary Diseases of the Human System, by Thomas Ritter, M.D. 6th edition, revised and corrected. 18mo, pp. 142. New York, 1854. cloth. 3s.
